

KEY DIFFERENTIATORS

- Quality comes first, we seek growth that can endure
- Team-based approach, rather than star-manager fund, which we believe leads to greater consistency
- ESG integrated into the investment process leveraging proprietary ESG research
- Culture matters. Comgest's broad partnership structure incentivises long-term thinking, an ESG mindset, teamwork and low employee turnover

INVESTMENT TEAM

Franz Weis, Eva Fornadi, Denis Callioni
Team may include advisors from affiliates within the Comgest Group.

RISK PROFILE

The indicator represents the risk profile presented in the PRIIPs Key Information Document. The indicator assumes you keep the product for 5 years otherwise the actual risk can vary significantly.

INVESTMENT POLICY

The objective of the Sub-Fund ("the Fund") is to increase the value of the Fund (capital appreciation) over the long term. The Fund intends to achieve this objective through investment in a portfolio of "Opportunities" companies, headquartered or carrying out their predominant activity in Europe, which seek to deliver above-average quality earnings growth and are attractively valued. Such companies may have shorter track records and earnings than more established growth companies and may have a higher risk profile.

The Fund is actively managed. The index is provided for comparative purposes only.

The Fund is aimed at investors with a long-term investment horizon (typically 5 years or more).

FUND COMMENTARY

European equity markets started 2024 on a strong note, much like they ended 2023. Inflationary pressures are easing, with the European Central Bank now expecting to reach its 2% target in 2025. Against this backdrop, central banks have indicated a readiness to lower interest rates, albeit at a slower pace than originally anticipated. The companies within our quality growth portfolio demonstrate robust balance sheets and idiosyncratic growth drivers which help to reduce their sensitivity to macro developments. Nevertheless, fluctuations in interest rates can still induce volatility in valuations.

European small- and mid-caps have underperformed their large cap counterparts persistently since January 2022, with this polarisation continuing this quarter. The forward price-to-earnings (NTM P/E) ratio of small caps has derated by 25% over this period, tracking the evolution of bond yields and the concerns associated to their relatively higher leverage. Small-cap stocks are currently trading at a discount to large-caps for the first time in two decades. This is somewhat visible in the portfolio's performance whose exposure to smaller capitalisation companies (<EUR 20bn) is approximately 40%.

The portfolio is still leveraging on long-term trends such as innovation in both healthcare (e.g. obesity) and technology (AI giving a further boost to semiconductors, cloud software, IT services), strong brands with pricing power and other niches with idiosyncratic growth (e.g. Scout24's innovation in digitising the ecosystem within the German real estate market). With the post Covid-19 normalisation hopefully coming to an end (with destocking largely behind us), some companies will gradually resume their long-term growth trend.

The FY'23 earnings season has been pleasing, with many portfolio companies delivering solid results and providing promising outlook statements for 2024. Our larger holdings have performed notably well year-to-date, partly supported by the sharp recovery seen in companies that suffered in 2023 for various reasons, such as Adyen, Lonza and Bakkafrøst.

ASML was one of the largest contributors during the quarter, benefitting from the rise of Nvidia and the race of peers to catch up in AI chipsets. The strong backlog yields excellent medium and long term-term visibility. Adyen's H2 results confirmed a significant reacceleration of growth after the H1'23 slowdown. The medium-term guidance provided by management at the capital markets day in November 2023 was well received, as it continues to point to dynamic and visible growth with solid profitability until 2026. Lonza's shares performed strongly following its above-consensus H2 results and management's reassuring commentary regarding the company's margin for 2024. Shares rose further on the announcement of Lonza's acquisition of Roche's Genentech large scale biologics manufacturing facility in the US, which triggered a further upgrade to mid-term targets. This comes at a time when potential implications of the US Biosecure Act could threaten competitor WuXi in the US market. Capgemini posted a solid return despite expecting soft revenue growth this year. The company is seen as an AI enabler, with management expecting a pick-up in activity throughout 2024. The shares retracted in March following a slight softening in Accenture's commentary regarding short-term demand patterns around more discretionary, non-core projects. Bakkafrøst rebounded following an encouraging outlook for 2024, driven by continued strong salmon pricing, reduced mortality and increased harvest weight expectations.

