The Bank of New York Mellon SA/NV, Luxembourg Branch 2-4, rue Eugène Ruppert L-2453 Luxembourg

### Depositary:

Skandinaviska Enskilda Banken AB (publ), Luxembourg Branch 4, rue Peternelchen L-2370 Howald, Luxembourg

## **General Information**

SEB Fund 1 (the "Fund") is an open-ended common fund ("FCP" - "Fonds Commun de Placement") governed by Part I of the Luxembourg Law on Undertakings for Collective Investment of 17 December 2010, as amended, (the "Law"). The Fund qualifies as an Undertaking for Collective Investment in Transferable Securities (UCITS). The Fund was set up on 3 December 1987 for an undetermined duration. The Management Regulations lastly modified with effect from 20 September 2017, have been published in the *Recueil Electronique des Sociétés et Associations (RESA)* on 31 October 2017. The Fund is registered in Luxembourg with the Luxembourg Register of Commerce under the number K 49. The Management Company was established on 19 May 1978 in the form of a Swedish limited liability company (AB). The Management of financial instruments and investment portfolios under the Swedish UCITS Act (SFS 2004:46). The Management Company is also authorised as an alternative investment fund manager to manage alternative investment funds under the Swedish AIFM Act (SFS 2013:561).

The Management Company has delegated parts of the Central Administration as further detailed hereafter, including the administrative, registrar and transfer agent functions - under its continued responsibility and control - at its own expenses to The Bank of New York Mellon SA/NV, Luxembourg Branch, 2-4, rue Eugène Ruppert, L-2453 Luxembourg. This branch was created in Luxembourg as a "succursale d'une société de droit étranger" on 15 December 1998 and is an indirect wholly-owned subsidiary of The Bank of New York Mellon Corporation. It is registered with the Luxembourg Trade and Companies' Register under Corporate Identity Number B 105087 (the "Administrative Agent" and "Registrar and Transfer Agent").

In the capacity of Administrative Agent, it carries out certain administrative duties related to the administration of the Fund, including the calculation of the NAV of the Units and the provision of account services for the Fund.

In its capacity as Registrar and Transfer Agent, it will process all subscriptions, redemptions and transfers of units, and will register these transactions in the Investors' register of the Fund.

The main objective of each Sub-Fund will be to invest directly and/or indirectly in transferable securities and other Eligible Assets, with the purpose of spreading investment risks and achieving long-term capital growth. The investment objectives of the Sub-Funds will be carried out in compliance with the investment restrictions set forth in the latest prospectus.

Sub-Fund name:	Base currency:
SEB Asset Selection Fund	EUR
SEB Europe Equity Fund	EUR
SEB Europe Exposure Fund	EUR
SEB Global Climate Opportunity Fund	EUR
SEB Global Fund	USD
SEB Nordic Future Opportunity Fund	EUR
SEB US Focus Core Fund	USD

At present, seven Sub-Funds of SEB Fund 1 are at the Investors' disposal:

Luxembourg-domiciled SEB Fund 1 - SEB Norway Focus Fund merged with Sweden-domiciled SEB Nordenfond on 12 June 2023. See Note 6 for further details.

The base currency of the Fund is USD.

Unless otherwise laid down in part II of the Prospectus, "The Sub-Funds", the Management Company may decide to issue, for each Sub-Fund, capitalisation Units ("C" Units) and distribution Units ("D" Units).

The "C" Units will reinvest their income, if any. The "D" Units may pay a dividend to its Investors, upon decision of the Management Company. Dividends are paid annually, except for those Sub-Funds where the Management Company would decide on a monthly, quarterly or semi-annual dividend payment.

The Management Company may issue Unit Classes whose Reference Currency is not the Base Currency of the respective Sub-Fund. With regard to such Unit Classes, the Management Company has the ambition to hedge the currency exposure from the Base Currency into the currency exposure of the Reference Currency. Considering the practical challenges of doing so, the Management Company does not guarantee how successful such currency hedging of Unit Classes will be. For Unit Classes where the Management Company has an ambition to currency-hedge the Unit Class, an "H-" will precede the currency denomination of the Unit Class. For example "(H-SEK)" means that there is an ambition by the Management Company to hedge the currency exposure from a Base Currency into a SEK-exposure for the Unit Class. The ambition of such hedging activity is to limit the performance impact related to fluctuations in the exchange rate between the Base Currency and the Reference Currency of the Unit Class. The profit and loss effects related to currency hedging of a particular Unit Class, will be allocated to the relevant Unit Class.

The unit classes offered for the Sub-Funds are disclosed in note 2 of this Annual Report.

The last known issue and redemption prices may be downloaded from the Website of the Branch and/or requested at any time at the registered offices of the Management Company and of the Depositary, at the address of its Branch as well as from the paying agents.

In addition, the Net Asset Value, fact sheets and other informational material is published on the SEB Luxembourg website www.sebgroup.lu ("website"). When registered in other countries, the publication media might differ according to the regulatory requirements. Information about fund charges can be found in the Key Information Document ("KID").

The audited annual and unaudited semi-annual reports of the Fund may be obtained, free of charge at the registered office of the Management Company, at the address of its Branch and on the website. These reports as well as copies of the Prospectus, the Management Regulations and the KID are available, free of charge, at the registered office of the Management Company, at the address of the Branch and on the website.

## Management Report

## January 2023 - December 2023: Lower inflation, falling bond yields and the promise of Artificial Intelligence delivered a positive ending to 2023

In 2023, the global landscape was defined by stronger-than-expected growth, declining inflation from elevated levels, restrictive monetary policies and geopolitical uncertainties. When the year began, market sentiment foresaw a substantial recession in Europe, a notable deceleration in the United States, and an anticipated resurgence in China as its three-year period of the Zero-COVID policy concluded. However, as the year unfolded, Europe and, in particular, the US exceeded growth projections, while the Chinese economy failed to meet anticipated outcomes.

US economic growth exhibited remarkable resilience amidst ongoing monetary policy tightening. Economic activity hovered close to trend, while the labour market retained its tightness. Real wage growth bolstered purchasing power for US consumers, and the corporate sector remained in good shape. However, the surge in economic activity unsettled the Federal Reserve, prompting concerns about whether inflation would align with the two per cent average inflation target. The US Central Bank signalled to markets an expectation of "higher for longer" interest rates, continuing its rate hikes until July 2023. This hawkish rhetoric, coupled with strong growth, propelled longer-term government bond yields to multi-year highs in Q3 2023. But although rising bond yields dampened risk appetite in Q3, we saw a reversal in Q4 reflecting that the market decided that interest rates had peaked which drove bond yields swiftly lower due to the decline of inflation in developed markets which in turn led to a notable rally in equity markets.

Throughout the year, technology stocks (IT) maintained their leadership position, buoyed by strong demand for US growth stocks and a continued market preference for companies specializing in Artificial Intelligence. Value and small-cap stocks underperformed as technology shares surged ahead, driving growth in the market. Quality stocks demonstrated gains comparable to those of growth stocks, marking a notable increase of 28 per cent in 2023.

US equity markets continued their outperformance, led by the remarkable gains of the "Magnificent 7", followed by more modest increases in Europe and the Nordics. Emerging market equities faced ongoing challenges due to geopolitical uncertainties, elevated inflation, tighter financial conditions, a stronger US dollar, and growth setbacks in China. Despite trading at low multiples and presenting cheap valuations, rising commodity prices, reduced geopolitical tensions, and potential interest rate cuts by the Federal Reserve could provide positive catalysts for emerging markets moving forward.

Many countries, notably the US, continued to grapple with large public deficits, fuelled by increased spending on defence and renewable energy investments. This suggests that interest rates are unlikely to return to pre-pandemic lows. In Sweden, despite initial increases by the Riksbank, having a particular damping effect on Swedish households and consumers, long-term interest rates ended the year lower than at its outset, favouring fixed-income funds and attracting investors to credit markets.

Going forward, a downward trajectory in inflation is anticipated in 2024, prompting expectations of central bank rate cuts. From a tactical horizon, the market rally since Q4 2023 is expected to broaden over the next few months, benefiting more sectors. While inflation and interest rates will remain focal points, growth data will play an increasingly crucial role in confirming anticipated easing measures. The biggest risks for financial markets are an uptick in inflation levels and setbacks in anticipated interest rate cuts, alongside escalating geopolitical tensions and potential conflicts in the Middle East, which could drive commodity prices higher.

SEB Investment Management acknowledges the positive impact of the global equity and bond market upturn on its assets under management. Committed to delivering a brighter financial future for its customers through sustainable investments, SEB Investment Management AB and our board of directors thank you again for your continued commitment.

Luxembourg, 5 February 2024 SEB Investment Management AB

The Board of Directors

\*) Performance is calculated by the following formula: ((Year end closing NAV per unit or last NAV calculated in case of terminated classes + dividend per unit distributed respectively for D units) / (Prior year closing NAV per unit or first NAV per unit in case of newly launched classes) - 1) \* 100.

#### NAV = Net Asset Value

The past performance is no indication of current or future performance. The performance data do not take account of the costs incurred on the issue and redemption of units.

\*\*) Luxembourg-domiciled SEB Fund 1 – SEB Norway Focus Fund merged with Sweden-domiciled SEB Nordenfond on 12 June 2023. The last effective NAV for SEB Fund 1 – SEB Norway Focus Fund on 9 June 2023.

\*\*\*) NAV as at merger date. Performance is calculated by the following formula: ((NAV / Unit as at Merger date) / (NAV / Unit as at 31/12/2022) -1) \* 100.

# Notes to the Financial Statements As at 31 December 2023

### Note 1. Significant Accounting Policies

The financial statements have been prepared in accordance with Luxembourg regulations relating to Undertakings for Collective Investment.

The financial statements have been prepared on going concern basis as the Merging Fund continues to exist and operate after 12 June 2023 under another vehicle. See Note 6 for details.

The Financial Statements have been prepared based on the last official Net Asset Value of the year which has been calculated on 29 December 2023 with the prices as of that date.

Investments	Last available price	Administrative Agent	Last available settlement prices	A price no lower than the bid price and no higher than the ask price	Latest available forward exchange rates
Listed Transferable securities and money markets instruments	X				
Unlisted Transferable securities and money markets instruments				X	
Transferable securities and money market instruments quoted or traded on several markets	x				
Derivatives instruments			Х		
Forward foreign exchange contracts					Х
Financial Futures Contracts*	Х				

<sup>\*)</sup> Financial Futures Contracts, which are not matured, are valued at valuation date at market rates prevailing at this date and resulting unrealised appreciation or depreciation are posted as change in net unrealised appreciation/(depreciation) on financial future contracts to the Combined Statement of Changes in Net Assets.

In the event that such prices are not in line with market conditions, or for securities and money market instruments other than those covered above for which there are no fixed prices, these securities and money market instruments, as well as other assets, will be valued at the current market value as determined in good faith by the Management Company, following generally accepted valuation principles.

Derivatives instruments not traded on regulated markets or on stock exchanges are valued at their net liquidating value determined, pursuant to the policies established in good faith by the Management Company, on a basis consistently applied for each different variety of contracts, in accordance with generally recognised principles, taking into consideration the generally accepted accounting practices, the customary practices in line with the market and the interests of the Investors.

In the case that extraordinary circumstances occur which make it impossible or even wrong to make a valuation in accordance with the above-mentioned criteria, the Management Company is entitled to temporarily apply other generally accepted valuation procedures, which are determined by it in good faith, in order to make an appropriate valuation of the Fund's Assets.

Gains and losses on the sale of securities are determined using the average cost method.

### Swing pricing:

When substantial sums flow in or out of a Sub-Fund, the Investment Manager has to make adjustments, such as trading on the market, in order to maintain the desired asset allocation for the Sub-Fund. Trading can incur costs that affect the Unit price of the Sub-Fund and the value of existing Investors' investments. Swing pricing is designed to protect Investors' investments in this kind of situation.

The Unit price of the Sub-Fund may thus be adjusted upwards in case of large inflows and downwards in case of large outflows on a certain Business Day. The thresholds that trigger swing pricing as well as the size of the adjustments ("swing factor") are set by the board of directors of the Management Company or by a swing price committee appointed by the board of directors of the Management Company.

Adjustments made during the year are recorded in "Proceeds on issues of units" and "Payment on redemptions of units" in the Combined Statement of Changes in Net Assets.

The Board of Directors of the Management Company or swing price committee may also decide a maximum swing factor to apply to a specific Sub-Fund. The list of Sub-Funds that currently apply swing pricing, including the size of a maximum swing factor, is available on SEB Investment Management's website. Investors may also request this information, free of charge.

Umbrella	Sub-Funds	Maximum applied adjustment	
SEB Fund 1	SEB Europe Equity Fund	0.99% of the NAV	
SEB Fund 1	SEB Europe Exposure Fund	0.99% of the NAV	
SEB Fund 1	SEB Global Climate Opportunity Fund	0.99% of the NAV	
SEB Fund 1	SEB Global Fund	0.99% of the NAV	
SEB Fund 1	SEB Nordic Future Opportunity Fund	0.99% of the NAV	
SEB Fund 1	SEB US Focus Core Fund	0.99% of the NAV	

No swing pricing adjustment has been applied to the year end Net Asset Value per unit calculated on 29 December 2023.

### Currency translation:

Separate accounts are maintained for the Sub-Fund in the currency in which the Net Asset Value per unit to which it relates is expressed (the "accounting currency").

Transactions denominated in a currency other than the accounting currency are recorded on the basis of exchange rates prevailing on the date they occur or accrue to the Sub-Fund.

Assets and liabilities, expressed in a currency other than the accounting currency, are translated on the basis of exchange rates ruling at the balance sheet date.

The combined total is translated into USD at the year end date exchange rate.

The Sub-Funds are priced at either intraday or close of business. The exchange rates are presented in line with when these Sub-Funds are priced.

As at 29 December 2023, the intraday exchange rates for SEB Global Climate Opportunity Fund and SEB US Focus Core Fund were as follows:

1 AUD	=	0.681655157	USD	1 ILS	=	0.276847151	USD
1 BRL	=	0.205863571	USD	1 JPY	=	0.007067389	USD

\*SEB Europe Exposure Fund - UC (EUR) and UD (EUR) unit classes launched on 24 August 2023. \*\*Luxembourg-domiciled SEB Fund 1 – SEB Norway Focus Fund merged with Sweden-domiciled SEB Nordenfond on 12 June 2023. See Note 6 for further details.

A twelfth of this rate is being payable at the end of each month and based on the average Net Assets of each Sub-Fund calculated daily during the relevant month.

The Management Company pays accounting, administration and depositary fees on behalf of the Fund.

### Note 3. Performance Fees

In addition to the management fees, the Management Company is entitled to a performance fee on all the unit classes of the Sub-Funds SEB Fund 1 - SEB Asset Selection Fund and SEB Fund 1 - SEB Nordic Future Opportunity Fund. The performance fee is calculated, accrued and crystallised on a daily basis and paid out of the assets of the applicable unit class of the Sub-Fund at the end of each month. The calculation of the performance fees takes place on the basis of the units of the respective unit class in circulation at the respective Valuation Day.

The performance fees per unit of the applicable unit class of SEB Fund 1 - SEB Asset Selection Fund equals 20% of the appreciation of the Net Asset Value per unit of the applicable unit class of the Sub-Fund over the benchmark, pre performance fees, but post the management fees and other types of fees, above the current Hurdle Value of the applicable unit class of the Sub-Fund for all classes except unit class SIC (H-USD) with a rate of 15%. The Sub-Fund uses the principle of High Water Mark and the Risk Free Rate as a hurdle. The 3 Month Treasury Bill return index is used as the Risk Free Rate.

The performance fees per unit of the applicable unit class of SEB Fund 1 - SEB Nordic Future Opportunity Fund equals 15% of the appreciation of the Net Asset Value per unit of the applicable unit class of the Sub-Fund over the benchmark, pre performance fees, but post the management fees and other types of fees, above the current Hurdle Value of the applicable unit class of the Sub-Fund for all classes. The Sub-Fund uses the principle of the Benchmark model. The VINX Benchmark Cap Net Return Index is used as the Benchmark.

