## General Information

The following information is derived from and should be read in conjunction with the full text and definitions section of the Prospectus.
Muzinich Funds (the "Fund") was constituted on 8 May 1998 as an open-ended umbrella unit trust.
The Fund is authorised and regulated by the Central Bank of Ireland (the "Central Bank") under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and the Central Bank (Supervision and Enforcement) Act, 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 (the "UCITS Regulations").
At 30 November 2023, the Fund was comprised of 17 active Sub-Funds (the "Sub-Funds"). The names and launch dates are as follows:

| Sub-Fund | Launch Date |
| :--- | ---: |
| Muzinich Americayield Fund | 13 May 1998 |
| Muzinich Europeyield Fund | 15 June 2000 |
| Muzinich Global High Yield Low Carbon Credit Fund | 25 July 2003 |
| Muzinich Enhancedyield Short-Term Fund | 26 November 2003 |
| Muzinich ShortDurationHighYield Fund | 4 October 2010 |
| Muzinich Sustainable Credit Fund | 14 May 2011 |
| Muzinich LongShortCreditYield Fund | 19 June 2012 |
| Muzinich EmergingMarketsShortDuration Fund | 22 July 2013 |
| Muzinich Global Tactical Credit Fund | 13 November 2013 |
| Muzinich Asia Credit Opportunities Fund | 11 November 2015 |
| Muzinich Emerging Market Corporate Debt Fund | 2 May 2017 |
| Muzinich European Credit Alpha Fund | 31 October 2017 |
| Muzinich Fixed Maturity 2024 Fund | 29 November 2017 |
| Muzinich High Yield Bond 2024 Fund | 24 September 2018 |
| Muzinich Global Short Duration Investment Grade Fund | 9 July 2019 |
| Muzinich Dynamic Credit Income Fund | 28 April 2022 |
| Muzinich Global Fixed Maturity 2027 Fund | 20 April 2023 |

There is no cross liability between the Sub-Funds.

## General Information cont/d...

## Minimum subscriptions cont/d...

The minimum initial subscription is set out below:

| Sub-Fund | Unit Class | Minimum Subscription |
| :--- | :--- | ---: |
| Muzinich Global Fixed Maturity | Hedged US\$ Accumulation P1 Units | US $\$ 1,000$ |
| 2027 Fund* $^{*}$ cont/d... | Hedged US\$ Accumulation R Units | US $\$ 1,000$ |
|  | Hedged US\$ Income H Units | US $\$ 5,000,000$ |
|  | Hedged US\$ Income P1 Units | US $\$ 1,000$ |
|  | Hedged US\$ Income R Units | US $\$ 1,000$ |

* Muzinich Global Fixed Maturity 2027 Fund launched on 20 April 2023.

## General Information cont/d...

## Prices

The prices for buying and selling Units in the Sub-Funds are represented by the Net Asset Value ("NAV") per Unit. A subscription fee not exceeding $5 \%$ of the NAV per Unit may be added to the total subscription amount and the resultant sum shall be rounded up to the nearest cent. The subscription fee shall be paid to Muzinich \& Co. (Ireland) Limited (the "Manager"), or to any placing or sales agent, or agents or distributors appointed by the Manager, for its or their absolute use and benefit and shall not form part of the net assets of the relevant Sub-Fund.

The Manager may at its sole discretion waive such fee or fees or differentiate between applicants as to the amount of such fee or fees within the permitted limits.

## Dealing

The Dealing Day for all Sub-Funds is each Business Day. Applications for subscriptions for all Sub-Funds must be received by the Administrator at its registered office no later than 4.00pm (Irish time) on the relevant Dealing Day. Requests for redemptions of Units in all Sub-Funds with the exception of Muzinich LongShortCreditYield Fund and Muzinich European Credit Alpha Fund must be received by the Administrator at its registered office no later than 4.00pm (Irish time) on the relevant Dealing Day. For Muzinich LongShortCreditYield and Muzinich European Credit Alpha Fund requests for redemptions must be received by the Administrator at its registered office no later than 4.00 p.m. (Irish time) one Business Day prior to the relevant Dealing Day.

Any application received after the time aforesaid shall be deemed to be made in respect of the next Dealing Day following such relevant Dealing Day. The deadline for receipt of subscription monies is 4.00pm (Irish time), three Business Days after the relevant Dealing Day.

Application and redemption requests should be addressed to the Administrator:
State Street Fund Services (Ireland) Limited, 78 Sir John Rogerson's Quay, Dublin 2, Ireland.
Tel: +353-1-853-8693
Fax: +353-1-523-3710

## Distributions

The Manager will determine the distribution policy of each Class of Units in accordance with the criteria as set out in the Supplement of the Sub-Fund. The distributions will normally be payable twice a year, in or around June and December in each year. Income Units which have a distribution frequency designated in the name of the Units, such as "(Monthly)" or "(Quarterly)", will declare dividends in accordance with their applicable frequency. Dividends that are declared monthly will be declared on the last Business Day of each month and dividends that are declared quarterly will be declared on or around 31 March, 30 June, 30 September and 31 December, unless otherwise set out in the relevant Supplement. Please refer to Note 10 for total distributions made by each Sub-Fund during the financial year.

The following table illustrates the distributions that were paid over the last 2 financial years by each Sub-Fund:

## Muzinich Americayield Fund

## Dealings with Connected Persons

Regulation 43(1) of the UCITS Regulations "Restrictions of transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is a) conducted at arm's length; and b) in the best interest of the Unitholders of the UCITS".

As required under UCITS Regulation 78.4, the Directors, as responsible persons, are satisfied that there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected person; and all transactions with connected persons that were entered into during the financial year to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

## Significant events during the financial year

Details of any significant events during the financial year are disclosed in Note 21 to the financial statements.

## Significant events after the financial year end

Details of any significant events after the financial year end are disclosed in Note 22 to the financial statements.

## General Information cont/d...

## Corporate Governance Code

## Statement of Compliance

The Board of Directors of the Manager has adopted in full the voluntary Code of Corporate Governance for Collective Investment Schemes and Management Companies issued by Irish Funds ("IF"), the text of which is available from the IF website, "http://www.irishfunds.ie". The Fund has been in compliance with the Corporate Governance Code during the financial year ended 30 November 2023.

