Bankinter International Fund Sicav - Multifunds Conservative - Class B

(ISIN: LU1496042943) Multifunds Conservative (the 'Fund') is a Sub-Fund of Bankinter International Fund Sicav (the 'Company'). Lemanik Asset Management S.A. is the Management Company (the 'Management Company') to the Fund.

Objectives and Investment Policy

- The Fund's objective is to provide long-term positive returns investing in other UCITS and UCIS with a limited exposure to equity.
- To achieve its objective, the Fund will invest 50% to 100% of its net assets in UCITS and other UCIs. The management company and/or investment management entity of those UCITS or other UCIs may be affiliated with the Bankinter Group.
- The Fund is actively managed without any reference to a benchmark. The Investment Manager has discretion over the composition of its portfolio subject to this objective and investment policy.
- The Fund may gain principally exposure to any of the following financial instruments through the investment in UCITS and other UCIs: any type of Transferable Securities including equity and fixed income securities, Money Market Instruments and other UCITS and UCI eligible assets (including but not limited to indices on commodities).
- The Fund will invest up to 25% of its net assets in equities or UCITS or other UCIs, whose investment strategy is mainly focused on equities.

- Sales of shares in the Fund can be made on any business day.
- The Fund does not intend to distribute dividends. Any income arising from the Fund's investments is reinvested and reflected in the value of your shares. However, the Annual General Meeting of shareholders may decide to distribute such income.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within four years.

Risk and Reward Profile

- The lowest category does not mean a risk free investment.
- The risk and reward profile may change over time.
- Historical data may not be a reliable indication for the future.
- This Fund is in category 3, since the share price has a moderate volatility and therefore the risk of loss as well as the expected reward is generally small to medium.

The following risks may not be fully captured by the risk and reward

indicator:

- Credit Risk: The Fund can invest a material part of its assets in bonds. Their issuers can become insolvent, thus their bonds can either partly or entirely diminish in value.
- Market Risk: The Fund's assets may decrease because of sovereign acts and political transformation, which may also influence free trade of currency. In addition, risks may arise because of restricted information possibilities in addition to less stringent supervision and control of certain markets. The performance of these markets may be subject to significant volatility.
- Liquidity Risk: The Fund may invest a material part of its assets in other funds. With these funds there can be a risk of suspension of redemption and therefore their liquidity can be constrained.

A complete description of risk factors is set out in the Prospectus in the section entitled 'Risk Factors'.
