SRI AGEING POPULATION,
a compartment of GENERALI INVESTMENTS SICAV
Class: E, Share: X (Accumulation) ISIN: LU1234787544
This SICAV is managed by Generali Investments Luxembourg S.A.

Objectives and Investment Policy

The objective of the Fund is to outperform its Benchmark and provide a long-term capital appreciation by investing, with a socially and Responsible Investment (SRI) process in listed equities from European companies that offer solutions for ageing societies through their products and services, as further detailed in the Supplement of the Fund.

The Fund has a sustainable investment objective, which is investing in listed companies that contribute to the social objectives linked to the long-term trend of ageing population, those social objectives being: Health, Ageing Well, Better Living and Social solutions to the challenges of an ageing world, while not significantly harming any other social or environmental objective provided that the investee companies follow good corporate governance practices. Moreover, the fund is structured around 3 investment pillars, being Healthcare, Pension & Savings and Consumers.

The Fund is a SRI labelled European thematic equity fund that has sustainable investment as its objective pursuant to Article 9 of the SFDR.

The Fund shall invest at least 90% of its net assets in listed equities issued by European companies compliant with the SRI process. For the purposes of the Fund, European companies are companies listed on a stock exchange, or incorporated, in the European Union, Great Britain, Norway and Switzerland.

ESG (Environment, Social and Governance) analysis, being simultaneously and fully integrated into the investment process, is conducted, on an ongoing basis, through the Investment Manager (Sycomore Asset Management)'s proprietary "SPICE" methodology. This methodology aims in particular to understand the distribution of the value created by a company between all its stakeholders, and is structured around 5 stakeholder types (Society and suppliers, People – i.e. employees, Investors, Clients and Environment). It leads to a SPICE rating from 1 to 5 (5 being the highest rate). The SPICE analysis covers at least 90% of the net assets of the Fund (excluding government bonds and cash) and is applied on an ongoing basis.

In addition, into the overall SPICE methodology, the investment universe of the Fund is built according to specific criteria, which are: a filter to exclude the main ESG risks, a filter to exclude companies which are rated less than 3/5 in the Clients pillar of SPICE, and at least 90% of the net assets of the Fund (excluding government bonds and cash) is invested in companies with a societal contribution of products and services strictly above 0%.

The SPICE methodology also contributes analyzing a company's exposure and/or contribution to the United Nations Sustainable Development Goals (SDGs) as further outlines in the Supplement of the Fund. The Fund also undertakes to report annually on the portfolio companies' exposure to SDGs through their products and services.

The Fund's eligible investment universe is thus reduced by at least 20% compared to its initial investment universe, namely listed equities issued by European companies.

In order to ensure that while investee companies contribute to a social objective they do not significantly harm other objectives, the Fund does not invest in companies involved in activities identified in the Investment Manager's SRI exclusion policy for their controversial social or environmental impacts, in companies affected by a level 3/3 controversy and in companies with a SPICE rating equal or less than 3/5.

Furthermore, the Investment Manager will focus on monitoring ESG indicators (i.a. Net Environmental Contribution; workforce growth over three years; percentage of women in key management roles; percentage of companies with commitment to respecting human rights). The ESG indicators aims at having a better result on at least two indicators compared to the Fund's benchmark. There may be potential inconsistencies and lack of availability of ESG data, especially when issued by external data providers (more details on the methodological limits in the Supplement of the Fund).

The Fund may also invest up to 10% of its net assets in equities issued worldwide (subject to the same SRI process described for European companies), as well as in money market instruments, government bonds, corporate bonds, convertibles and participation rights that are not subject to the above SRI process.

The Fund shall not invest more than 10% of its net assets into other funds. Such funds must benefit or have undertaken to benefit within one year from the French SRI label and/or French Greenfin label and/or any equivalent foreign labels, codes or charters.

The Fund is actively managed and references the Benchmark by seeking to outperform it. The Investment Manager has full discretion over the composition of the Fund's portfolio and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the ones of the Benchmark.

The Fund may use financial instruments and derivatives for hedging purposes, for efficient portfolio management purposes and for investment purposes. The underlying of such derivatives are subject to the above SRI process. The use of derivatives must be compliant and consistent with the Fund's long-term objectives.

The Fund is open-ended. You may redeem shares of the Fund on any Luxembourg business day.

The Share Class makes no dividend payment.

The Benchmark of the Fund is the MSCI Europe – Net Total Return Index.

Risk and Reward Profile

This indicator represents the annual historical volatility of the Fund over a 5-year period. Its aim is to help investors understand the uncertainties attached to gains and losses that may have an impact on their investment.

The Fund's exposure to equity markets explains its classification in this category.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time. The lowest risk category does not mean "risk free". Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Counterparty Risk: The Fund primarily concludes derivatives trades with various contracting parties. There is a risk that counterparties may no longer be able to honour their payment or settlement obligations.

Operational Risk and Depositary Risk: The Fund may fall victim to fraud or other criminal acts. It may also incur losses due to misunderstandings or errors by employees of the management company, the depositary or external third parties. Finally, its' management or the custody of its' assets can be adversely affected by external events such as fires, natural disasters etc.

Sustainable Finance: Currently, there is not universally accepted framework or list of factors to consider to ensure that investments are sustainable. Legal and regulatory framework governing sustainable finance is still under development. The lack of common standards may result in different approaches to set and achieve ESG (environmental, social, and governance) objectives. Applying ESG criteria to the

investment process may exclude securities of certain issuers for non-financial reasons and, therefore, may forgo some market opportunities available to funds that do not use ESG or sustainability criteria.
