Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Debt instruments are exposed to credit risk which is the ability of the borrower to repay the interest and capital on the redemption date. Changes in interest rates will result in fluctuations in the value of the fund. The fund uses derivatives (complex instruments) for investment purposes, which may result in the fund being significantly leveraged and may result in large fluctuations in the value of the fund. The Fund may invest in a dynamic way across assets/asset classes, which may result in periodic changes in the risk profile, underperformance and/or higher transaction costs. Investment in instruments providing exposure to commodities is generally considered to be high risk which may result in large fluctuations in the value of the fund.

Fund Strategy

The fund manager seeks to generate consistent returns in various market environments by investing across multiple macroeconomic factors to provide investors with broad economic diversification. The strategy utilises a long-only, risk-balanced investment process with an adaptive tactical element. Through this, we aim to participate meaningfully during periods of economic strength. We also aim to mitigate downside risks during periods of market distress.

Portfolio weightings and allocations are subject to change. The weightings for each breakdown are rounded to the nearest tenth or hundredth of a percent; therefore, the aggregate weights for each breakdown may not equal 100%. The Risk allocation and Portfolio breakdown data has been calculated as at 1 March 2024. Growth represents cap-weighted equity beta and long put options. Defensive represents government bonds and equity factor premia. Real Return represents commodities. A discretionary cap on multiple components of the total costs is maintained. This discretionary cap may positively impact the performance of the Share Class.
