

**FUND FACTSHEET** 

# NATIXIS GLOBAL EMERGING BONDS

# **MAY 2017**

### **FUND HIGHLIGHTS**

- Invests mainly in government bonds, but may also invest in corporate bonds for diversification purposes.
- Employs an active management approach to the fixed income and currency markets of emerging countries.
- Seeks to exploit the potential of bonds issued by emerging countries denominated both in local and hard currencies (USD and EUR and generally all G10 currencies).
- Follows an independent fundamental and value investment process that seeks to select the most attractive issuers in terms of fundamentals and yield potential (given the identified risks).
- Undertakes a macroeconomic analysis country by country after having established their views on the emerging debt asset class.
   GROWTH OF 10.000 (USD)

The performance indicated for the fund before its inception, for the period from october 04, 2011 to january 24, 2014 is based on the historic performance of Nativis Global Emerging Bonds, FCP collective investment fund under French law, registered with AMF, the financial market authority, and managed by the same management company using the same investment process. This performance has been adjusted to show the various charges applicable to the fund as accurately as possible.

The figures provided refer to performance in past years. Past performance is not a reliable indicator of future performance. Some recent performance may be lower or higher. As the value of the capital and the returns change over time (notably due to currency fluctuations), the repurchase price of the shares can be higher or lower than their initial price. The performance indicated is net of all charges applying to the fund but does not account for sale commissions, taxation or paying agent fees, and assumes that dividends if any are reinvested. Taking such fees or commissions into account would lower the returns. The performance of other share classes would be higher or lower based on the differences between the fees and the entry charges. In the periods where certain share classes are not subscribed or not yet created (inactive share classes), performance is calculated based on the actual performance of an active share class of the fund whose characteristics are considered by the management company as being closest to the inactive share class in the currency in which the inactive share class is listed. The performance given for the inactive share class is the result of a calculation provided for information.

Please read the important information given in the additional notes on pages 3 and 4 of this document.

#### Growth of 10,000

The graph compares the growth of 10, 000 in a fund with that of an index. The total returns are not adjusted to reflect sales charges or the effects of taxation, but are adjusted to reflect actual ongoing fund expenses, and assume reinvestment of dividends and capital gains. If adjusted, sales charges would reduce the performance quoted. The index is an unmanaged portfolio of specified securities and cannot be invested in directly. The index does not reflect any initial or ongoing expenses. A fund's portfolio may differ significantly from the securities in the index. The index is chosen by the fund manager.

#### **Risk Measures**

The risk and reward indicator is shown as a scale of 1 to 7 representing the levels of risk and rewards in increasing order that enables you to assess the potential performance of a fund compared to the risk it represents. The general calculation method of this regulatory indicator is based on the annualized past volatility of the fund, calculated from weekly returns over a five-year period. This indicator is monitored regularly and may vary.

#### **Special Risk Considerations**

The specific risks of investing in the Sub-Fund are

- Capital loss
- Credit
- Interest rate

- LiquidityCounterpartyEmerging markets
- Exchange rates
- Geographic and portfolio concentration
- Changes in laws and/or tax regimes

- Financial derivatives Instruments - Investment in CNH Bonds The global risk exposure of the Sub-Fund is managed through the use of the Relative Value at Risk (VaR) Approach (the "Relative VaR approach")

The calculation of the Relative VaR of the Sub-Fund is based on a reference portfolio which is constituted by the Reference Index.

For a complete description of these risks, please refer to the chapter entitled "Principal Risks" in the prospectus. This same chapter also describes the other risks linked to an investment into the Sub-Fund.
