## Blackstone Diversified Multi-Strategy Fund

a sub-fund of Blackstone Alternative Investment Funds plc

### Class A (USD) Accumulating Shares

ISIN: IE00BYXDVH76

#### Objective and Investment Policy

##### Objective

The objective of the Fund is to seek capital appreciation.

##### Investment Policy

Blackstone Alternative Investment Advisors LLC, the investment manager of the Fund ("BAIA"), allocates the Fund's assets among several investment sub-advisers with experience managing non-traditional or "alternative" investment strategies. BAIA's allocation process aims to combine strategies and sub-advisers in a way that produces an investment portfolio that is diversified across strategies and asset classes.

The Fund invests in a wide range of assets, which may include equity securities (shares), debt securities (bonds) and financial instruments that derive their value from other underlying instruments ("FDI"). The Fund's investments may be located anywhere in the world, may have any market capitalization and may belong to any industry sector. The Fund may use FDI for investment or non-hedging purposes as well as for hedging purposes (e.g., to reduce risk or generate additional income).

For full investment objective and policy details, see "Investment Objectives and Policies" in the Supplement for the Fund available from [www.blackstone.com/UCITS](http://www.blackstone.com/UCITS).

**Recommendation:** The Fund is suitable for investors seeking to grow their investment over a full market cycle (typically, a 3 year period) and who are prepared to accept a moderate level of volatility.

##### Buying and Selling Shares

You can buy and sell shares in the Fund on any day (other than Saturdays, Sundays and days on which banks are closed in Dublin or London) on which the New York Stock Exchange is open. The price you pay or receive will be based on net asset value per share on the day the shares are bought or sold.

The minimum initial purchase and minimum holding is USD1,000. The minimum subsequent purchase is USD100.

##### Distribution Policy

This Class does not pay out income or capital gains on the Fund's investments. Instead these are reinvested.

##### Transaction Costs

The costs of buying and selling the Fund's investments are charged to the Fund, which reduces its returns.

#### Risk and Reward Profile

##### Lower risk

Potentially lower reward

##### Higher risk

Potentially higher reward

You can earn returns in excess of the risk-free interest rate only by taking on risk. Over the longer term, greater risk can potentially produce higher returns. The risk indicator above shows the Fund's risk/reward profile. Risk level 1 signals a low risk of losing money but typically offers limited potential rewards. At risk level 7, the risk of losing money is much higher, but the potential rewards are typically much greater. Note that even investments in the lowest risk category are not entirely free of risk.

The risk indicator was calculated incorporating simulated and historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk category shown is not a target or guarantee and may shift over time.

##### Why is this Fund in this category?

The Fund is in category 3 because variations in the price of its units are typically low. The Fund invests across many different types of assets that should provide diverse exposure, which may result in the Fund carrying lower risk and offering potentially lower rewards than other categories.

##### Are there any other particular risks?

The Fund may also be exposed to other significant risks that the risk indicator does not adequately capture. These may include:

- General economic and market conditions can affect the price and volatility of investments.
- The success of the Fund depends upon BAIA's skill in determining the Fund's allocation to alternative investment strategies and in selecting the best mix of sub-advisers. There can be no guarantee that sub-advisers will stick to the Investment strategy for which they were selected, or that these strategies will be successful.

- Sub-advisers may make investment or hedging decisions which conflict with each other; for example, sub-advisers may hold economically offsetting positions or may purchase or sell the same security at the same time without aggregating their transactions. This may result in unnecessary brokerage and other expenses and the Fund may incur losses as a result.
- Some of the sub-advisers selected may hold only a small number of investments, or assets that move closely in line with assets held by other sub-advisers.
- The Fund's investments will include shares, bonds and FDI. Each of these will be exposed to the risks specific to the type of asset in question. In particular, the use of FDI may result in substantial gains or losses that are greater in magnitude than the original amount invested.
- The Fund may invest in countries with a weak legal or financial framework where it can be hard to enforce ownership rights or repatriate funds.
- The Fund may invest in currencies other than its base currency. The success of measures to protect the Fund or a Class against currency movements cannot be certain.
- The Fund may invest in FDI that derive their value from other assets in the expectation of making a profit if the price of the assets falls; theoretically, this could result in an infinite loss.
- The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Low trading volumes, lack of buyers, large positions or legal restrictions may limit or prevent the Fund from selling particular assets quickly and/or at desirable prices.

For further information on the risks faced by the Fund, see "Risk Factors" in the Prospectus and Supplement for the Fund, available from [www.blackstone.com/UCITS](http://www.blackstone.com/UCITS).

## Charges for this Fund

The charges you pay are used to pay the cost of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges that may be taken before or after you invest

Entry charge	none
Exit charge	none

*This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.*

### Charges taken from the Fund over a year

Ongoing charge	2.23%
----------------	-------

### Charges taken from the Fund under certain specific conditions

Performance fee	15% a year of any returns the Class achieves above any losses carried forward from previous periods plus any additional sub-adviser performance fee (see opposite), subject to a maximum of 4.95% of the net asset value of the Class.
-----------------	--

The entry and exit charges shown are maximum figures. In some cases, you might pay less – you can find this out from your financial advisor.

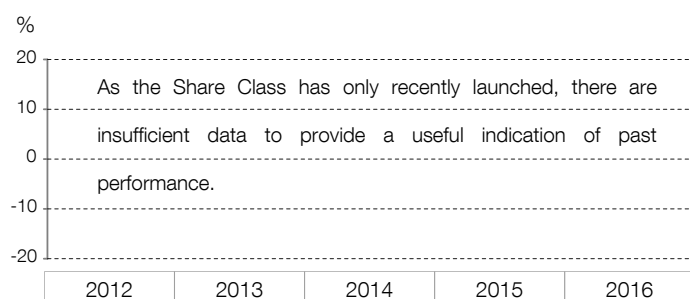

- A charge of up to 5% may be payable when switching shares from the Fund to another Sub-Fund.

The ongoing fund charge shown here is an estimate of the charges. The ongoing charges figure is shown as an estimate due to limited operating history and is based on data for similar share classes. The Fund's Annual Report for each financial year will include detail on the exact charges made. This figure may vary from year to year. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

BAIA compensates the sub-advisers out of the fees it receives from the Fund. Such compensation may include a performance fee of up to 20% of a sub-adviser's positive performance. If, as of any performance period, the sum of all subadvisers' performance fees exceeds the performance fee received by BAIA from the Fund, the Fund will pay an additional amount ("additional subadviser performance fee") to BAIA to cover the shortfall. Any such additional sub-adviser performance fee will be deducted from BAIA's performance fee before it is paid in subsequent performance periods.

For further information about fees and expenses, see "Fees" in the Supplement for the Fund, available from [www.blackstone.com/UCITS](http://www.blackstone.com/UCITS).

## Past Performance

Past performance is not a reliable indicator of future results.

The past performance shown here takes account of ongoing charges. Any entry/exit fees are excluded from the calculation of past performance.

The Fund was launched on 01/07/2014.

The share class of the Fund was launched on 29/04/2016.

Performance is shown only where full calendar-year performance history is available.

Past performance has been calculated in USD and is expressed as a percentage change of the Fund's net asset value at each year end.
