PERFORMANCES

Performance (Basis 100 - Net of fees)

Benchmark (Index) : MSCI Emerging Markets (NR) (USD)

Market index (Market index) : MSCI Emerging Markets (NR) (USD)

The benchmark has changed since this UCI was created. The performance data for the benchmark has been chain-linked in order to take the successive changes into account.

Past performance is not an indication of future performance. It may vary over time. Reported performance does not take into account costs and fees on issues and redemptions of units, but does include ongoing charges and intermediary fees as well as any performance fees charged.

(D) once the legal nature of this UCITS is amended, with no impact on the purpose of the fund, and once the performance history is preserved, the launch date of the fund may fall after the start date of the performance history.

GLOSSARY

The VOLATILITY of a security is the difference between performance and average performance and therefore makes it possible to gauge the consistency of performance obtained. It comprises a measure of risk. If this is zero, the individual performances are identical. The higher it is, the greater the difference between individual performances.

The TRACKING ERROR shows the volatility of a funds relative performance against that of its benchmark. It shows the difference between performances and their average and so makes it possible to gauge the consistency of relative performance. The lower the tracking error, the closer the funds performance is to that of its benchmark.

The ALPHA corresponds to the funds average performance. More specifically, it measures the fund managers added value while cancelling out market influence, which cannot be controlled. This measure is expressed as a percentage.

The SHARPE RATIO shows the funds outperformance against a zero-risk interest rate, adjusted for fund volatility.

Other definitions and methodologies are available in our fund center at www.edmond-de-rothschild.com, under the heading "Funds".