Soitec was among the largest detractors from portfolio performance over the quarter. The company's shares fell sharply on the back of FY'25 guidance which was significantly below consensus expectations in connection with the evolution of inventories for its core RF-SOI modules for the smartphone market. Alfen's shares remained under pressure despite the majority of destocking in electric vehicle charging points being resolved and despite an expected margin recovery in 2024. However, the recovery in charging stations post destocking seems to be weaker than initially expected. Genus profit warned as the Chinese pig market is weaker than expected and FDA approval regarding PRRS resistant pigs has been slightly delayed. Edenred was weak despite solid underlying results as an investigation regarding a public tender in Italy and a potential associated fine are weighing on the stock. Keywords Studios continued to de-rate on the theme of AI threats despite FY'24 guidance being maintained in a context of tough market conditions.

In terms of core portfolio changes over the quarter, we took profits in ASML and Icon after solid performance. Alfen was reduced due to a shift in business mix and DSV sold down on lower growth expectations. We also tactically reduced Adyen and Lonza following their respective re-ratings. The proceeds were used to fund increases in London Stock Exchange Group (solid execution), Campari (attractive valuation) and Genus (around its short-term warning). Two new positions were added to the portfolio: Richemont for its attractively valued branded jewellery portfolio and Sage for its attractively growing recurring software portfolio and good mid-term margin expansion opportunities. No companies were sold during the quarter.

The portfolio has delivered a solid return since the end of October, a performance supported notably by a re-rating in the portfolio's larger-cap holdings. The anticipation of lower rates has driven up the valuation of quality growth stocks in recent months. Your portfolio's valuation remains significantly below the peak valuation level seen at the end of 2020. This reflects the mix of the portfolio with small and mid-caps trading at a PE discount versus large-caps for the first time in two decades and also the re-rating (but not to peak levels) of large-cap quality growth companies. The re-rating of large-cap stocks can be partly justified by their accelerated growth trends as is the case of Novo Nordisk (major opportunity in obesity), LVMH (consolidation of demand towards top brands and pricing power) and ASML (AI potentially expanding the market opportunity), for instance. As market sentiment should eventually inflect towards smaller and mid-cap stocks (assuming there is no further deterioration in the economic environment), we believe your portfolio stands to benefit from the smaller-cap outlook (<EUR 20bn) given its circa 40% exposure to the category. We are tactically reducing larger portfolio weights and increasing positions where quality and reliability of growth are still at a discount, exemplified by holding London Stock Exchange Group for example.

Volatility can still be present for the remainder of the year, depending on the evolution of inflation, the exact timing of the central bank's decision to proceed with interest rate cuts and the overall macroeconomic environment. Beyond these elements, we are pleased with the quality and growth characteristics of the portfolio. As always, we remain convinced that it is ultimately earnings growth that will drive long-term performance. The portfolio is expected to deliver solid double-digit growth and higher growth than the underlying European market for the next twelve months and in the mid-term.

The views expressed in this document are valid at the time of publication only, do not constitute independent investment research and should not be interpreted as investment advice. The reference to specific companies does not constitute a recommendation to invest directly in these securities. Allocation is subject to change without notice. Remember that past performance does not predict future returns.

RISKS

This Fund has the following core inherent risks (non-exhaustive list):

- Investing involves risk including possible loss of principal.
- The value of all investments and the income derived therefrom can decrease as well as increase.
- There is no assurance that the investment objective of the Fund will be achieved.
- To the extent that the Fund is invested in or denominated in a currency other than yours, the cost and return in your currency may increase or decrease due to exchange rate fluctuations.
- A more detailed description of the risk factors that apply to the Fund is set out in the Prospectus.

PLEASE NOTE THAT THE DATA SHOWN BELOW IS THE OUTCOME OF OUR INVESTMENT PHILOSOPHY AND STOCK SELECTION. THESE METRICS ARE NOT ALL SPECIFICALLY TARGETED BY COMGEST BUT MAY BE ADDRESSED AS PART OF OUR RESPONSIBLE INVESTMENT PROCESS.

