iMGP European Subordinated Bonds

Managed by
Ersel Asset Management SGR

Share class : C EUR
ISIN : LU1457568472

For qualified and retail investors

Investment objective

The Fund's objective is to generate investment growth mainly through any types of subordinated bonds, including convertible bonds and, for maximum 50%, contingent convertible bonds, issued by European entities or entities predominantly active in Europe. The Fund may, to a lesser extent, invest in other fixed income securities, including ABS (Asset Backed Securities). The Index ICE BofA ML EUR Financial Subordinated is used for comparison only, incl. for performance comparison. The Fund is actively managed and the manager's discretionary powers are not constrained by the Index. Although the manager may take into consideration the Index composition, the Fund may bear little resemblance to the Index. As part of the aforementioned investment policy, the manager may also invest in Credit Default Swaps, both as buyer and as seller of protection.

Manager Comment

Highlights

- US regional banks turmoil and CS emergency merge with UBS drove spreads wider in March both in US and European credit markets, even if USD credit outperformed EUR as spreads widened less especially for high beta
- High-Grade bonds were best performers supported by the decrease in risk-free rates fueled by flight to quality and expectations of more accommodative central banks
- USD High Yields closed in slightly positive territory while Euro peers were barely negative but significantly outperformed subordinated bonds
- AT1s were affected the most, closing down more than 5% notwithstanding a sound recovery during the last trading week, while Hybrids and Tier 2s suffered minor losses
- The strategy posted negative returns lagging its reference index because of its shorter duration and higher credit risk, but managed to contain the drawdown notwithstanding its exposure to AT1 instruments

Cumulative performance	Fund	Index

YTD	-3.4%	0.7%

Market Review

March was dominated by tensions in the banking sector. The default of SVB spread also outside the US regional banks sector and accelerated the on-going loss of confidence in CS bringing to the Swiss bank forced merge with UBS and putting additional pressure to European credit markets. Fears of a banking crisis and the potential consequent credit crunch pushed markets to price in more accommodative central banks and ignited a flight to quality that brough risk-free rates significantly lower. On the other side spreads widened, especially on High beta segments with a decompression in EUR High Yield of about 70 bps. Bank subordinated instruments were, anyway, the most affected, with AT1s spread rising by more than 100 bps getting close to historical peaks. Notwithstanding the context, Euro investment grade credit registered a positive performance of around +1%, while High Yields gave up only 50bps. Performance was instead overall negative for subordinated bonds, especially financials. While Tier 2 instruments partially benefited from the risk-free rates compression and realized only moderate losses in the month, AT1s lost more than 5% on average with significant dispersion among issuers. Finally, primary markets slowed down in March given market tensions, starting to resurge only towards the end of the month.

Fund Review

In this environment the strategy posted an overall negative return underperforming its reference index due to a lower duration and an overweight in high beta, AT1s especially. Notwithstanding the latter, the strategy managed to contain the drawdown, especially during AT1 sell off, thanks to the absence of CS instruments and the contribution of hedging via equity indices derivatives, even if the positive contribution during the selloff was almost entirely offset by the volatility of the following rally. On the long portfolio, worst contributors have been AT1 instruments as Banco BPM (-14.4%) and Deutsche Bank (-14.4%) together with Heimstaden Hybrid (-20.4%), while best contributors have been longer dated high grade bonds such as BNP T2 2031 (+1.7%), Agricole T2 2029 (+1.7%) and Telefonica Hyb (+1.0%). In terms of activity, the managers first decided to increase the level of cash and equivalent instruments by taking profits on liquid short term insurance T1s and banking legacy for about 13%. Half of the liquidity was then reinvested adding 5% of High Quality AT1s leaving the strategy with 14% of cash and 38% of COCOs at the end of march. AT1s showed a strong valuation appeal after the selloff suggesting adding exposure, but the asset class is expected to price a higher risk premium for longer after the recent events. As such the managers choose to focus on high quality issuer. The strategy remains lower in duration, overweight BB rated subs and AT1s versus the index, hedged via equity derivatives.

