ODDO BHF Haut Rendement 2023

(hereinafter the "Fund")

This UCITS is managed by ODDO BHF Asset Management SAS

ISIN: CI-EUR units - FR0013173408 - EUR - Accumulation

OBJECTIVES AND INVESTMENT POLICY

This Fund is classified as follows: International bonds and other debt securities
The investment objective is to achieve a net annualised performance above 4% over an investment period running from the Fund inception date, 9 December 2016, to 31 December 2023. The Fund aims to benefit from the yield-to-maturity of high yield corporate bonds rated between BB+ and B- (Standard & Poor's or equivalent as assessed by the Management Company or according to its own internal rating), thereby incurring a risk of capital loss. The Fund's investment strategy is to manage, on an active and discretionary basis, a diversified portfolio composed of traditional bonds (and convertible bonds up to 10% of net assets) with high yields and ratings between BB+ and B- (Standard & Poor's or equivalent as assessed by the Management Company or according to its own internal rating), with maturities of a maximum of six months and one day after 31 December 2023 (final maturity of the product or early redemption options at the issuer's discretion) and issued mainly by corporate issuers with their registered office in Europe.

These securities will be denominated in all OECD currencies and hedged against currency risk; however, there is a residual risk of no more than 5% of net assets. In addition, the Fund may hold up to 20% of its bond portfolio in corporate bonds from issuers having their registered office outside of Europe, including in emerging countries. The Fund seeks to select securities that the manager deems to have been unjustly downgraded by rating agencies. The Fund is managed within a modified duration range of 0 to 7.

The Management Company does not use the ratings issued by ratings agencies automatically or in isolation, as it also applies its own internal analysis. In the event that the securities' rating is downgraded below B- (Standard & Poor's or equivalent as assessed by the Management Company or according to its own internal rating), the Management Company will decide whether or not to dispose of the securities in light of its own analysis, the interests of unitholders and market conditions.

Where market conditions are considered to be unfavourable by the manager, the manager may decide, on a discretionary basis, to invest up to 100% of the Fund's assets in investment grade securities (Standard & Poor's rating of BBB- or equivalent as assessed by the Management Company or according to its own internal rating) such as bonds, convertible bonds, debt securities or money market instruments.

The manager may invest up to 10% of the Fund's net assets in convertible bonds with small and mid-cap companies as their underlyings.
The average duration of the debt securities shall be calculated based on a portfolio comprising securities with a maximum maturity of 31 December 2023 plus six months and one day.

The Fund may invest up to 10% of its net assets (i) in units or shares of UCITS, (ii) in EU AIFs and/or in foreign investment funds mentioned in R.214-25 that meet the criteria of article R.214-13 of the French Monetary and Financial Code. These funds may be managed by the management companies of the ODDO BHF group (ODDO BHF Asset Management SAS and/or ODDO BHF Asset Management GmbH) and will be compatible with the Fund's investment strategy.

Without seeking overexposure, up to 100% of the Fund's assets may be invested in financial futures or options traded on regulated, organised or OTC markets in France or other countries. The manager may take positions in order to hedge the portfolio (interest rate, equity and currency risk) and/or expose it to assets (interest rates):

- for hedging purposes: by selling forward contracts and buying put options, forward currency contracts or swaps;

- to gain exposure: by purchasing forward contracts and call options or swaps.

The Fund's maximum exposure may not exceed 100% of the Fund's net assets, all markets combined (including money market instruments).

Subscription period: new subscriptions will not be accepted after 11:15 (Paris time) on 12 January 2018.

Subscription and redemption requests are centralised by the depositary every Paris stock exchange trading day until 11:15 (Paris time, CET/CEST) and executed on the basis of the net asset value of the same day.

CI-EUR units accumulate their income.

Recommended investment horizon: the recommended minimum investment horizon is the term through to the end of each investment period (i.e. through to 31 December 2023 for the first period).

This Fund may not be appropriate for investors who plan to withdraw their money within this period.

RISK AND REWARD PROFILE

Historical data, such as is used to calculate the synthetic indicator, may not be a reliable indication of the future risk profile of the Fund.
The risk profile is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.
The capital initially invested is not guaranteed.

Why is the Fund placed in category 2?

Material risks to the Fund that are not taken into account in the indicator:

Credit risk: this is the risk of a downgrading of an issuer's credit rating or the risk of an issuer's insolvency. **Liquidity risk:** the Fund invests in markets which may be affected by declines in liquidity. Low volumes of market transactions may have an impact on prices at which the manager opens or closes positions. **Counterparty risk:** the risk of a counterparty's collapse, causing it to default on payment. The Fund may be exposed to this risk resulting from the use of forward financial instruments or temporary purchases and sales of securities contracts negotiated over-the-counter with a credit institution if the latter is unable to honour its commitments.

If one of these risks were to materialise, the Fund's net asset value may fall.