There were no performance fees accrued during the year and no performance fees were outstanding as at 31 December 2023.

#### Note 4. Taxation

The Fund is liable in Luxembourg to a subscription tax ("taxe d'abonnement") of 0.05% or 0.01% (as applicable) per annum of its NAV, such tax being payable quarterly on the basis of the value of the aggregate Net Assets of the Sub-Funds at the end of the relevant calendar quarter. Investments by a Sub-Fund in shares or units of another Luxembourg undertaking for collective investment which are also subject to the taxe d'abonnement are excluded from the NAV of the Sub-Fund serving as basis for the calculation of this tax to be paid by the Sub-Fund.

No stamp duty or other tax is payable in Luxembourg on the issue of units.

Interest, dividend and other income realised by a Sub-Fund on the sale of securities of non-Luxembourg issuers, may be subject to withholding and other taxes levied by the jurisdictions in which the income is sourced.

#### Note 5. Transaction Fees

Transaction fees incurred by the Sub-Funds relating to the purchase or sale of transferable securities, money market instruments, derivatives or other eligible assets are mainly composed of depositary fees and broker fees. Most of the transaction fees are included in the transaction price used to calculate the realised and unrealised gain/(loss) on securities.

In line with bond market practice, a bid-offer spread is applied when buying or selling securities and other financial instruments. Consequently, in any given transaction, there will be a difference between the purchase and sale prices quoted by the broker, which represents the broker's remuneration. This type of transaction cost is difficult to obtain separately and is therefore included in the acquisition cost of securities or deducted from selling prices of bonds. As at 31 December 2023, the transaction fees of SEB Fund 1 were as follows:

SEB Asset Selection Fund	811,314.23	EUR
SEB Europe Equity Fund	1,156,398.51	EUR
SEB Europe Exposure Fund	320,849.30	EUR
SEB Global Climate Opportunity Fund	300,481.07	EUR
SEB Global Fund	983,202.24	USD
SEB Nordic Future Opportunity Fund	74,805.61	EUR
SEB Norway Focus Fund*	15,763.82	NOK
SEB US Focus Core Fund	33,878.00	USD

\*Luxembourg-domiciled SEB Fund 1 – SEB Norway Focus Fund merged with Sweden-domiciled SEB Nordenfond on 12 June 2023. See Note 6 for further details.

### Note 6. Merger of the Sub-Fund

On 12 June 2023 (Date of merger) Luxembourg domiciled SEB Fund 1 – SEB Norway Focus Fund ("Merging Sub-Fund") was merged into Sweden-domiciled SEB Nordenfond ("Receiving Fund").

This merger was completed in accordance with article 1, (20) a) as well as Chapter 8 of the Law.

The costs triggered by the merger including the costs of the dissolution of the Merging Sub-Fund were borne by the Management Company.

The merger took place by way of absorption meaning that the merging Sub-Fund transferred all its respective assets and liabilities to the receiving Fund. The accrued income of the merging Sub-Fund was transferred and accounted as an accrued income in the corresponding unit class of the receiving Fund. Any income accrued in the receiving Fund prior to the merger was not affected.

The merger report prepared by Ernst & Young S.A., includes the following items for which no objection was reported:

- (i) the criteria adopted for valuation of the assets and/or liabilities for the purposes of calculating the exchange ratios;
- (ii) the calculation method for determining the exchange ratios; and

(iii) the final exchange ratios.

In accordance with article 71 (3) of the Law, the merger report is available on request and free of charge to the investors of the Sub-Fund and to the "Commission de Surveillance du Secteur Financier" at the registered office of the Management Company.

The final exchange ratios used were as follows:

Name of merging Sub-Fund	Name of receiving Fund	Exchange ratio*
SEB Fund 1 – SEB Norway Focus Fund - Class C (SEK)	SEB Nordenfond - Class A (SEK)	3.1960625
SEB Fund 1 – SEB Norway Focus Fund - Class C (NOK)	SEB Nordenfond - Class C	1.00
SEB Fund 1 – SEB Norway Focus Fund - Class IC (NOK)	SEB Nordenfond - Class D	1.00
SEB Fund 1 – SEB Norway Focus Fund - Class HNWC (NOK)	SEB Nordenfond - Class E	1.00

\*Number of units of the receiving Fund issued for one unit of the merging Sub-Fund.

Upon the effective date of the merger, the merging Sub-Fund ceased to exist.

### Note 7. Significant Events during the year

A new prospectus was issued in September 2023.

There were no other significant events during the year.

#### Note 8. Subsequent Events after the year end

A new prospectus was issued in January 2024.

### SEB Fund 1 – SEB Global Fund changes

Effective 2 January 2024, SEB Fund 1 – SEB Global Fund will undergo a number of changes as follows:

- The Sub-Fund will be renamed SEB Fund 1 SEB Global Focus Fund.
- The benchmark of the Sub-Fund will change from the MSCI World Net Return Index to the MSCI AC World Net Return Index.
- The Sub-Fund, currently managed by our Quantitative Equities team, will change management to the Fundamental Global Equities team.
- There will be a new investment strategy. The portfolio will be based on in-depth fundamental analysis and the portfolio managers will focus on identifying reasonably valued companies with quality aspects, such as strong market positions, solid finances, clear sustainability work, and a proven ability for profitable growth. The Sub-Fund will have a considerably more focused portfolio than previously. Additionally, the Sub-Fund will include the possibility to invest a maximum of 5% in China A-shares via the Stock Connect program.

On 1 April 2024, SEB Asset Management AB was appointed as Global Distributor in place of Skandinaviska Enskilda Banken AB (publ). The new visiting address is Malmskillnadsgatan 44 B, 111 57 Stockholm, Sweden.

There were no other subsequent events after the year end.

## Independent auditor's report

To the Unitholders of SEB Fund 1 4, rue Peternelchen L-2370 Howald, Luxembourg

## Opinion

We have audited the financial statements of SEB Fund 1 (the "Fund") and of each of its sub-funds, which comprise the combined statement of net assets and the schedule of investments as at 31 December 2023, and the combined statement of operations and the combined statement of changes in net assets for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its sub-funds as at 31 December 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

## **Basis for Opinion**

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (the "Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements" section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## Other information

The Board of Directors of the Management Company of the Fund (the "Board of Directors") is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

## Responsibilities of the Board of Directors for the financial statements

The Board of Directors is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Fund's or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

## Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "réviseur d'entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud
  or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that
  is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material
  misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve
  collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors.
- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of
  accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to
  events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to
  continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw
  attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial
  statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on
  the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However,
  future events or conditions may cause the Fund's or any of its sub-funds to cease to continue as a going
  concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

> Ernst & Young Société anonyme Cabinet de révision agréé

Nadia Faber

## Risk Disclosure (unaudited)

In the context of risk measurement and in accordance with CSSF Circular 11/512 a UCITS must calculate its global exposure on at least a daily basis.

For SEB Fund 1, the global exposure is calculated and monitored daily by using the calculation methodology Value at Risk (VaR) or the commitment methodology. The VaR model used is parametric VaR. The observation period is at least 250 days.

The VaR methodology provides an estimate of the maximum potential loss over a specific time period and at a given confidence level, i.e. probability level. Usually for UCITS, the time period is 1 month/20 business days and the confidence level is 99%.

For example, a VaR estimate of 3% on a 20-days' time period with a 99% confidence level means that, with 99% certainty, the percentage the Fund can expect to lose over the next 20 days' period should be a maximum of 3%.

In case of the VaR methodology, the Fund can use either the "relative" or the "absolute" VaR approach.

According to CSSF Circular 11/512, the absolute VaR approach must not be greater than 20% based on a 99% confidence level and a holding period of 1 month/20 business days. In the case of the relative VaR approach, the VaR of the Fund must not be greater than twice the VaR of its reference portfolio. Nevertheless, lower limitations than those ones set by the regulator can be set in accordance with the investment policy/strategy of the Fund.

In addition to the VaR, the level of leverage generated through the use of derivatives and the use of collateral in relation to efficient portfolio management transactions (i.e. securities lending or repurchase agreements) is monitored twice a month. Leverage is measured as the sum of the absolute notional exposures of the financial derivative instruments (i.e. the absolute sum of all long and short notional positions in derivatives compared to the Net Asset Value of the Fund) and the reinvestment of collateral related to securities lending or repurchase agreement used by the Fund.

The Investment Manager calculates the leverage on a gross or on a commitment method. The gross method converts all positions on derivative financial instruments into equivalent positions in the underlying assets, while the commitment method applies the same while allowing netting and hedging arrangements.

The below overview summarises the Fund indicating the VaR or commitment approach, the reference portfolio (in the case of relative VaR), the legal VaR limit, the lowest/highest and average utilisation of VaR (expressed as a percentage of the respective absolute or relative legal VaR limit) as well as the average level of leverage for the year ended 31 December 2023. Or in other cases, the minimum, maximum and average leverage within the commitment method:

SEB Fund 1 Sub-Fund	Relative/ Absolute VaR	Reference portfolio	Lowest utilisation of VaR	Highest utilisation of VaR	Average utilisation of VaR	Average Leverage (FX forwards serving the purposes of unit-class(es) hedging, if any, are not included in the leverage calculation)	Average Leverage (including FX forwards for unit-class hedging)
SEB Asset Selection Fund	Absolute	N/A	20.42%	47.89%	32.27%	422.99%	422.99%

Limits as set by the Board of Directors of the Management Company as part of the risk profile have temporarily been exceeded by the Sub-Fund(s), such as disclosed in below table. However such events have been adequately monitored and corrected in accordance with applicable internal procedures (escalation, etc.).

The commitment approach figures for the year ending 31 December 2023:

SEB Fund 1 Sub-Fund		Commitment Method Leverage			
	Limit	Minimum	Average	Maximum	
SEB Europe Equity Fund	100%	0.30%	2.19%	3.69%	
SEB Europe Exposure Fund	100%	0.00%	0.00%	0.00%	
SEB Global Climate Opportunity Fund	100%	0.00%	0.00%	0.00%	
SEB Global Fund	100%	1.50%	2.67%	4.54%	
SEB Nordic Future Opportunity Fund	100%	0.00%	0.00%	0.00%	
SEB US Focus Core Fund	100%	0.00%	0.00%	0.00%	

The Risk Monitoring is based on the risk management process adopted by the Board of the Management Company and is performed independently from the portfolio management. No changes have been applied to the risk management procedures.

## Remuneration Disclosure (unaudited)

SEB Investment Management AB wishes to encourage and incite good performance and sound behaviour, as well as to endeavour to achieve balanced risk-taking that is aligned with the interests of fund investors.

The Management Company has a long-term vision regarding the employment conditions of its staff. Total remuneration shall contribute to developing the Management Company's competitiveness and profitability through the Company being able to attract, retain, motivate and reward competent and skilful employees. In order to achieve this objective, the Management Company's Board of Directors has adopted a remuneration policy based on Swedish and international regulations. The purpose of the remuneration policy is to ensure that the Management Company has a remuneration system that is adapted to the fund Investors' long-term interests and the Management Company's strategy and values.

The remuneration policy is based on the remuneration model that is applied at Group level, and is built on SEB's values. The Management Company's remuneration policy is reviewed at least annually. The Management Company's current remuneration policy is based on a risk analysis that has been prepared by the Management Company's risk control department.

### The Management Company's remuneration structure is based on three components:

- Fixed remuneration (basic salary)
- Variable remuneration
- Pensions and other benefits

The remuneration components are used to achieve a competitive individual level of remuneration with an appropriate balance between fixed and variable remuneration.

The fixed remuneration component is individually adapted further to predetermined internal and external appraisals. The level of the fixed remuneration is based on the employee's experience, long-term performance and behaviour.

All employees at the Management Company are embraced by SEB's collective profit sharing model that has a predetermined maximum outcome. The remuneration is established based on SEB's earnings and customer satisfaction.

Remuneration to employees in control departments (internal audit, risk control, and observance of regulations) is established by the board of directors further to proposals from the Management Company's remuneration committee. Remuneration shall be based on objective grounds related to the employee's role and tasks, and be independent of the business unit that the control department scrutinises.

Employees in departments that have a monitoring function, such as internal auditing, risk control or compliance, are not to receive any other variable remuneration over and above SEB's profit sharing.

The Management Company applies the grandfather principle to all remuneration, which means all decisions are to be approved by, at the least, the manager for the manager of the employee concerned.

#### Variable remuneration

The Management Company uses variable remuneration in order to develop and reward performance and behaviour that create both short-term and long-term value for the fund Investors and the Management Company. Variable remuneration is an important aspect of designing a flexible remuneration system. Variable remuneration is composed of both cash and shares in investment funds or financial instruments which achieve the equivalent common interests as shares in the relevant investment funds.

The principles for variable remuneration adopted by the Management Company are established with the objective of reflecting the Management Company's low risk tolerance and being compatible with the Fund's prevailing risk profiles, fund rules, discretionary mandates, as well as internal and external regulations. The variable remuneration shall be based on the employee's performance and behaviour from a several-year perspective, as well as the performance and economic results of the employee's team, the Management Company and SEB as a whole.

At the same time as obtaining a sound balance between fixed and variable remuneration, the payment of variable remuneration shall be related to the Management Company's risk policy and creation of value for the fund Investors. This implies that certain maximum levels and deferment of payment shall apply to different personnel categories.

For employees in positions that have a significant influence on the Management Company's or the managed funds' risk profile, the maximum variable remuneration may not exceed 100 percent of the fixed remuneration. The variable remuneration is to be deferred by 40 to 60 percent for a minimum of three years. At least 50 percent of the variable remuneration is to consist of shares in investment funds or instruments which achieve the same common interests as shares in the relevant securities funds. Variable remuneration in the form of fund shares will be subject to retention policy for at least one year. This retention policy applies to variable compensation whether or not it is deferred.

The Management Company also applies a special remuneration model for certain employees who manage funds and discretionary mandates. The remuneration model for these persons is based on a structure with distinct rules for maximum outcome of remuneration, deferment of remuneration as well as rules regarding downward adjustment/reduction of remuneration.

Payment of deferred remuneration shall only be made if such is motivated based on the Management Company's economic situation and the performance of the Management Company, the relevant division and the employee.

Reduction or downward adjustment of deferred variable remuneration shall apply should losses, increased risks and costs arise during the deferment period, which includes for example taking into consideration the employee's observance of external and internal regulations. Reduction or downward adjustment shall also take place should payment be deemed unwarrantable in view of the Management Company's financial situation.

The variable remuneration system shall be continuously reviewed in order to ensure that it does not create any unsuitable behaviour and contribute to excessive risk-taking.

#### The remuneration committee

The Management Company has appointed a remuneration committee with the task of independently appraising the remuneration policy. The remuneration committee shall be responsible for preparing decisions regarding remuneration that are to be adopted by the board of directors, and intervene if a decision could imply consequences for the Management Company's risks and risk management. The remuneration committee is an independent body composed of the board of directors' independent members.

### Follow up

The CEO, the deputy CEO and the board of directors shall ensure that the remuneration policy is operationally applied. The remuneration policy shall be reviewed annually by the internal audit department or by an independent auditing firm. In order to ensure that the Management Company's remuneration system is applied in accordance with the remuneration policy, the remuneration system and the payment of remuneration shall be reviewed annually by internal or external auditors.

# Sustainable Financing Transactions Regulation (unaudited)

The Fund did not engage in any Securities Financing Transactions during the financial year ended 31 December 2023.

## Sustainable Finance Disclosure Regulation (unaudited)

The following Sub-Funds are categorised as Article 8 Funds under the Sustainable Finance Disclosure Regulation. **SEB Fund 1 Sub-Fund name:** SEB Europe Equity Fund SEB Europe Exposure Fund SEB Global Fund SEB US Focus Core Fund

The periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 for the Sub Funds categorised as Article 8 Funds listed above of SEB Fund 1 are disclosed overleaf.

The following Sub-Funds are categorised as Article 9 Funds under the Sustainable Finance Disclosure Regulation. **SEB Fund 1 Sub-Fund name:** SEB Global Climate Opportunity Fund SEB Nordic Future Opportunity Fund

The periodic disclosure for financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852 for the Sub Funds categorised as Article 9 Funds listed above of SEB Fund 1 are disclosed overleaf.

