Algebris UCITS Funds plc

Class Id EUR (ISIN IE00BYT35F75) Algebris Global Credit Opportunities Fund, a sub-fund of Algebris UCITS Funds plc
The Fund is externally managed by Algebris Investments (Ireland) Limited (the Manager), a member of the Algebris group

OBJECTIVES AND INVESTMENT POLICY

The Algebris Global Credit Opportunities Fund (the **Fund**) aims to achieve a high level of income diversifying across global bond and credit markets.

The Fund is actively managed without reference to any benchmark meaning that Algebris (UK) Limited (the **Investment Manager**) has full discretion over the composition of the Fund's portfolio, subject to the stated investment objectives and policies.

The Fund intends to invest primarily in the following asset classes: debt securities to include corporate or government bonds with fixed or variable interest, investment or below investment grade, mortgage-backed and other asset-backed securities, senior and subordinated financial debt, convertible securities (bonds that can be converted into shares), contingent convertible instruments (e.g. **CoCo-Bonds**) (bonds that can be converted into shares or their principal amount may be written down if a pre-specified trigger event occurs), hybrid securities (a security which combines both debt and equity characteristics), Tier 1 and upper and lower Tier 2 securities (which are forms of bank capital), and trust preferred securities (a type of hybrid security).

Although the Fund will primarily invest in the asset classes listed above, it may also invest in certain other asset classes including equity and equity-related securities (including ordinary shares, common stock, preference shares, exchange traded notes (**ETNs**), global depositary receipts, American depositary receipts, warrants and rights), exchange traded funds (**ETFs**), commodity exposure and ancillary liquid assets (which may include bank deposits, certificates of deposit, commercial paper, money market funds and freely transferable promissory notes) in order to increase portfolio diversification and improve liquidity. Commodity exposure may be achieved solely via investment in UCITS eligible structures including, but not limited to, ETNs, exchange traded certificates (**ETCs**), ETFs and financial derivative instruments (**FDI**) based on UCITS eligible commodity indices which meet the requirements of and have, where necessary, been cleared by the Central Bank of Ireland. The Fund may also enter into FDIs and invest in securities which may embed leverage or embed a derivative component (e.g. ETNs, ETCs, mortgage-backed securities and other asset-backed securities and hybrid securities such as convertible securities and CoCo-Bonds) for investment, efficient portfolio management and hedging.

Such FDI include swaps (an instrument that swaps the performance of one asset for another), contracts for difference (a security that returns the difference between the value of an asset at the beginning and the end of the contract), single name, index and portfolio tranches credit default swaps (**CDS**), options (securities that give the right to buy or sell another asset), futures (contracts to exchange a predetermined quantity of another asset at a certain price on a certain future date), forward contracts (contracts to exchange foreign currencies/debt securities at an agreed date in the future), warrants and rights.

The Fund may invest substantially all of its assets in deposits with credit institutions (or other ancillary liquid assets) during periods of high market volatility.

The Fund's base currency is Euro and the Fund may use currency hedging (the technique of buying or selling currencies to minimise fluctuations in non-Euro currency investments resulting from foreign exchange movements). There is no guarantee that this will be successful.

Investment in the Fund may be suitable for investors with a medium to long term investment horizon. For full investment objectives and policy details, please refer to the section entitled "Investment Objectives and Policy" in the supplement for the Fund (the **Supplement**).

The Fund promotes environmental and/or social characteristics (**E/S**) and does not have a sustainable investment as its investment objective. More information on how the Fund promotes E/S characteristics and on the Manager/Investment Manager and Fund's approach to environmental, social and governance (**ESG**) (as related to this Fund) can be found under the section titled "The Sustainable Finance Disclosure Regulation" and Schedule II of the Fund's Supplement.

Dealing

You can buy or sell shares daily (but not on weekends or bank holidays in the UK or Ireland). For more information please refer to the section entitled "Dealings in the Fund" in the Supplement.

