

FTGF Brandywine Global Income Optimiser Fund Class A Distr. (A) (H) (EUR)

Fund details

Summary of Investment Objective:

The fund's goal is to generate income in all market conditions while maintaining the value of the fund.

The fund will invest in bonds issued by corporations and governments.

The value of investments and the income from them may go down as well as up and you may not get back the amount you originally invested.

Fund inception date: 03.06.2013

Performance inception date: 19.05.2015

Reference Benchmark:

FTSE 3-Month U.S. Treasury Bill Index

Morningstar Category peer group:

Global Flexible Bond - EUR Hedged

ISIN IE00BWT64Y45

SEDOL BWT64Y4

Portfolio statistics

Total net assets 1.184,95m USD

Month end Net Asset Value (NAV) 80,26 USD

Number of holdings 176

Percentage of top ten holdings 26,20

Risk statistics (weighted average)*

Life 8,66 years

Effective Duration 5,74 years

Credit Quality BBB

Charges

Minimum initial investment 1,000 EUR

Entry charge 5.00%

Exit charge None

Ongoing charge 1.36%

Performance fee None

The charges are the fees the fund charges to investors to cover the costs of running the Fund. Additional costs, including transaction fees, will also be incurred. These costs are paid out by the Fund, which will impact on the overall return of the Fund. Fund charges will be incurred in multiple currencies, meaning that payments may increase or decrease as a result of currency exchange fluctuations.

FTGF Brandywine Global
Income Optimiser Fund Class A Distr. (A) (H) (EUR)

Investment risks

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Bonds: There is a risk that issuers of bonds held by the fund may not be able to repay the investment or pay the interest due on it, leading to losses for the fund. Bond values are affected by the market's view of the above risk, and by changes in interest rates and inflation.

Liquidity: In certain circumstances it may be difficult to sell the fund's investments because there may not be enough demand for them in the markets, in which case the fund may not be able to minimise a loss on such investments.

Low rated bonds: The fund may invest in lower rated or unrated bonds of similar quality, which carry a higher degree of risk than higher rated bonds.

Emerging markets investment: The fund may invest in the markets of countries which are smaller, less developed and regulated, and more volatile than the markets of more developed countries.

Asset-backed securities: The timing and size of the cash-flow from asset-backed securities is not fully assured and could result in loss for the fund. These types of investments may also be difficult for the fund to sell quickly.

Fund currency: Changes in exchange rates between the currencies of investments held by the fund and the fund's base currency may negatively affect the value of an investment and any income received from it.

Interest rates: Changes in interest rates may negatively affect the value of the fund. Typically as interest rates rise, bond values fall.

Derivatives: The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested.

Sustainability: The fund's integration of sustainability risks in the investment decision process may have the effect of excluding profitable investments from the investment universe of the fund and may also cause the fund to sell investments that will continue to perform well. A sustainability risk could materialise due to an environmental, social or governance event or condition which may impact the fund's investments and negatively affect the returns of the fund.

Fund counterparties: The fund may suffer losses if the parties that it trades with cannot meet their financial obligations.

Convertible Securities: The value of convertible securities tends to decline as interest rates increase and increase as interest rates decline as well as be more volatile than non-convertible debt securities due to its relationship with the underling equity. They are also generally not as senior as non-convertible debt securities and typically have lower ratings. Contingent convertible securities have additional risks to this due to more difficult valuation and discretionary coupon payments. There are no assurances of capital repayment.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries.

Complete information on the risks of investing in the Fund are set out in the Fund's prospectus.

A temporary negative cash position may be due to (1) unsettled trade activity (2) permitted purposes, such as borrowing or derivatives use, if allowed by the prospectus.

In the Middle East: Issued by Franklin Templeton Investments (ME) Limited, authorized and regulated by the Dubai Financial Services Authority. Franklin Templeton Investments, The Gate, East Wing, Level 2, Dubai International Financial Centre, P.O. Box 506613, Dubai, U.A.E., Tel.: +9714-4284100 Fax: +9714-4284140.

Sector breakdown (%)

Corporate Bond	54.98	Government Owned - No Guarantee	1.80
Government Sovereign	19.26	Supranational	0.55
Mortgage Backed Securities	9.88	Bond Futures	0.52
Government Sovereign Agency	6.41	Other Inc. Cash and Cash Equivalents	6.60

Definitions

Life: The average number of years for which each component of unpaid principal on a bond, loan or mortgage remains outstanding. The weighted average life calculation provides an aggregate figure that shows how many years it will take to pay off half the outstanding principal on a bond portfolio.

Effective duration: Average Duration equals the weighted average maturity of all the cash flows in the portfolio and gives an indication of the sensitivity of a portfolio's bond prices to a change in interest rates. The higher the duration, the more sensitive the portfolio is to interest rate changes. Effective Duration is a calculation for bonds with embedded options (Not every portfolio will purchase bonds with embedded options). It takes into account the expected change in cash flows caused by the option, as interest rates change. If a portfolio does not hold bonds with embedded options, then the Effective Duration will be equal to the Average Duration.

Credit quality breakdown: Nationally Recognised Statistical Rating Organisation's (NRSRO's) assess the likelihood of bond issuers defaulting on a bond's coupon and principal payments. The weighted average credit quality by Brandywine Global Investment Management assigns each security the middle rating from three NRSRO's (Standard & Poor's, Moody's Investor Services and Fitch Ratings, Ltd.). In the event that only two NRSRO's provide ratings, the lowest of the two ratings will be assigned. If only one NRSRO assigns a rating, that rating will be used. If the security is not rated by one of the three major agencies, U.S. treasuries and certain U.S. agencies are given the U.S. issuer rating. Sovereign treasuries are given the sovereign issuer rating. All other unrated securities are given a rating equivalent to a defaulted bond. Cash is included and received the highest rating. The lower the overall credit rating, the riskier the portfolio. The credit rating is expressed as a regular letter rating (from high to low quality): AAA, AA, A, BBB, BB, .D.

Distribution yield: Distribution yield (net) is determined by taking the latest distribution of the share class divided by the NAV, as of the ex-date of the distribution, and then annualised. Investors may be subject to tax on distributions.

Important information

This fund has been classified as Article 8 under the Regulation on sustainability related disclosures in the financial services sector (EU) 2019/2088. These are Funds which have an ESG integration approach and, in addition, have binding environmental and/or social characteristics in their investment process.
