Global Corporate Bond

ISIN	LU1395536243	a sub-fund of Vontobel Fund
Share Class	AH (hedged)	This fund is managed by Vontobel Asset Management S.A., which is part of Vontobel Group.
Currency	EUR	This fund is authorised in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and investment policy

This actively managed sub-fund aims to achieve the best-possible investment return by investing in global investment grade corporate debt securities. It is categorized as Article 8 SFDR.

- The sub-fund invests at least two thirds of its assets in the fixed-income asset class, including in convertible bonds and bonds with warrants. Up to 10% each may be invested in asset-backed or mortgage-backed securities and in contingent convertible bonds (so-called CoCo-Bonds). The sub-fund may also hold cash.
- The sub-fund mainly invests in securities issued by public and/or private borrowers, which are denominated in freely convertible currencies and have an investment grade rating.
- The sub-fund may use derivatives to achieve the investment objective and for hedging purposes.
- The currency of this class is continually hedged against the sub-

fund's main currency. This hedging does not necessarily cover all currency risks. It entails costs which in turn reduce the share class' return.

- The sub-fund is not managed with reference to a benchmark. The portfolio manager has full investment discretion within the predefined investment limits.
- Income may be paid out each year.
- Buying and selling securities entails transaction costs payable in addition to the charges listed.
- Redemption of shares: daily when banks in Luxembourg are open for normal business (see prospectus for details and exceptions).
- Other information: environmental, social and governance (ESG) criteria contribute to, but are not a determining factor in, the manager's decision making.

Risk and reward profile

- The indicator above does not signal the risk of a potential loss, but indicates the fluctuations in the sub-fund's share price in the past.
- The share class is assigned to this category because its share price can fluctuate moderately due to the investment policy applied.
 - The historical data used to calculate the profile cannot be used as a reliable guide to the future risk profile of the sub-fund.
 - The risk category shown is not guaranteed and may change.
 - Even the lowest risk category is not entirely free of risk.

When assigning a sub-fund's share class to a risk category, it may be the case that not all risks are taken into account. Such risks include

- risks in connection with exceptional market events, operational errors, legal and political events. You can find a detailed list of the risks in the "Notice regarding special risks" section in the general part of the sales prospectus. The following risks have no direct influence on this category, but may still be important:
- Securities with a lower credit quality means a higher risk that an issuer may fail to meet its obligations. The investment value may fall if an issuer's credit rating is downgraded.
 - Using derivatives generally creates leverage and entails valuation risks and operational risks. Leverage magnifies gains but also losses. Over-the-counter derivatives involve corresponding counterparty risks.
 - Asset-backed and mortgage-backed securities, and their underlying receivables are often intransparent. The sub-fund may also be subject to a higher credit and/or prepayment risk.
 - CoCo-Bonds may entail significant risks such as coupon cancellation risk, capital structure inversion risk, call extension risk.
