**Fund objectives and investment policy**

The fund aims to provide capital growth in excess of the S&P Developed SmallCap (Net TR) Index after fees have been deducted over a three to five year period by investing in equities of small-sized companies worldwide. The fund is actively managed and invests at least two-thirds of its assets in equities of small-sized companies worldwide. These are companies which, at the time of purchase, are considered to be in the bottom 30% by market capitalisation of each relevant equity market. The fund may invest directly in China B-Shares and China H-Shares and may invest less than 30% of its assets (on a net basis) directly or indirectly through derivatives in China A-Shares through Shanghai/Shenzhen-Hong Kong Stock Connect. The fund may also invest directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash. The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently.

Relevant risk as associated with this Fund are shown overleaf and should be carefully considered before making any investment.

## Risk considerations

**Liquidity risk:** In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

**Operational risk:** Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

**Currency risk:** The fund may lose value as a result of movements in foreign exchange rates.

**Derivatives risk – Efficient Portfolio Management:** Derivatives may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

**Stock Connect risk:** The fund may be investing in China "A" shares via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect which may involve clearing and settlement, regulatory, operational and counterparty risks.

**Emerging Markets & Frontier risk:** Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

**Counterparty risk:** The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

**Performance risk:** Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

**IBOR:** The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

## Synthetic risk & reward indicator (SRRI)

### LOWER RISK

Potentially lower reward

### HIGHER RISK

Potentially higher reward

The risk category was calculated using simulated historical performance data and may not be a reliable indicator of the fund's future risk profile. The fund's risk category is not guaranteed to remain fixed and may change over time. A fund in the lowest category does not mean a risk-free investment. A fund is in categories 1 to 3 where it can take lower risks in search of potentially lower rewards and its price may rise and fall accordingly. A fund is in categories 4 to 7 where it can take higher risks in search of potentially higher rewards and its price may rise and fall accordingly.