The following Sub-Fund is categorised as an Article 6 Fund under the Sustainable Finance Disclosure Regulation. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities. **SEB Fund 1 Sub-Fund name:** 

SEB Asset Selection Fund

The following Sub-Fund has merged out of the umbrella. Upon the effective date of the merger, the merging Sub-Fund ceased to exist. Therefore no periodic disclosure under the Sustainable Finance Disclosure Regulation relating to the merging Sub-Fund is included for this annual report.

## SEB Fund 1 Sub-Fund name:

SEB Norway Focus Fund

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: SEB Europe Equity Fund

Legal entity identifier: 529900D8G6BI5YVBHF82

## **Environmental and/or social characteristics**

#### Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally** sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this firm of a base have a successful black and a bit of a star 2

			with a social objective		
	It made sustainable investments with a social objective:%		It promoted E/S characteristics, but <b>did not</b> make any sustainable investments		

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the fund promoted environmental and social characteristics through exclusions, and by integration of sustainability risks and opportunities in investment decision-making. In addition, the fund company exercised active ownership and advocacy work in several companies on behalf of the fund.

To support the work of assessing the companies' sustainability risks and opportunities, the fund used a quantitative tool in the form of SEB Investment Management Sustainability Score, SIMS-S. SIMS-S is the fund company's proprietary sustainability model that rates all companies in the fund's investment universe based on multiple aspects of sustainability to establish a comprehensive and unbiased view.

The model consists of two main components: sustainability risks and sustainability opportunities. The model uses data from multiple vendors and is continuously modified as new data and new insights become available. The sustainability rating includes both a current status picture and a forward-looking perspective for each company. This provides portfolio managers the opportunity to assess current and future sustainability factors that can affect risk and return in the longer term.

Sustainability risks refer to environmental, social or governance-related events or circumstances that, if they were to occur, would have an actual or potential significant negative impact on the value of the investment.

Sustainability opportunities refer to environmental, social or governance-related events or circumstances that, if they were to occur, would have an actual or potential significant positive impact on the value of the investment.

SIMS-S was used in the portfolio construction, where the sustainability rating was included as part of the selection process of the companies in which the fund invested. SIMS-S was used both as a weighted sustainability score where companies with a high score were favoured, but also broken down into sub-scores, where certain parts of the sustainability rating were highlighted when certain sustainability themes/criteria were taken into account extra clearly in the selection process. Restrictions on the minimum score according to SIMS-S were included in the selection process.

The fund promoted environmental and social characteristics during the reference period by applying the fund company's exclusion criteria. The fund excluded investments in companies operating in industries or business areas deemed to have significant sustainability challenges.

Furthermore, the fund also promoted environmental and social attributes through its continuous efforts to influence companies' business models in a more sustainable direction. The fund company influenced companies on behalf of the fund by voting at general meetings, through dialogues with management teams and boards, and in cooperation with other asset managers or partners.

Read more about SIMS-S, exclusions and SEB Investment Management's sustainability approach at sebgroup.com/ fundcompanysustainability.

#### Sustainability indicators measure how the environmental or social characteristics promoted by the financial

product are attained.

#### How did the sustainability indicators perform?

The fund achieved a SIMS-S rating of 6.4 at the end of 2023, which was higher than the fund's benchmark index which had a rating of 5.73. SIMS-S ratings are set on a scale of 0-10 with a normal distribution, which means that the normal outcome for a company is 5.0 and that most companies have a rating between 4.0-6.0.

In 2023, the fund had 145 corporate engagements in 28 companies, corresponding to 44.2% of the portfolio. These dialogues differed in nature, with some being very detailed and time-consuming while others were handled within a limited time. This means that the number of dialogues has not been directly linked to the amount of time and resources spent on advocacy dialogue. The fund voted at the annual general meetings of 50 companies.

The fund excluded 21.15% of the benchmark index's value and the number of excluded companies totalled 67. The benchmark index included 425 companies.

#### ...and compared to previous periods?

During the previous period, SEB Investment Management's sustainability model, SIMS-S, and its sustainability score showed that the fund had a weighted average score higher than the benchmark of the fund. The weighted average score of the fund was 6.32 vs the benchmark's score of 5.89.

During the previous period, the fund, in accordance with SEB Investment Management's sustainability policy, excluded 69 companies from the fund's benchmark of 426 companies. During 2022, the fund voted at general meetings for 2 companies and had engagement dialogues with 45 companies.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the 2023 reference period, the fund aimed to make sustainable investments to a minimum of 20%. During the period, the fund owned one or more companies that could be classified as sustainable investments whose financial activities were deemed to contribute to one or more of the following environmental and social objectives.

Social objectives:

• United Nations Social Development Goals (UN SDGs): SDG 1 — No poverty; SDG 2 — Zero hunger; SDG 3 — Good health and well-being; SDG 4 — Quality education; SDG 5 — Gender equality; SDG 6 — Clean water and sanitation; SDG 8 — Decent work and economic growth; SDG 10 — Reduced inequalities; SDG 11 — Sustainable cities and communities; and SDG 16 — Peace, justice and strong institutions

• Other social sustainability goals such as gender equality, social inclusion and diversity.

Environmental objectives considered environmentally sustainable according to the EU Taxonomy:

• The six goals defined by the EU Green Taxonomy: climate change mitigation, climate change adaptation, sustainable use and protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems.

Environmental objectives that are not considered compatible with the EU Taxonomy

• The United Nations Environment-related Sustainable Development Goals (UN SDGs): SDG 6 — Clean water and sanitation; SDG 7 — Affordable and clean energy; SDG 9 — Industry, innovation and infrastructure; SDG 11 — Sustainable cities and communities; SDG 12 — Responsible consumption and production; SDG 13 — Climate action; SDG 14 — Life below water; and SDG 15 — Life on land

• Operational resource efficiency in key environmental areas such as carbon use, water use or use of raw materials.

The sustainable goals included in SEB Investment Management's definition of sustainable investments and quantitative thresholds are:

Environmental goals

• 10% of the company's revenue, capital expenditure or operating costs have been classified by estimation or reporting as significantly contributing to the six EU Taxonomy goals

 $\bullet~20\%$  of the company's revenue has been assessed as contributing to other global environmental goals, directly or indirectly linked to the UN SDGs

• The company outperforms its sector and region in terms of emission factors according to quantitative data

• The company outperforms its sector and region in other resource efficiency areas, such as water use, raw material consumption or waste generation, according to quantitative data

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to environmental objectives

Social goals

 $\bullet$  20% of the company's revenue has been assessed to contribute to other global social goals, directly or indirectly linked to the UN SDGs

• The company outperforms relative to its region in terms of gender equality factors, according to quantitative data

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to social goals

The fund company applies a pass/fail methodology, whereby an entire investment is classified and reported as sustainable if the requirements for contributing, not doing significant harm and good corporate governance are met. Other management companies may use a different methodology and criteria to classify an investment as sustainable. Therefore, the levels of sustainable investments may differ between fund companies depending on the methodologies, criteria and data providers used, and not only on levels of sustainability within the funds.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In order to ensure that no sustainable investment caused significant harm to any environmental or social sustainable investment objective, the fund has worked with the following principles during the reference period:

- Excluded companies that do not comply with international norms and standards;
- Excluded companies operating in controversial sectors and business areas;

• Excluded companies that have exposure to fossil fuels or other activities with negative environmental impacts;

• Excluded companies that are not considered to fulfil the levels of minimum social safeguards as defined by the EU Taxonomy; and

• Used an external research partner's assessment of the companies' governance structure, labour relations, tax compliance and remuneration.

### How were the indicators for adverse impacts on sustainability factors taken into account?

During the reference period, the fund company's model for detecting companies with extreme values among the negative principal impact indicators (PAI) was used to avoid investing in companies that have caused significant harm. The negative impact indicators for sustainability factors used are those outlined in Annex I of the Sustainable Finance Disclosure Regulation's technical standard (CDR 2022/1288) - as well as the relevant PAIs in Tables 2 and 3 of Annex 1 of CDR 2022/1288. However, the indicators are dependent on the current availability of data.

Where sufficient coverage has been available, companies with significant negative performance in a geographical and sectoral context have not been included as sustainable investments.

Some indicators are considered through the exclusions outlined in the fund company's sustainability policy, in particular:

- Companies with activities in the fossil fuel sector;
- Companies with facilities/operations located in or near biodiversity-sensitive areas where the activities of these companies negatively impact these areas;

• Companies that do not comply with international norms and standards, such as the UN Global Compact principles and the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises;

• Companies involved in the manufacture or sale of controversial weapons (landmines, cluster bombs, chemical and biological weapons); and

• Companies whose activities affect endangered species.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

During the reference period, the fund's investments have been aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights through the normbased exclusion criteria set out in the fund company's sustainability policy and using the SIMS-S.

Norm-based exclusions mean that the fund company expects issuers to adhere to international laws and conventions such as the following:

- The UN Principles for Responsible Investment
- The UN Global Compact
- The OECD Guidelines for Multinational Enterprises

• The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights

Companies with confirmed violations are not considered sustainable investments.

#### Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters. The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## R

## How did this financial product consider principal adverse impacts on sustainability factors?

During the reference period, the fund considered principal adverse impacts on sustainability factors through the exclusions outlined in the fund company's sustainability policy but also by using SEB Investment Management Sustainability Score, SIMS-S, the fund company's sustainability model. Companies with operations in the following were excluded:

• Companies with activities in the fossil fuel sector;

• Companies with facilities/operations located in or near biodiversity-sensitive areas where the activities of these companies negatively impact these areas;

• Companies that do not comply with international norms and standards, such as the UN Global Compact principles and the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises;

• Companies involved in the manufacture or sale of controversial weapons (landmines, cluster bombs, chemical and biological weapons); and

• Companies whose activities affect endangered species.

To support the work of assessing the companies' sustainability risks and opportunities, the fund used SEB Investment Management Sustainability Score, SIMS-S. It was used in portfolio construction, where the sustainability rating was included as part of the selection process of the companies in which the fund was to invest. SIMS-S was used both as a weighted sustainability score, where companies with a high score were favoured, but also broken down into sub-scores where certain parts of the sustainability rating were highlighted when certain sustainability themes/criteria were given a greater focus in the selection process. Restrictions on the minimum score according to SIMS-S were included in the selection process.

Using SIMS-S, the fund company's proprietary sustainability model, the following indicators for adverse impacts were considered:

- Greenhouse gas emissions of the investee companies;
- The carbon footprint of the investee companies;
- Greenhouse gas intensity of the investee companies;
- Whether companies operate in the fossil fuel sector;
- Energy consumption intensity per sector with high climate impact, for the investee companies;

• Whether the investee companies have facilities/operations located in or near biodiversity-sensitive areas where the operations of these companies negatively impact these areas;

- Emissions to water generated by the investee companies;
- The amount of hazardous waste generated by the investee companies;
- Whether the companies we invest in lack processes and compliance mechanisms to monitor compliance with the UN Global Compact and the OECD Guidelines for Multinational Enterprises;
- The unadjusted gender pay gap in the investee companies;
- Gender distribution of the board of directors of the investee companies;

• Whether the investee companies have decarbonisation initiatives in place to align with the Paris Agreement; and

• Whether the investee companies have a supplier code of conduct (against unsafe working conditions, precarious work, child labour and forced labour).

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest propor-tion of investments** of the financial product during the reference period which is: 31 December 2023

Largest investments	Sector	% Assets	Country
Novo Nordisk A/S	Health Care	5.32	Denmark
Roche Holding AG	Health Care	3.53	Switzerland
Novartis AG	Health Care	3.50	Switzerland
HSBC Holdings PLC	Financials	3.34	United Kingdom

Relx PLC	Industrials	3.02	United Kingdom
Hermes International	Consumer Discretionary	2.99	France
Industria de Diseno Textil SA	Consumer Discretionary	2.97	Spain
Jeronimo Martins SGPS SA	Consumer Staples	2.60	Portugal
STMicroelectronics NV	Information Technology	2.51	Switzerland
Coca-Cola HBC AG	Consumer Staples	2.48	Switzerland
L'Oreal SA	Consumer Staples	2.46	France
Fiat Chrysler Automobiles NV	Consumer Discretionary	2.42	United Kingdom
GlaxoSmithKline PLC	Health Care	2.08	United Kingdom
Daimler AG	Consumer Discretionary	2.00	Germany
Klepierre SA	Real Estate	1.98	France

## What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

## What was the asset allocation?

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy <sup>1</sup>?

🖌 Yes:

🗌 In fossil gas 🛛 In nuclear energy

🗌 No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of: - **turnover** reflecting

the share of revenue from green activities of investee companies

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

### Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

#### Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable ecoThe graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

## What was the share of investments made in transitional and enabling activities?

During 2023, the share of investments in transitional activities was 0.1%. The share in enabling activities was 0.3%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period (2022), the share of investments whose revenue was compatible with the EU Taxonomy was 0.3%. Compatible capital expenditure was 0% and operating expenditure 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

At the end of 2023, the fund had an equivalent of 4.82% of investments that were classified as sustainable investments with environmental objectives but not compliant with the EU Taxonomy.

The EU Green Taxonomy does not cover all economic sectors that are relevant for the fund to invest in and that contribute to sustainability goals. There were also relatively few companies that reported in accordance with the EU Green Taxonomy. This may have been due both to their size and their geographical location. The fund company uses an internal process to define the contributions to environmental objectives and the classification of sustainable investments. The environmental goals included in SEB Investment Management's definition of sustainable investments and quantitative thresholds are:

20% of the company's revenues have been assessed to contribute to other global environmental goals, directly or indirectly linked to the United Nations Sustainable Development Goals (UN SDGs);
The company outperforms its sector and region in terms of emission factors according to quantita-

tive data;
The company outperforms its sector and region in other resource efficiency areas, such as water use, raw material consumption or waste generation, according to quantitative data; and

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to environmental objectives.

The fund company applies a "pass/fail" methodology, where an investment is classified and recognised as contributing if the investment meets one or more of the above criteria.

## What was the share of socially sustainable investments?

At the end of 2023, the fund had investments corresponding to 40.16% classified as socially sustainable investments.

The fund company uses an internal process to define the contribution to social goals and the classification of sustainable investments.

The social goals included in SEB Investment Management's definition of sustainable investments and quantitative thresholds are:

 $\bullet$  20% of the company's revenue has been assessed to contribute to other global social goals, directly or indirectly linked to the UN SDGs.

• The company outperforms relative to its region in terms of gender equality factors, according to quantitative data.

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to social goals.

The fund company applies a "pass/fail" methodology, where an investment is classified and recognised as sustainable if the investment meets one or more of the above criteria.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the period, the fund used cash and derivatives to manage liquidity and flows. During the reference period, the fund did not conclude that any environmental or social minimum protection measures were deemed necessary for these investments.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

With the support from the fund company's sustainability model SIMS-S, which was used in the portfolio construction and selection process of companies to invest in, Verbund is an example of one of the investments in the fund. Verbund is engaged in the production and distribution of electricity. Verbund's electricity generation is almost exclusively based on renewable energy and the company aims to further expand production from wind and solar energy by 2030. The company's low carbon electricity generation intensity and sound climate change mitigation strategy contribute to the fight against climate change. The company contributes to the UN SDG goal 13: Climate action. The company was on SEB Investment Management's transition list as it was deemed to contribute to positive change in accordance with the management company's sustainability policy.

In the fund's role as an active shareholder and investor, the fund company seeks to safeguard clients' common interests in ownership issues and engage with companies on the development of their sustainability practices. In the fund's position as shareholder, active ownership is conducted via voting at shareholder meetings, in support of, or against, specific shareholder or management proposals, and via proxy voting according to the fund company's policy for shareholder engagement. Even though this is carried out according to equity holdings it also positively affects the fund's corresponding bond holdings.

