

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Northern Trust World Equity Index Fund (the “Fund”) Unit Class B USD Accumulating

A sub-fund of Northern Trust UCITS Common Contractual Fund

ISIN: IE00B54MSD52

Management Company: Northern Trust Fund Managers (Ireland) Limited (the “Manager”)

Objectives And Investment Policy

The investment objective of the Fund is to closely match the risk and return characteristics of the MSCI World Index (the “Index”) with net dividends reinvested.

The Fund invests in equities (that is, shares and other similar kinds of assets) issued by or relating to companies included in the Index.

Target Market: This Fund is appropriate for investors who plan to invest over the medium to long term; and are looking for a passively managed investment in the relevant market(s). This Fund may be appropriate for investors who seek a Fund which features tax transparency.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is an index tracking Fund and seeks to track the risk and return characteristics of the Index by buying all or most of the stocks of the Index. This means it may not hold all the same assets as the Index or hold assets in the same proportion as the Index, and the Fund may not match the Index performance.

The Manager considers that the Fund meets the criteria in Article 6 of the Sustainable Finance Disclosure Regulation (Regulation EU/2019/2088) and accordingly the investments underlying the Fund do not take into account the EU criteria for environmentally sustainable economic activities. More information on Article 6 funds can be found in the Prospectus and on our website at www.northerntrust.com/europe/-what-we-do/investment-management/sustainable-finance-regulation. For efficient portfolio management purposes the Fund may invest in derivatives and other financially linked instruments (such as currency forwards and exchange traded futures) to reduce risk, minimise costs or generate additional capital or income. A derivative is a financial contract whose value is derived from other assets.

You can buy or sell units daily (on each business day of the Fund). An application must be received by the Fund's administrator before 2.00pm (Irish time) on the business day prior to the relevant dealing day.

The base currency of the Fund is U.S. Dollar.

Units will be accumulating (i.e. income will be included in the value).

Risk And Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund. The rating is based upon changes in prices of the equities held by the Fund.

Investments in other countries are affected by exchange rate risk, where the currencies may fluctuate in value.

Performance volatility can be increased or reduced due to fluctuations in the currencies represented within this document.

The following risks are material in addition to the risks captured by the indicator above:

Liquidity Risk – Some recognised exchanges are less liquid or more volatile which may affect the price received and time taken when selling investments.

Derivative Risk – Derivatives may result in gains or losses that are greater than the original amount invested.

Investment Risk – The Fund may not achieve its investment objective. An investment in the Fund involves investment risks including possible loss of the amount invested.

Counterparty Risk – In case of bankruptcy of the broker, there is no guarantee collateral held by the broker will be returned to the Fund. In the event of bankruptcy of the counterparty, the premium and any unrealised gains may be lost.

Currency Risk – Where a class of units are in a currency other than the base currency of the Fund, the non-base unit classes of the Fund may be affected unfavourably by fluctuations in currency rates.

Valuation Risk – A position in the Fund may be valued incorrectly, as some prices may be uncertain at a point in time.

For more information about risks, please see the section entitled “Risk Factors” of the Fund's prospectus and supplement, which are available at www.northerntrust.com/pooledfunds.
