Investment Objective and Philosophy

The Cohen & Steers SICAV Global Listed Infrastructure Fund (the "Fund") seeks current income and capital appreciation by investing in publicly traded infrastructure companies that can provide the beneficial investment characteristics of private infrastructure ownership with the added features of liquidity, transparency, diversification and daily market pricing. By investing in core owners and operators of infrastructure assets that offer contractual revenues and inflation-linked cash flows, we believe the strategy offers attractive investment characteristics.

The Global Listed Infrastructure Fund seeks to benefit from growing demand for infrastructure investment, historical underinvestment in infrastructure and continued privatization of traditionally government-owned assets and services.

Investment Approach

Our investments in infrastructure include hard asset owners/operators of cell towers, pipelines, airports, marine ports, toll roads, railways, water, renewable energy and utilities. Our fundamental analysis focuses on both asset valuation and growth potential.

The infrastructure team formulates independent views on fundamentals, regulatory trends and company financials. We use a proprietary macro sector overlay, which ranks the attractiveness of the infrastructure subsectors based on several key drivers. The analysts then develop projections for each company's earnings, cash flow and dividend growth potential. Security level weightings are determined using the output of our fundamental research and valuation models.

Total Returns (Annualized)

For regulatory purposes, performance data will only be displayed
after the fund has achieved a 12 month record.