## Statement of Responsibilities of the Manager

The Manager of the Fund is required by the UCITS Regulations to prepare financial statements for each annual accounting period which give a true and fair view of the financial position of the Fund at the end of that period, the profit or loss and the movement in net assets attributable to Unitholders resulting from operations for the period then ended. In preparing these financial statements the Manager is required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are prudent and reasonable;
- state whether the financial statements have been prepared in accordance with the applicable accounting standards, identify those standards, and note the effect and the reasons for any material departure from those standards; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Fund will continue in operation.

The Manager is also required to manage the Fund in accordance with the Trust Deed and the UCITS Regulations. The Manager is also responsible with respect to its duties under the Unit Trusts Act, 1990 for taking reasonable steps for the prevention and detection of fraud and other irregularities.
Under the UCITS Regulations the assets of the Fund shall be entrusted to the Depositary for safe-keeping. The Manager has appointed State Street Custodial Services (Ireland) Limited to act as Depositary for the Fund.

## Muzinich \& Co. (Ireland) Limited

## Report of the Depositary to the Unitholders of Muzinich Funds

We have enquired into the conduct of the Manager in respect of the Muzinich Funds (the "Trust") for the financial year ended 30 November 2023, in our capacity as Depositary to the Trust.
This report including the opinion has been prepared for and solely for the Unitholders of the Trust as a body, in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, as amended (the "UCITS Regulations"), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

## Responsibilities of the Depositary

Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Manager in each annual accounting period and report thereon to the Unitholders.
Our report shall state whether, in our opinion, the Trust has been managed in that period in accordance with the provisions of the Trust's Trust Deed and the UCITS Regulations. It is the overall responsibility of the Manager to comply with these provisions. If the Manager has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

## Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Trust has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Trust Deed and the appropriate regulations and (ii) otherwise in accordance with the Trust's constitutional documentation and the appropriate regulations.

## Opinion

In our opinion, the Trust has been managed during the year in all material respects:
(i) in accordance with the limitations imposed on the investment and borrowing powers of the Manager and the Depositary by the Trust Deed, by the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2015 (the "Central Bank UCITS Regulations"); and
(ii) otherwise in accordance with the provisions of the Trust Deed, the UCITS Regulations and the Central Bank UCITS Regulations.

# Investment Manager's Report for the financial year ended 30 November 2023 

## Financial Markets in the Period

Global credit delivered strong positive returns for the reporting period ( 30 November 2022-30 November 2023), with much of those returns generated in the last month. Prior to November, markets faced considerable downward volatility as inflation steepened, and, early in the period, as US regional banks and Credit Suisse faced solvency challenges which regulators quickly addressed, calming markets. As the year moved on, the recession that many had forecast (even more strongly for Europe than for the US) following multiple rate hikes, a war in Ukraine, and elevated commodity prices, failed to materialise. Eventually, positive market movements were largely driven by expectations of an imminent pivot in monetary policy of major Central Banks on the back of lower than expected inflation over the last few months of the year. The soft-landing scenario increasingly anticipated by investors, particularly for the US, combined with nice and steady disinflation, boosted global market valuations through the end of the reporting period. We do not expect much change to the narrative of lower policy rates from most Central Banks in 2024, though timing remains uncertain. Consequently, we believe any significant rise in yields or subsequent spread widening presents an opportunity to add some risk in portfolios. Looking ahead, we remain committed to the higher carry opportunity in credit, including high-yielding assets. We are cognisant of high valuations, but with the average price for high yield assets ("HY") in the US and Europe still below par, in our view this is the time to put money to work to capture the carry from credit markets.
References to returns refer to gross returns. Net returns will be reduced by fees and expenses and will vary by unit class. Reference returns refer to returns in the base currency of each Fund relative to a currency-similar market indicator.

## Muzinich Americayield Fund

In this environment, the Fund generated strong positive returns and outperformed its indicative index, the ICE BofA B/BB US Non-Financial Cash Pay High Yield Constrained Index ("JC4N"). Over the reporting period, credit spreads tightened across the quality spectrum while rates were materially less impactful than in 2022. We remained as fully invested as practical to capture the benefits of the HY and positive convexity of high yield bonds given positive economic growth. We maintained focus on credits that can perform in a variety of economic scenarios. Nearly all rating cohorts contributed positively on an absolute basis, led by BB- and B+ rated credits. On a sector basis, we successfully leveraged the work of our global research team to take advantage of a favorable view on auto sector recovery in Europe. We also benefitted modestly from the investment grade upgrade of Ford Motor. Another sector highlight came from cable/satellite TV, where increasing competition and elevated customer acquisition/network spending drove our underweight position in this underperforming sector. From a duration perspective, the Fund benefitted on both a relative and absolute basis from strong credit selection across the core 3-5 years duration bucket. A modest cash balance cost the Fund on a relative basis, given the market's strength over the reporting period.

## Muzinich Europeyield Fund

In this environment, the Fund generated positive returns and outperformed the indicative ICE BofA BB-B European Currency Non-Financial High Yield Constrained Index ("HP4N"). On a sector basis, the Fund benefitted most significantly from strong credit selection in homebuilders/real estate and automotives $\mathbb{\&}$ auto parts, while exposure to select food $\& d$ drug retail bonds acted as a drag. We continue to prefer more defensive sectors (i.e. telecommunications, cable/satellite TV, healthcare, etc.). We remain cautious (despite elevated yields) on the European retail sector and the chemicals sector, given deteriorating earnings trends. On the duration front, strong credit selection across the core 1-5 years duration range bolstered relative returns. At the end of the reporting period, the Fund's duration-to-worst is shorter than the indicative market due to our focus on the benefit of the pull-to-par of shorter dated bonds and an allocation to floating rate bonds and secured loans. However, we are progressively adding more duration to the portfolio by participating in the new issue market. Given an expected corporate earnings slowdown and macro-economic uncertainties, we have reduced our long-term overweight in single- $B$ rated credit and have also invested tactically in investment grade bonds made up of rising stars ( $B B+$ bonds that have recently been upgraded but haven't yet reached our price target), attractive senior bonds from European real estate issuers rated BBB- or above, attractive corporate hybrids rated investment grade (defensive sectors like utilities and energy), and senior bonds from

# Investment Manager's Report for the financial year ended 30 November 2023 cont/d... 

Muzinich Europeyield Fund cont/d...

