

Impax Environmental Leaders (Ireland) Fund

APRIL 2022

THIS DOCUMENT IS AN ADVERTISEMENT FOR MARKETING PURPOSES. BEFORE SUBSCRIBING, PLEASE READ THE PROSPECTUS AND THE KIID.

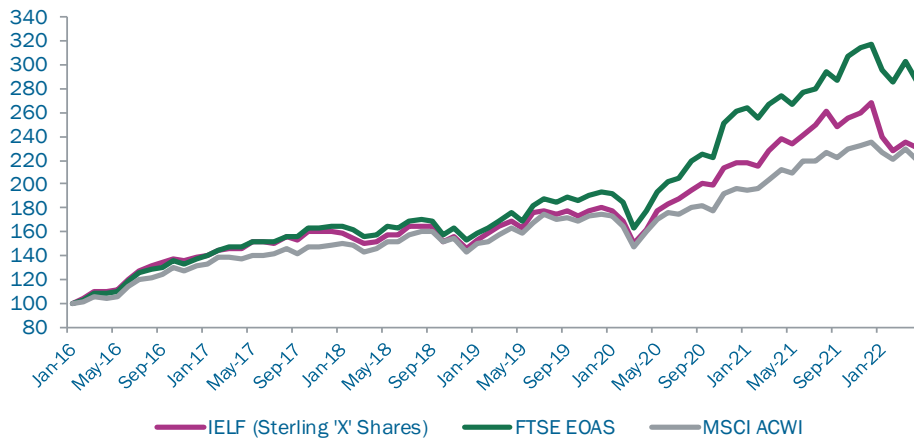

INVESTMENT OBJECTIVE

The Impax Environmental Leaders (Ireland) Fund ("IELF") seeks to achieve sustainable, above market returns over the longer term by investing globally in companies active in the growing resource efficiency and environmental markets.

These markets address a number of long term macro-economic themes: growing populations, rising living standards, increasing urbanisation, rising consumption and depletion of limited natural resources. Investments are made in companies which have >20% of their underlying revenue generated by sales of environmental products or services in the energy efficiency, renewable energy, water, waste and sustainable food and agriculture markets.

Please refer to Impax's [ESG Policy](#) for more details.

These figures refer to the past. Investments in funds are subject to risk. Past performance is not a guide to current or future performance and may not be repeated. The past performance does not take into account commissions and costs incurred on the issue and redemption of units. The money invested in a fund can increase and decrease in value and there is no guarantee that you will get back the full amount invested.

KEY RISK CONSIDERATIONS

Governmental liberalisation of basic services and increased environmental legislation may not occur at the anticipated rate. The costs of technology in environmental markets may not continue to fall or may not maintain price competitiveness.

IELF's portfolio will include a number of relatively newly established companies and companies whose future is dependent on widespread adoption of their products and services.

Many of IELF's investments will be denominated in currencies other than the currency of the Share class purchased by the investor and, therefore, the Net Asset Value of IELF may be affected by currency movements.

The valuations of companies in environmental markets may remain at current levels or may fall. For information on additional risk factors facing IELF your attention is drawn to the Prospectus.
