

PGIM BROAD MARKET U.S. HIGH YIELD BOND FUND

FIXED INCOME 31 MARCH 2024

The investment objective of the PGIM Broad Market U.S. High Yield Bond Fund (the "Fund") is to achieve a return through a combination of current income and capital appreciation while preserving invested capital. There is no guarantee that this objective will be achieved. The benchmark of the Fund is the Bloomberg U.S. High-Yield 1% Issuer Capped Index. The Fund will be invested in a diversified portfolio consisting primarily of high yield bonds that are originated in the US corporate bond markets. These high yield bonds will largely be a mix of fixed and floating rate instruments that are rated below investment grade. The Fund seeks to add value through active management by identifying and capturing relative value opportunities within the US high yield bond market with an active, risk managed approach using fundamental credit analysis. The Fund incorporates environmental, social and governance ("ESG") factors into its investment process and promote certain sustainability characteristics. **PGIM Fixed Income has determined that the Fund qualifies as a Light Green Fund, which is a fund that seeks to comply with the principles of Article 8 of the SFDR.** The fund reclassified from Article 6 to Article 8 on 12 June 2023. Please see the Company's Fund Documents as described below for additional information.

If only two Ratings Agencies assign ratings, the methodology will attribute the more conservative (lower) rating of the two. If only one Ratings Agency assigns a rating, the methodology will attribute that rating.

Important Information

Risks

An investment in the Fund involves a high degree of risk, including the risk that the entire amount invested may be lost. The Fund is primarily designed to purchase certain investments, which will introduce significant risk to the Fund, including asset performance, price volatility, administrative risk and counterparty risk. No guarantee or representation is made that any Fund's investment program will be successful, or that such Fund's returns will exhibit low correlation with an investor's traditional securities portfolio.

Any investment in the Fund will be deemed to be a speculative investment and is not intended as a complete investment program. Investment in the Fund is suitable only for persons who can bear the economic risk of the loss of their investment and who meet the conditions set forth in the PGIM Funds plc's Prospectus, Supplement and Key Investor Information Document (the "KIID") or Key Information Document (the "KID") (collectively the "Fund Documents"). There can be no assurances that the Fund will achieve its investment objective. Prospective and existing Investors should carefully consider the risks involved in an investment in the Fund, including, but not limited to, those discussed in the Fund Documents. Prospective and existing Investors should consult their own legal, tax and financial advisors about the risks of an investment in the Fund. Any such risk could have a material adverse effect on the Fund and its Shareholders.

The return may increase or decrease as a result of currency fluctuations. The use of financial derivative instruments may result in increased gains or losses within the Fund.

Where an investor's own currency is different from the currency of the Fund, the return on investment may be affected by fluctuations in the currency exchange rate. Also, the use of financial derivative instruments may result in increased gains or losses within the Fund. The NAV of the Fund is calculated on a daily basis and published on the Fund's website at the following address: www.pgimfunds.com.

Bank Loans Risk: The Fund's ability to receive payments of principal and interest and other amounts in connection with loans (whether through participations, assignments or otherwise) will depend primarily on the financial condition of the borrower. The failure by the Fund to

receive scheduled interest or principal payments on a loan because of a default, bankruptcy or any other reason may adversely affect the income of the Fund and reduce the value of its assets.

Call Risk: If an issuer exercises its right to redeem a security prior to its maturity (a call), the Fund may not recoup the full amount of its initial investment and may be forced to re-invest in lower-yielding securities, securities with greater credit risks or with other less favourable features.

Custodial Risk: Assets which are traded in markets where custodial and/or settlement systems are not fully developed may be exposed to risk in circumstances where the custodian will have no liability.

Junk Bonds Risk: High-yield, high-risk bonds have predominantly speculative characteristics, including particularly high credit risk. The non-investment grade bond market can experience sudden and sharp price swings and become illiquid due to a variety of factors.

Political Risk: The value of the Fund's investments may be affected by uncertainties such as international policy developments and changes in government policies. This can result in more pronounced risks where conditions have a particular impact on one or more countries or regions.

Socially Responsible Investment Risk: The Fund may achieve lower returns than an equivalent fund which does not pursue a socially responsible mandate.