RESPONSIBLE INVESTMENT APPROACH

We believe a responsible approach to environmental, social and governance issues has a positive impact on a company's long-term sustainable growth. ESG is part of our fundamental analysis and we have developed and implemented a three-pronged responsible investment strategy: Integration / Active Ownership / Partnership.

MAIN EXCLUSIONS*

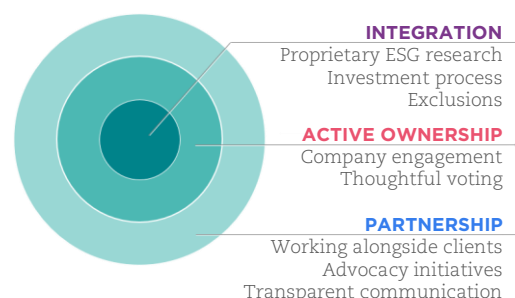

Coal Exit Policy: Coal-exposed electricity producers & thermal coal mines

Tobacco: Producers & distributors

Weapons: Conventional & controversial

UN Global Compact: Severe violations without prospect for improvement

Controversial Jurisdictions: High-risk jurisdictions & sanctions regime

* Further information on the exclusion policies and **applicable revenue thresholds** may be found in the Prospectus and the Investment Manager's Responsible Investment Policy on the Comgest website at www.comgest.com/en/our-business/esg

Neither Morningstar nor its information providers are responsible for any investment decisions, damages or losses arising from any use of this information or any information provided in conjunction with it.

Morningstar Rating™ is an objective, quantitative measure of a fund's historical risk-adjusted performance relative to other funds in its category. The overall rating is a weighted combination of the three-, five- and ten-year ratings. The top 10% of funds will receive a 5-star rating and the next 22.5% receive a 4-star rating.

Carbon Footprint: estimates the apportioned Scope 1 and 2 greenhouse gases emissions of the portfolio holdings.

Environmental Footprint: estimates the apportioned ratio of annual costs linked to greenhouse gases, water abstraction, waste generation, air, land & water pollutants, and natural resource use associated with the portfolio holdings per EUR m invested.

Environmental Footprint Source: S&P Trucost Limited © Trucost 2024. All rights in the Trucost data and reports vest in Trucost and/or its licensors. Neither Trucost, nor its affiliates, nor its licensors accept any liability for any errors, omissions or interruptions in the Trucost data and/or reports. No further distribution of the Data and/or Reports is permitted without Trucost's express written consent.

Science Based Targets Initiative Portfolio Coverage: calculates the % of the Fund's AUM invested in companies with SBTi approved targets or which have committed to set SBTi targets.

Board Gender Diversity: this indicator represents the weighted average ratio of female board members to total board members in investee companies, expressed as a percentage of all board members.

Non-Violation of UNGC Principles: this indicator represents the percentage of investee companies that have not been involved in violations of the United Nations Global Compact (UNGC) principles.

Effective Tax Rate: an indicator of corporate responsibility and impact. Using MSCI data, Comgest calculates the average effective tax rate and average statutory tax rate of the portfolio's holdings.

Index Source: MSCI. This report contains information (the "Information") sourced from MSCI Inc., its affiliates or information providers (the "MSCI Parties") and may have been used to calculate scores, ratings or other indicators. For more detailed information on ESG integration please consult our website: www.comgest.com/en/our-business/esg

Active Share: The percentage of fund holdings that is different from the reference index holdings. A fund that has no holdings in common with the reference index will have an active share of 100%, and a fund that has exactly the same holdings as the reference index considered will have an active share of 0%.

ADR - American Depositary Receipt: A negotiable security that represents securities of a foreign company and allows that company's shares to trade in the financial markets of the United States.

Annualised: A figure converted into an annual rate. Figures covering a period of more than one year are averaged to present a figure for a 12-month period.

Bp(s) - Basis point(s): One basis point is equal to one hundredth of 1% (i.e. 0.01%).

