Fund Overview

Fund Aspects:

The Fund employs a systematic investment approach to create a global long-only equity portfolio of companies that satisfy sustainable environmental, social, and governance ("Sustainable ESG") criteria and seeks to provide diversified exposure to three investment styles:

Value: The tendency for relatively cheap assets to outperform relatively expensive ones.

Momentum: The tendency for an asset's recent relative performance to continue in the near future.

Defensive: The tendency for lower risk and higher-quality assets to generate higher risk-adjusted returns.

The Fund is actively managed, which means that the investments are selected at the discretion of the investment manager. The Fund is managed in reference to the Benchmark. The Fund's portfolio will be managed by investing more or less in securities, industries, and sectors relative to the Benchmark. The investment manager will impose operational limits on the extent that the Fund may deviate from the Benchmark but may not observe these limits in certain circumstances, for example, where movements in the market so require or in the case of corporate actions (e.g. stock splits, mergers). Over extended periods the Fund's performance may be correlated with that of the Benchmark.

Fund Objective:

The Fund seeks to generate higher risk-adjusted returns than its beta-adjusted benchmark (MSCI World Total Return Index with net dividends) in a full market cycle by 1.25% (annual excess returns gross of fees), while having a long-term average tracking error of 2.5%. The Fund seeks to mitigate downside risk by investing in companies that satisfy the Investment Manager's sustainable environmental, social, and governance ("Sustainable ESG") criteria. Further information about the sustainability-related aspects of the Fund is available at <https://ucits.aqr.com/Sustainability-Related-Disclosures>.

Umbrella Fund:

The Fund is a sub-fund of AQR UCITS Funds II, a Luxembourg based UCITS of which the management company is FundRock Management Company S.A.

The AQR Style Premia: Global Equity UCITS Fund merged with the AQR Style Premia: Sustainable Global Equity UCITS Fund on 25 September 2020 and was renamed to AQR Sustainable Style Premia Global Equity UCITS Fund. Prior to that date the past performance shown was achieved under a different objective and investment policy which no longer applies.

Risk Management:

Risk control is built into the Fund's portfolio construction process with a focus on diversification and managing tracking error relative to the benchmark.

AQR's Risk Management Team and the Fund's portfolio managers actively assess risk of the Fund.

Risk and Reward Profile:

Calculated using historical data which may not be a reliable indicator of the Fund's future risk profile. See Key Investor Information Document (KIID) for details.

Share Class Performance (Net) as of 30 Apr. 2023⁴

	Share Class	Benchmark
1 Month	0.0%	0.1%
3 Months	-1.9%	0.7%
YTD	1.6%	6.0%
1 Year	-4.7%	-1.4%
3 Year	10.8%	12.8%
Since Inception	9.0%	11.0%

Past performance results in complete 12-month periods (1 May – 30 April)

¹ Holdings subject to change without notice.

² Fees follow a step-down structure. Fees are charged on an investor's net aggregate subscription (subscriptions minus redemptions) vs. a blended weighted average approach.

³ Local Lux Tax per annum of Fund's NAV, payable quarterly.

Average P/B ratios of the stocks in the portfolios exclude individual stock book-to-price ratios that are negative and the top and bottom 1 percentile of the remaining. Data sources:

Principal Risks

Sustainable investing is qualitative and subjective by nature, and there is no guarantee that the environmental, social and governance ("ESG") criteria utilized, judgment exercised, or techniques employed, by AQR will be successful, or that they will reflect the beliefs or values of any one particular investor. Certain information used to evaluate ESG factors or a company's commitment to, or implementation of, responsible practices is obtained through voluntary or third-party reporting, which may not be accurate or complete. ESG investing can limit the investment opportunities available to a portfolio, such as the exclusion of certain securities or issuers for nonfinancial reasons and, therefore, the portfolio may perform differently than or underperform other similar portfolios that do not apply ESG factors.

The Fund may use derivatives in an attempt to reduce risk (hedging) or for investment purposes. It may be that the use of derivatives may not always be successful and cause unit prices to fluctuate which may in turn result in loss to the Fund.

