General Risks

- The Fund can invest in equities which may be affected by market risk (the risk of an investment losing its value due to changes in economic conditions).
- As the Fund invests in debt securities (e.g. bonds) it is subject to credit risk (the risk of a bond issuer failing to pay) and interest rate risk (the risk of changes in interest rates).
- The strategy employed may result in the NAV exhibiting a high level of volatility. The Fund may be leveraged which can potentially increase losses. This Fund may invest in contingent convertible securities. These securities have unique risks, for example, due to equity conversion or principal write-down features which are tailored to the issuing entity and its regulatory requirements, which means the market value of the securities may fluctuate. Additional risk factors associated with contingent convertible securities are set out in the Fund's Prospectus. There is no secondary market for investments in the Fund and none are expected to develop. The Fund may lack diversification. The Fund's high fees and expenses may offset the Fund's trading profits.
- The Fund can invest in Financial Derivative Instruments (FDI). These instruments have additional risks such as legal risk or liquidity risk (the inability to sell the contract due to lack of buyers in the market). These risks can have adverse impacts on the overall value of the Fund.
- The Fund can invest in emerging markets. Such markets carry additional risks such as political instability, weaker auditing and financial reporting standards and less government supervision and regulation.
- The Fund's investments may be in currencies other than Euros. The impact of this is that as the value of a currency rises or falls it can have a positive or negative impact on the value of the Fund's investments.
- Sustainability risks may adversely affect the returns of the Fund. A sustainability risk is an environmental, social or governance (ESG) event that if it occurs, could cause an actual or potential material negative impact on the value of the Fund's investment. The Fund's investments are also exposed to the risk of losses resulting from reputational damage an issuer may face in connection with an ESG event.
- For a complete overview of all risks attached to this fund, refer to the section entitled "Risk Factors" in the Supplement and Algebris UCITS Funds plc Prospectus.

Past Performance is not a reliable guide to future performance. Neither past experience nor the current situation are necessarily accurate guides to the future growth in value or rate of return. The strategy employed by the Fund may result in the NAV exhibiting a high level of volatility and therefore may be subject to sudden large falls in value, and, if it is the case, investors could lose the total value of the initial investment.

The Fund is considered to be actively managed in reference to the MSCI ACWI Financials Local Index (the "Benchmark") by virtue of the fact that it seeks to achieve a total return which exceeds the returns of the Benchmark.
