

# Allianz Multi Asset Opportunities - AT (H2-EUR) - EUR

Broadly diversified multi asset-fund following a highly flexible strategy

**Allianz**   
Global Investors

## Investment Objective

The fund aims at generating capital growth over the long term and superior risk-adjusted returns throughout the market cycle. To this end it follows a highly flexible strategy in a variety of asset classes including, equities, bonds, commodities and currencies. Exposure to asset classes may be gained through direct investments as well as derivatives and other instruments.

## Fund Manager

Claudio Marsala  
(since 11/21/2016)

Yield to worst (%) <sup>7</sup>	5.84
Average rating	AA

## Opportunities

- + Prospect for attractive risk-adjusted return throughout the market cycle
- + Flexible use of different high-opportunity asset classes and instruments including derivatives
- + Potential additional returns from single security analysis and active management

## Risks

- Positive return or capital preservation not guaranteed. The fund unit price may be subject to strongly increased volatility.
- Above-average fluctuations and risk of loss particularly in high-opportunity asset-classes and strategies employing derivatives
- Success of single security analysis and active management not guaranteed

### FOR FUND DISTRIBUTORS AND PROFESSIONAL INVESTORS ONLY

- 1) Calculated at the net asset value, excl. front-end load, distributions reinvested. Calculation according to method as defined by BVI, the German Fund Companies Association. **Any front-end loads reduce the capital employed and the performance.**
- 2) Benchmark history: until 30/09/2021 LIBOR USD Overnight (hedged into EUR)
- 3) SFDR: EU Sustainable Finance Disclosure Regulation. Information accurate at time of publishing.
- 4) The Sharpe ratio states the relationship between the return generated by the fund and the investment risk. The fund's excess return versus the risk-free market rate is compared to volatility. Negative values are not meaningful.
- 5) Volatility measures the fluctuation range of the fund's performance over a specified period of time.
- 6) This is for guidance only and not indicative of future allocation.
- 7) Represents the lowest potential yield that an investor could theoretically receive on the bond up to maturity if bought at the current price (excluding the default case of the issuer). The yield to worst is determined by making worst-case scenario assumptions, calculating the returns that would be received if worst-case scenario provisions, including prepayment, call or sinking fund, are used by the issuer (excluding the default case). It is assumed that the bonds are held until maturity and interest income is reinvested on the same conditions. Calculation is before currency hedging. The yield to worst is a portfolio characteristic; in particular, it does not reflect the actual fund income. The expenses charged to the fund are not taken into account. As a result, the yield to worst is not suitable as an indicator of the future performance of a bond fund. Forecasts are not a reliable indicator of future results.

### Disclaimer

Investing involves risk. The value of an investment and the income from it may fall as well as rise and investors might not get back the full amount invested. Investing in fixed income instruments may expose investors to various risks, including but not limited to creditworthiness, interest rate, liquidity and restricted flexibility risks. Changes to the economic environment and market conditions may affect these risks, resulting in an adverse effect to the value of the investment. During periods of rising nominal interest rates, the values of fixed income instruments (including positions with respect to short-term fixed income instruments) are generally expected to decline. Conversely, during periods of declining interest rates, the values of these instruments are generally expected to rise. Liquidity risk may possibly delay or prevent account withdrawals or redemptions. Allianz Multi Asset Opportunities is a sub-fund of Allianz Global Investors Fund SICAV, an open-ended investment company with variable share capital organised under the laws of Luxembourg. Past performance does not predict future returns. If the currency in which the past performance is displayed differs from the currency of the country in which the investor resides, then the investor should be aware that due to the exchange rate fluctuations the performance shown may be higher or lower if converted into the investor's local currency.
