<div><div>CAPITAL AT RISK:</div><div>The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.</div></div>		<div><div>DEALING INFORMATION</div><div><p>Minimum Initial Investment : 10,000,000 GBP *</p><p>Settlement : Trade Date + 3 days</p><p>Dealing Frequency : Daily, forward pricing basis</p><p><small>* or currency equivalent</small></p></div></div>	
<div><div>KEY RISKS:</div><div><ul style="list-style-type: none">Equities and equity-related securities can be affected by daily stock market movements. Fixed Income securities can be affected by changes to interest rates, credit risk and potential or actual credit rating downgrades. Non-investment grade FI securities can be more sensitive to these events. ABS and MBS may have high levels of borrowing and not fully reflect the value of underlying assets. FDIs are highly sensitive to changes in the value of the asset they are based on. The impact is greater where FDIs are used in an extensive or complex way.'Absolute Return' funds may not move in line with market trends or fully benefit from a positive market environment. Emerging markets are generally more sensitive to economic and political conditions than developed markets.Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.</div></div>		<div><div>PORTFOLIO MANAGEMENT</div><div><p>Philip Hodges</p><p>He Ren</p></div></div>

GLOSSARY

SFDR Classification: Article 8: Products that promote environmental or social characteristics and promote good governance practices.

Article 9: Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

Modified Duration: A measure of price sensitivity of a bond to changes in interest rates. The Modified Duration of the fund is calculated as the average of the underlying bonds' modified duration values, adjusted to take account of their relative weight (size) within the fund.

Price to Earnings: A valuation ratio of a company's current share price compared to its per-share earnings in the current forecast year, calculated as current share price divided by current earnings per share.

Average Market Cap: The average market capitalization of a fund's equity portfolio gives you a measure of the size of the companies in which the fund invests. Market capitalization is calculated by multiplying the number of a company's shares outstanding by its price per share.

Price to Book Ratio: represents the ratio of the current closing price of the share to the latest quarter's book value per share.

IMPORTANT INFORMATION:

In the UK and Non-European Economic Area (EEA) countries: this is issued by BlackRock Investment Management (UK) Limited, authorised and regulated by the Financial Conduct Authority.