Outside the Nordic region, the fund company collaborates with other investors via IIGCC, PRI Collaboration Platform, Access to Medicine, Global Child Forum, and others. Direct dialogues are also conducted with companies outside the Nordic region. The fund company cooperates with Sustainalytics and Institutional Shareholder Services (ISS), two international leaders in engaging with companies through dialogue. The fund company's partners maintain an ongoing, direct dialogue with the management and the board of the companies in which the fund invests. Working with other asset managers, under the leadership of the fund company's partners, the fund is able to be more successful in dialogues with companies outside the Nordic region, where the funds' ownership is typically relatively small.

During the year, engagement work in 28 companies was performed on behalf of the fund.

During the reference period, SEB Investment Management updated its sustainability policy with a clear position on biodiversity. Nature is the foundation of societies and economies and there is a growing appreciation for the need to include nature and biodiversity in investment decisions.

SEB Investment Management does not invest in companies that have verified violations of biodiversity-related norms. The fund company also excludes companies that operate and have a negative impact on endangered species or bio-sensitive areas.

To reduce the risks of deforestation of the tropical forests, SEB Investment Management monitors companies with the greatest influence on and exposure to tropical deforestation and aims to set net zero deforestation targets as the global data quality on deforestation improves.

SEB Investment Management is a member of the Taskforce for Nature-related Financial Disclosures (TNFD) Forum, and a signatory of the Finance for Biodiversity Pledge and is working to increase the quality and coverage of biodiversity-related data sets through scientific collaborations.

Read more about SEB Investment Management's work as an active owner in the company's policy for Shareholder Engagement at https://sebgroup.com/about-us/our-divisions/asset-management/seb-asset-management-ab/ legal-documents-and-policies.

## How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How does the reference benchmark differ from a broad market index?

The fund did not use a benchmark index to determine whether it was aligned with the environmental and/ or social characteristics it promotes and therefore has no measure of it for the reference period.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

#### How did this financial product perform compared with the reference benchmark?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

#### How did this financial product perform compared with the broad market index?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics. Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: SEB Europe Exposure Fund

Legal entity identifier: 529900X022E2KM9F7A20

## **Environmental and/or social characteristics**

#### Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally** sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period 2023, the fund promoted environmental and social attributes through its continuous efforts to influence companies' business models in a more sustainable direction. The fund company influenced companies on behalf of the fund by voting at general meetings, through dialogues with management teams and boards and in cooperation with other asset managers or partners.

Furthermore, the fund promoted environmental and social characteristics during the reference period by applying the fund company's exclusion criteria. The fund excluded investments in companies operating in industries or business areas deemed to have significant sustainability challenges.

Read more about exclusions and SEB Investment Management's sustainability approach at sebgroup.com/fund-companysustainability.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

## How did the sustainability indicators perform?

In 2023, the fund had 654 corporate engagements in 162 companies, corresponding to 68.9% of the portfolio. These dialogues differed in nature, with some being very detailed and time-consuming while others were handled within a limited time. This means that the number of dialogues was not directly linked to the amount of time and resources spent on advocacy dialogue. The fund voted at the annual general meetings of 156 companies.

By the end of 2023, the fund excluded 21.2% of the benchmark index's value. The fund excluded 67 companies from the benchmark index's 425 companies.

#### …and compared to previous periods?

During 2022, the fund voted at the AGMs of 61 companies and engaged with 175 companies. The fund excluded 61 companies from the benchmark.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not commit to making sustainable investments, but if the fund did make sustainable investments, they are defined according to the method described below.

During the period, the fund owned one or more companies that could be classified as sustainable investments whose economic activities are deemed to contribute to one or more of the following environmental and social objectives. Social objectives:

• United Nations Social Development Goals (UN SDGs): SDG 1 — No poverty; SDG 2 — Zero hunger; SDG 3 — Good health and well-being; SDG 4 — Quality education; SDG 5 — Gender equality; SDG 6 — Clean water and sanitation; SDG 8 — Decent work and economic growth; SDG 10 — Reduced inequalities; SDG 11 — Sustainable cities and communities; and SDG 16 — Peace, justice and strong institutions

• Other social sustainability goals such as gender equality, social inclusion and diversity

Environmental objectives considered environmentally sustainable according to the EU Taxonomy:

• The six goals defined by the EU Green Taxonomy: climate change mitigation, climate change adaptation, sustainable use and protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems.

Environmental objectives that are not considered compatible with the EU Taxonomy

• The United Nations Environment-related Sustainable Development Goals (UN SDGs): SDG 6 --- Clean water and sanitation; SDG 7 — Affordable and clean energy; SDG 9 — Industry, innovation and infrastructure; SDG 11 — Sustainable cities and communities; SDG 12 — Responsible consumption and production; SDG 13 — Climate action; SDG 14 — Life below water; and SDG 15 — Life on land

 Operational resource efficiency in key environmental areas such as carbon use, water use or use of raw materials

The sustainable goals included in SEB Investment Management's definition of sustainable investments and quantitative thresholds are:

Environmental goals

• 10% of the company's revenue, capital expenditure or operating costs have been classified by estimation or reporting as significantly contributing to the six EU Taxonomy goals

• 20% of the company's revenue has been assessed as contributing to other global environmental goals, directly or indirectly linked to the UN SDGs

• The company outperforms its sector and region in terms of emission factors according to quantitative data

• The company outperforms its sector and region in other resource efficiency areas, such as water use, raw material consumption or waste generation, according to quantitative data

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to environmental objectives

Social goals

• 20% of the company's revenue has been assessed to contribute to other global social goals, directly or indirectly linked to the UN SDGs

• The company outperforms relative to its region in terms of gender equality factors, according to quantitative data

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to social goals

The fund company applies a pass/fail methodology, whereby an entire investment is classified and reported as sustainable if the requirements for contributing, not doing significant harm and good corporate governance are met. Other management companies may use a different methodology and criteria to classify an investment as sustainable. Therefore, the levels of sustainable investments may differ between fund companies depending on the methodologies, criteria and data providers used, and not only on levels of sustainability within the funds.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that no sustainable investment caused significant harm to any environmental or social sustainable investment objective, the fund worked with the following principles during the reference period:

- Excluded companies that did not comply with international norms and standards;
- Excluded companies operating in controversial sectors and business areas;

• Excluded companies that had exposure to fossil fuels or other activities with negative environmental impacts;

• Excluded companies that were not considered to fulfil the levels of minimum social safeguards as defined by the EU Taxonomy; and

• Used an external research partner's assessment of the companies' corporate governance structure, labour relations, tax compliance and remuneration.

Principal adverse

## How were the indicators for adverse impacts on sustainability factors taken into account?

During the reference period, the fund company's model for detecting companies with extreme values among the negative principal impact indicators (PAI) was used to avoid investing in companies that have caused significant harm. The negative impact indicators for sustainability factors used are those outlined in Annex I of the Sustainable Finance Disclosure Regulation's technical standard (CDR 2022/1288) - as

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social

and employee matters, respect for human rights, anti-corruption and anti-bribery matters. well as the relevant PAIs in Tables 2 and 3 of Annex 1 of CDR 2022/1288. However, the indicators are dependent on the current availability of data.

Where sufficient coverage has been available, companies with significant negative performance in a geographical and sectoral context have not been included as sustainable investments.

Some indicators are considered through the exclusions outlined in the fund company's sustainability policy, in particular:

- Companies with activities in the fossil fuel sector;
- Companies with facilities/operations located in or near biodiversity-sensitive areas where the activities of these companies negatively impact these areas;

• Companies that do not comply with international norms and standards, such as the UN Global Compact principles and the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises;

• Companies involved in the manufacture or sale of controversial weapons (landmines, cluster bombs, chemical and biological weapons); and

• Companies whose activities affect endangered species.

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

During the reference period, the fund's investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights through the norm-based exclusion criteria set out in the fund company's sustainability policy.

Norm-based exclusions mean that the fund company expects issuers to adhere to international laws and conventions such as the following:

- The UN Principles for Responsible Investment
- The UN Global Compact
- The OECD Guidelines for Multinational Enterprises

• The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights

Companies with confirmed violations are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

During the reference period, the fund considered principal adverse impacts on sustainability factors through the exclusions outlined in the fund company's sustainability policy where companies with operations in the following were excluded:

• Companies with activities in the fossil fuel sector;

• Companies with facilities/operations located in or near biodiversity-sensitive areas where the activities of these companies negatively impact these areas;

• Companies that do not comply with international norms and standards, such as the UN Global Compact principles and the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises;

• Companies involved in the manufacture or sale of controversial weapons (landmines, cluster bombs, chemical and biological weapons); and

• Companies whose activities affect endangered species.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31 December 2023

Largest investments	Sector	% Assets	Country
Nestle SA	Consumer Staples	4.15	Switzerland
Novo Nordisk A/S	Health Care	3.63	Denmark
ASML Holding NV	Information Technology	3.44	Netherlands
Roche Holding AG	Health Care	2.75	Switzerland
AstraZeneca PLC	Health Care	2.68	United Kingdom
Novartis AG	Health Care	2.66	Switzerland
HSBC Holdings PLC	Financials	1.89	United Kingdom
SAP SE	Information Technology	1.78	Germany
Unilever PLC	Consumer Staples	1.59	United Kingdom
Siemens AG	Industrials	1.56	Germany
Sanofi	Health Care	1.50	France
L'Oreal SA	Consumer Staples	1.37	France
Allianz SE	Financials	1.22	Germany
Schneider Electric SE	Industrials	1.21	France
UBS Group AG	Financials	1.04	Switzerland

## What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

## What was the asset allocation?

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

#### The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

## In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

🖌 Yes:

🗌 In fossil gas 🛛 In nuclear energy

🗌 No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

## <sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of: - **turnover** reflecting

the share of revenue from green activities of investee companies

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies. The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

#### Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

#### Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable eco-

#### What was the share of investments made in transitional and enabling activities?

During 2023, the share of investments in transitional activities was 0.0%. The share in enabling activities was 0.2%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period (2022), the share of investments whose revenue was compatible with the EU Taxonomy was 1.0%. The compatible capital expenditure was 0.3% and operating expenditure 0.0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

At the end of 2023, the fund had an equivalent of 10.66% of investments that were classified as sustainable investments with environmental objectives but not compliant with the EU Taxonomy.

The EU Green Taxonomy does not cover all economic sectors that are relevant for the fund to invest in and that contribute to sustainability goals. There were also relatively few companies that reported in accordance with the EU Green Taxonomy. This may have been due both to their size and their geographical location. The fund company uses an internal process to define the contributions to environmental objectives and the classification of sustainable investments. The environmental goals included in SEB Investment Management's definition of sustainable investments and quantitative thresholds are:

20% of the company's revenues have been assessed to contribute to other global environmental goals, directly or indirectly linked to the United Nations Sustainable Development Goals (UN SDGs);
The company outperforms its sector and region in terms of emission factors according to quantita-

tive data;
The company outperforms its sector and region in other resource efficiency areas, such as water use, raw material consumption or waste generation, according to quantitative data; and

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to environmental objectives.

The fund company applies a "pass/fail" methodology, where an investment is classified and recognised as contributing if the investment meets one or more of the above criteria.

## What was the share of socially sustainable investments?

At the end of 2023, the fund had investments corresponding to 35.44% classified as socially sustainable investments.

The fund company uses an internal process to define the contribution to social goals and the classification of sustainable investments.

The social goals included in SEB Investment Management's definition of sustainable investments and quantitative thresholds are:

 $\bullet$  20% of the company's revenue has been assessed to contribute to other global social goals, directly or indirectly linked to the UN SDGs.

• The company outperforms relative to its region in terms of gender equality factors, according to quantitative data.

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to social goals.

The fund company applies a "pass/fail" methodology, where an investment is classified and recognised as sustainable if the investment meets one or more of the above criteria.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During reference the period, the fund used cash and derivatives to manage liquidity and flows. During the reference period, the fund did not conclude that any environmental or social minimum protection measures were deemed necessary for these investments.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the period, the fund excluded companies that did not meet the fund company's extensive criteria for sustainability and was actively engaged with the ambition of influencing companies in a more sustainable direction. One example of an exclusion is The Swatch Group. They were excluded as their governance structure exhibits deficiencies.

During the 2023 reference period, SEB Investment Management updated its sustainability policy with a clear position on biodiversity. Nature is the foundation of societies and economies and there is a growing appreciation for the need to include nature and biodiversity in investment decisions.

SEB Investment Management does not invest in companies that have verified violations of biodiversity-related norms. The fund company also excludes companies that operate and have a negative impact on endangered species or bio-sensitive areas, including Arctic drilling.

Furthermore, the fund company monitors the companies with the greatest influence on and exposure to deforestation of tropical forests and aims to set zero-tolerance targets for deforestation as the global data quality on deforestation improves.

Since 2023, SEB Investment Management has been a member of the Taskforce for Nature-related Financial Disclosures (TNFD) Forum and is a signatory of the Finance for Biodiversity Pledge. In addition, the fund company also works independently to increase the quality and coverage of biodiversity data through collaborations with various actors within or close to the scientific community.

## How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- How does the reference benchmark differ from a broad market index? The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.
   How did this financial product perform with regard to the sustainability indicators to deter
  - mine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

How did this financial product perform compared with the reference benchmark?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

## How did this financial product perform compared with the broad market index?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: SEB Global Focus Fund

Legal entity identifier: 529900MNF70NDBE54I22

## **Environmental and/or social characteristics**

#### Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally** sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did th	Did this financial product have a sustainable investment objective?					
••	Yes	•0	✓ No			
	It made sustainable investments with an environmental objective:%		It promoted Environmental/Social (E/S) char- acteristics and while it did not have as its objective a sustainable investment, it had a proportion of <b>41.39%</b> of sustainable invest- ments			
	in economic activities that qualify as envir- onmentally sustainable under the EU Taxonomy		✓ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy			
	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy		with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy			
			✓ with a social objective			
	It made sustainable investments with a social objective:%		It promoted E/S characteristics, but <b>did not</b> make any sustainable investments			

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the fund promoted environmental and social characteristics through exclusions, and by integration of sustainability risks and opportunities in investment decision-making. In addition, the fund company exercised active ownership and advocacy work in several companies on behalf of the fund.

To support the work of assessing the companies' sustainability risks and opportunities, the fund used a quantitative tool in the form of SEB Investment Management Sustainability Score, SIMS-S. SIMS-S is the fund company's proprietary sustainability model that rates all companies in the fund's investment universe based on multiple aspects of sustainability to establish a comprehensive and unbiased view.

The model consists of two main components: sustainability risks and sustainability opportunities. The model uses data from multiple vendors and is continuously modified as new data and new insights become available. The sustainability rating includes both a current status picture and a forward-looking perspective for each company. This provides portfolio managers the opportunity to assess current and future sustainability factors that can affect risk and return in the longer term.

Sustainability risks refer to environmental, social or governance-related events or circumstances that, if they were to occur, would have an actual or potential significant negative impact on the value of the investment.

Sustainability opportunities refer to environmental, social or governance-related events or circumstances that, if they were to occur, would have an actual or potential significant positive impact on the value of the investment.

SIMS-S was used in the portfolio construction, where the sustainability rating was included as part of the selection process of the companies in which the fund invested. SIMS-S was used both as a weighted sustainability score where companies with a high score were favoured, but also broken down into sub-scores, where certain parts of the sustainability rating were highlighted when certain sustainability themes/criteria were taken into account extra clearly in the selection process. Restrictions on the minimum score according to SIMS-S were included in the selection process.

The fund promoted environmental and social characteristics during the reference period by applying the fund company's exclusion criteria. The fund excluded investments in companies operating in industries or business areas deemed to have significant sustainability challenges.

Furthermore, the fund also promoted environmental and social attributes through its continuous efforts to influence companies' business models in a more sustainable direction. The fund company influenced companies on behalf of the fund by voting at general meetings, through dialogues with management teams and boards, and in cooperation with other asset managers or partners.

Read more about SIMS-S, exclusions and SEB Investment Management's sustainability approach at sebgroup.com/ fundcompanysustainability.

#### Sustainability indicators measure how the environmental or social characteristics promoted by the financial

product are attained.

