KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Aegon Global Diversified Income Fund

a sub-fund of Aegon Asset Management Investment Company (Ireland) plc

Euro Class C - Income shares (ISIN: IE00BYYPFT28)

This fund is managed by Aegon Investment Management B.V.

Objectives and investment policy

Objective: The investment objective of the Fund is to provide income with the potential for capital growth over the medium term.

Policy: The Investment Manager will seek to achieve the investment objective by investing predominantly in a diversified portfolio of equities and bonds denominated in any currency. The Fund's exposure to the equities and bonds may be obtained through direct investment or through the financial derivative instruments (FDI) described below. Assets will be chosen based on global economic outlook, trends and investment opportunities where it is the view of the Investment Manager that a positive return may be generated for the Fund. As a result, at any one time the Fund may be diversified across asset classes, sectors, currencies or countries or may be more focused. Equities will be limited to a maximum of 80% of the Fund's Net Asset Value at all times. The Fund intends to invest at least 25% of its net assets in equities.

The Fund may invest in all types of fixed and floating rate bonds as described below.

The Fund can invest in a wide range of assets around the world, but invests principally in: equities, sovereign, corporate and high yield bonds, collective investment schemes, indirect property, commodities, liquid assets and derivatives. Restrictions regarding these investments are detailed in the prospectus.

The Fund adheres to environmental, social and governance ('ESG') criteria for all of its equity and bond investments (excluding collective investment schemes, index derivatives and ancillary cash) which consist of screening such investments against exclusionary criteria as more fully described in the Fund supplement. The Fund shall not be permitted to invest in issuers which the Investment Manager considers to have a negative impact on society and/or the environment and excludes such issuers that full within either the “exclusion list” and “watch list” (the Fund will commit to a strict application of the watch list and treat it as a hard restriction limit) referenced in the Fund Supplement. Investments which pass the screening criteria will form the investment universe from which the Investment Manager will select to pursue its investment strategy.

Target Performance: The Investment Manager expects to generate income with a target yield of approximately 5% per annum, with the potential for capital growth over the medium term (being any 5 year period). By investing in the Fund, capital is at risk. There is no guarantee that the Fund will generate this, or any other level of income or returns. The Investment Manager may also use the MSCI World Index to measure the Fund's volatility against global equities. This is undertaken only for reference and comparison. The Investment Manager does not use this index as a target and the Fund's portfolio is not constrained by this index.

Other information

You can buy, sell or exchange the Fund's shares on any business day (see 'Key Information for Buying and Selling' in the Fund Supplement to the Prospectus for more information).

Income the Fund receives may be paid out every month.

It is expected that the Fund will be held as part of a diversified portfolio which may include other assets such as bonds, equities, property and cash.

The fund promotes E/S (i.e Environmental and Social) characteristics within the meaning of Article 8 of the Sustainable Finance Disclosure Regulation (SFDR).

Risk and reward profile

1	2	3	4	**5**	6	7

Lower risk / potentially lower rewards — **Higher risk / potentially higher rewards**

The risk/reward profile shows the risk of investing in the Fund, based on the rate at which funds of this type changed in the past. This Fund has the above risk/reward rating because the price of shares and bonds can be affected by political or economic events, changes in exchange rates and changes in interest rates.

The Fund's category is not guaranteed and may change over time. It is calculated using historical data, which may not be a reliable indication for the future. Category 1 does not mean 'risk free'. Positive returns are not guaranteed and no form of capital protection applies.

The following risks, which are not, or are not fully, reflected in the risk/ reward profile are also relevant to the Fund:

Credit: An issuer of bonds may be unable to make payments due to the Fund (known as a default). The value of bonds may fall as default becomes more likely. Both default and expected default may cause the Fund's value to fall. High yield bonds generally offer higher returns because of their higher default risk and investment grade bonds generally offer lower returns because of their lower default risk.

Liquidity: The Fund's value may fall if some investments, especially in smaller companies or high yield bonds, become more difficult to trade or value due to market conditions or a lack of supply and demand.

Counterparty: Investments such as derivatives are made using financial contracts with third parties. Those third parties may fail to meet their obligations to the Fund due to events beyond our control. The Fund's value could fall because of: (i) loss of monies owed by the counterparty; and/or (ii) the cost of replacement financial contracts.

Other markets: The Fund may invest in countries which have less developed political, economic and legal systems and which provide fewer investor protections. Difficulties in buying, selling, safekeeping or valuing investments in such countries may reduce the value of the Fund.

Concentration risk: The Fund may invest more than 35% of its value in securities issued by a single Government or other Public issuer. Holding a limited number of underlying investments means a change in the value of any one investment has more impact on the Fund's value. This increases potential gain but also potential loss.

Derivatives: The value of derivatives depends on the performance of an underlying asset. Small changes in the price of that asset can cause larger changes in the value of the derivative. This increases potential gain but also potential loss.

Foreign Exchange Risk: The Fund's portfolio of investments may be denominated in a range of currencies which differ from the Fund's base currency. Fluctuations in these currencies may increase the risk of losses to the Fund where hedging is not used or is incomplete or unsuccessful.

Fund charges: The Fund charges its fees against capital, which will increase the amount of income available for distribution to Shareholders, but may constrain capital growth.

Interest Rate Risk: Bond values are affected by changes in interest rates. When interest rates rise, the value of the Fund is likely to fall.

Full details of risks are disclosed in the 'Risk Factors' section of the Fund Supplement to the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	0.42%
Charges taken from the fund under certain specific conditions	
Performance fee	None

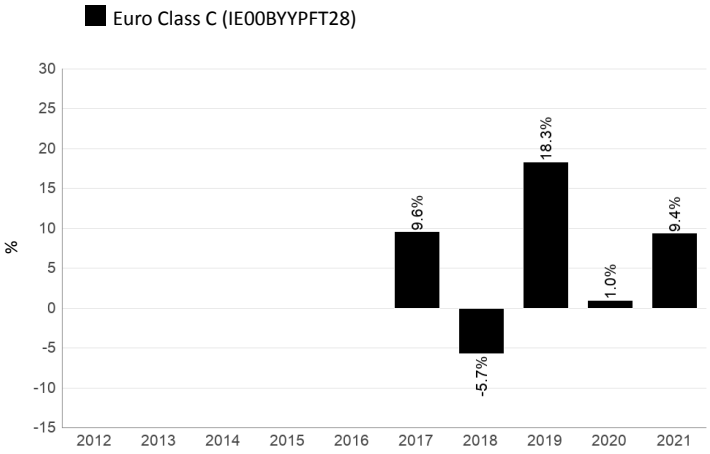

The entry and exit charges shown are the maximum figures, and in some cases you may pay less. You can find out specific charges which apply to your investment by contacting your financial adviser, distributor, or by contacting us using the details given in the Practical Information section.

The ongoing charge is based on expenses for the year to 31 December 2021. This figure may vary from year to year. It excludes any portfolio transaction costs (except in the case of an entry/exit charge paid by the Fund when buying and selling shares in another fund).

Exchanging your holdings into another sub-fund of the Company: the first five exchanges in a calendar year are free, and subject to a charge of 1.5% on each transaction thereafter.

More detailed information on charges can be found in the 'Fees and Expenses' section of the Fund Supplement to the Prospectus.

Past performance

Source: Lipper

Past performance is not a guide to future performance.

Fund launch date: 21 April 2016
Share class launch date: 21 April 2016

Performance is calculated in EUR.

The past performance calculation does not take into account the entry and exit charges but does take into account the ongoing charge, as shown in the 'Charges' section.
