Fund aim

The Fund aims to achieve a positive absolute return over the long term regardless of market conditions, though a positive absolute return is not guaranteed over any time period.

The Fund will typically invest at least 60% of its total assets, by taking long and short positions, in equities or equity related derivative contracts of:

- companies having their registered office in the United Kingdom; and
- companies that do not have their registered office in the United Kingdom but either (i) carry out a predominant proportion of their business activity in these markets, or (ii) are holding companies which predominantly own companies with registered offices in the United Kingdom, or (iii) are listed on the London Stock Exchange.

In addition, in seeking to implement the Fund's investment strategy, manage market exposure and ensure that the Fund remains sufficiently liquid to cover obligations arising from its derivative positions, a substantial proportion of the Fund's assets may at any time consist of cash, near cash, deposits and/or Money Market Instruments. The Fund will invest in companies of any market capitalisation.

Long positions may be held through a combination of direct investment and/or derivative instruments, and short positions will be held through derivative positions, including but not limited to swaps and futures. The use of derivatives forms an important part of the investment strategy.

The Fund may also invest at the Investment Manager's discretion in other Transferable Securities, derivative instruments and collective investment schemes.

Additional information

On 16 January 2014, the Fund changed its investment objective and policy.

This is a Luxembourg SICAV Fund, regulated by the Commission de Surveillance du Secteur Financier (CSSF).

What are the risks specific to this fund?

- This fund is designed to be used only as one component in several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this fund.
- The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund.
- Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.
- The Fund involves a high level of buying and selling activity and as such will incur a higher level of trading costs than a fund that trades less frequently.
- The fund may invest up to 40% in shares or derivatives of share of companies outside the UK
- Any security could become hard to value or to sell at a desired time and price, increasing the risk of investment losses.
- If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.
- If the Fund or a specific share class of the Fund seeks to reduce risks (such as exchange rate movements), the measures designed to do so may be ineffective, unavailable or detrimental.

General risks

- Past performance is not a guide to future performance.
- The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.
- Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change.