European banks. Looking ahead, we plan to participate actively in the HY new issue market to secure higher coupons in the portfolio by selling some of the investment grade bonds in the portfolio.

## Muzinich Global High Yield Low Carbon Credit Fund

In this environment, the Fund generated positive returns but underperformed its indicative reference index, the ICE BofA Global High Yield Constrained Index ("HWOC"). Over the reporting period, we remained focused on investing in a portfolio of credits with less carbon intensity than the broader global HY market and on strong individual credit selection. At the close of the reporting period, the Fund was underweight in US HY exposure and overweight in both emerging markets high yield and European HY exposure. Our overweight in European HY is due to the addition of some higher quality, non-cyclical credit, and cross-over positions. The Fund's overall emerging markets positioning is slightly overweight due to our (overweight) HY exposure and the addition of some crossover and investment grade rated emerging markets credits with attractive yields. By rating, the portfolio ended the reporting period overweight in BBB rated credit, neutral to the index with respect to $B B$ and $B$ rated credit, and underweight in CCC rated credit. Throughout the reporting period, we have de-emphasised the most volatile and distressed geographies. The portfolio's Duration Times Spread ("DTS"), which can be used as a proxy for beta or risk, decreased slightly at the close of the reporting period. Lower spread levels in the portfolio relative to the market are most pronounced in the emerging markets HY sleeve as we have no positioning in Eastern Europe and are underweight in our exposure to China.

## Muzinich Enhancedyield Short-Term Fund

During the reporting period, the Fund generated positive returns and comfortably outperformed its indicative ICE BofA German Federal Government (1 to 3 years) Index ("G1D0"). Despite some weaker performance at the beginning of the reporting period, mostly due to Credit Suisse exposure as well as some interest rate hedges that were closed early in 2023, the Fund has recovered with resilience and delivered steady positive performance throughout most of the period. We continue to emphasise our focus on an issuer's ability to repay short-dated bonds as we believe this focus allows us to look through various macro headwinds, sector concerns, and market headlines. This approach, coupled with our deep fundamental credit research, allows us to position in out-of-favor issuers and sectors, subsequently reaping the benefit of HY as bonds are repaid. During this reporting period, we maintained our confidence in the Fund's banking sector exposure despite March's banking crisis and have seen our conviction rewarded. Active portfolio management decisions also helped drive positive performance for the period. Our preference for BBBs over single As in the investment grade market, along with our preference for cyclical sectors like automotives $\&$ auto parts and diversified financial services, led to the delivery of some of the strongest performance in the portfolio. We also maintained a decent exposure in HY credit., however, we significantly reduced our single-B exposure through the reporting period. While this cost us some performance during the market rally at the close of the period, we felt this was a prudent decision as we believe risks remain elevated for highly levered businesses in an environment of higher funding costs. In addition, the Fund has benefitted from active management of USD and EUR credit exposure. We were overweight in EUR credit at the beginning of the reporting period as we saw a clear premium in terms of spreads and yields after currency hedging costs, despite concerns of a more significant slowdown in the Eurozone relative to other developed markets. Later in the reporting period, as valuations between the two markets shifted back to fair value, we unwound our EUR bias and moved to a slight overweight in USD credit. This decision was based on the relative difference in rate curves and our belief that the US Treasury curve could rally more than the Bund curve.

## Muzinich ShortDurationHighYield Fund

Over the reporting period, the Fund (or "SDHY") generated positive returns but underperformed the US HY bond market as indicated by the ICE BofA US Cash Pay High Yield Index ("JOAO"). This is not unexpected as duration rallied strongly at the end of the period. We remained as fully invested as practical to capture the benefits of the HY and positive convexity of HY bonds given positive economic growth. On a sector basis, the top contributors to absolute performance were led by energy, diversified financial services, and healthcare.

# Investment Manager's Report for the financial year ended 30 November 2023 cont/d... 

## Muzinich ShortDurationHighYield Fund cont/d...

Conversely, the Fund's modest exposure to select paper sector bonds detracted from performance. From a rating perspective, nearly all rating cohorts contributed positively on an absolute basis, led by BB- and $\mathrm{B}^{+}$ rated bonds. By duration, contributions across the core $1-3$ years duration segment most meaningfully bolstered total returns. Towards the latter part of the reporting period, we maintained our position in BB rated loans given the carry advantage and limited volatility relative to HY bonds. We reduced the Fund's allocation to opportunistic EUR credits due to relative value considerations. We also maintained exposure to $B B$ and single-B rated credit, while minimising CCC exposure due to market access concerns. We believe a balanced approach to $\mathrm{BB} / \mathrm{B}$ exposure is acceptable given the economic outlook. We maintained mostly stable positioning and diversification in our top 10 sectors. There were more idiosyncratic changes at the issuer level, as is typical. At the end of the reporting period, the five largest sectors in the Fund by weighting are energy, diversified financial services, services, gaming and leisure.

## Muzinich Sustainable Credit Fund

The Fund generated positive performance and comfortably outperformed its indicative market, the Bloomberg Barclay's Global Aggregate Corporate Total Return Index hedged EUR ("LGCPTREH"). Over the reporting period, the Fund benefitted from strong credit selection of banking and utilities, as well as an underweight of healthcare bonds. By rating, strong credit selection and an underweight of BBB+ rated credit bolstered returns. During the broad-based risk rally at the close of the reporting period, the US outperformed Europe across asset classes because of the greater move in the US Treasury curve. Considering the rally in interest rates, we began to increase our duration, primarily by selling shorter-dated bonds to raise cash for outflows, but also by adding longer-dated new issues. We added some HY exposure at the margin, and we kept our USD and EUR allocations close to the benchmark weights. At the close of the reporting period, banking remains the Fund's largest sector exposure at roughly $24 \%$ of the portfolio. We have been steadily increasing the Tier 2 component of that allocation, focusing on short-dated callable instruments where we are confident of the bank calling the bond, but where there is still some extension risk premium on offer.