The Fund is exposed to the currency markets which may be highly volatile. Large price swings can occur in such markets within very short periods and may result in your investment suffering a loss.

The Fund may enter into various financial contracts (known as derivatives) with another party. There is a risk that this party may fail to make its payments or become insolvent which may result in the Fund and your investment suffering a loss to the Fund.

The Fund is exposed to concentration risk as it may have increased exposure to a particular asset, reference rate or index. A fall in value of the asset, reference rate or index can result in a greater loss to the Fund which may be more than the amount borrowed or invested.

The Fund may invest in less economically developed (known as emerging) markets which can involve greater risks than well developed economies. Amongst other issues, the level of government supervision and market regulation may be less than in more developed economies and could affect the value of your investment. Investment in emerging markets also increases the risk of settlement default.

Your investment in the Fund is not guaranteed and is at risk. You may lose some or all of your investment.

The Fund relies upon the performance of the investment manager of the Fund. If the investment manager performs poorly the value of your investment is likely to be adversely affected.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Investment Approach

The AQR Sustainable Style Premia Global Equity Strategy seeks to provide balanced risk allocation across three well-known and researched investment styles – value, momentum and defensive – using a systematic investment process. Importantly, the strategy does so by investing in companies that satisfy sustainable environmental, social, and governance ("Sustainable ESG") criteria. Academic research has shown these three economically intuitive styles to be persistent and pervasive, with positive expected returns and generally low correlations to each other. The combination aims to identify stocks that are cheap, high quality and low volatility, and with a catalyst for improvement.

Governance-related considerations are important to the model, and the strategy further offers a higher ESG score than the benchmark as well as an exclusion of the worst ESG-offending names.

The underlying styles of the AQR Sustainable Style Premia: Global Equity are as follows:

Value: This style exploits the tendency for relatively cheap securities to outperform relatively expensive ones. It is based on various measures of fundamentals to price.

Momentum: This style exploits the tendency for a security's recent relative performance to continue in the near future. Various measures of recent relative performance are used, including both price-based and fundamental momentum measures.

Defensive: This style exploits the tendency for lower-risk and higher-quality securities to generate higher risk-adjusted returns. It is based on various measures of riskiness and quality.

Distinguishing features of our strategy include:

Substantial experience managing quantitative strategies: AQR personnel have extensive experience managing a variety of quantitative investment processes.

Systematically incorporate favorable ESG characteristics relative to the benchmark.

Unique framework for combining investment signals: Our framework accounts for differences in inherent volatility (across factors), missing or not meaningful data, and asymmetric effectiveness of factors.

Low direct trading costs: We believe that we possess a distinct implementation advantage through our proprietary electronic trading algorithms.

Optimization technology: Implied expected returns used to limit the shortcomings of traditional optimization, and the incorporation of shorter-term trading signals allows us to build robust portfolios and trade and rebalance in an effective manner.

Global research platform: Integration of research across global equity markets contributes to greater insights and a more robust research process.

Integration of research, portfolio management and trading: Integration of research with portfolio management and trading enhances the value-add of research to real-world processes.

Company Profile

At a Glance:

AQR is a global investment management firm dedicated to delivering results for our clients. At the nexus of economics, behavioral finance, data and technology, AQR's evolution over two decades has been a continuous exploration of what drives markets and how it can be applied to client portfolios. The firm is headquartered in Greenwich, Connecticut, with offices in Bangalore, Dubai, Frankfurt, Hong Kong, London, Munich and Sydney.

Disclosures

This is a marketing communication. Please refer to the Prospectus, KIID and (where applicable) KID for more information on general terms, risks and fees. Investors should only invest in the Fund once they have reviewed the Prospectus, KIID and (where applicable) KID, the most recent versions are available free of charge, in English and in your local language at AQR UCITS Funds, c/o HedgeServ (Luxembourg) S.à r.l. 11st Floor, Infinity Building, 5 Avenue John F. Kennedy, L-1855, Grand Duchy of Luxembourg, along with the annual and semi-annual report and articles (each in English). Investors may wish to consult an independent financial advisor for personal and specific investment advice before investing. Only the information provided in the Prospectus and the KIID is legally binding. Not all share classes are available for investment in all countries. The Prospectus as well as a summary of investor rights are available in English. The relevant KIID is available in Danish, Dutch, English, French, German, Icelandic, Italian, Norwegian, Spanish, Swedish, and depending upon the specific fund, Greek and Portuguese. These documents are available at: <https://ucits.aqr.com/>. Please refer to the Prospectus, KIID and (where applicable) KID for more information on and fees. The decision to invest in the Fund should take into account all the characteristics or objectives of the Fund as described in the Prospectus.