BV - Book Value: The value of the company assets minus its liabilities.

CAGR - Compound Annual Growth Rate: The rate of return that would be required for an investment to grow from its beginning balance to its ending balance, assuming the profits were reinvested at the end of each year of the investment's lifespan.

CapEx - Capital Expenditure: The money invested by a company to acquire or upgrade fixed, physical, non-consumable assets such as property, plants, buildings, technology, or equipment.

Cash Flow: The net amount of cash and cash equivalents being transferred in and out of a company. Cash received signifies inflows, and cash spent signifies outflows.

CPI - Consumer Price Index: An index that measures the overall change in consumer prices based on a representative basket of goods and services over time. It is the metric often used to measure inflation.

DY - Dividend Yield: A ratio that shows how much a company pays out in dividends each year relative to its share price.

EBITDA - Earnings Before Interest, Taxes, Depreciation and Amortisation: Used to measure a company's core profitability and is calculated by adding interest, tax, depreciation and amortisation expenses to net income.

EBIT - Earnings Before Interest and Taxes: Used to measure a company's core profitability and is calculated by adding interest and tax expenses to net income.

EPS - Earnings Per Share: The profits of a company attributed to each share, calculated by dividing profits after tax by the number of shares. EPS serves as an indicator of a company's profitability.

FCF - Free Cash Flow: The cash generated by a company from its normal business operations after subtracting any money spent on capital expenditures.

GDP - Gross Domestic Product: The total market value of all the finished goods and services produced within a country's border in a specific time period.

GDR - Global Depositary Receipt: A certificate issued by a bank that represents shares in a foreign stock on two or more global markets. A GDR is similar to an American depositary receipt (ADR), except an ADR only lists shares of a foreign country in the markets of the United States.

LTM - Last 12 Months: LTM multiples are backward-looking and are based on historical performance.

Market Cap(italisation): A measure of a company's size, calculated by multiplying the total number of shares in issue by the current share price. Companies are commonly grouped according to size, such as small cap, mid cap, large cap or all cap. There is no consensus on the definition of these groupings and they may vary from portfolio to portfolio depending on the country of investment.

NAV - Net Asset Value: The current market value of the portfolio's assets minus the portfolio's liabilities.

NTM - Next 12 Months: NTM multiples are forward-looking and are based on projected performance.

Ongoing Charges: A fund's operational costs over a year. Ongoing Charges are calculated as a percentage of the average fund size over the year and include, for example, investment manager's fees, administration fees and custody costs.

Operating Margin: Measures how much profit a company makes on a dollar (or relevant currency) of sales after paying for variable costs of production, such as wages and raw materials, but before paying interest or tax.

Operating Profit: A company's gross income less operating expenses and other business-related expenses, such as wages, cost of goods sold (COGS) and depreciation.

Organic Growth: Growth a company achieves by increasing output and enhancing sales through the business' own operations and internal processes. This does not include profits or growth attributable to mergers, acquisitions, divestitures and foreign exchange but rather an increase in sales and expansion through the company's own resources.

Organic Sales: Sales generated from within a company that are a direct result of the company's existing operations and internal processes. Organic sales do not include the impacts of mergers, acquisitions, divestitures and foreign exchange.

P/B or P/BV - Price-to-Book Value Ratio: Measures the market's valuation of a company relative to its book value. P/B or P/BV is calculated by dividing the company's stock price per share by its book value per share.

P/E - Price-to-Earnings Ratio: A ratio used to value a company's shares. It is calculated by dividing the current market price by the earnings per share.

P/S - Price-to-Sales Ratio: A valuation ratio that compares a company's stock price to its revenues. It is an indicator of the value that financial markets have placed on each dollar of a company's sales or revenues.

PEG - Price/Earnings-To-Growth Ratio: A stock's price-to-earnings (P/E) ratio divided by the growth rate of its earnings for a specified time period. The PEG ratio is used to determine a stock's value while also factoring in the company's expected earnings growth.