Index Description

The Bloomberg U.S. High-Yield 1% Issuer Capped Index is an issuer constrained version of the Bloomberg U.S. Corporate High-Yield Index that covers non-investment grade, fixed-rate, taxable corporate bond market. It limits issuer exposures to a maximum 1% and redistributes the excess market value index-wide on a pro-rata basis. Securities must be rated BB/B using the middle rating of Moody's, S&P, and Fitch, and have at least 1 year until final maturity. BLOOMBERG® is a trademark and service mark of Bloomberg Finance L.P. and its affiliates (collectively “Bloomberg”). Bloomberg does not approve or endorse this material, or guarantees the accuracy or completeness of any information herein, or makes any warranty, express or implied, as to the results to be obtained therefrom and, to the maximum extent allowed by law, neither shall have any liability or responsibility for injury or damages arising in connection therewith.

The benchmark of the Fund may be changed from time to time to any other benchmark that is generally representative for the Fund. Shareholders will be notified of any change in the benchmark of the Fund in the periodic reports of the Company following such change. Investors should note that the Fund does not intend to track the benchmark. While the Fund is actively managed, the benchmark will be used for risk management purposes (performing additional checks on holdings in the Fund with a weighting over or underweight the benchmark's holdings) and performance comparison purposes.

The use of benchmarks has limitations because portfolio holdings and characteristics of the Fund will differ from those of the benchmark, and such differences may be material. All indices and averages are unmanaged. You cannot make an investment directly in an index or average.

***MORNINGSTAR INFORMATION**

Morningstar measures risk-adjusted returns. The overall rating is a weighted average based on the Fund's 3-, 5-, and 10-year star rating. Source: Morningstar. Morningstar Stars were calculated using extended performance returns, which links preinception returns to a U.S. based Fund, managed using the same investment approach, with a longer track record which begins 1 Mar 1996. Fees were adjusted inline with the Fund's current expenses. Ratings 3yr 3/654, 5yr 4/546, 10yr 5/302.

The Morningstar Rating for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustments for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

The Morningstar Medalist Rating™ is the summary expression of Morningstar's forward-looking analysis of investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The Medalist Ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Investment products are evaluated on three key pillars (People, Parent, and Process) which, when coupled with a fee assessment, forms the basis for Morningstar's conviction in those products' investment merits and determines the Medalist Rating they're assigned. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using algorithmic techniques. Vehicles are sorted by their expected performance into rating groups defined by their Morningstar Category and their active or passive status. When analysts directly cover a vehicle, they assign the three pillar ratings based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. When the vehicles are covered either indirectly by analysts or by algorithm, the ratings are assigned monthly. For more detailed information about these ratings, including their methodology, please go to global.morningstar.com/managerdisclosures/.

The Morningstar Medalist Ratings are not statements of fact, nor are they credit or risk ratings.

The Morningstar Medalist Rating (i) should not be used as the sole basis in evaluating an investment product, (ii) involves unknown risks and uncertainties which may cause expectations not to occur or to differ significantly from what was expected, (iii) are not guaranteed to be based on complete or accurate assumptions or models when determined algorithmically, (iv) involve the risk that the return target will not be met due to such things as unforeseen changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange rate, tax rates, exchange rate changes, and/or changes in political and social conditions, and (v) should not be considered an offer or solicitation to buy or sell the investment product. A change in the fundamental factors underlying the Morningstar Medalist Rating can mean that the rating is subsequently no longer accurate.

⁴ESG scores exclude cash and derivatives. Benchmark statistics and ESG scores based on PGIM analytics and may differ from published statistics by official benchmark vendors. PGIM Fixed Income maintains a proprietary ESG ratings framework, where issuers or issues across all fixed income sectors are given an ESG rating in addition to a fundamental credit rating. More than 100 analysts seek to assign ESG ratings based on a 100-point scale in five-point increments, with zero as the lowest and 100 as the highest. In certain instances, it may not be possible or practical to obtain or analyse the information needed to assess and rate each investment and where this is the case our analysts may either make reasonable assumptions in order to rate the particular investments based on, for example, information relating to the particular industry of an underlying issuer or identify the investment as unrated.