The information set forth herein has been obtained or derived from sources believed by AQR Capital Management, LLC ("AQR") to be reliable. However, AQR does not make any representation or warranty, express or implied, as to the information's accuracy or completeness, nor does AQR recommend that the attached information serve as the basis of any investment decision. This document has been provided to you solely for information purposes and does not constitute an offer or solicitation of an offer, or any advice or recommendation, to purchase any securities or other financial instruments, and may not be construed as such. This document is intended exclusively for the use of the person to whom it has been delivered by AQR and it is not to be reproduced or redistributed to any other person.

This document is not research and should not be treated as research. This document does not represent valuation judgments with respect to any financial instrument, issuer, security or sector that may be described or referenced herein and does not represent a formal or official view of AQR.

The views expressed reflect the current views as of the date hereof and AQR does not undertake to advise you of any changes in the views expressed herein. It should not be assumed that AQR will make investment recommendations in the future that are consistent with the views expressed herein, or use any or all of the techniques or methods of analysis described herein in managing client accounts. AQR and its affiliates may have positions (long or short) or engage in securities transactions that are not consistent with the information and views expressed in this document.

The information contained herein is only as current as of the date indicated, and may be superseded by subsequent market events or for other reasons. Charts and graphs provided herein are for illustrative purposes only. The information in this document has been developed internally and/or obtained from sources believed to be reliable; however AQR does not guarantee the accuracy, adequacy or completeness of such information. Nothing contained herein constitutes investment, legal, tax or other advice nor is it to be relied on in making an investment or other decision.

There can be no assurance that an investment strategy will be successful. This document should not be viewed as a current or past recommendation or a solicitation of an offer to buy or sell any securities or to adopt any investment strategy.

The investment strategy and themes discussed herein may be unsuitable for investors depending on their specific investment objectives and financial situation. Please note that changes in the rate of exchange of a currency may affect the value, price or income of an investment adversely.

No representation or warranty, express or implied, is made or given by or on behalf of AQR or any other person as to the accuracy and completeness or fairness of the information contained in this document, and no responsibility or liability is accepted for any such information.

There is no guarantee, express or implied, that long-term return and/or volatility targets will be achieved. Realized returns and/or volatility may come in higher or lower than expected. Past performance does not predict future returns. Diversification does not eliminate the risk of experiencing investment losses.

There is a risk of substantial loss associated with trading commodities, futures, options, derivatives and other financial instruments. Before trading, investors should carefully consider their financial position and risk tolerance to determine if the proposed trading style is appropriate. Investors should realize that when trading futures commodities, options, derivatives and other financial instruments one could lose the full balance of their account. It is also possible to lose more than the initial deposit when trading derivatives or using leverage. All funds committed to such a trading strategy should be purely risk capital. Investors should note that UCITS funds will not trade in commodities.

Please note that the management company may decide to terminate the arrangements made for the marketing of the Fund in any country where it has been registered for marketing.

Broad-based securities indices are unmanaged and are not subject to fees and expenses typically associated with managed accounts or investment funds. Investments cannot be made directly in an index.

Where the benchmark is not being used in reference to the management and/or implementation of the investment policy of the Fund, the referenced benchmark is used for the calculation of performance fees and/or as a point of comparison.

The fees and charges paid by the Fund will reduce the return on your investment. Certain costs paid by the Fund will be charged in USD and exchange rate fluctuations may cause these costs to increase or decrease when converted into your local currency.

Definition: The MSCI All Country World Index (net dividends) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of 23 developed and 24 emerging markets' country indices throughout the world.