## Muzinich LongShortCreditYield Fund

In this more positive, but still volatile market period, the Fund delivered attractively, but underperformed the US HY market as represented by the ICE BofA Merrill Lynch US Cash Pay High Yield index ("JOAO"). Gains were comprised of gains in the Fund's Core Long and Arbitrage books, partially defrayed through losses in individual credit short and portfolio level hedging positions, although both techniques helped protect the portfolio during the period's market declines. Overall, the Fund achieved its returns with less than half the volatility of the market, outperforming and even gaining when the market declined and participating with more restraint during the market's sharp increases. Notably, Core Long holdings outperformed the market on a return basis, an advantage that was compounded by the leverage of this book to approximately $116 \%$ on average through the period. By industry, most sectors were positive, outside of (most notably) paper and diversified financial services (in which the Fund held some exposure to Credit Suisse). Our biggest contributions came from energy, automotives $\&$ auto parts, healthcare, gaming and leisure. We estimate that our current beta to the market is approximately 30 as we anticipate volatility in the coming year, as well as market compression that should lead to an increased opportunity set for differentiated returns.

## Muzinich EmergingMarketsShortDuration Fund

In this environment, the Fund generated positive returns and outperformed its reference index, the ICE BofA Emerging Market Short Duration Index ("Q690"). Both interest rates and spreads contributed to positive performance towards the end of the reporting period, as major central banks ended their tightening policy cycles and investor sentiment improved. By region, Asia generated the largest contributions to total returns. On a relative regional basis, the Fund's overweight exposure in Eastern Europe more than offset a relative underweight of interest rate sensitive securities in Asia (which acted as a drag on relative returns). In Asia, our Chinese exposure strongly outperformed as sentiment over the reporting period improved in line with supportive government measures to stabilise the economy. In Latin America, the Fund's overweight positioning

# Investment Manager's Report for the financial year ended 30 November 2023 cont/d... 

Muzinich EmergingMarketsShortDuration Fund cont/d...

in Mexico and Colombia worked well towards the end of the reporting period, Colombian securities benefitted from spread tightening, and our Mexican holdings benefitted from falling government yields in the US. In CEEMEA (Central and Eastern Europe, Middle East, and Africa), our exposure to UAE (United Arab Emirates) traded strongly in line with falling government yields. At the close of the reporting period, energy remains the most efficient sector for the Fund as prices remained supported by supply cuts from OPEC+ and ongoing Middle East tension. Over the reporting period, the Fund's overweight of financials and strong credit selection of capital goods bonds more than compensated for the Fund's exposure to select chemicals bonds. From a rating perspective, an overweight and strong credit selection of BB rated credit was the best performing rating bucket.

## Muzinich Global Tactical Credit Fund

In this environment, the Fund generated strong positive returns but underperformed its benchmark target, the US 3 Month Treasury Bill $+3 \%$. The Fund also lagged its indicative reference index, the ICE BofA Global Corporate and High Yield Index ("GIOO"). Over the reporting period, we focused on improving credit quality and liquidity within the HY sleeve of the portfolio, and on duration management against a backdrop of higher interest rates for most of the year. We have continued to maintain diversification within the portfolio, concentrating on more liquid parts of global credit. Over the course of the reporting period, the Fund benefitted from tactical management that demonstrated its ability to navigate pressures from higher interest rates. We maintained a defensive posture given rising rates and volatility related to macro headlines and economic data for much of the reporting period, while adding positions when attractive opportunities presented themselves. The 10-year US Treasury interest rate rose slightly during the first half of the reporting period but exhibited a wide intra-period range. The average duration of the portfolio for the first half of the reporting period was slightly higher than the duration level at the end of last year's reporting period, suggesting some detraction from performance due to increased rates. However, during this year's reporting period, interest rates rose significantly through October before falling significantly in November to end the reporting period nearly unchanged from where they began. The portfolio's duration was actively and effectively managed, we maintained lower durations during the most significant rate rises in September and October and higher durations in November 2023. We ended the reporting period with the Fund's duration at close to the highest level for the entire period. The portfolio benefitted from active duration management as our tactical moves were synchronised with the movement in rates during the reporting period. Furthermore, while our US Treasury exposure seemed poised to be the laggard for the reporting period, the November move lower in rates allowed our US Treasury allocation to perform just as well as the US investment grade allocation.

## Muzinich Asia Credit Opportunities Fund

In this environment, the Fund generated positive returns and strongly outperformed its reference index, the ICE BofA Asian Dollar Index ("ADOL"). On a country basis, the largest contributors to positive performance were China, India, and Indonesia. On a relative basis, strong credit selection in credit from China, India, the Philippines, Thailand, and Indonesia, benefitted performance, more than offsetting a relative underweight in Chinese and Indonesian credit vs. the reference index. The Fund's off-benchmark exposure to Japan continued to significantly benefit performance. By industry, the top contributors to absolute returns and relative outperformance were banking and diversified financial services. Towards the end of the reporting period, we added to our gaming exposure, which additionally bolstered returns in a sector that outperformed. From a ratings perspective, strong credit selection of the $B B B$ rated cohort most meaningfully bolstered total returns and was a significant contributor to outperformance. In addition, the Fund's overweight and strong credit selection in the $B B$ and single- $B$ rating buckets more than offset a relative underweight in both higher and lower quality rating categories. On a duration basis, the Fund benefitted from strong credit selection across the duration segments, with no duration bucket detracting from returns.

# Investment Manager's Report for the financial year ended 30 November 2023 cont/d... 

## Muzinich Emerging Market Corporate Debt Fund

During this reporting period, the Fund generated positive returns and outperformed its reference index, the ICE BofA Emerging Market Corporate Liquid Index ("EMCL"). By region, the Fund benefitted from superior credit selection in Asia (ex. Japan) and the Middle East \& Africa, while exposure to select positions in Latin America (specifically Brazil) acted as a drag. On a sector basis, strong credit selection and an underweight in banking and capital goods bolstered Fund performance, while exposure to select chemicals bonds underperformed. The relative underweight in more interest rate sensitive sectors (e.g., quasi sovereigns, utilities, investment grade energy bonds, etc.) continued to benefit performance for much of the reporting period. The relative overweight in HY credit also helped bolster performance and the Fund's strong credit selection and overweight of BB rated credit contributed to returns, especially as the rating bucket benefitted from both falling government yields and tightening credit spreads at the end of the reporting period.

