NHS-SICAV II - MCM ISRAELI IT-SECURITY FUND, class A EUR (LU1345291485) a sub-fund of NHS-SICAV II

Management Company: Fuchs Asset Management S.A.

Objectives and investment policy

Objectives

The sub-fund's main objective is to achieve a consistent outperformance, relative to its benchmark, the TASE-BlueStar Israel Global Technology Index, by selecting stocks within IT-Security sector based on quantitative models. The strategy will then overweight those stocks within a large and diversified basket of global IT security stocks (actively managed).

Investment policy

The sub-fund aims to maximize the increase in value of the portfolio with agile response to the Israel, London and US markets within the IT security sector. In order to achieve its investment objective, the sub-fund will mainly invest in equities that are members of the BGTH Index and will overweight the equities related to the IT security sector within a portfolio of global technology stocks in accordance with the "General Investment Restrictions" of the prospectus. The sub-fund will invest (up to 100% of its net assets) in equities mainly listed on the US, London and Israel markets. The sub-fund may use financial derivative instruments for hedging and investment purposes. Investment in non-reference currency financial instruments is allowed provided by the fact that currency exposure is hedged. There is how-

ever, no guarantee or assurance that such coverage will be effective.

The sub-fund may also invest up to 100% of its net assets in liquid instruments, such as cash deposits, money market UCITS.

The sub-fund is actively managed. While the sub-fund compares its performance against the TASE-BlueStar Israel Global Technology Index, it does not try to replicate this benchmark and freely selects the securities that it invests in. The deviation with this benchmark can be significant.

The currency of the share class is expressed in EUR.

The investor has the right to redeem his shares on demand. The dealing in shares is carried out on each complete bank business day in Luxembourg. The attention of the investor is drawn to the fact that in exceptional circumstances, the possibility for the investor to request the redemption of his shares may be limited or suspended.

These shares are capitalisation shares. Income and capital gains are reinvested.

Recommendation

This fund may not be appropriate for investors who plan to withdraw their money within 4 - 5 years.

Risk and reward profile

What does this synthetic indicator mean?

- The shares of class A EUR are classified in category 7 because the value of the share may be subject to high variations and consequently the risk of loss and the opportunity of gain may be high.
- The risk category has been determined on the basis of historical and simulated data and may not be a reliable indication of the future risk profile. The risk and reward category shown does not necessarily remain unchanged and the categorisation of the fund may shift over time.
- The lowest category does not mean a risk-free investment.
- Repayment of the initial investment is not guaranteed.

Which materially relevant risks are not adequately captured by the synthetic indicator?

- **Credit risk:** the sub-fund can be indirectly invested in securities whose credit rating may decline, it is consequently exposed to credit risk.

- **Liquidity risk:** the sub-fund will invest in Transferable Securities of smaller companies which may be less liquid.
- **Counterparty risk:** the sub-fund will invest in OTC derivatives for investment and hedging purposes.
- **Operational risk:** the sub-fund is subject to risks through operational or human error. The management company is monitored by independent internal and external auditors, as well as by the regulators.
- **Emerging market risk:** Emerging, frontier and other markets may be subject to increased political, regulatory and economic instability, poor transparency, safekeeping issues and greater financial risks.
- **Risks from the use of derivatives:** the sub-fund will invest on an ancillary basis in financial derivatives. Financial derivative instruments can introduce leverage risks and lead to volatility.
- **Risks related to investment in currencies:** The sub-fund's investments may be acquired directly or indirectly in other national currencies than its reference currency. This can have a negative impact on the Fund depending on volatility in currency markets.

How can I get more information about the risks of the sub-fund?
