Credit Suisse Investment Partners (Lux) Global Convertible Bond Fund

a subfund of CS Investment Funds 1 - Class IB USD

Investment policy

The fund provides an actively managed exposure to the broad global convertible investment grade universe, applying a proprietary investment process. The goal is to generate a superior risk-adjusted return in excess of the chosen benchmark with controlled active risk. The fund invests globally with a minimum of 75% in investment grade convertibles.

ESG Integration (ESG aware): This product undertakes investments that explicitly assess and integrate the sustainability characteristics of companies in the investment process.

¹⁾ The fund's risk and reward profile shows the variations in value an investment in this fund would have undergone over the past five years, whereby simulated performance data is used in the case of missing history. The fund's risk rating may change in the future. Please note, higher possible gains generally also mean higher possible losses. The lowest risk category does not mean that the fund is risk free.

²⁾ If the currency of a financial product and/or its costs is different from your reference currency, the return and cost may increase or decrease as a result of currency fluctuations.

Asset Allocation presented on this page may change over time.

Credit Suisse Investment Partners (Lux) Global Convertible Bond Fund

a subfund of CS Investment Funds 1 - Class IB USD

ESG stands for environmental (E), social (S), and governance (G). For further information about the ESG investment criteria and the sustainability-related aspects of the fund please consider the legal and regulatory documents of the fund (such as, e.g., the prospectus) and visit credit-suisse.com/esg. In addition to sustainability-related aspects, the decision to invest in the fund should take into account all objectives and characteristics of the fund as described in its prospectus, or in the information which is to be disclosed to investors in accordance with applicable regulations.

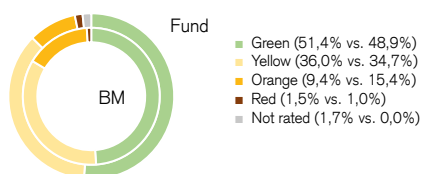

ESG Rating vs Benchmark ⁶⁾

Governance	5,8

ESG Controversies Flag ¹⁰⁾

Low Carbon Transition Score ¹²⁾

Portfolio: **5,6** / Benchmark: **5,7**

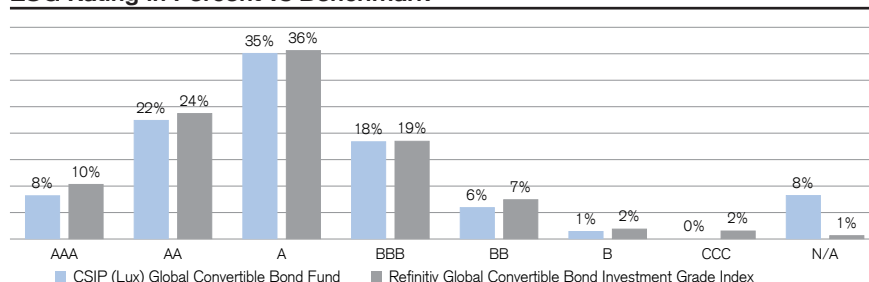

Portfolio Summary ⁷⁾

This fund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088). It applies the CSAM Sustainable Investing Policy (www.credit-suisse.com/esg) to combine the most material ESG factors with traditional financial analysis to calculate an ESG integrated credit rating, which serves as the basis for a bottom-up security selection process.

Applied ESG Characteristics ⁸⁾

Carbon Emission Intensity ¹³⁾

Tons CO₂-equivalent emissions per \$m revenues

Portfolio: **254,7** / Benchmark: **259,9**

Legend

6) ESG Rating which is provided by MSCI ESG, is measured on a scale from AAA (highest rating) to CCC (lowest rating). The rating is based on the underlying company's exposure to industry specific sustainability risks and their ability to mitigate those risks relative to their peers. The overall portfolio rating is calculated on an industry relative basis while the underlying individual E, S and G ratings are absolute. Hence, the overall rating cannot be seen as an average of the individual E, S and G ratings.