Outlook

With bank turmoil increasing the likelihood of a recessionary scenario and a still resilient core inflation which limits central banks ability to reduce their tightening, we view limited headroom for a further rally of risky asset. In this context, we continue see any rise in yields as an opportunity to add duration on high quality instruments while only adding selectively on credit risk by keeping the overall portfolio risk balanced via hedging instruments.

Users are solely responsible for verifying that they are legally authorised to consult the information herein. **Only the most recent version of the prospectus, the key information document (“KID”) (key investor information document (“KIID”) in the UK), and the annual and half-yearly reports of iMGP (hereinafter referred to as iMGP’s “legal documentation”) should be considered as a basis for investment decisions. These documents are available in English on the website, www.imgp.com/iMGP, or from the iMGP offices at 5, Allée Scheffer, L-2520 Luxembourg.** For Switzerland, the prospectus, the key information document, the annual and semi-annual reports, as well as the statutes can be obtained without charges from CACEIS (Switzerland) SA- 35 Route de Signy - CH-1260 Nyon, representative for Switzerland and CACEIS Bank, Paris, succursale de Nyon / Suisse, paying agent for Switzerland. For other countries, the list of representatives is available on www.imgp.com.

The information or data contained in the present document does not in any way constitute an offer or a recommendation or advice to buy or sell shares in the Fund’s units. Furthermore, any reference to a specific security in this document should not be construed as a recommendation or investment advice. They are intended solely to inform the investor as to past performance, and do not reflect the opinion of iMGP or any related companies as to future returns. The information, opinions and assessments contained in the present document shall apply at the time of publication and may be revoked or changed without prior notice. iMGP has not taken any measures to adapt to each individual investor who remains responsible for his own independent decisions. Moreover, investors are advised to consult their legal, financial or tax advisors before taking any investment decisions. Tax treatment depends entirely on the financial situation of each investor and may be subject to change. It is recommended that investors obtain the appropriate expert advice before taking any investment decisions. This marketing document is in no way intended to replace the legal documentation and/or any information that investors obtain from their financial advisors.

The value of the units referred to may fluctuate and investors may not recoup all or part of their original investment. Investors should consult the iMGP’s prospectus for further details on the risks involved. **Past performance does not predict future returns.** It is calculated in the unit currency and, where investments are made in a different currency, may also be affected by fluctuations in exchange rates. The performance data given does not include commissions or any fees linked to the subscription to and/or repurchase of shares. **Returns are calculated net of fees in the reference currencies of specific sub - funds.** They reflect the current fees, include management commissions and possibly also performance commissions deducted from the sub-funds. All returns are calculated from NAV to NAV with dividends reinvested. Unless otherwise stated, the performance of sub-funds is shown on a total return basis, including dividends or any other relevant distributions. All returns shown are gross of any tax deductions that could be applicable to an investor. It is possible that companies linked to iMGP and their executives, directors or personnel hold or have held stakes or positions in the securities listed in this document, or that they have traded or acted as market maker for these securities. Moreover, these entities or individuals may also have past or present ties with the executives of the companies issuing the abovementioned shares; furnish or have furnished financial or other services; or are or have been a director of the companies in question. Please note that any reference to an index is made for information purposes only. The performance of the Fund may differ from the performance of the index. None of the index provider data may be reproduced or re-disseminated in any form and may not be used as a basis for or a component of any financial instruments or products or indices. The risk indicator of the Fund is deemed to reflect the level of risk of the Fund. It can vary from 1 to 7. Level 1 on the scale does not mean that investing in the Fund is risk free. The indicator is based on historic data and can therefore not guarantee the level of future risk of the Fund. The indicator is also not intended to be an investment objective for the Fund and therefore can vary over time. For further information, please refer to the most recent version of the key information document (“KID”), (“KIID” in the UK).
