FRANKLIN  
TEMPLETON

# Legg Mason Brandywine Global Dynamic US Equity Fund

Class A US\$ Accumulating

ISIN: IE00BSBN5Q47

**A sub-fund of:** Legg Mason Global Funds plc

**Managed by:** Franklin Templeton International Services S.à r.l., part of the Franklin Templeton group of companies.

## Objectives and Investment Policy

### Objective

The fund's goal is to achieve growth of the fund's value in the long term.

### Investment Policy

- The fund will invest at least 80% of its assets in shares of large companies based in or conducting most of their activities in the United States.
- The fund's portfolio managers will try to focus on companies that they believe have potential for growth while maintaining relatively low risk.

**Benchmark:** Russell 1000 Value Index

**Manager's Discretion:** The fund is actively managed, and the investment manager has discretion in selecting investments within the fund's objective and investment policies. The investment manager seeks to provide an average annualised return for the fund, on a gross basis over a complete economic cycle of several years, equal to the return of the benchmark plus 3%. There is no

guarantee that the investment manager will meet its target, and the targeted return does not take into account the fees charged, which will reduce the fund's return. The fund's investment in any particular sector will not deviate more than 15% from the benchmark's exposure to that sector.

**Fund's Base Currency:** US Dollar

**Share Class Currency:** US Dollar

**Transaction Costs:** The fund bears costs in buying and selling investments, which may have a material impact on the fund's performance.

**Dealing Frequency:** You can buy, sell and switch your shares on each day that the New York Stock Exchange is open for business.

**Minimum Initial Investment:** For this share class the minimum initial investment is USD 1,000.

**Treatment of Income:** Income and gains from the fund's investments are not paid but instead are reflected in the fund's share price.

## Risk and Reward Profile

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund is in its risk/reward category because investments in shares of US companies from various sectors have historically been subject to large fluctuations in value.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

**Investment in company shares:** The fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

**Geographical focus:** This fund invests primarily in the United States, which means that it is more sensitive to local economic, market, political or regulatory events in the United States, and will be more affected by these events than other funds that invest in a broader range of regions.

**Fund operations:** The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the base prospectus and "Primary Risks" in the fund supplement.
