### Fisher Investments Institutional Frontier Markets Equity Fund (the "Fund") a sub-fund of Fisher Investments Institutional Funds plc US Dollar Class Shares (IE00BRK98013)

The Fund is managed by Carne Global Fund Managers (Ireland) Limited (the "Manager"), with Fisher Investments acting as the Fund's investment manager (the "Investment Manager")

#### OBJECTIVE AND INVESTMENT POLICY

##### Investment Objective

The investment objective of this actively managed Fund is to outperform the MSCI Frontier Markets Index (the "Benchmark"). There is no guarantee the investment objective will be achieved. The Fund is actively managed by the Investment Manager, meaning that investment decisions are made on a fully discretionary basis. Accordingly, the portfolio holdings may deviate from the Benchmark. This deviation may be significant.

##### Investment Policy

The Fund invests:

- Primarily in equities and equity-related securities of issuers that are included in the country indices represented within the Benchmark.
- Up to 30% of its total assets in equities and equity-related securities of companies established in countries not represented within the Benchmark.
- Up to 10% of its total assets in unlisted equities.

While the Fund will invest primarily in equities and equity-related securities in frontier markets, as referred to above, the Fund may, in circumstances of extreme volatility or if market factors require and if considered appropriate to the investment objective, invest on a short term basis in listed equities and equity-related securities of issuers located in non-frontier market countries worldwide, cash, cash equivalents, money market instruments or government or corporate bonds. Investments in other funds will not be more than 10% of the Fund's total assets.

The Fund may use investment techniques (known as derivatives), but only to reduce or protect against risk, reduce costs, and generate income or capital with appropriate risk. Furthermore, the Fund may use these techniques if controlled by the Fund's risk management process.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 3 to 5 years.

For full investment objectives and policy details, please refer to the Prospectus and Supplement.

##### Income

Income from the Fund's investments will not be paid out in dividends.

You may sell your shares on any bank business day in Dublin, Ireland.

#### RISK AND REWARD PROFILE

The risk category shows how much the Fund has risen and fallen in the past 5 years, and therefore how much the Fund's returns have varied. It is calculated using historical data and may not be a reliable indicator of the Fund's future risk profile. To the extent this share class has no or limited historical data, Benchmark performance data is used to supplement such historical data. The risk category is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean risk-free.

The Fund is ranked 6 due to its exposure to frontier market equity markets, which means the Fund may experience significant volatility.

**Currency Risk:** The base currency of the Fund is US Dollars. The non-US Dollar share classes of the Fund may be affected unfavourably by fluctuations in currency rates.

**Liquidity Risk:** Some of the Fund's investments may be difficult to buy or sell. This might affect the price at which the investments can be sold, which would affect the Fund's value.

**Counterparty Risk:** There is a risk that counterparties to some of the Fund's investments may not perform their obligations and that transactions may not settle.

**Frontier Markets Risk:** The Fund invests in the frontier markets equities market, which carries a higher than average investment risk and the Fund may have problems or delays in getting its investments back when required.

For a more detailed explanation of these and other risks, please refer to the Prospectus and Supplement.
