HIGHLIGHTS

LO Funds - Asia High Conviction is an actively managed long-only Asia-ex Japan equity strategy in place since 31 May 2014. It seeks to outperform the MSCI Asia ex-Japan ND index over the long term, without necessarily tracking it over the short term. The investment approach consists of 3 distinct themes (Growth, Value and Turnaround), combined with a fundamental bottom up stock-picking process. The portfolio will usually be relatively concentrated (with a maximum of 50 companies deriving a significant portion of their revenues from Asia). Each position is further constrained by a minimum and maximum position size of 1% and 10% respectively. The portfolio managers monitor risk exposures closely at the portfolio level to ensure the portfolio is not taking on excessive risks. Alongside this, independent teams manage investment risks and monitor operational risks.

PARTICULAR RISKS

The following risks may be materially relevant but may not always be adequately captured by the synthetic risk indicator and may cause additional loss:

- Liquidity risk: Where a significant level of investment is made in financial instruments that may under certain circumstances have a relatively low level of liquidity, there is a material risk that the fund will not be able to transact at advantageous times or prices. This could reduce the fund's returns.
- Emerging market risk: Significant investment in emerging markets may expose to difficulties when buying and selling investments. Emerging markets are also more likely to

experience political uncertainty and investments held in these countries may not have the same protection as those held in more developed countries.

- Active management risk: Active management relies on anticipating various market developments and/or security selection. There is a risk at any given time that the fund may not be invested in the highest-performing markets or securities. The fund's net asset value may also decline.

For more details about risk, see appendix B "Risk Factors" of the prospectus.

GLOSSARY

Credit Ratings: The credit ratings breakdown mentioned for convertible funds is a blend of ratings performed internally as well as ratings provided by external sources.

Risk and Reward Profile: This indicator (SRRI) represents the annualized historical volatility of the Sub-Fund over a 5-year period. Where there are less than 5 years worth of data, missing returns are simulated using an appropriate benchmark. The SRRI may change over time and should not be used as an indicator of future risk or returns. Even the lowest risk classification does not imply that the Sub-Fund is risk-free or that capital is necessarily guaranteed or protected.

Total Expense Ratio (TER): The total fees involved in managing and operating a fund. The TER included the annual management fee and other charges, for example legal, admin, and audit costs (source: annual audited reports or semi annual non audited reports). The Total Expense Ratio (TER) is calculated twice per year and is subject to change between calculation dates.

Volatility: A statistical measure of the fluctuations of a security's price. It can also be used to describe fluctuations in a particular market. High volatility is an indication of higher risk.

Sharpe Ratio: A measure of risk-adjusted performance. The higher the ratio, the better riskadjusted performance has been.

Drawdown: A draw down is usually quoted as the percentage between the peak and trough of an investment during a specific period. It can help to compare an investment's possible reward to its risk.

Correlation: Correlation is a measure of how securities or asset classes move in relation to each other. Highly correlated investments tend to move up and down together while investments with low correlation tend to perform in different ways in different market conditions, providing investors with diversification benefits. Correlation is measured between 1 (perfect correlation) and -1 (perfect opposite correlation). A correlation

coefficient of 0 suggests there is no correlation.

Tracking Error: A measure of how closely an investment portfolio follows the index against which it is benchmarked.

Bond Floor: The lowest value that convertible bonds can fall to, given the present value of the remaining future cash flows and principal repayment. The bond floor is the value at which the convertible option becomes worthless because the underlying stock price has fallen substantially below the conversion value.

Delta: The ratio comparing the change in the price of the underlying asset to the corresponding change in the price of a derivative.

Premium: If a fixed-income security (bond) is purchased at a premium, existing interest rates are lower than the coupon rate. Investors pay a premium for an investment that will return an amount greater than existing interest rates.

Yield to Maturity: The rate of return anticipated on a bond if it is held until the maturity date.

Coupon: The interest rate stated on a bond when it's issued.

Modified Duration: This formula is used to determine the effect that a 100-basis-point (1%) change in interest rates will have on the price of a bond.

Average Duration: The average modified duration of the portfolio expressed in years.

Expected Loss: Annual average expected loss to the portfolio expressed in percent.

Attachment Point: The modelled probability of a negative portfolio return in any given year.

FROC (Fixed Rate of Operational Costs): The Operational Costs cover expenses directly incurred by the Company ("Direct Costs") and those resulting from the activities carried out by the Management Company on behalf of the Company ("Fund Servicing Costs").

An investment in the Fund is not suitable for all investors. Making an investment in a Fund is speculative. There can be no assurance that the Fund's investment objective will be achieved or that there will be a return on capital. Past or estimated performance is not necessarily indicative of future results and no assurance can be made that profits will be achieved or that substantial losses will not be incurred. Where the fund is denominated in a currency other than an investor's base currency, changes in the rate of exchange may have an adverse effect on price and income. All performance figures reflect the

reinvestment of interest and dividends and do not take account the commissions and costs incurred on the issue and redemption of shares/units; performance figures are estimated and unaudited. Net performance shows the performance net of fees and expenses for the relevant fund/share class over the reference period. This document does not contain personalized recommendations or advice and is not intended to substitute any professional advice on investment in financial products. Before making an investment in the Fund, an investor should read the entire Offering Documents, and in particular the risk factors pertaining to an investment in the Fund, consider carefully the suitability of such investment to his/her particular circumstances and, where necessary, obtain independent professional advice in respect of risks, as well as any legal, regulatory, credit, tax, and accounting consequences. Important information on benchmarks: Any benchmarks or indices included in the factsheets are for information purposes and any past performance is not a guarantee of future performance. No benchmark/index is directly comparable to a fund's investment strategy and investors should not assume there is any direct correlation between an index/benchmark's performance and that of a fund. Investors should note that for hedged share classes, the performance index hedging methodology will replicate that of the relevant share class and may include benchmark performance simulated by the Investment Manager in order to replicate the relevant share class mechanism.

Important information on target performance/risk: Target performance/risk represents a portfolio construction goal. It does not represent past performance/risk and may not be representative of actual future performance/risk.

Important information on portfolio composition: The portfolio information provided in this document is for illustrative purposes only and does not purport to be recommendation of an investment in, or a comprehensive statement of all of the factors or considerations which may be relevant to an investment in, the referenced securities. They illustrate the investment process undertaken by the manager in respect of a certain type of investment, but may not be representative of the Fund's past or future portfolio of investments as a whole and it should be understood that they will not of themselves be sufficient to give a clear and balanced view of the investment process undertaken by the manager or of the composition of the investment portfolio of the Fund. As the case may be, further information regarding the calculation methodology and the contribution of each holding in the representative account to the overall account's performance can be obtained by the Fund or the Management Company.