Distribution Policy

The Fund may declare dividends on the following approximate dates: 1 January, 1 April, 1 July and 1 October.

RISK AND REWARD PROFILE

The synthetic indicator shown above is calculated using historical data from a representative model for the last five years and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean that a share class is risk free and your initial investment is not guaranteed.

The Fund is in category 4 because of the moderate range and frequency of price movements of the underlying investments the Fund invests in.

Risk Factors

The Fund may be subject to risks which are not included in the calculation of the risk-reward indicator associated with the following:

- As the Fund invests in debt securities (e.g. bonds) it is subject to credit risk (the risk of a bond issuer failing to pay) and interest rate risk (the risk of changes in interest rates).
- The Fund may also invest in CoCo-Bonds, these bonds have additional risks such as the risk that following certain trigger events, including an issuer's capital ratio falling below a particular level, the bond may be converted into the issuer's equity or its principal amount may be written down, resulting in losses for the Fund.

- The Fund may be exposed through ETNs, ETCs, ETFs and FDI on financial indices to commodities as the components of such an index may include commodities. Prices of commodities are influenced by, among other things, various macro-economic factors such as changing supply and demand relationships, agricultural, trade, fiscal, monetary, exchange control programmes, policies of governments (including government intervention in certain markets), weather conditions and other natural phenomena and other unforeseeable events.
- The Fund can invest in FDI. These instruments have additional risks such as legal risk or liquidity risk (the inability to sell the contract due to lack of buyers in the market). These risks can have adverse impacts on the overall value of the Fund.
- Sustainability risks may adversely affect the returns of the Fund. A sustainability risk is an ESG event that if it occurs, could cause an actual or potential material negative impact on the value of the Fund's investment. The Fund's investments are also exposed to the risk of losses resulting from reputational damage an issuer may face in connection with an ESG event.
- The Fund can invest in emerging markets. Such markets carry additional risks such as political instability, weaker auditing and financial reporting standards and less government supervision and regulation.
- The Fund's investments may be in currencies other than Euros. The impact of this is that as the value of a currency rises or falls it can have a positive or negative impact on the value of the Fund's investments.

For a complete overview of all risks attached to this Fund, refer to the section entitled "Risk Factors" in the Supplement and Algebris UCITS Funds plc (the **Company**) prospectus (the **Prospectus**).

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest:	
Entry charge	0.00%
Exit charge	0.00%
These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.	
Charges taken from the Fund over a year:	
Ongoing charges	1.03%
Charges taken from the Fund under specific conditions:	
Performance Fee	1.35%

The Ongoing Charges figure is based on expenses for the last 12 months to the period ending 31 December 2023. Ongoing Charges do not include Fund transaction costs and performance fees and may vary from year to year.

You may be charged a dilution adjustment of up to 1.5% of the value of the Shares (representing the cost of buying or selling the underlying investments) on entry to or exit from the Fund. This adjustment is paid to the Fund to protect existing investors from bearing transaction costs caused by other investors buying or selling their shares. The average dilution adjustment charged in the past financial year was 0.07%.

The Fund's investment manager is entitled to a performance fee of 15% of any returns the Fund achieves in excess of a peak net asset value (NAV) level. The performance fee crystallises at the end of each performance period (being at least a calendar year) and is payable annually in arrears normally within 14 calendar days of each performance period. This peak NAV is the higher of the highest NAV achieved at the end of a performance period or the initial price of the shares. The performance fee charged during the Fund's last financial year is shown in the table. A more detailed description (including additional conditions) of the performance fee is set forth in the section entitled "Performance Fee" in the Supplement.

For more information please refer to the sections entitled "Fees and Expenses" in the Prospectus and the Supplement.

PAST PERFORMANCE

You should be aware that past performance is not a guide to future performance.

Fund launch date: 19/07/2016
Share class launch date: 30/12/2016
Performance is calculated in: EUR

The past performance calculation does not take into account the entry and exit charges but does take into account the ongoing charges referred to above.