PMI - Purchasing Managers' Index: An index of the prevailing direction of economic trends in the manufacturing and service sectors.

Reference Index: Index against which a fund's performance is compared.

ROE - Return On Equity: Measures financial performance and is calculated by dividing net income by shareholders' equity. ROE is a gauge of a company's profitability and how efficiently it generates those profits.

ROIC - Return On Invested Capital: Calculation used to assess a company's efficiency at allocating the capital under its control to profitable investments.

SME - Small- Or Medium-Sized Enterprise: A company, or companies considered as a group, that are neither very small nor very large and which employ fewer than a given number of employees. This number varies across countries.

Volatility: Measures the movements of an asset up and down over time. Volatility is generally considered to be a measure of risk.

Engagement: Proactive, targeted dialogue with companies or other industry stakeholders (e.g. policymakers, industry bodies) in order to make known areas of concern and to incite tangible, positive change to improve outcomes for stakeholders.

Environmental Factors: Issues related to pollution, climate change, energy efficiency, natural resource use, waste management, biodiversity and other environmental challenges and opportunities.

ESG - Environmental, Social and Governance: The three key factors when measuring the sustainability and ethical impact of an investment in a business or company.

GHG - Greenhouse Gases: Gases that trap heat in the atmosphere and warm the planet. The best known greenhouse gases are carbon dioxide, methane, nitrous oxide and fluorinated gases.

Governance Factors: Governance refers to a set of rules or principles defining rights, responsibilities and expectations between different stakeholders in the governance of corporations. Governance factors include a company's leadership, executive pay, audits, internal controls and shareholder rights.

Net Zero: Achieving a balance between emitting carbon and absorbing carbon from the atmosphere. This balance, or net zero, will be achieved when the amount of carbon added to the atmosphere is no more than the amount removed.

PAI - Principal Adverse Impact: A list of sustainability factors that firms need to take into account for their investment policies and decisions. These indicators relate to environmental and social topics.

Proxy Voting: A form of voting whereby a shareholder delegates their vote to another who votes on their behalf at company meetings. This allows the shareholder to exercise their right to vote without being physically present.

RI - Responsible Investment: The integration of environmental, social and governance factors (ESG) into the selection and management of investments.

Scope 1 Emissions: Emissions directly generated by a company, such as an airline emitting exhaust fumes.

Scope 2 Emissions: Emissions indirectly generated by a company, such as emissions from the electricity or energy used to heat and cool a company's office.

Scope 3 Emissions: All other indirect emissions that occur in the value chain of a company and are not already included within scope 2. These emissions are a consequence of the company's business activities but occur from sources the company does not own or control. For example, emissions from a company's employees commuting to work. Scope 3 emissions are often difficult to measure.

SFDR Classification: SFDR product classifications fall under three categories and aim to make the sustainability profiles of funds more comparable and easier to understand by investors.

SFDR - EU Sustainable Finance Disclosure Regulation: An EU regulation which aims to make the sustainability profile of funds more comparable and better understood by end-investors. The regulation requires firms to advise whether principal adverse impacts on sustainability factors are considered in their investment decision making process.

Social Factors: Factors that examine how a company communicates with employees, suppliers, customers, governments, regulators and the communities where it operates.

tCO₂e: Tonnes (t) of carbon dioxide (CO₂) equivalent. Carbon dioxide equivalent is a standard unit for counting greenhouse gas emissions regardless of whether they are from carbon dioxide or another gas, such as methane.

UNGC - UN Global Compact: A voluntary pact of the United Nations (UN) to encourage businesses and firms worldwide to adopt sustainable and socially responsible policies, and to report on their implementation.

UN Global Compact (UNGC) Principles: Ten principles defined as part of the UNGC framework to promote responsible investment. Companies, investors and other participants are called upon to align their strategies and operations with the principles in the areas of human rights, labor, the environment and anti-corruption.

Voting: A mechanism for active owners to influence companies, usually done with the aim of influencing a company's governance or operations. Public equity investors typically have the right to vote on company and shareholder resolutions at annual and extraordinary general meetings (AGMs and EGMs).
