- The NASDAQ Global High Equity Income Index is a modified market capitalisation weighted index designed by Nasdaq to objectively identify and select stocks from the NASDAQ Global Index.
- The Index begins with the eligible companies in the NASDAQ Global Index, excluding mortgage REITs. Companies are selected based on factors such as liquidity, dividend yield and other quality screens.
- To be eligible for inclusion in the Index, the companies must meet stringent eligibility criteria and exhibit the ability to increase dividends. The following quality screens are also applied: i. exclude stocks in the bottom quintile by return on assets; ii. long term debt to assets less than 75%; iii. three-year dividend pay-out ratio less than 90%; iv. positive free cash flow.
- One security per issuer is permitted.
- Eligible securities that pass the above screens are selected for inclusion and are weighted by "net income minus dividends paid" or "plough-back", subject to a maximum weight of 3% for developed stocks and 1% for emerging stocks.
- The Index stocks are rebalanced and reconstituted semi-annually.
- The Index is divided into six separate sub-portfolios, each of which receives 16.67% of the total Index weight.
- Each sub-portfolio is rebalanced and reconstituted on a separate semi-annual schedule so that one sub-portfolio is rebalanced each calendar month. The sub-portfolios are returned to their ideal weights of 16.67% once a year in December.