## Muzinich European Credit Alpha Fund

The Fund generated strong positive returns but underperformed the European HY market as measured by the ICE BofA BB/B European High Yield Index ("HEC4"), which rallied vigorously following the sell off that took place through most of 2022. The recession that many had forecast following multiple rate hikes, a war in Ukraine, and elevated commodity prices, failed to materialise. Meanwhile, HY credit metrics remained resilient, allowing spreads to tighten meaningfully. In this context, Fund returns were driven by the Core Long book. One of the highlights during this time came from our allocation to banking as our overweight positioning and strong credit selection benefited returns, particularly as AT1s rallied hard, having previously been oversold, in our view. Fund performance additionally benefited from an overweight and strong credit selection of insurance bonds. Our strong credit selection of higher quality real estate/homebuilders bonds further contributed to positive returns, with our investment grade rated selections performing well, while we avoided two HY issuers which dropped in value. Towards the end of the reporting period, the Arbitrage book contributed to performance as several trades played out, particularly where our preceding bearishness allowed for some interesting opportunities, for example, too much yield was priced into low-reset AT1s relative to high-reset AT1s, which had started to look dislocated, but partially reverted in November. This trend also helped mitigate declines in the Portfolio Overlay book. While hedges clearly detracted during the rally, we meaningfully lessened this drag by taking profit on several hedges during October's sell off. At the close of the reporting period, we continue to believe valuations look attractive from a medium-term perspective. Looking ahead, we have strategically positioned to capture upside, while also striving to provide downside protection should a correction occur. This highlights the ability of the Fund to nimbly reposition its risk profile rapidly as needed.

## Muzinich Fixed Maturity 2024 Fund

The Fund generated positive returns during this period. Positive contributions to absolute performance came from diversified financial services, automotive and auto parts, and services, while exposure to select food and drug retail bonds detracted. The Fund's HY bias has continued to provide some protection as rate moves weighed more heavily on investment grade corporates during much of the reporting period. By duration, positive contributions were led by the 1-3 years duration bucket, with the Fund's shorter duration profile offering some protection from the rates pressure during much of the period.

## Muzinich High Yield Bond 2024 Fund

The High Yield Bond 2024 Fund generated positive returns during this reporting period. By sector, diversified financial services was the biggest contributor to performance, followed by automotive and auto parts and services. Conversely, exposure to select food and drug retail bonds detracted from performance. By rating, the Fund's BB- and BB rated bonds outperformed higher-rated holdings and led positive contributions. With a healthy portion of the Fund in the 1-3 year duration-to-worst segment due to the nature of this 2024 maturity Fund, the portfolio was well positioned to be better protected from rate moves given its shorter duration profile. We maintain our conviction that HY strategies, particularly those with shorter duration, are well

# Investment Manager's Report for the financial year ended 30 November 2023 cont/d... 

## Muzinich High Yield Bond 2024 Fund cont/d...

positioned for this environment as ample liquidity/low defaults and historically strong credit quality bode well, despite the potential for continued immediate volatility.

## Muzinich Global Short Duration Investment Grade Fund

The Global Short Duration Investment Grade Fund generated positive returns and strongly outperformed its indicative ICE BofA German Federal Government (1 to 3 years) Index ("G1DO"). Although index returns for the full reporting period might suggest otherwise, this was a period that included many challenges, including highly volatile and rising interest rates, the failure of a global systemically important bank and several US regional banks, international conflicts, geopolitical tensions, and heightened sensitivity to macroeconomic data and central bank messaging. We continue to prefer BBBs over single-A rated credit, and we have maintained a modest allocation to HY to allow for ongoing management of fallen angels. We are finding attractive parts of the market where we believe lower rates and funding costs should have an outsised positive impact, specifically Tier 2 bank paper (which currently makes up most of our allocation to the banking sector) and real estate. At the close of the reporting period, the Fund is mostly balanced between USD and EUR denominated credit. We see similar opportunities in both markets and continued synchronisation of central bank policies. At the end of the period, we also marginally increased our GBP exposure given the HY offered in that market and compelling recent new issues. We have limited exposure to floating rate instruments, which have performed strongly for much of the reporting period. The Fund ends the reporting period close to its duration limit and with a relatively high level of cash as we expect a busy primary calendar at the start of the new calendar year (2024).

## Muzinich Dynamic Credit Income Fund

Over the reporting period the Fund delivered positive absolute returns but underperformed its indicative market*. We have been strategically managing our European HY exposure. At the close of the reporting period, we increased our exposure to European HY as spreads remain relatively wide (compared to the rest of global credit), yields are elevated, and prices are discounted. We also slightly increased our cash and Treasury positions as part of our tactical management of portfolio duration. By industry, energy remains the largest exposure at the close of the reporting period, overweight compared to the indicative market. We continue to reduce/exit individual credits with potential fundamental concerns as we rotate into higher quality, stronger credits. We have also focused on investing in bonds with attractive coupons as we believe income will be an important driver of future returns. The Fund's overall HY exposure has remained fairly flat at the close of the reporting period, with an underweight position in the US, a neutral position in emerging markets, and an overweight position in Europe. The Fund's emerging markets exposure ended the reporting period at an overall overweight due to our exposure in emerging markets investment grade risk assets. We have maintained a mostly neutral positioning in emerging markets HY as we continue to largely avoid the more volatile geographies such as China and most of Eastern Europe.
*Reference index: 70\% of HW40 - ICE BofA BB-B Global High Yield Index, 30\% of GBC4 - ICE BofA BBB Global Corporate Index.

## Muzinich Global Fixed Maturity 2027 Fund

The Fund launched on 20 April 2023 and was rapidly invested in a well-diversified portfolio, nearly three-quarters of its assets in investment grade corporates with the rest largely in "better-quality" HY with a predominately BB rated focus. Due to the Fund's fixed maturity profile, the portfolio skews toward shorter duration paper which exhibited some resilience in the market's bouts of rate induced stress. The portfolio is invested approximately $65 \%$ in Western Europe and $28 \%$ in the US. All regions delivered attractive, positive results led by a small Eastern European allocation. Western Europe modestly outperformed US holdings. All sectors, save a single name in the paper category, gained, led by double-digit returns in leisure and cable/satellite TV. Large allocations in homebuilders/real estate, diversified financial services, banking, and automotives/auto parts led contributions. HY names generally outperformed investment grade names, but gains were well-distributed.

