

Aberdeen Standard SICAV I - Emerging Markets Local Currency Bond Fund

This is a marketing communication. Please refer to the Prospectus of the UCITS/Information document and the KiID before making any final investment decisions.

A Acc EUR

30 November 2022

Objective

The Fund aims to achieve a combination of income and growth by investing in bonds (which are like loans that can pay a fixed or variable interest rate) issued by companies, governments or other bodies in Emerging Market countries, which are denominated in the currency of that country. The Fund aims to outperform the JP Morgan GBI-EM Global Diversified Index (USD) benchmark (before charges).

Portfolio securities

- The Fund invests at least two-thirds of its assets in bonds which are issued by companies with their registered office in, and/or government related bodies domiciled in an Emerging Market country and denominated in the currency of that country as at the date of investment.
- The bonds will be of any credit quality. The Fund may invest up to 50% of its assets in Sub-Investment Grade bonds.

Performance Data: Share Class A Acc EUR

Benchmark history: Benchmark – JP Morgan GBI-EM Global Diversified (EUR)

Source: Lipper, JP Morgan, Russell Mellon. Basis: Total Return, NAV to NAV, net of annual charges, gross Income reinvested, (EUR).

Costs may increase or decrease as a result of currency and exchange rate fluctuations. This may impact what you might get back. "Fund (Net)" refers to the actual unit price performance of the shareclass shown; "Fund(Gross)" adds back charges such as the annual management charge to present performance on the same basis as the Benchmark / Benchmark / portfolio constraining benchmark. All return data includes investment management fees, operational charges and expenses, and assumes the reinvestment of all distributions. The returns provided do not reflect the initial sales charge and, if included, the performance shown would be lower. Performance and benchmark returns are shown in the currency of the share class which may differ from the base currency of the Fund.

Net of Entry Fee is Fund Net after taking into account the maximum initial charge and costs incurred at fund level. The customer level accruing costs (e.g. custody account fees or brokerage fees) and the front-end load are not taken into account and, if included, the performance shown would be lower.

Past performance does not predict future returns.

Management process

- The Fund is actively managed.
- The benchmark is used as a reference point for portfolio construction and as a basis for setting risk constraints.
- In order to achieve its objective, the Fund will take positions whose weightings diverge from the benchmark or invest in securities which are not included in the benchmark. The investments of the Fund may deviate significantly from the components and their weightings in the benchmark.
- Due to the active nature of the management process, the Fund's performance profile may deviate significantly from that of the benchmark over the longer term.
- abrdn integrate environmental, social and governance (ESG) considerations within the investment process. Details of the Fixed Income ESG Integration Approach are published at www.abrdn.com under "Sustainable Investing".

- (d) The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- (e) The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.
- (f) Convertible securities are investments that can be changed into another form upon certain triggers. As such, they can exhibit credit, equity and fixed interest risk. Contingent convertible securities (CoCos) are similar to convertible securities but have additional triggers which mean that they are more vulnerable to losses and volatile price movements and hence become less liquid.
- (g) The fund invests in mortgage and asset-backed securities (which may include collateralised loan, debt or mortgage obligations (respectively CLOs, CDOs or CMOs)). These are subject to prepayment and extension risk and additional liquidity and default risk compared to other credit securities.
- (h) The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

Derivative usage

- The Fund may use investment techniques (including Derivatives) to seek to protect and enhance the value of the Fund and to manage the Fund's risks. Derivatives, such as futures, options and swaps, are linked to the rise and fall of other assets. In other words, they 'derive' their price from another asset. They can generate returns when share prices and/or indices fall.

A summary of investor rights can be found in English on our website - www.abrdn.com/corporate/legal. To help you understand this fund and for a full explanation of risks and the overall risk profile of this fund and the shareclasses within it, please refer to the Key Investor Information Documents available in the local language, and Prospectus available in English, which are available on our website www.abrdn.com. The Prospectus also contains a glossary of key terms used in this document. The Fund Management company may terminate arrangements for marketing the fund under the Cross-border Distribution Directive denotification process.

This Fund concerns the acquisition of units or shares in a fund, and not in a given underlying asset such as a building or shares of a company.

¹Yield to Maturity as at 30/11/2022 is the yield that would be realised on a bond or other debt instrument if the security was held until the maturity date.

²These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.

³The Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the fund. It is made up of the Annual Management Charge (AMC) of 1.50% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds.

The fund is a Luxembourg-domiciled UCITS fund, incorporated as a Société Anonyme and organized as a Société d'Investissement à Capital Variable (a "SICAV"). In Spain Aberdeen Standard SICAV I has been registered with the Comisión Nacional del Mercado de Valores under the number 1941.
