5. MANAGER'S COMMENTARY

Global growth remained very dynamic in March in all areas, albeit with specific characteristics.

In the United States, the lifting of health restrictions thanks to a flash vaccination campaign allows the sectors most affected by the crisis to reopen and hire, so that some shops mention recruitment difficulties!

China, having voluntarily slowed its economic machinery at the beginning of the year to avoid overheating and to limit population movement that are conducive to the spread of COVID cases ahead of the new year, is seeing a significant pickup in activity.

Finally, Europe held up well despite the increasing number of health restrictions (lockdown in France and Italy in particular). Manufacturing activity is strong, while services are limiting the helm.

This acceleration in global growth was evidenced by the sharp rebound in US 10 year interest rates from 1.40% to 1.74% during the month. This rapid growth has extended the massive switch from growth stocks to value. Thus, the European markets, which are more oriented towards value, largely outperformed (+7.80% for the EURO STOXX 50), the S & P 500 advanced +4.2% while the Nasdaq was almost stable, after having nevertheless experienced significant corrections, which was also true for all growth stocks with long duration.

Credit spreads are still trending downwards, driving high yield credit indices while investment grade is suffering from the rise in rates and records a stable performance in Europe and negative performance in the United States.

Thanks to its blend positioning, Auris Diversified Beta continued to advance, gaining +1.8% in March, driven by its 30% equity exposure (22% Europe, 8% US) and the portfolio's credit allocation, which accounts for 55% of the fund.

The equity bucket has significant potential: It is mainly invested in consumer related stocks that will benefit from the excess savings made by households during this crisis and industrial and cyclical stocks that will benefit from the good performance of manufacturing.

The fund is up 2.7% year to date.
