Performance, Portfolio Breakdowns and Net Asset information as at: 31-Oct-2023. All other data as at: 07-Nov-2023.
This document is marketing material. For the Investors in LatAm. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to achieve a positive absolute return through a combination of capital growth and income on your investment.
- Under normal market conditions, the Fund will seek to gain at least 70% of its investment exposure through global equity securities (e.g. shares) and equity related securities. The Fund may also invest in fixed income (FI) securities (such as bonds), FI related securities, funds, money market instruments (MMIs) (i.e. debt securities with short-term maturities), deposits and cash.
- The Fund will employ a fundamentals-based investment process focussed on identifying investments that are undergoing a sufficiently defined catalyst event (e.g. announced mergers and acquisitions).

RISK INDICATOR

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Due to its investment strategy an 'Absolute Return' fund may not move in line with market trends or fully benefit from a positive market environment.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

KEY FACTS

Comparator 1 : ICE BofA US 3-Month Treasury Bill Index
Asset Class : Equity
Fund Launch Date : 04-Aug-2015
Share Class Launch Date : 26-Aug-2015