#### How did the sustainability indicators perform?

The fund achieved a SIMS-S rating of 5.99 at the end of 2023, which was higher than the fund's benchmark index which had a rating of 5.71. SIMS-S ratings are set on a scale of 0-10 with a normal distribution, which means that the normal outcome for a company is 5.0 and that most companies have a rating between 4.0-6.0.

In 2023, the fund had 375 corporate engagements in 94 companies, corresponding to 46.54% of the portfolio. These dialogues differed in nature, with some being very detailed and time-consuming while others were handled within a limited time. This means that the number of dialogues has not been directly linked to the amount of time and resources spent on advocacy dialogue. The fund voted at the annual general meetings of 142 companies.

The fund excluded 14.69% of the benchmark index's value and the number of excluded companies totalled 262. The benchmark index included 1480 companies.

#### ...and compared to previous periods?

During the previous period, SEB Investment Management's sustainability model, SIMS-S, and its sustainability score showed that the fund had a weighted average score higher than the benchmark of the fund. The weighted average score of the fund was 5.78 vs the benchmark score of 5.46.

During the previous period, the fund, in accordance with SEB Investment Management's sustainability policy, excluded 201 companies from the fund's benchmark of 1,374 companies. During 2022, the fund voted in general meetings for 31 companies and had engagement dialogues with 38 companies.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the 2023 reference period, the fund aimed to make sustainable investments to a minimum of 20%. During the period, the fund owned one or more companies that could be classified as sustainable investments whose financial activities were deemed to contribute to one or more of the following environmental and social objectives.

Social objectives:

• United Nations Social Development Goals (UN SDGs): SDG 1 — No poverty; SDG 2 — Zero hunger; SDG 3 — Good health and well-being; SDG 4 — Quality education; SDG 5 — Gender equality; SDG 6 — Clean water and sanitation; SDG 8 — Decent work and economic growth; SDG 10 — Reduced inequalities; SDG 11 — Sustainable cities and communities; and SDG 16 — Peace, justice and strong institutions

• Other social sustainability goals such as gender equality, social inclusion and diversity.

Environmental objectives considered environmentally sustainable according to the EU Taxonomy:

• The six goals defined by the EU Green Taxonomy: climate change mitigation, climate change adaptation, sustainable use and protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems.

Environmental objectives that are not considered compatible with the EU Taxonomy

• The United Nations Environment-related Sustainable Development Goals (UN SDGs): SDG 6 — Clean water and sanitation; SDG 7 — Affordable and clean energy; SDG 9 — Industry, innovation and infrastructure; SDG 11 — Sustainable cities and communities; SDG 12 — Responsible consumption and production; SDG 13 — Climate action; SDG 14 — Life below water; and SDG 15 — Life on land

• Operational resource efficiency in key environmental areas such as carbon use, water use or use of raw materials.

The sustainable goals included in SEB Investment Management's definition of sustainable investments and quantitative thresholds are:

Environmental goals

• 10% of the company's revenue, capital expenditure or operating costs have been classified by estimation or reporting as significantly contributing to the six EU Taxonomy goals

 $\bullet~20\%$  of the company's revenue has been assessed as contributing to other global environmental goals, directly or indirectly linked to the UN SDGs

• The company outperforms its sector and region in terms of emission factors according to quantitative data

• The company outperforms its sector and region in other resource efficiency areas, such as water use, raw material consumption or waste generation, according to quantitative data

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to environmental objectives

Social goals

 $\bullet$  20% of the company's revenue has been assessed to contribute to other global social goals, directly or indirectly linked to the UN SDGs

• The company outperforms relative to its region in terms of gender equality factors, according to quantitative data • The company has been fundamentally analysed and assessed as having a high contribution and exposure to social goals

The fund company applies a pass/fail methodology, whereby an entire investment is classified and reported as sustainable if the requirements for contributing, not doing significant harm and good corporate governance are met. Other management companies may use a different methodology and criteria to classify an investment as sustainable. Therefore, the levels of sustainable investments may differ between fund companies depending on the methodologies, criteria and data providers used, and not only on levels of sustainability within the funds.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In order to ensure that no sustainable investment caused significant harm to any environmental or social sustainable investment objective, the fund has worked with the following principles during the reference period:

- Excluded companies that do not comply with international norms and standards;
- Excluded companies operating in controversial sectors and business areas;

• Excluded companies that have exposure to fossil fuels or other activities with negative environmental impacts;

• Excluded companies that are not considered to fulfil the levels of minimum social safeguards as defined by the EU Taxonomy; and

• Used an external research partner's assessment of the companies' governance structure, labour relations, tax compliance and remuneration.

### How were the indicators for adverse impacts on sustainability factors taken into account?

During the reference period, the fund company's model for detecting companies with extreme values among the negative principal impact indicators (PAI) was used to avoid investing in companies that have caused significant harm. The negative impact indicators for sustainability factors used are those outlined in Annex I of the Sustainable Finance Disclosure Regulation's technical standard (CDR 2022/1288) - as well as the relevant PAIs in Tables 2 and 3 of Annex 1 of CDR 2022/1288. However, the indicators are dependent on the current availability of data.

Where sufficient coverage has been available, companies with significant negative performance in a geographical and sectoral context have not been included as sustainable investments.

Some indicators are considered through the exclusions outlined in the fund company's sustainability policy, in particular:

- Companies with activities in the fossil fuel sector;
- Companies with facilities/operations located in or near biodiversity-sensitive areas where the activities of these companies negatively impact these areas;

• Companies that do not comply with international norms and standards, such as the UN Global Compact principles and the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises;

• Companies involved in the manufacture or sale of controversial weapons (landmines, cluster bombs, chemical and biological weapons); and

• Companies whose activities affect endangered species.

Read more about exclusions within SEB Investment Management's sustainability approach at sebgroup. com/fundcompanysustainability.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

During the reference period, the fund's investments have been aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights through the normbased exclusion criteria set out in the fund company's sustainability policy and using the SIMS-S.

Norm-based exclusions mean that the fund company expects issuers to adhere to international laws and conventions such as the following:

- The UN Principles for Responsible Investment
- The UN Global Compact
- The OECD Guidelines for Multinational Enterprises

• The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights

Companies with confirmed violations are not considered sustainable investments.

#### Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters. The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## R

## How did this financial product consider principal adverse impacts on sustainability factors?

During the reference period, the fund considered principal adverse impacts on sustainability factors through the exclusions outlined in the fund company's sustainability policy but also by using SEB Investment Management Sustainability Score, SIMS-S, the fund company's sustainability model. Companies with operations in the following were excluded:

• Companies with activities in the fossil fuel sector;

• Companies with facilities/operations located in or near biodiversity-sensitive areas where the activities of these companies negatively impact these areas;

• Companies that do not comply with international norms and standards, such as the UN Global Compact principles and the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises;

• Companies involved in the manufacture or sale of controversial weapons (landmines, cluster bombs, chemical and biological weapons); and

• Companies whose activities affect endangered species.

To support the work of assessing the companies' sustainability risks and opportunities, the fund used SEB Investment Management Sustainability Score, SIMS-S. It was used in portfolio construction, where the sustainability rating was included as part of the selection process of the companies in which the fund was to invest. SIMS-S was used both as a weighted sustainability score, where companies with a high score were favoured, but also broken down into sub-scores where certain parts of the sustainability rating were highlighted when certain sustainability themes/criteria were given a greater focus in the selection process. Restrictions on the minimum score according to SIMS-S were included in the selection process.

Using SIMS-S, the fund company's proprietary sustainability model, the following indicators for adverse impacts were considered:

- Greenhouse gas emissions of the investee companies;
- The carbon footprint of the investee companies;
- Greenhouse gas intensity of the investee companies;
- Whether companies operate in the fossil fuel sector;
- Energy consumption intensity per sector with high climate impact, for the investee companies;

• Whether the investee companies have facilities/operations located in or near biodiversity-sensitive areas where the operations of these companies negatively impact these areas;

- Emissions to water generated by the investee companies;
- The amount of hazardous waste generated by the investee companies;
- Whether the companies we invest in lack processes and compliance mechanisms to monitor compliance with the UN Global Compact and the OECD Guidelines for Multinational Enterprises;
- The unadjusted gender pay gap in the investee companies;
- Gender distribution of the board of directors of the investee companies;

• Whether the investee companies have decarbonisation initiatives in place to align with the Paris Agreement; and

• Whether the investee companies have a supplier code of conduct (against unsafe working conditions, precarious work, child labour and forced labour).

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest propor-tion of investments** of the financial product during the reference period which is: 31 December 2023

Largest investments	Sector	% Assets	Country United States United States	
Apple Inc	Information Technology	4.05

## What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

## What was the asset allocation?

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

## In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

□ In fossil gas □ In nuclear energy

✓ No

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#### Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

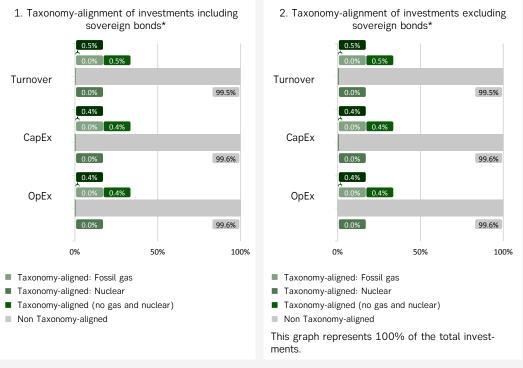

#### Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable ecoThe graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

## What was the share of investments made in transitional and enabling activities?

During 2023, the share of investments in transitional activities was 0.0%. The share in enabling activities was 0.0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period (2022), the share of investments whose revenue was compatible with the EU Taxonomy was 1.3%. Compatible capital expenditure was 0% and operating expenditure 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

At the end of 2023, the fund had an equivalent of 6.09% of investments that were classified as sustainable investments with environmental objectives but not compliant with the EU Taxonomy.

The EU Green Taxonomy does not cover all economic sectors that are relevant for the fund to invest in and that contribute to sustainability goals. There were also relatively few companies that reported in accordance with the EU Green Taxonomy. This may have been due both to their size and their geographical location. The fund company uses an internal process to define the contributions to environmental objectives and the classification of sustainable investments. The environmental goals included in SEB Investment Management's definition of sustainable investments and quantitative thresholds are:

20% of the company's revenues have been assessed to contribute to other global environmental goals, directly or indirectly linked to the United Nations Sustainable Development Goals (UN SDGs);
The company outperforms its sector and region in terms of emission factors according to quantita-

tive data;
The company outperforms its sector and region in other resource efficiency areas, such as water use, raw material consumption or waste generation, according to quantitative data; and

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to environmental objectives.

The fund company applies a "pass/fail" methodology, where an investment is classified and recognised as contributing if the investment meets one or more of the above criteria.

## What was the share of socially sustainable investments?

At the end of 2023, the fund had investments corresponding to 27.97% classified as socially sustainable investments.

The fund company uses an internal process to define the contribution to social goals and the classification of sustainable investments.

The social goals included in SEB Investment Management's definition of sustainable investments and quantitative thresholds are:

 $\bullet$  20% of the company's revenue has been assessed to contribute to other global social goals, directly or indirectly linked to the UN SDGs.

• The company outperforms relative to its region in terms of gender equality factors, according to quantitative data.

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to social goals.

The fund company applies a "pass/fail" methodology, where an investment is classified and recognised as sustainable if the investment meets one or more of the above criteria.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the period, the fund used cash and derivatives to manage liquidity and flows. During the reference period, the fund did not conclude that any environmental or social minimum protection measures were deemed necessary for these investments.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

With the support from the fund company's sustainability model SIMS-S, which was used in the portfolio construction and selection process of companies to invest in, the fund invested in companies such as Innergex Renewable Energy and ERG SpA. Innergex Renewable Energy produces renewable energy and operates in both wind and hydropower, as well as developing and operating solar energy plants. The company also works with storage of renewable energy. The company made a positive contribution to several of the UN Sustainable Development Goals. The largest positive contributions were within SDG 7: Affordable and Clean Energy, and SDG 13: Climate Action.

ERG SpA engages in the generation and distribution of electricity from renewable sources. It operates through the following segments: wind, solar, and thermoelectric. This company was on SEB Investment Management's transition list as they were considered to contribute to positive change in accordance with the management company's sustainability policy.

In the fund's role as an active shareholder and investor, the fund company seeks to safeguard clients' common interests in ownership issues and engage with companies on the development of their sustainability practices.

In the fund's position as shareholder, active ownership is conducted via voting at shareholder meetings, in support of, or against, specific shareholder or management proposals, and via proxy voting according to the fund company's policy for shareholder engagement. Even though this is carried out according to equity holdings it also positively affects the fund's corresponding bond holdings.

Outside the Nordic region, the fund company collaborates with other investors via IIGCC, PRI Collaboration Platform, Access to Medicine, Global Child Forum, and others. Direct dialogues are also conducted with companies outside the Nordic region. The fund company cooperates with Sustainalytics and Institutional Shareholder Services (ISS), two international leaders in engaging with companies through dialogue. The fund company's partners maintain an ongoing, direct dialogue with the management and the board of the companies in which the fund invests. Working with other asset managers, under the leadership of the fund company's partners, the fund is able to be more successful in dialogues with companies outside the Nordic region, where the funds' ownership is typically relatively small.

During the year, engagement work in 94 companies was performed on behalf of the fund.

During the reference period, SEB Investment Management updated its sustainability policy with a clear position on biodiversity. Nature is the foundation of societies and economies and there is a growing appreciation for the need to include nature and biodiversity in investment decisions.

SEB Investment Management does not invest in companies that have verified violations of biodiversity-related norms. The fund company also excludes companies that operate and have a negative impact on endangered species or bio-sensitive areas.

To reduce the risks of deforestation of the tropical forests, SEB Investment Management monitors companies with the greatest influence on and exposure to tropical deforestation and aims to set net zero deforestation targets as the global data quality on deforestation improves.

SEB Investment Management is a member of the Taskforce for Nature-related Financial Disclosures (TNFD) Forum, and a signatory of the Finance for Biodiversity Pledge and is working to increase the quality and coverage of biodiversity-related data sets through scientific collaborations.

Read more about SEB Investment Management's work as an active owner in the company's policy for Shareholder Engagement at https://sebgroup.com/about-us/our-divisions/asset-management/seb-asset-management-ab/ legal-documents-and-policies.

## How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How does the reference benchmark differ from a broad market index?

The fund did not use a benchmark index to determine whether it was aligned with the environmental and/ or social characteristics it promotes and therefore has no measure of it for the reference period.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

How did this financial product perform compared with the reference benchmark?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

#### How did this financial product perform compared with the broad market index?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: SEB Global Climate Opportunity Fund

Legal entity identifier: 529900R9A2RR7UQERR02

## Sustainable investment objective

means an investment in an economic activity that con-	
tributes to an environmental	
or social objective, provided	
that the investment does	
not significantly harm any	
environmental or social	
objective and that the inves-	
tee companies follow good	
governance practices.	

Sustainable investment

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did th	his financial product have a sustainable i	nvestmen	t objective?
••	✓ Yes	• 0	□ No
	It made sustainable investments with an envionmental objective: 99.03%	-	It promoted Environmental/Social (E/S) char- acteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments
	in economic activities that qualify as environmentally sustainable under the EU Taxonomy	-	with an environmental objective in economic activities that qualify as environ- mentally sustainable under the EU Taxonomy
	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy		with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
			with a social objective
	It made sustainable investments with a social objective:%		It promoted E/S characteristics, but <b>did not</b> make any sustainable investments

## To what extent was the sustainable investment objective of this financial product met?

During the 2023 reference period, the fund had environmental sustainability as its investment objective. The fund's sustainability objective sought to create a positive climate impact to achieve, inter alia, the long-term objective of the Paris Agreement.

The sustainability approach was made up of companies that contributed to at least one of the six environmental objectives set out in Article 9 of the EU Taxonomy Regulation. The alignment of the companies' activities with the objectives of the EU Taxonomy Regulation was based on data from third-party vendors. Depending on the investment opportunities, the fund could contribute to any of the six objectives in the EU Taxonomy Regulation. The fund also considered companies whose products and services contributed to the climate-related UN Sustainability Development Goals and sought to influence companies on sustainability issues through active ownership. All equities were assessed and measured regarding their ability to contribute to combatting climate change.

