

Allianz Dynamic Asian High Yield Bond

Allianz Global Investors Fund
AT

Allianz 
Global Investors

- The Fund is exposed to significant risks of investment/general market, interest rate, valuation, sovereign debt, creditworthiness/credit rating/downgrading, default, emerging market, country and region and currency (such as exchange controls, in particular RMB), and the adverse impact on RMB share classes due to currency depreciation.
- The Fund may invest in high-yield (non-investment grade and unrated) investments and convertible bonds which may subject to higher risks, such as volatility, loss of principal and interest, creditworthiness and downgrading, default, interest rate, general market and liquidity risks and therefore may adversely impact the net asset value of the Fund. Convertibles may also be exposed to risks such as prepayment risk, equity movement and greater volatility than straight bond investments.
- The Fund may invest in financial derivative instruments ("FDI") which may expose to higher leverage, counterparty, liquidity, valuation, volatility, market and over the counter transaction risks. The Fund's net derivative exposure may be up to 50% of the Fund's net asset value.
- This investment may involve risks that could result in loss of part or entire amount of investors' investment.
- In making investment decisions, investors should not rely solely on this material.
- **Note:** Dividend payments may, at the sole discretion of the Investment Manager, be made out of the Fund's capital or effectively out of the Fund's capital which represents a return or withdrawal of part of the amount investors originally invested and/or capital gains attributable to the original investment. This may result in an immediate decrease in the NAV per share and the capital of the Fund available for investment in the future and capital growth may be reduced, in particular for hedged share classes for which the distribution amount and NAV of any hedged share classes (HSC) may be adversely affected by differences in the interests rates of the reference currency of the HSC and the base currency of the Fund.

Investment Objective

The Fund aims at long-term capital growth and income by investing in high yield rated debt securities of Asian bond markets.

In making investment decisions, investors should not rely solely on this material but should seek independent professional advice.

Investing in fixed income instruments (if applicable) may expose investors to various risks, including but not limited to creditworthiness, interest rate, liquidity and restricted flexibility risks. Changes to the economic environment and market conditions may affect these risks, resulting in an adverse effect to the value of the investment. During periods of rising nominal interest rates, the values of fixed income instruments (including short positions with respect to fixed income instruments) are generally expected to decline. Conversely, during periods of declining interest rates, the values are generally expected to rise. Liquidity risk may possibly delay or prevent account withdrawals or redemptions.

Investment involves risks, in particular, risks associated with investment in emerging and less developed markets. Past performance is not indicative of future performance. Investors should read the offering documents for further details, including the risk factors, before investing.
