

Heptagon European Focus Equity Fund

CE share class

Objective

The investment objective of the Fund is to provide long-term capital appreciation by investing in European equities.

Investment Strategy

The Fund employs a high conviction, bottom-up, low turnover, research driven strategy, with a bias towards companies that exhibit sustainable long-term top and bottom-line growth.

The portfolio manager evaluates investment opportunities on a company-by-company basis and utilises fundamental analysis to identify companies believed to have an intrinsic value greater than what is reflected in the current market valuation. This approach includes analysis of a company's financial statements, profitability, management structure, operations, business strategy, product development, and its position within its industry, among other things.

The Fund prefers large-capitalised stocks which display adequate free-float and liquidity, although investments are not limited by market capitalisation. The Fund does not invest in commodity or energy stocks, where the price of the product is set in the world market. The Fund does not generally invest in purely financial sectors, such as banks or insurance companies, as these sectors are deemed to be closely integrated with a slow-growing economy. In addition, the Fund prefers companies with more concentrated business models over those that have widely diversified business models, such as industrial conglomerates.

Fund manager, Christian Diebitsch, has over 27 years industry experience with close to 13 years directly managing European equities.

Portfolio Sector Weights (31/03/2018)

Key Facts

Fund Size:	EUR 37m
Fund Launch Date:	26/08/2014
Management Fee:	0.90%

Risk Warnings

The Fund is subject to special risk considerations including geographic concentration risk, portfolio concentration risk and operational risk. The investment return and principal value of an investment will fluctuate so that the investor's shares, when redeemed, may be worth more or less than their original cost. Any investor should consider the investment objectives, risks and charges and expenses of the fund carefully before investing. Where an investment is denominated in a currency other than the investor's currency, changes in rates of exchange may have an adverse effect on the value, price of, or income derived from the investment.
