

Key Investor Information for Investors in the United Kingdom

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Xtrackers Harvest FTSE China A-H 50 UCITS ETF

Share class: 1D, ISIN: LU1310477036, Security code: DBX0P8, Currency: USD

a sub-fund of Xtrackers. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is passively managed. The aim is for your investment to reflect the performance of the FTSE China A-H 50 Index (index) which reflects the performance of the 50 largest companies incorporated in the People's Republic of China (PRC) and traded on the Shanghai or the Shenzhen Stock Exchange. Each company will be represented either by its A-share (that is the share listed on the Shanghai or the Shenzhen Stock Exchange) and traded in Renminbi or by its H-share (that is the share listed on the Stock Exchange of Hong Kong (SEHK) and traded in Hong Kong dollars. The index is calculated in onshore Renminbi (CNY). The index is a price return index, which means that dividends which may have been paid out on any shares are not included in the index returns. The index is reviewed and adjusted quarterly. To achieve the aim, the fund will attempt to replicate the index, before fees and expenses, by buying all the securities in the index either through the Investment Manager's RQFII investment licence or through Stock Connect, which are investment programs that connects the

Shanghai Stock Exchange and the SEHK and the Shenzhen Stock Exchange and SEHK. The fund may receive income in respect of the securities held by the fund. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of financial contracts (derivatives). Certain information (including the latest share prices of the fund, indicative net asset values, full disclosure on the composition of the fund's portfolio and information on the index constituents) are available on your local DWS website or at www.Xtrackers.com. Transaction costs and taxes, unexpected fund costs and market conditions such as volatility or liquidity issues may affect the ability of the fund to track the index. The anticipated level of tracking error in normal market conditions is 2 per cent. The currency of the fund is USD. The fund distributes up to four times per annum. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following risks could be of particular significance for the fund: Your investment is dependent on the performance of the index less costs but your investment is not expected to match that performance precisely. The index is rules-based and is not capable of being adjusted to take into account changing market circumstances. As a result you may be negatively affected by, or may not benefit from, the lack of such adjustments in changing market circumstances. DWS entities and related companies may act in several roles in relation to the fund such as distributor and

management company which may involve conflicts of interest. The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. The fund is exposed to liquidity, operational, clearing, settlement and custody risks linked to investments in PRC, the RQFII system and the Stock Connect. The fund may suffer difficulties or delays in enforcing its rights in securities given the securities regimes in the PRC and Hong Kong are different. The fund and the depositary cannot ensure that the fund's ownership of the securities in the PRC or title thereto is assured in all circumstances. The Board of Directors intends to make relevant provision on dividend and interest from A-shares if the tax on dividends is not withheld at source at the time when such income is received. Any such provision may be excessive or inadequate. Investors may be advantaged or disadvantaged depending on the time they subscribed and/or redeemed their shares. The fund may use derivatives to try to manage its investments more efficiently. This may not always be successful and may result in greater fluctuations in the value of the fund. This may negatively affect the value of the fund and your investment.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charges	0.65 %
Charges taken from the fund under certain specific conditions	
Performance fee	None

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the fund will pay the transaction costs related to their subscriptions and redemptions.

The ongoing charges figure is based on expenses for the fiscal year ending 31.12.2022. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.

Additional information on costs can be found in the cost section(s) of the prospectus.

Past performance

Past performance is not a reliable indicator of future performance. All costs and fees that were withdrawn from the 1D share class of Xtrackers Harvest FTSE China A-H 50 UCITS ETF were deducted during the calculation. The 1D share class of Xtrackers Harvest FTSE China A-H 50 UCITS ETF was launched in 2016.