To support the work of assessing the companies' sustainability risks and opportunities, the fund used a quantitative tool in the form of the SEB Investment Management Sustainability Score, SIMS-S. SIMS-S is the fund company's proprietary sustainability model that rates all companies in the fund's investment universe based on multiple aspects of sustainability to establish a comprehensive and unbiased view.

The model consists of two main components: sustainability risks and sustainability opportunities. The model uses data from multiple vendors and is continuously modified as new data and new insights become available. The sustainability rating includes both a current status picture and a forward-looking perspective for each company. This provides fund managers the opportunity to assess current and future sustainability factors that can affect risk and return in the longer term.

Sustainability risks refer to environmental, social or governance-related events or circumstances that, if they were to occur, would have an actual or potential significant negative impact on the value of the investment.

Sustainability opportunities refer to environmental, social or governance-related events or circumstances that, if they were to occur, would have an actual or potential significant positive impact on the value of the investment.

The fund also promoted environmental and social attributes through its continuous efforts to influence companies' business models in a more sustainable direction. The fund company influenced companies on behalf of the fund by voting at general meetings, through dialogues with management teams and boards, and in cooperation with other asset managers or partners.

Furthermore, the fund promoted environmental and social characteristics during the reference period by applying the fund company's exclusion criteria. The fund excluded investments in companies operating in industries or business areas deemed to have significant sustainability challenges.

Read more about SIMS-S, exclusions and SEB Investment Management's sustainability approach at sebgroup.com/ fundcompanysustainability.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

#### How did the sustainability indicators perform?

The outcome for the reported indicators for SEB Global Climate Opportunity Fund with data as of the end of 2023:

• A score based on revenues from a companys' products and services which contribute to one or several of the climate-related UN Sustainability Development Goals (SDGs), including SDG 7 (Clean Energy), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land), SDG 12 (Responsible Consumption), and SDG 11 (Sustainable Cities) compared to the benchmark; the outcome was a Net contribution of ~3 units higher than the benchmark (MSCI All Country World Net Return Index). The scores range from -10 to 10.

• Level of greenhouse gas reduction targets using the SBTi methodology compared to the benchmark; the outcome was ~1.1% higher than the benchmark (MSCI All Country World Net Return Index). The scores range between 0 and 10.

• Reported and estimated taxonomy alignment compared to the benchmark; the outcome was ~37 percentage units higher than the benchmark (MSCI All Country World Net Return Index).

• Carbon intensity measured as Scopes 1 & 2 compared to the benchmark. Scope 1 is direct emissions and Scope 2 is purchased emissions by a company; the outcome was ~33% lower than the benchmark (MSCI All Country World Net Return Index). The unit of carbon intensity is measured as Tco2e/musd (tonnes of CO2 equivalent/million US dollars) revenue (Scopes 1&2).

• SEB Investment Management's sustainability model, SIMS-S, and its sustainability score shows that the fund has a weighted average adjusted score higher than the benchmark of the fund. The weighted average adjusted score of the fund is 7.4 vs the benchmark score of 5.7.

#### ...and compared to previous periods?

In the previous period (2022), the fund had a score based on revenues from products and services contributing to climate-related UN SDGs at ~4 units higher, a level of greenhouse reduction targets of ~7% higher, an estimated taxonomy alignment of ~14.5 percentage units higher, and a carbon intensity of ~20% lower, all compared to the benchmark.

## How did the sustainable investments not cause significant harm to any sustainable investment objective?

To ensure that no sustainable investment caused significant harm to any environmental or social sustainable investment objective, the fund worked with the following principles during the reference period:

- Excluded companies that did not comply with international norms and standards;
- Excluded companies operating in controversial sectors and business areas;

• Excluded companies that had exposure to fossil fuels or other activities with negative environmental impacts;

• Excluded companies that were not considered to fulfil the levels of minimum social safeguards as defined by the EU Taxonomy; and

• Used an external research partner's assessment of the companies' corporate governance structure, labour relations, tax compliance and remuneration.

The fund applied an additional layer of screening, where sustainable companies according to the central process needed to have an even higher value on controversies score and low obstruction from products and services to be investable. They also needed to have a certain rating from SIMS-S.

Apart from the data-driven analysis and exclusion, each sustainable investment was subject to fundamental tests (challenges) to identify whether it causes any significant harm to any other environmental or social sustainable investment objective.

#### How were the indicators for adverse impacts on sustainability factors taken into account?

During the reference period, the fund company's model for detecting companies with extreme values among the negative principal impact indicators (PAI) was used to avoid investing in companies that have caused significant harm. The negative impact indicators for sustainability factors used are those outlined in Annex I of the Sustainable Finance Disclosure Regulation's technical standard (CDR 2022/1288) - as well as the relevant PAIs in Tables 2 and 3 of Annex 1 of CDR 2022/1288. However, the indicators are dependent on the current availability of data.

Where sufficient coverage has been available, companies with significant negative performance in a geographical and sectoral context have not been included as sustainable investments.

Some indicators are considered through the exclusions outlined in the fund company's sustainability policy, in particular:

- Companies with activities in the fossil fuel sector;
- Companies with facilities/operations located in or near biodiversity-sensitive areas where the activities of these companies negatively impact these areas;

#### Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters. • Companies that do not comply with international norms and standards, such as the UN Global Compact principles and the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises;

• Companies involved in the manufacture or sale of controversial weapons (landmines, cluster bombs, chemical and biological weapons); and

• Companies whose activities affect endangered species.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

During the reference period, the fund's investments have been aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights through the normbased exclusion criteria set out in the fund company's sustainability policy and using the SIMS-S.

Norm-based exclusions mean that the fund company expects issuers to adhere to international laws and conventions such as the following:

- The UN Principles for Responsible Investment
- The UN Global Compact
- The OECD Guidelines for Multinational Enterprises

• The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights

Companies with confirmed violations are not considered sustainable investments.

## How did this financial product consider principal adverse impacts on sustainability factors?

During the reference period, the fund considered principal adverse impacts on sustainability factors through the exclusions outlined in the fund company's sustainability policy where companies with operations in the following were excluded:

• Companies with activities in the fossil fuel sector;

• Companies with facilities/operations located in or near biodiversity-sensitive areas where the activities of these companies negatively impact these areas;

• Companies that do not comply with international norms and standards, such as the UN Global Compact principles and the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises;

• Companies involved in the manufacture or sale of controversial weapons (landmines, cluster bombs, chemical and biological weapons); and

· Companies whose activities affect endangered species.

Using SIMS-S, the fund company's proprietary sustainability model, the following indicators for adverse impacts were considered:

- · Greenhouse gas emissions of the investee companies;
- The carbon footprint of the investee companies;
- · Greenhouse gas intensity of the investee companies;
- Whether companies operate in the fossil fuel sector;
- Energy consumption intensity per sector with high climate impact, for the investee companies;

• Whether the investee companies have facilities/operations located in or near biodiversity-sensitive areas where the operations of these companies negatively impact these areas;

- Emissions to water generated by the investee companies;
- The amount of hazardous waste generated by the investee companies;

• Whether the investee companies lack processes and compliance mechanisms to monitor compliance with the UN Global Compact and the OECD Guidelines for Multinational Enterprises;

- The unadjusted gender pay gap in the investee companies;
- Gender distribution of the board of directors of the investee companies;

• Whether the investee companies have decarbonisation initiatives in place to align with the Paris Agreement; and

• Whether the investee companies have a supplier code of conduct (against unsafe working conditions, precarious work, child labour and forced labour).

In the fund's fundamental analysis process, a sustainability assessment of, among other things, each company's products, services, operations, and suppliers is conducted. To support the work of assessing the companies' sustainability risks and opportunities, the fund managers used a quantitative tool in the form of the SEB Investment Management Sustainability Score, SIMS-S.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest propor-tion of investments** of the financial product during the reference period which is: 31 December 2023

Largest investments	Sector	% Assets	Country
Brambles Ltd	Industrials	2.56	Australia
Prologis Inc	Real Estate	2.45	United States
Getlink SE	Industrials	2.41	France

-7

## What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

## What was the asset allocation?

## In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

✓ Yes:

🗹 In fossil gas 🗌 In nuclear energy

🗌 No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include compre-

hensive safety and waste management

rules.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies

sovereign bonds.

capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies

#### **Enabling** activities

directly enable other activities to make a substantial contribution to an environmental objective.

#### **Transitional activities**

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of sustainable investments with an environmental objec-

The EU Green Taxonomy does not cover all economic sectors that are relevant for the fund to invest in and that contribute to sustainability goals. There were also relatively few companies that reported in accordance with the EU Green Taxonomy. This may have been due both to their size and their geographical location.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there

is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the

Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the

second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

During 2023, the share of investments in transitional activities was 0.0015%. The share in enabling activities was 0.5%.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period (2022), the share of investments whose revenue was compatible with the EU Taxonomy was 12.5%. The compatible capital expenditure was 3.4% and operating expenditure 0.0%

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable ecoThe fund company uses an internal process to define the contributions to environmental objectives and the classification of sustainable investments. The environmental goals included in SEB Investment Management's definition of sustainable investments and quantitative thresholds are:

20% of the company's revenues have been assessed to contribute to other global environmental goals, directly or indirectly linked to the United Nations Sustainable Development Goals (UN SDGs);
 The company autoefforms its sector and region in terms of omission factors according to quantital context of the company autoefforms its sector.

• The company outperforms its sector and region in terms of emission factors according to quantitative data;

• The company outperforms its sector and region in other resource efficiency areas, such as water use, raw material consumption or waste generation, according to quantitative data; and

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to environmental objectives.

The fund company applies a "pass/fail" methodology, where an investment is classified and recognised as contributing if the investment meets one or more of the above criteria.

## What was the share of socially sustainable investments?

As the fund had environmental sustainability as its objective; the fund had a 0% share of sustainable investments with a social objective during the reference period.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards? During the period, the fund used cash to manage liquidity and flows. During the reference period, the fund did not conclude that any environmental or social minimum protection measures were deemed necessary for these investments.

# What actions have been taken to attain the sustainable investment objective during the reference period?

During the year, the fund invested in companies that maintain the fund's objective, which aims to create a positive contribution to combatting climate change and its impacts through, among other ways, a long-term reduction in carbon emissions by fulfilling any of thresholds found below:

• 10% of the company's revenue, capital expenditure or operating costs have been classified by estimation or reporting as significantly contributing to the six EU Taxonomy goals;

• 20% of the company's revenues have been assessed to contribute to other global environmental goals, directly or indirectly linked to the United Nations Sustainable Development Goals (UN SDGs);

• The company outperforms its sector and region in terms of emission factors according to quantitative data;

• The company outperforms its sector and region in other resource efficiency areas, such as water use, raw material consumption or waste generation, according to quantitative data; and

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to environmental objectives.

An example of such a company is Terna Energy, which is included based on a reported taxonomy alignment of 79% and a net positive contribution to SDG 7 (Clean Energy). This company works mostly in Greece and focuses on creating energy from the wind, sun, and water. They are also involved in turning biogas and waste into energy. As Greece relies heavily on oil for energy, the work Terna Energy does is especially vital for making the country's energy sources cleaner and better for the planet.

The fund excludes companies that do not meet the fund company's extensive criteria for sustainability, and in this fund, there are additional exclusion criteria included. The fund manager reviews norm-based research reports on each company entering the fund at each rebalancing, in order to make sure that companies are identified if, among other things, they are involved in child labour, forced labour, or have established their country of incorporation in tax haven countries. If a company is involved in such controversies and has not expressed any commitment to prevent future occurrences, the company is excluded until further notice.

During the year, the fund company excluded Norfolk Southern Corp after a train incident in Ohio, USA. The derailing caused gas lightning and hazardous materials to spread in the region of the incident. Following this, short- and long-term health concerns were raised for the region's population. The company expressed commitment in cleaning, helping the community and cooperating with the investigation. However, APNews reported that the company was keeping minimum safety standards, which could have caused the accident. With this motivation, the position was sold off as the fund management keep monitoring the aftermath.

When it comes to engagement, the fund company made 55 engagements with 23 companies in the fund throughout the year. Of the engagements, 12 concerned environmental issues, 17 social issues and 19 governance issues.

## How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective How does the reference benchmark differ from a broad market index?

The fund did not use a benchmark to fulfil the sustainable investment objective.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The fund did not use a benchmark index to determine whether it was aligned with the environmental and/ or social characteristics it promotes and therefore has no measure of it for the reference period.

- How did this financial product perform compared with the reference benchmark? The fund did not use a benchmark to fulfil the sustainable investment objective.
- How did this financial product perform compared with the broad market index? The fund did not use a benchmark to fulfil the sustainable investment objective.

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: SEB Nordic Future Opportunity Fund

Legal entity identifier: 529900W8404Z9S4UFF18

## Sustainable investment objective

Sustaiı	nab	le	investm	e	ent	
means	an	in	vestmen	t	in	an

economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally** sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# To what extent was the sustainable investment objective of this financial product met?

During the 2023 reference period, the fund made positive environmental and social impacts to help achieve, among other things, the long-term objectives of the Paris Agreement. This was performed by investing in companies that offered products or services within specified themes considered to contribute to the goals aligned with the Paris Agreement, UN Sustainable Development Goals (SDGs), EU Taxonomy, and the EU Green Deal's long-term objectives.

The core themes of the fund: energy transition (companies that contributed to reducing greenhouse gas emissions by increasing renewable capacities, or enabled the transition from a fossil-based economy to renewable, thus creating a positive societal impact), resource efficiency and circularity (companies that accelerated and enabled the necessary green transition by providing eco-friendly products and services, or enabled others to save resources and/or energy consumption), sustainable mobility (companies that offered sustainable mobility and infrastructure solutions described in EU regulatory frameworks, e.g. the EU Sustainable and Smart Mobility Strategy), and healthy societies (companies that enabled the transition to plant-based nutrition, improved the societal level of health, safety and education, creating more inclusive communities). The fund invested in companies with a minimum of 20% of revenue derived from activities related to the fund's core themes or where at least 50% of the weighted revenues at the portfolio level were from activities related to the fund's core themes.

The objective of reducing carbon emissions was attained by identifying and investing in companies with verifiable revenue streams in relation to the identified structural themes.

The fund used a "pass/fail approach", where a company is classified and accounted for as sustainable if the company, based on quantitative measurements provided by third party data providers, fulfils one or more of the following conditions:

\* A minimum of 10% of their revenue is potentially EU Taxonomy-aligned based on the latest available data either from the company or a third party;

 $^{\ast}$  A minimum of 20% of their total revenue is attributable to the enablement or direct contribution to any UN SDG; and

\* A combination of a minimum of 20% of their total revenue is attributable to the enablement or direct contribution to any UN SDGs, or revenue streams potentially EU Taxonomy-aligned based on the last data available from the company or a third party.

In addition to complying with at least one of the conditions above, the issuer must pass the do no significant harm ("DNSH") test applied on the issuer's entire revenue.

#### Sustainability indicators measure how the sustainable objectives of this financial product are attained.

#### How did the sustainability indicators perform?

The fund evaluated companies from a business model perspective, starting with the thematic view, where each respective business model was assessed based on its contribution to the sustainable objectives. As all new equities of the fund were assessed and measured regarding their ability to contribute to the fund's thematises, all holdings were considered to meet the requirements of the fund's sustainability indicators.

The fund's Scopes 1&2 GHG Intensity (tCO2e/mEUR) adjusted for the GHG data coverage was 29 compared to 55 for the benchmark index. Meanwhile the fund had a higher exposure towards the high emitting sector industrials and lower exposure to the low emiting financials sector. The fund's Scopes 1&2 GHG Emissions (tCO2) was 3,280 compared to 14,650 for the benchmark index. This number was also adjusted by the GHG data coverage and the benchmark was assumed to have invested in the same market value as the fund, but according to the benchmarks's investment weights. The fund had 64% of the weighted reveues at the portfolio level attributed to activities related to the fund's core themes.

