Mercer Passive Emerging Markets Equity Fund (the "Fund")

Share Class M6 EUR (IE00BZ1HZZ46) (the "Share Class")

The Fund is a sub-fund of **MGI Funds plc** and is managed by Mercer Global Investments Management Limited

OBJECTIVE AND INVESTMENT POLICY

The investment objective of the Fund is to seek long term growth of capital and income.

The Fund is an index tracking fund. It is passively managed and will seek to achieve its objective by investing predominantly in equity and equity related securities of emerging markets issuers (as outlined further below) that as far as possible and practicable reflect the component emerging markets equity securities of the MSCI EM (Emerging Markets) ex Selected Securities Index, unhedged in USD (the "Index").

The Fund will seek to promote environmental and social characteristics within the meaning of Article 8 of the Sustainable Finance Disclosure Regulation.

The Fund will seek to promote environmental characteristics by investing in the component securities of the Benchmark Index which avoids investment in companies that generate more than 1% of their revenue from thermal coal extraction, arctic drilling or oil tar sand mining.

The Fund will seek to promote social characteristics by investing in the component securities of the Index which avoids investment in companies which are involved in the manufacture, distribution or sales of controversial weapons, or which manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales.

The Fund follows good governance standards in the selection of securities for investment and seeks to engage with any companies that are deemed to be in breach of UN Global Compact Principles ("UNGC"), to remediate where possible. UNGC is a set of globally accepted standards on human rights, labour, the environment and anti-corruption.

The Index represents the performance of large and mid-cap securities in 24 emerging markets except for those companies which the index provider excludes based on negative environmental and social screens.

The Fund may use optimisation techniques in order to achieve a similar return to the Index; this strategy seeks to build a representative portfolio that matches the risk and return characteristics of the Index without the expectation that the Fund will hold every underlying constituent of the Index.

This approach may result in the Fund investing in only a relatively small number of Index constituents where such instruments provide similar performance. Certain indices may also be used in the management of the Fund, including for investment purposes, as detailed in the Supplement.

Equity securities of emerging markets issuers in which the Fund will invest may include, without limitation, common stocks, warrants, new issues and units/shares of equity-related investment funds which fall within the categories of funds which are permissible investments for UCITS.

The Fund may invest and have direct access to eligible China A-Shares traded on the Shanghai Stock Exchange via the Shanghai-Hong Kong Stock Connect scheme, the Shenzhen Stock Exchange via the Shenzhen-Hong Kong Stock Connect scheme and/or the QFI regime.

The Fund will invest at least 90% of its net assets in securities issued in markets which are listed as emerging markets under the rules of the Index and / or constitute Recognised Markets. No more than 10% of the net assets of the Sub-Fund may be invested in aggregate in securities issued in markets other than those listed as emerging markets under the rules of the Index.

The Fund may, on an ancillary basis, invest in debt securities issued or guaranteed by EU Member States and non-EU Member States.

The Fund may invest in cash, money market instruments and / or liquid instruments such as bank deposits, certificates of deposit, fixed and floating rate instruments, commercial paper, floating rate notes and freely transferable promissory notes which may be listed on recognised markets for liquidity purposes and for paying expenses due by it.

No more than 10% of the Net Asset Value of the Fund will be invested in the debt securities including, without limitation, commercial paper, promissory notes, floating rate notes and certificates of deposit, of companies, other than banks, with a credit rating of less than A1/P1.

The Fund may use financial derivative instruments (instruments for which the price is dependent on one or more underlying asset, 'FDI') for the purposes of hedging and / or efficient portfolio management. The Fund is not intended to be leveraged. The Fund may not invest in FDI that would result in losses exceeding the Net Asset Value of the Fund.

The Share Class will not distribute dividends. Income and capital gains from the Fund are reinvested.

You can buy and sell shares in the Fund on demand each day which is a bank business day in Ireland or the United Kingdom.

RISK AND REWARD PROFILE

The risk and reward indicator value is calculated using historical data and may not be a reliable indicator of the Fund's future risk profile.

The risk category shown is not guaranteed and may change over time.

The lowest category, 1, does not mean risk free.

The value of investments and income from them can go down as well as up and you may not get back the full amount you invested.

The Share Class is rated 6 due to the nature of its investments which include the risks listed below:

Equities: The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political and economic news, company earnings and significant corporate events.

Emerging markets: Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries do. This means your money is at greater risk if it is invested in emerging markets.

Liquidity risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Operational risk: All funds are subject to the risk that something could go wrong in the day-to-day running of an organisation.

For more information on risks please refer to the "Special Considerations and Risk Factors" section in the prospectus and in the supplement for the Fund.

CHARGES

The charges you pay are used to pay the cost of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	none
Exit charge	none

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.