## Investment Manager's Report for the financial year ended 30 November 2023 cont/d...

## Outlook

Looking ahead, we believe credit markets will continue to benefit from the relatively high carry in bond yields on their way to delivering mid-to-high single digit total returns, maybe more if an added optimistic yield scenario materialises. We see potential dispersion of returns based on credit quality and refinancing risk an environment of opportunities for an active manager. HY markets are expected to outperform investment grade markets, and we expect technical factors to be supportive in general, which could leave spreads around their historical averages in a low growth economic scenario. Furthermore, we do not believe there are sectors to avoid vs. sectors to love, as we see potential for both positive and negative idiosyncratic situations developing in various industries, generating alpha opportunities in 2024. As we have been saying, corporate credit balance sheets entered this cycle in good fundamental shape with low leverage and high coverage, and with a relatively benign maturity profile.

## Soft Commission Arrangements

There were no soft commission arrangements in place during the financial year or during the prior financial year and there are no plans to introduce such programs.
All market data from Bloomberg or as noted.

## INDEPENDENT AUDITOR'S REPORT TO THE UNITHOLDERS OF MUZINICH FUNDS

## Report on the audit of the financial statements

## Opinion on the financial statements of Muzinich Funds (the 'Fund')

In our opinion the Fund's financial statements:

- give a true and fair view of the assets, liabilities and financial position of the Fund as at 30 November 2023 and of the result for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework, the applicable Regulations and the provisions of the Trust Deed

The financial statements we have audited comprise:

- the Statement of Comprehensive Income;
- the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Units;
- the Statement of Financial Position;
- the Statement of Cash Flows; and
- the related notes 1 to 23 , including a summary of significant accounting policies as set out in note 1 .

The relevant financial reporting framework that has been applied in their preparation is International Financial Reporting Standards as adopted by the European Union ("IFRS") ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation is the Unit Trusts Act, 1990 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 ("the applicable Regulations").

## Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "Auditor's responsibilities for the audit of the financial statements" section of our report.

We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## Conclusions relating to going concern

In auditing the financial statements, we have concluded that the Manager's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Fund's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the Manager with respect to going concern are described in the relevant sections of this report.

## Deloitte.

## INDEPENDENT AUDITOR'S REPORT TO THE UNITHOLDERS OF MUZINICH FUNDS

## Other information

The other information comprises the information included in the Annual Report and Audited Financial Statements, other than the financial statements and our auditor's report thereon. The Manager is responsible for the other information contained within the Annual Report and Audited Financial Statements. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

## Responsibilities of the Manager for the financial statements

The Manager is responsible for the preparation and fair presentation of the financial statements in accordance with the relevant financial reporting framework, and for such internal control as the Manager determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Manager is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Manager either intend to liquidate the Fund or to cease operations, or have no realistic alternative but to do so.

## Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on IAASA's website at: https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements. This description forms part of our auditor's report.

## Report on other legal and regulatory requirements

## Opinion on other matters prescribed by the applicable Regulations

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the Fund were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.

## Deloitte.

## INDEPENDENT AUDITOR'S REPORT TO THE UNITHOLDERS OF MUZINICH FUNDS

## Use of our report

This report is made solely to the Fund's unitholders, as a body, in accordance with the applicable Regulations and the provisions of the Trust Deed. Our audit work has been undertaken so that we might state to the Fund's unitholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Fund and the Fund's unitholders as a body, for our audit work, for this report, or for the opinions we have formed.

Statement of Cash Flows for the financial year ended 30 November 2022 cont/d...

* Muzinich Dynamic Credit Income Fund launched on 28 April 2022.

The accompanying notes form an integral part of these financial statements.

## Notes to the financial statements for the financial year ended 30 November 2023

## 1. Significant accounting policies

## (i) Basis of preparation and statement of compliance

These annual financial statements for the financial year ended 30 November 2023 have been prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union ("EU"), and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended), and the Central Bank (Supervision And Enforcement) Act 2013 (Section 48 (1) (Undertakings For Collective Investment in Transferable Securities)) Regulations 2019, (together the "UCITS Regulations").

The preparation of financial statements in conformity with IFRS requires the Fund to make certain accounting estimates and assumptions. Actual results may differ from those estimates and assumptions. The Directors of the Muzinich \& Co. (Ireland) Limited (the "Manager") believe that any estimates used in preparing the financial statements are reasonable and prudent.

These financial statements are prepared on a going concern basis. Management have reviewed the assessment of the Fund's ability to continue as a going concern. All Sub-Funds hold sufficient cash and liquidity within their portfolios to be able to meet their financial obligations at a minimum for a 12 month period post signing of the financial statements. Therefore, management has concluded that the going concern basis of accounting is the most appropriate and has applied same in these financial statements.
(ii) New standards, amendments and interpretations issued and effective for the financial year beginning 1 December 2022

There are a number of standards, amendments to standards or interpretations that are effective for annual periods beginning on 1 December 2022. The following new and amended standards and interpretations do not have a significant impact on the Fund's financial statements:

- Onerous Contracts - Cost of Fulfilling a Contract (Amendments to IAS 37).
- Property, Plant and Equipment: Proceeds before Intended Use (Amendments to IAS 16).
- Reference to the Conceptual Framework (Amendments to IFRS 3).
- Annual Improvements to IFRS Standards 2018-2020.
(iii) New standards, amendments and interpretations issued but not effective for the financial year beginning 1 December 2022

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning on or after 1 December 2022, and have not been early adopted in preparing these financial statements. The following new and amended standards and interpretations are not expected to have a significant impact on the Fund's financial statements:

- Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS Practice Statement 2).
- Definition of Accounting Estimates (Amendments to IAS 8).
- Deferred Tax related to Assets and Liabilities arising from a Single Transaction (Amendments to IAS 12).
- Classification of Liabilities as Current or Non-Current (Amendments to IAS 1).
- Lease Liability in a Sale and Leaseback (Amendments to IFRS 16).
- IFRS 17 Insurance Contracts.
- International tax reform - Pillar II Model rules (amendments to IAS 12).
- Disclosure of Supplier Finance Arrangements (Amendments to IAS 7 and IFRS 7).
- IFRS S1 - General Requirements for Disclosure of Sustainability-related Financial Information.
- IFRS S2 - Climate-related Disclosures.