In 2023, the share of companies with a minimum of 20% of revenue derived from activites related to the following themes:

- Circularity and resource efficiency: 42.96%
- Energy Transition: 24.2%
- Healthy Societies: 26.98%
- Sustainable Mobility: 3.39%
- Other (including cash and unspecified): 2.37%

#### ...and compared to previous periods?

During the previous period, the fund was changed from Article 8 to Article 9, so it is not accurate to compare the fund's indicators with previous periods.

## How did the sustainable investments not cause significant harm to any sustainable investment objective?

The fund company's sustainability policy is used through the exclusions described herein as a first step to ensure that no investment causes significant harm to any environmental or social sustainable investment objective.

Companies were excluded and not eligible for investment if they:

- did not comply with international norms and standards;
- operated in controversial sectors and business areas; or
- had exposure to fossil fuels or other activities with negative environmental impacts.

The fund was also screened for misalignment/obstruction towards the UN SDGs. Any significant misalignment led to exclusion from the fund's sustainable investment universe if the issuer was considered at risk of causing significant harm to environmental and/or social objectives.

Apart from the data-driven analysis and exclusion, each sustainable investment was subject to fundamental tests (challenges) to identify whether it caused any significant harm to any other environmental or social sustainable investment objective.

The fund company has developed internal tools and processes to assess and consider the negative consequences of the Principal Adverse Impact ("PAI") indicators in Annex I of the CDR 2022/1288, relevant PAIs in relevant PAI Tables 2 and 3 of Annex 1 of the CDR 2022/1288. However, the indicators were subject to current data availability. They were, together with the fundamental analysis, the internal exclusion process, and the internal proprietary sustainability rating from SIMS-S, included in the impact analysis in the do no significant harm ("DNSH") test.

#### Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### How were the indicators for adverse impacts on sustainability factors taken into account?

Principal Adverse Impacts indicators (PAI) from Annex 1 - Table 1 of the CDR (EU) 2022/1288, that were taken into account by the fund company's sustainability policy, and excluded from investments:

- PAI 4: Exposure to companies active in the fossil sector
- PAI 10: Violations of UN Global Compact Principles & OECD Guidelines for multinational enterprises
- PAI 14: Exposure to controversial weapons

PAIs from Annex 1 - Table 1 of the CDR (EU) 2022/1288, that were taken into account through SIMS-S and fundamental analysis by applying a threshold approach to remove the issuers at risk of causing significant harm:

- PAI 1: GHG emissions
- PAI 2: Carbon footprint
- PAI 3: GHG intensity of investee companies
- PAI 5: Share of non-renewable energy consumption and production
- PAI 6: Energy consumption intensity per high-impact climate sector
- PAI 7: Activities negatively affecting biodiversity-sensitive areas
- PAI 8: Emissions to water

• PAI 9: Hazardous waste ratio

• PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises.

- PAI 12: Unadjusted gender pay gap
- PAI 13: Board gender diversity

 $\bullet$  PAI 4 from Annex 1 - Table 2 of CDR (EU) 2022/1288: Investments in companies without carbon emission reduction initiatives

• PAI 4 from Annex 1 - Table 3 of CDR (EU) 2022/1288: Lack of a supplier code of conduct All the PAI indicators are subject to data availability and may also change with improving data quality and availability. Hence, all adverse impact on sustainability factors is carried out based on best effort.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

During the reference period, the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights through the normbased exclusion criteria set out in the fund company's sustainability policy and using the SIMS-S.

Norm-based exclusions mean that the fund company expects issuers to adhere to international laws and conventions such as the following:

- The UN Principles for Responsible Investment
- The UN Global Compact
- The OECD Guidelines for Multinational Enterprises

• The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights

Issuers with confirmed violations are not considered sustainable investments.

Read more about exclusions within SEB Investment Management's sustainability approach at sebgroup. com/fundcompanysustainability.

## How did this financial product consider principal adverse impacts on sustainability factors?

Prior to investment decisions, the following PAIs were considered.

On an exclusionary basis:

From Annex 1 - Table 1 of CDR (EU) 2022/1288

- PAI 4: Exposure to companies active in the fossil sector
- PAI 10: Violations of UN Global Compact Principles & OECD Guidelines for multinational enterprises
- PAI 14: Exposure to controversial weapons

During the ESG integration process using the SIMS-S combined with fundamental analysis:

From Annex 1 - Table 1 of CDR (EU) 2022/1288

- PAI 1: GHG emissions
- PAI 2: Carbon footprint
- PAI 3: GHG intensity of investee companies
- PAI 4: Exposure to companies active in the fossil sector
- PAI 5: Share of non-renewable energy consumption and production
- PAI 6: Energy consumption intensity per high-impact climate sector
- PAI 7: Activities negatively affecting biodiversity-sensitive areas
- PAI 8: Emissions to water
- PAI 9: Hazardous waste ratio
- PAI 10: Violations of UN Global Compact Principles & OECD Guidelines for Multinational Enterprises

• PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises.

- PAI 12: Unadjusted gender pay gap
- PAI 13: Board gender diversity
- PAI 14: Exposure to controversial weapons

During the ESG integration process, using quantitative and fundamental analysis outside of SIMS-S:

From Table 1-Annex 1 of CDR (EU) 2022/1288

- PAI 1: GHG emissions
- PAI 2: Carbon footprint

- PAI 3: GHG intensity of investee companies
- PAI 4: Exposure to companies active in the fossil sector
- PAI 6: Energy consumption intensity per high-impact climate sector
- PAI 7: Activities negatively affecting biodiversity-sensitive areas
- PAI 8: Emissions to water
- PAI 9: Hazardous waste ratio
- PAI 10: Violations of UN Global Compact Principles & OECD Guidelines for Multinational Enterprises

• PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises.

- PAI 12: Unadjusted gender pay gap
- PAI 13: Board gender diversity
- PAI 14: Exposure to controversial weapons

What was the asset allocation?

During the investment period, these PAIs were considered.

In engagement dialogues with issuers:

• PAI 13: Board gender diversity - from Annex 1 - Table 1 of CDR (EU) 2022/1288

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31 December 2023

Largest investments	Sector	% Assets	Country
Novo Nordisk A/S	Health Care	9.27	Denmark
Hexagon AB	Information Technology	5.80	Sweden
AstraZeneca PLC	Health Care	5.55	United Kingdom
Nibe Industrier AB	Industrials	5.21	Sweden
Atlas Copco AB	Industrials	4.74	Sweden
ABB Ltd	Industrials	4.21	Switzerland
OX2 AB	Industrials	3.63	Sweden
AddTech AB	Industrials	3.48	Sweden
EQT AB	Financials	3.36	Sweden
Beijer Ref AB	Industrials	3.24	Sweden
Boliden AB	Materials	3.12	Sweden

## What was the proportion of sustainability-related investments?

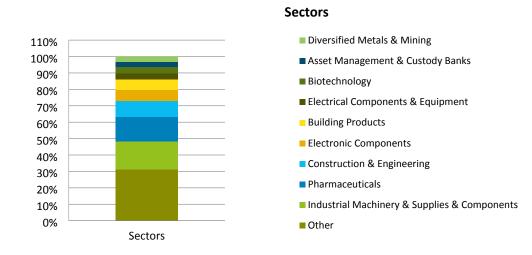

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

## In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy <sup>1</sup>?

✓ Yes:

🗌 In fossil gas 🛛 In nuclear energy

🗌 No

for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To comply with the EU Taxonomy, the criteria

## <sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

### Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

#### Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy. The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

During 2023, the share of investments in transitional activities was 0.0%. The share in enabling activities was 0.5%.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

During the previous period, the fund was changed from Article 8 to Article 9, so it is not accurate to compare the fund's indicators with previous periods.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

At the end of 2023, the fund had an equivalent of 54.95 % of investments that were classified as sustainable investments with environmental objectives but not compliant with the EU Taxonomy.

The fund also had the option of investing in sustainability-labelled bonds, such as green bonds. The funding from these bonds had to be used to contribute to an environmental goal in order to receive their green label, but taxonomy reporting for individual financial securities is often lacking.

It is likely that in the vast majority of cases these goals have a clear connection to the goals found in the EU's Green Taxonomy, but that reliable data is lacking for such a classification. The EU Green Taxonomy does not cover all economic sectors that are relevant for the fund to invest in and that contribute to sustainability goals. There were also relatively few companies that reported in accordance

with the EU Green Taxonomy. This may have been due both to their size and their geographical location.

The fund company uses an internal process to define the contributions to environmental objectives and the classification of sustainable investments. The environmental goals included in the Fund company's definition of sustainable investments and quantitative thresholds are:

• 20% of the company's revenues have been assessed to contribute to other global environmental goals, directly or indirectly linked to the United Nations Sustainable Development Goals (UN SDGs);

• The company outperforms its sector and region in terms of emission factors according to quantitative data;

• The company outperforms its sector and region in other resource efficiency areas, such as water use, raw material consumption or waste generation, according to quantitative data; and

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to environmental objectives.

The fund company applies a "pass/fail" methodology, where an investment is classified and recognised as contributing if the investment meets one or more of the above criteria.

## What was the share of socially sustainable investments?

At the end of 2023, the fund had investments corresponding to 23.32% classified as socially sustainable investments.

The fund company uses an internal process to define the contribution to social goals and the classification of sustainable investments.

The social goals included in SEB Investment Management's definition of sustainable investments and quantitative thresholds are:

 $\bullet$  20% of the company's revenue has been assessed to contribute to other global social goals, directly or indirectly linked to the UN SDGs.

• The company outperforms relative to its region in terms of gender equality factors, according to quantitative data.

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to social goals.

The fund company applies a "pass/fail" methodology, where an investment is classified and recognised as sustainable if the investment meets one or more of the above criteria.

The fund also had the option of investing in sustainability-labelled bonds such as social bonds. The funding from these bonds had to be used to contribute to a social goal.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards? During the period, the fund used cash to manage liquidity and flows. During the reference period, the fund did not conclude that any environmental or social minimum protection measures were deemed necessary for these investments.

# What actions have been taken to attain the sustainable investment objective during the reference period?

During the 2023 reference period, the fund was managed following its sustainability criteria towards the fulfilment of the fund's objectives. Energy transition is one of the core themes of the fund, and emphasis lies on companies that contribute to reducing greenhouse gas emissions by increasing renewable capacity or enabling the transition from a fossil-based economy to a renewable one, thus creating a positive societal impact. Examples of such company allocations are OX2, Encavis, Orstedt and NKT. All are companies with business models that contribute to different parts of the energy transition value chain. The fund had investments in companies that increased the installed capacity of green energy in excess of 1 GW during 2023. To meet the world's commitments stipulated by the Paris Agreement or the EU Green Deal, resource efficiency and circularity are essential. Companies that accelerate and enable the necessary green transition by providing eco-friendly products and services or enable others to save resources and/or energy consumption are in line for inclusion in the fund's investment universe. Examples of such companies are ABB and Atlas Copco, as they contribute to the world's industrial transformation by focusing on energy and resource efficiency in their product offering as well as enabling digitalisation, Al and more sustainable energy usage through the usage of their products and services.

One example would be the avoided emissions during the year, where in 2023, 74 Mt GHG emissions across industry, transport, buildings, data centres and more, was avoided by using ABB's products and services. The transportation sector accounts for a third of the world's total emissions and the fund aims to support this transition. Companies that offer sustainable mobility and infrastructure solutions described in EU regulatory frameworks, e.g. the EU Sustainable and Smart Mobility Strategy, are targeted. Examples of such companies in the fund were Garo and Sdiptech, both contributing to more sustainable transportation infrastructure. One of Sdiptech's recent acquisitions, Rolec Services, delivered over 20,000 connected EV charge points in the UK during 2023.

Healthy societies are a prerequisite for solving the current challenges that the world is facing. Business models that enable the transition to plant-based nutrition, and improve the societal level of health, safety, and education creating more inclusive communities are an important part of the fund. The fund identified companies with exposure to trends within diabetes, obesity, Alzheimer's and cancer, where breakthroughs will have a large societal impact. Examples in these categories are Novo Nordisk and Zealand Pharma, being among the leading research companies when it comes to obesity and diabetes. Bioarctic works with revolutionary Alzheimer's research, Astra-Zeneca is involved in cutting-edge cancer research, and Sectra in the cancer diagnostics segment, helping patients improve outcomes.

The fund excluded companies that did not meet the fund company's extensive criteria for sustainability, and in this fund, there are additional exclusion criteria included. The fund manager reviewed norm-based research reports on each company entering the fund, at each rebalancing, to make sure that companies are identified if, among other things, they are involved in child labour, forced labour, or have established their country of incorporation in tax haven countries. If a company is involved in such controversies and has not expressed any commitment to prevent future occurrences, the company is excluded until further notice.

The fund managers interacted with and met all companies during the investment process and engaged on topics important for the fulfilment of the fund's objectives, such as climate commitments, good corporate governance, transparency and remuneration.

During the 2023 reference period, SEB Investment Management updated its sustainability policy with a clear position on biodiversity. Nature is the foundation of societies and economies and there is a growing appreciation for the need to include nature and biodiversity in investment decisions.

SEB Investment Management does not invest in companies that have verified violations of biodiversity-related norms. The fund company also excludes companies that operate and have a negative impact on endangered species or bio-sensitive areas, including Arctic drilling.

Furthermore, the fund company monitors the companies with the greatest influence on and exposure to deforestation of tropical forests and aims to set zero-tolerance targets for deforestation as the global data quality on deforestation improves.

Since 2023, SEB Investment Management has been a member of the Taskforce for Nature-related Financial Disclosures (TNFD) Forum and is a signatory of the Finance for Biodiversity Pledge. In addition, the fund company also works independently to increase the quality and coverage of biodiversity data through collaborations with various actors within or close to the scientific community.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective

#### How does the reference benchmark differ from a broad market index?

The fund did not use a benchmark to fulfil the sustainable investment objective.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

- How did this financial product perform compared with the reference benchmark? The fund did not use a benchmark to fulfil the sustainable investment objective.
- How did this financial product perform compared with the broad market index? The fund did not use a benchmark to fulfil the sustainable investment objective.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: SEB US Focus Core Fund

Legal entity identifier: 529900C38VRSUXAEKV61

## **Environmental and/or social characteristics**

#### Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally** sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did th	is fin	ancial product have a sustainable inv	estmen	t obj	ective?
••		Yes	•0	$\checkmark$	No
		ade sustainable investments with an envir- ental objective:%		<b>acte</b> obje	omoted Environmental/Social (E/S) char- ristics and while it did not have as its ctive a sustainable investment, it had a ortion of 44.08% of sustainable invest- ts

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted environmental and social characteristics through consideration of material ESG risk factors, levels of controversy involvement, and alignment with long-term sustainable themes. Material ESG risks were those that could meaningfully impact a company's financial performance and could vary by sector and industry.

Assessments of internal risk factors primarily focused on governance and social issues related to a company's policies, management, working conditions, and internal controls, among many other considerations related to its ongoing operations.

External risk factors were those related to the impact a company had on its external stakeholders, its community, customers, partnerships, the environment and climate change.

The fund sought to identify these material ESG risks, and importantly, assessed a management team's ability to mitigate any risks over time. Continuous monitoring of controversial involvement in any violation of global norms, if any, could be an important indication of a management team's ability to mitigate material ESG risks.

Quantitative assessment of the fund's carbon footprint (e.g. total GHG emissions, and carbon intensity) provided an overall view that could be tracked and monitored over time. In addition, it enabled the identification of material climate change-related risks within the fund at the company level, as well as served as a measurement by which climate-related improvement goals could be set over time.

A pillar of the fund's investment process is identifying secular themes, many of which have inherent sustainability attributes that can further support an investment thesis. The fund considers a secular theme to possess positive sustainability attributes if it addresses social or environmental challenges through various means:

- generating revenue from sustainable products or services;
- benefitting from long-term sustainable trends; and
- actively working to solve sustainability challenges.

In addition, each secular theme deemed sustainable is aligned with one or more UN Sustainable Development Goals (SDGs). Of the 20 secular themes represented in the fund's holdings, 12 are designated as "sustainable." Of the 12, eight principally promote social characteristics, and four promote both social and environmental characteristics.