7) For more information on the applied norms-based exclusions please refer to: www.svk-asir.ch. In the absence of suitable and/or liquid equity index futures on ESG indices, the Sub-Fund / Fund may use equity index futures, which refer to traditional indices (non-ESG) in order to reduce various risks, for efficient portfolio management and as a way to gain or reduce market exposure.

8) For further information on the methodology applied to assess the ESG characteristics of the investments, please refer to www.msci.com/our-solutions/esg-investing/

9) The Overall ESG Quality Score does not correspond directly to the presented underlying Environment, Social and Governance Pillar scores. The Pillar scores are derived on an absolute basis, while the Overall ESG Quality Score is adjusted to reflect the industry-specific level of sustainability risk exposure. Since Pillar scores are absolute, and Overall scores are relative, the first cannot be averaged to derive the latter. ESG Themes represent a break-down of individual E, S and G scores. All scores and its' components are rated on a scale of 0-10 (provided by MSCI), where 0 is very poor and 10 is very good.

10) ESG Controversies Flag is designed to provide timely and consistent assessments of ESG controversies involving publicly traded companies and fixed income issuers. A controversy case is typically a one-off event such as an environmental oil spill, an accident, or allegations such as safety issues in a production facility. The colour indicator, which spans from red to green, indicates the most severe involvement (red) to the least involved (green) in any controversies. The grey colour indicates where data is unavailable.

11) ESG Ratings represents the ESG Rating breakdown in percentage in an absolute view or relative to a benchmark.

12) Low Carbon Transition Score is based on a multi-dimensional risks and opportunities assessment and considers both predominant and secondary risks a company faces. The scale ranges from 0-10 (with 10 representing a potential leader) and is industry agnostic and represents an absolute assessment of a company's position vis-à-vis the transition. On a portfolio level, individual scores are aggregated and compared to the benchmark (if existent).

13) Carbon Intensities compares the weighted average emissions intensity per million \$ sales (broken down by GICS sector) between the portfolio and the benchmark. It also displays active GICS sector weights.

Potential risks

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- Credit risk: Issuers of assets held by the Fund may not pay income or repay capital when due. Part of the Fund's investments may have considerable credit risk.
- Liquidity risk: Assets cannot necessarily be sold at limited cost in an adequately short timeframe. Part of the Fund's investments may be prone to limited liquidity. The Fund will endeavor to mitigate this risk by various measures.
- Counterparty risk: Bankruptcy or insolvency of the Fund's derivative counterparties may lead to payment or delivery default. The Subfund will endeavor to mitigate this risk by the receipt of financial collateral given as guarantees.
- Event risk: In the case a trigger event occurs contingent capital is converted into equity or written down and thus may lose substantially in value.
- Operational risk: Deficient processes, technical failures or catastrophic events may cause losses.
- Political and Legal risks: Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks. Investments in less developed financial markets may expose the Fund to increased operational, legal and political risk.
- Sustainability risks: Sustainability risks are environmental, social or governance events or conditions can have a material negative effect on the return, depending on the relevant sector, industry and company exposure.

The investment promoted in this marketing material concerns the acquisition of units or shares in a fund and not of any underlying assets. The underlying assets are owned by the fund only.

The full offering documentations including complete information on risks may be obtained free of charge from a Credit Suisse representative or where available via FundSearch (credit-suisse.com/fundsearch).

Solvency II Market Risk Contribution ¹⁴⁾

Interest Rate up / down	Spread	Equity Type 1 / Type 2	Property	Currency up / down
1,98%/0,21%	7,09%	9,55%/2,38%	0,00%	-25,40%/25,40%

14) The indicative SCR market risk figures are based on the methodology defined in the Solvency II standard model and are calculated as per end of the last full quarter.

Details on the aggregation methodology are described in the paper 'Classifying Solvency Capital Requirement Contribution of Collective Investments under Solvency II' available on <http://www.solvencyanalytics.com/publications.html>.