Notes to the financial statements for the financial year ended 30 November 2023 cont/d...

## 1. Significant accounting policies cont/d...

## (iv) Financial instruments at fair value through profit or loss

## Recognition and initial measurement

Financial assets and financial liabilities are initially recognised at fair value through profit or loss ("FVTPL") on the Fund's Statement of Financial Position on the trade date, which is the date on which the Fund becomes a party to the contractual provisions of the instrument. Other financial assets and financial liabilities are recognised at the date they are originated. From this date any gains and losses arising from changes in fair value of the financial assets or financial liabilities are recorded in the Statement of Comprehensive Income. Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value. Transaction costs are expensed as incurred in the statement of comprehensive income. Transaction costs on financial assets and financial liabilities at fair value through profit or loss are expensed immediately, while on other financial instruments they are amortised.

## Classification and subsequent measurement

## (a) Classification of financial assets

Under IFRS 9, all instruments in the Portfolio of Investments are classified at fair value through profit or loss. Subsequent to initial recognition, all instruments classified at fair value through profit or loss have changes in their fair value recognised in the Statement of Comprehensive Income.
The financial instruments classified as held-for-trading are classified as such under IFRS 9:

- financial instruments currently designated into this category because they are managed on a fair value basis in accordance with a documented investment strategy. Accordingly, these financial instruments will be mandatorily measured at FVTPL under IFRS 9; and
- financial instruments currently measured at amortised cost are: cash balances and all other assets and liabilities except the financial instruments classified as held-for-trading and measured at FVTPL. These instruments meet the "solely payments of principal and interest" (SPPI) criterion and are held in a held to-collect business model. Accordingly, they will continue to be measured at amortised cost under IFRS 9.
IFRS 9 uses the forward-looking 'expected credit loss' ("ECL") model. This will require considerable judgement about how changes in economic factors affect ECLs, which will be determined on a probability-weighted basis. The new impairment model will apply to financial assets measured at amortised cost or FVOCI, except for investments in equity instruments.

Based on the Fund's assessment, changes to the impairment model do not have a material impact on the financial assets of the Fund, this is because:

- the majority of the financial assets are measured at FVTPL and the impairment requirements do not apply to such instruments; and
- the financial assets at amortised cost are short-term (i.e. no longer than 12 months), of high credit quality and/or highly collateralised. Accordingly, the ECLs have had no impact.

On initial recognition, the Fund classifies financial assets as measured at amortised cost or FVTPL. A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- It is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest ("SPPI").

All other financial assets of the Fund are measured at FVTPL.

Notes to the financial statements for the financial year ended 30 November 2023 cont/d...

## 1. Significant accounting policies cont/d...

(iv) Financial instruments at fair value through profit or loss cont/d...

Classification and subsequent measurement cont/d...
(a) Classification of financial assets cont/d...

## Business model assessment

In making an assessment of the objective of the business model in which a financial asset is held, the Fund considers all of the relevant information about how the business is managed, including:

- The documented investment strategy and the execution of this strategy in practice. This includes whether the investment strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- How the performance of the portfolio is evaluated and reported to the Fund's management;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- How the investment manager is compensated: e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- The frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Fund's continuing recognition of the assets.

The Fund has determined that it has two business models:

- Held-to-collect business model: this includes cash at bank, amounts at broker, amounts receivable for subscription of units, receivable from Investment Manager, receivable for investments sold, interest receivable and other debtors. These financial assets are held to collect contractual cash flow.
- Other business model: this includes debt securities (except financial assets held by the money market fund - see below), equity investments, investments in unlisted open-ended investment funds and unlisted private equities. These financial assets are managed and their performance is evaluated, on a fair value basis, with frequent sales taking place.

## Assessment whether contractual cash flows are SPPI

For the purpose of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are SPPI, the Fund considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Fund considers:

- Contingent events that would change the amount or timing of cash flows;
- Leverage features;
- Prepayment and extension features;
- Terms that limit the Fund's claim to cash flows from specified assets (e.g. non-recourse features); and
- Features that modify consideration of the time value of money (e.g. periodical reset of interest rates).

## 1. Significant accounting policies cont/d...

(iv) Financial instruments at fair value through profit or loss cont/d...

Classification and subsequent measurement cont/d...
(a) Classification of financial assets cont/d...

Assessment whether contractual cash flows are SPPI cont/d...
Reclassifications
Financial assets are not reclassified subsequent to their initial recognition unless the Fund were to change its business model for managing financial assets, in which case all affected financial assets would be reclassified on the first day of the first reporting period following the change in the business model.

## (b) Subsequent measurement of financial assets

Financial assets at FVTPL
These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income and expense and foreign exchange gains and losses, are recognised in the Statement of Comprehensive Income.

## Financial assets at amortised cost

These assets are subsequently measured at amortised cost using the effective interest method. Interest income, if any, and foreign exchange gains and losses are recognised in the Statement of Comprehensive Income. Any impairment and gain or loss on derecognition is also recognised in profit or loss.

Cash at bank, amounts at broker, amounts receivable for subscription of units, receivable from Investment Manger, receivable for investments sold, interest receivable and other debtors are included in this category.
(c) Financial liabilities - Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss.

Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

Financial liabilities at FVTPL:

- Held-for-trading: derivative financial instruments.

Financial liabilities at amortised cost:

- This includes amounts due to broker, amounts payable for redemption of units, payable for investments purchased, other payables and accrued expenses.

## Recognition, derecognition and measurement

Regular purchases and sales of investments are recognised on the trade date, the date on which the Sub-Funds commit to purchase or sell the investment. Financial assets and financial liabilities at fair value through profit or loss are initially classified at fair value. Transaction costs are expensed as incurred in the Statement of Comprehensive Income (see Note 1 (xvii)).

Financial assets are derecognised when the rights to receive cash flows from the investments have expired or the Sub-Funds have transferred substantially all risks and rewards of ownership and a realised gain or loss is recognised. Realised gains and losses are presented in the Statement of Comprehensive Income as net gains/(losses) on financial assets and financial liabilities at fair value through profit or loss.

Notes to the financial statements for the financial year ended 30 November 2023 cont/d...

## 1. Significant accounting policies cont/d...

(iv) Financial instruments at fair value through profit or loss cont/d...