Two examples of the fund's sustainable secular themes are Cloud Computing and Personalised Health. The Cloud Computing secular theme promotes at least five SDGs (7,9,11,12,13) by helping reduce energy consumption, promoting renewable energy, expanding access to online educational resources to improve learning outcomes, and fostering innovation by enhancing the cost-effective operation of computing resources. Personalised Health pri-

marily addresses social SDGs (3,9,10,12) by promoting better health outcomes and patient well-being through improved treatments and enhanced diagnoses. In addition, it helps reduce inequalities in healthcare outcomes through better accessibility and equity in resource allocation. It also minimises unnecessary medical treatments, reduces medical waste, contributes to more efficient healthcare resource utilisation, a company's financial performance and could vary by sector and industry.

Assessments of internal risk factors primarily focused on governance and social issues related to a company's policies, management, working conditions, and internal controls, among many other considerations related to its ongoing operations. External risk factors were those related to the impact a company had on its external stakeholders, its community, customers, partnerships, the environment and climate change. The fund sought to identify these material ESG risks, and importantly, assessed a management team's ability to mitigate any risks over time. Continuous monitoring of controversial involvement in any violation of global norms, if any, could be an important indication of a management team's ability to mitigate material ESG risks. Quantitative assessment of the fund's carbon footprint (e.g. total GHG emissions, and carbon intensity) provided an overall view that could be tracked and monitored over time. In addition, it enabled the identification of material climate change-related risks within the fund at the company level, as well as served as a measurement by which climate-related improvement goals could be set over time.

#### How did the sustainability indicators perform?

The fund's carbon footprint metrics compared favourably to the benchmark (Russell 1000). Carbon Intensity (tC02e/\$M sales) was 90.8 vs. 110.76 for the benchmark. Carbon Emissions (C02e/\$1M invested) was 13.83 vs. 29.54 for the benchmark .

The fund's social characteristics were captured in Sustainalytic's ESG Risk Ratings. The fund's ESG Risk Rating was 19.6 vs. 21.7 for the benchmark (lower is better). Within this overall risk score, the fund's exposure to Material ESG Issues (MEIs) score was 37.8, lower than the benchmark's 40.9. Its management (of MEIs) score was 51.8, better than the benchmark's score of 50.7 (higher is better). Furthermore, the fund performs equally or slightly better than each of the 21 MEIs cited by Sustainalytics.

The fund's and benchmark's aggregate weight percentages by ESG Risk Category were as follows (fund %/benchmark %): Negligible (3%/1%), Low (57%,47%), Medium (29%,38%), High (12%,13%), Severe (0%,2%).

The fund also monitored and evaluated companies' controversial involvement in any violation of global norms. The fund used a 3rd-party provider to assess companies' compliance with the United Nations (UN) Global Compact Principles by identifying those violating or at risk of violating these principles. Each company is assigned one of three statuses: Non-Compliant, Watchlist, or Compliant. A company is assessed as Non-Compliant when it is determined to be causing or contributing to severe or systemic violations of international norms and standards. A company is assessed as Watchlist if it is at risk of causing or contributing to severe or systemic violations of international norms and standards.

The assessment also includes related standards such as the Organisation for Economic Co-operation and Development's (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. An Outlook rating is also provided to indicate whether there is an expectation of improvement or deterioration in the Assessment Status (Positive, Negative, Neutral). The assessments are intended to identify companies that fail to meet established expectations for responsible business conduct.

None of the fund's holdings were rated Non-Compliant. Three were rated Watchlist, with the remaining rated Compliant. Meta Platforms (Neutral outlook) is rated Watchlist primarily due to allegations that it withheld information on the unauthorised use of its user data by a third party from 2015-2018. It has been the subject of claims of other incidents of inappropriate handling of user data. The company has also been criticised for its platform's potential adverse human rights impact on teenage users. Amazon.com (Neutral outlook) is rated Watchlist primarily due to allegations of health and safety issues at its operations and being accused of interfering with its workers' rights to join unions. Thermo Fisher Scientific (Neutral outlook) is rated Watchlist over concerns about it providing biomedical and bioinformatics technology to the Chinese government, which the country allegedly uses to conduct biometric surveillance and other potential human rights abuses.

## ...and compared to previous periods?

Most of the fund's sustainability indicators improved versus the prior year in all measures, and continued to compare favourably to the benchmark.

Carbon Intensity (tCO2e/\$M sales) decreased to 90.8 vs. 132.1 last year. Carbon Emissions (CO2e/\$1M invested) improved to 13.83 vs. 25.0 last year. The fund's overall ESG Risk Rating (Sustainalytics) improved to 19.6 vs. 20.0 last year. Within this overall rating score, the fund's exposure to Material ESG Issues (MEIs) score increased slightly to 37.8 vs. 37.6 last year. However, its management (of MEIs) score increased to 51.8 (higher is better) vs. 50.5 last year.

The fund performs equally or slightly better than all 21 MEIs evaluated by Sustainalytics. Last year, the fund performed slightly worse in one: Bribery and Corruption.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not commit to making any sustainable investments during the 2023 reference period. However, the fund owned one or more companies that could be classified as sustainable investments whose

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained. economic activities were deemed to contribute to one or more of the following environmental and social objectives.

Social objectives:

• United Nations Social Development Goals (UN SDGs): SDG 1 — No poverty; SDG 2 — Zero hunger; SDG 3 — Good health and well-being; SDG 4 — Quality education; SDG 5 — Gender equality; SDG 6 — Clean water and sanitation; SDG 8 — Decent work and economic growth; SDG 10 — Reduced inequalities; SDG 11 — Sustainable cities and communities; and SDG 16 — Peace, justice and strong institutions

• Other social sustainability goals such as gender equality, social inclusion and diversity

Environmental objectives considered environmentally sustainable according to the EU Taxonomy:

• The six goals defined by the EU Green Taxonomy: climate change mitigation, climate change adaptation, sustainable use and protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems.

Environmental objectives that are not considered compatible with the EU Taxonomy

• The United Nations Environment-related Sustainable Development Goals (UN SDGs): SDG 6 — Clean water and sanitation; SDG 7 — Affordable and clean energy; SDG 9 — Industry, innovation and infrastructure; SDG 11 — Sustainable cities and communities; SDG 12 — Responsible consumption and production; SDG 13 — Climate action; SDG 14 — Life below water; and SDG 15 — Life on land

• Operational resource efficiency in key environmental areas such as carbon use, water use or use of raw materials

The sustainable goals included in SEB Investment Management's definition of sustainable investments and quantitative thresholds are:

Environmental goals

• 10% of the company's revenue, capital expenditure or operating costs have been classified by estimation or reporting as significantly contributing to the six EU Taxonomy goals

• 20% of the company's revenue has been assessed as contributing to other global environmental goals, directly or indirectly linked to the UN SDGs

• The company outperforms its sector and region in terms of emission factors according to quantitative data

• The company outperforms its sector and region in other resource efficiency areas, such as water use, raw material consumption or waste generation, according to quantitative data

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to environmental objectives

Social goals

 $\bullet$  20% of the company's revenue has been assessed to contribute to other global social goals, directly or indirectly linked to the UN SDGs

• The company outperforms relative to its region in terms of gender equality factors, according to quantitative data

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to social goals

The fund company applies a pass/fail methodology, whereby an entire investment is classified and reported as sustainable if the requirements for contributing, not doing significant harm and good corporate governance are met. Other management companies may use a different methodology and criteria to classify an investment as sustainable. Therefore, the levels of sustainable investments may differ between fund companies depending on the methodologies, criteria and data providers used, and not only on levels of sustainability within the funds.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not commit to any sustainable investments. However, during the reference period, the fund considered the following principles:

- Excluded companies that did not comply with international norms and standards;
- Excluded companies operating in controversial sectors and business areas;

• Excluded companies that had exposure to fossil fuels or other activities with negative environmental impacts;

• Excluded companies that were not considered to fulfil the levels of minimum social safeguards as defined by the EU Taxonomy; and

• Used an external research partner's assessment of the companies' corporate governance structure, labour relations, tax compliance and remuneration.

Principal adverse impacts are the most significant negative impacts of investment

#### How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not commit to any sustainable investments. However, during the reference period, the fund took into account the fund company's model for detecting companies with extreme values among the negative impact indicators to avoid investing in companies that have caused significant harm. The nega-

decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters. tive impact indicators for sustainability factors used are those outlined in Annex I of the Sustainable Finance Disclosure Regulation's technical standard (CDR 2022/1288) - as well as the relevant indicators in Tables 2 and 3 of Annex 1 of CDR 2022/1288. However, the indicators are dependent on the current availability of data. Therefore, where sufficient coverage has been available, companies with significant negative performance in a geographical and sectoral context have not been included as sustainable investments.

Some indicators were considered through the exclusions outlined in the fund company's sustainability policy, in particular:

- Companies with activities in the fossil fuel sector;
- Companies with facilities/operations located in or near biodiversity-sensitive areas where the activities of these companies negatively impact these areas;

• Companies that do not comply with international norms and standards, such as the UN Global Compact principles and the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises;

• Companies involved in the manufacture or sale of controversial weapons (landmines, cluster bombs, chemical and biological weapons); and

• Companies whose activities affect endangered species.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

During the reference period, the fund's investments have been aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights through the normbased exclusion criteria set out in the fund company's sustainability policy.

Norm-based exclusions mean that the fund company expects issuers to adhere to international laws and conventions such as the following:

- The UN Principles for Responsible Investment;
- The UN Global Compact ;
- The OECD Guidelines for Multinational Enterprises; and

• The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights.

Companies with confirmed violations are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund considers multiple PAIs as part of its investment process, primarily using data from a 3rd-party ESG research provider.

From Annex 1 – Table 1 of CDR (EU) 2022/1288, PAIs 1 through 3 were assessed and monitored with the fund's carbon footprint analysis. PAI 10 was monitored through third-party controversy involvement and Global Standards ratings research. PAI 14 was monitored through third-party product involvement research.

PAI data for the fund's holdings is monitored and updated (at least) monthly. For holdings with above-average values for PAIs 1 through 3, the fund manager assesses the underlying drivers of the value and seeks to understand the company's strategies for reducing GHG emissions and mitigating possible negative impacts. For holdings found in violation or potential violation of UNGC Principles (PAI 10), the manager researches the underlying factors and allegations and seeks to understand companies' intentions and plans to move to compliance or avoid further violations.

The fund currently has no holdings involved in controversial weapons (PA 14), as it is restricted from such holdings. However, third-party research is utilised for ongoing monitoring of existing holdings to ensure there are no new violations.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31 December 2023

Largest investments	Sector	% Assets	Country
Apple Inc	Information Technology	8.08	United States
Microsoft Corp	Information Technology	8.00	United States
Alphabet Inc	Communication Services	4.53	United States

## What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

## What was the asset allocation?

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

## In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.
- Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

🗌 In fossil gas 🗌 In nuclear energy

🗸 No

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#### Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

#### Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable ecoThe graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

## What was the share of investments made in transitional and enabling activities?

During 2023, the share of investments in transitional activites was 0.0%. The share in enabling activites was 0.0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period (2022), the share of investments whose revenue was compatible with the EU taxonomy was 0.0%, compatible capital expenditure was 0.0%, and operating expenditure 0.0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

At the end of 2023, the fund had an equivalent of  $10.86 \ \%$  of investments that were classified as sustainable investments with environmental objectives but not compliant with the EU Taxonomy.

The EU Green Taxonomy does not cover all economic sectors that are relevant for the fund to invest in and that contribute to sustainable investment objective. There were also relatively few companies that reported in accordance with the EU Green Taxonomy. This may have been due both to their size and their geographical location. The fund company uses an internal process to define the contributions to environmental objectives and the classification of sustainable investments. The environmental goals included in SEB Investment Management's definition of sustainable investments and quantitative thresholds are:

20% of the company's revenues have been assessed to contribute to other global environmental goals, directly or indirectly linked to the United Nations Sustainable Development Goals (UN SDGs);
The company outperforms its sector and region in terms of emission factors according to quantita-

tive data;
The company outperforms its sector and region in other resource efficiency areas, such as water use, raw material consumption or waste generation, according to quantitative data; and

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to environmental objectives.

The fund company applies a "pass/fail" methodology, where an investment is classified and recognised as contributing if the investment meets one or more of the above criteria.

## What was the share of socially sustainable investments?

At the end of 2023, the fund had investments corresponding to 24.14 % classified as socially sustainable investments.

The fund company uses an internal process to define the contribution to social goals and the classification of sustainable investments.

The social goals included in SEB Investment Management's definition of sustainable investments and quantitative thresholds are:

 $\bullet$  20% of the company's revenue has been assessed to contribute to other global social goals, directly or indirectly linked to the UN SDGs.

• The company outperforms relative to its region in terms of gender equality factors, according to quantitative data.

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to social goals.

The fund company applies a "pass/fail" methodology, where an investment is classified and recognised as sustainable if the investment meets one or more of the above criteria.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash in the meaning of ancillary liquid assets and derivatives.

The purpose of cash was liquidity and flows, and the purpose of derivatives was efficient portfolio management techniques. During the period, there were no minimum environmental or social safeguards for these investments.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund fully used Sustainalytics' research for 3rd-party ESG Risk Score and Carbon Footprint analyses in order to be able to consistently and accurately monitor and meet the environmental and social characteristics of the fund. Reports are created monthly and reviewed for any material changes to exposures or scores.

The fund seeks to meet environmental and/or social characteristics through ESG integration, engagement and exclusions. In addition, the fund utilises a 3rd-party ESG Risk Score, Carbon Footprint and Global Standards research and analysis to monitor holdings for any material changes to risk exposures.

ESG integration – The fund's ESG integration process complements overall fundamental analysis by evaluating a range of ESG-related considerations for existing and potential fund holdings. The manager identifies and assesses material ESG factors relevant to holdings and their respective industries to better understand their impact on society, the environment and the economy. Evaluation of controversy involvement in violation of global norms helps identify potential financial or reputational risks for individual holdings. The fund also seeks to identify secular themes, and companies poised to benefit, with sustainability traits aligned with favourable social and environmental outcomes.

Engagement – The fund's management engages directly with companies on a variety of issues, including ESG risks, controversy involvement, carbon footprint, etc. The goal is to promote disclosure on material ESG issues, encourage adoption of sustainability best practices, and establish dialogue around material ESG risks and/or alleged violations of global norms. Examples of company engagements during the year include a meeting with senior management of a company in the industrial sector to discuss a wide range of topics, including opportu-

nities, priorities and risks. Specifically related to material ESG risks were discussions of mining sector exposure from a recent acquisition, leadership/governance post-acquisition, PFAS remediation project opportunities (pending updated government water quality standards), and electrification vs. LNG fuelling station opportunities. The fund's management also met with a healthcare company to encourage it to simplify its messaging to investors while highlighting faster-growing businesses and goals to increase productivity across the entire healthcare value chain.

Exclusions – The fund excludes investments in companies within sectors or business areas deemed to have major sustainability challenges. Companies with verified violations of international norms and standards or with inadequate corporate governance structures are also excluded. This is a way for the fund company to reduce the negative impact that the funds' investments can have on sustainable development.

Exceptions to the exclusion criteria can be made in individual cases. For example, exceptions can be made when the fund's management has an ongoing dialogue, or for other reasons has insight into the company's operations and transformation work.

Exceptions from exclusion related to fossil fuels can be made if the company is assessed to be undergoing a transition process. When the fund manager decides whether a company can be considered to be a so-called transition company three factors to assess the companies are applied:

Willingness - a company's strategic understanding and plan for managing climate-related risks and opportunities;

Capability - a company's current operational readiness, i.e. whether its business model can transform to meet the  $1.5^{\circ}$ C target of the Paris Agreement within set timeframes; and

Action - a company's actual work and its investments towards the 1.5°C target – a company must demonstrate its financial commitment to strategic plans. any material changes to exposures or scores.

## How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## • How does the reference benchmark differ from a broad market index?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

## How did this financial product perform compared with the reference benchmark?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

## How did this financial product perform compared with the broad market index?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.