Recognition, derecognition and measurement cont/d...
Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value and realised gains and losses on sales of the financial assets or financial liabilities at fair value through profit or loss category are presented in the Statement of Comprehensive Income within net gains/(losses) on financial assets and financial liabilities at fair value through profit or loss. Interest on debt securities at fair value through profit or loss is recognised in the Statement of Comprehensive Income within interest income based on the effective interest rate.

All transferable securities are traded on a regulated market.

## (v) Valuation of securities

Investments in debt securities and exchange traded funds ("ETF's") are valued at fair value through profit or loss. For securities held long, the quoted market price is taken as the measure of fair value. The Sub-Funds had no securities held short. The value of any investment which is not normally quoted, listed or traded on or under the rules of a recognised exchange or market is valued at its probable realisation value, as determined by the Manager, having been approved for such purposes by State Street Custodial Services (Ireland) Limited (the "Depositary"), in good faith and in consultation with Muzinich \& Co. Limited (the "Investment Manager") and subject to the approval of the Depositary.
Investments in investment funds are valued by utilising the valuations of the underlying investment funds (its published NAV) to determine the fair value of the relevant Sub-Fund's interest.

## (vi) Forward foreign currency exchange contracts

The value of open forward foreign currency exchange contracts is calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the Statement of Financial Position date. Gains or losses on open forward foreign currency exchange contracts are included in the net unrealised gain or loss on forward foreign currency exchange contracts, as appropriate, on the Statement of Financial Position and are shown in the Portfolio of Investments of the relevant Sub-Fund.
Forward foreign currency exchange contracts held are Over the Counter ("OTC") Financial Derivative Instruments.

## (vii) Swaps

Some Sub-Funds may enter into swap agreements. A swap is an agreement to exchange the return generated by one instrument for the return generated by another instrument.
Derivatives such as interest rate swaps are used for trading purposes. Interest rate swaps are measured initially at fair value on the date on which the derivative contract is entered into and subsequently remeasured at fair value. Fair values are obtained from counterparties or from quoted market prices in active markets, including recent market transactions, and from valuation techniques using discounted cash flow models and option pricing models as appropriate.

In a credit default swap, one party makes a stream of payments to another party in exchange for the right to receive a specified return in the event of a default by a third party on its obligation. The Sub-Fund may use credit default swaps to provide a measure of protection against defaults of sovereign or corporate issues (i.e. to reduce risk where the Sub-Fund owns or has exposure to the issuer).
The maximum exposure the Sub-Fund has in selling credit protection is equal to the notional amount of such credit default swap contracts. For credit default swaps on corporate or sovereign issuers, a credit event may be triggered by events such as bankruptcy, failure to pay, obligation acceleration, repudiation, moratorium or restructuring. The Investment Manager monitors a variety of factors including credit ratings, cash flow assumptions, market activity, market sentiment and valuation as part of its ongoing process of assessing

Notes to the financial statements for the financial year ended 30 November 2023 cont/d...

## 1. Significant accounting policies cont/d...

(vii) Swaps cont/d...
payment and performance risk. In connection with these agreements, cash or securities may be set aside as collateral by the Custodian in accordance with the terms of the swap agreement.
Credit Default Swaps Buy Protection means that the relevant Sub-Fund will receive compensation in the event of the relevant credit events occurring. Credit Default Swaps Sell Protection means that the relevant Sub-Fund will have to pay compensation in the event of the relevant credit events occurring.

Swaps (including credit default swaps) are marked-to-market daily using standard models that incorporate quotations from market makers and the change in value, if any, is recorded as unrealised gain or loss in the Statement of Comprehensive Income.
Payments received or made on swap contracts are recorded as realised gains or losses in the Statement of Comprehensive Income. Gains or losses are realised upon termination of the swap agreements. These financial instruments are not actively traded on exchanges. The values assigned to these instruments are based upon the best available information and because of the uncertainty of the valuation, these values may differ significantly from the values that would have been realised had a ready market for these instruments existed and the differences could be material. Entering into these agreements involves, to varying degrees, elements of credit, legal, market and documentation risk in excess of the amounts recognised in the Statement of Comprehensive Income. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparties to the agreements may default on their obligations to perform or disagree as to the meaning of contractual terms in the agreements, or that there may be unfavorable changes in interest rates or the price of the index or security underlying these transactions.

In a total return swap, one party pays the other the total economic performance of a specified asset(s), the Reference Obligation(s), for another cash flow, typically a reference rate plus a spread. The performance or "Total Return" comprises the sum of interest, dividends, fee payments, and any payment due to the change in value of the Reference Obligation. Payments due to change in value are equal to the appreciation (or depreciation) in the marked-to-market value of the Reference Obligation. A net depreciation in value (i.e. a negative total return) results in a payment to the Total Return Payer. A total return swap may provide for acceleration of its termination date upon the occurrence of one or more referenced events with respect to a Reference Obligation.
To mitigate the counterparty risk resulting from swap transactions, the relevant Sub-Fund will only enter into swap transactions with highly rated financial institutions specialised in this type of transaction and in accordance with the standard terms laid down by the International Securities Dealers Association.

Swaps held are Over the Counter ("OTC") Financial Derivative Instruments.

## (viii) Options

The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security in determining the realised gain or loss. The premium on purchased call options exercised is included in determining initial fair value of the securities or foreign currency purchased. Premiums paid from the purchase of options which expire unexercised are treated as realised losses.

The premium on written call options exercised is added to the proceeds from the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on written put options exercised is included in determining initial fair value of securities or foreign currencies purchased. Premiums received from written options which expire unexercised are treated as realised gains. The Fund may not carry out uncovered short sales of Options.
Options held are exchange traded Financial Derivative Instruments.

Notes to the financial statements for the financial year ended 30 November 2023 cont/d...

## 1. Significant accounting policies cont/d...

## (ix) Swaptions

A swaption is an option that grants the right, with no obligation, to enter into an underlying swap on pre-agreed terms. A payer swaption gives the owner of the swaption the right to enter into a swap where they pay the fixed leg and receive the floating leg. A receiver swaption gives the owner of the swaption the right to enter into a swap where they pay the floating leg and receive the fixed leg.

Premiums paid for the purchase of swaptions which expire unexercised are treated on the expiration date as realised losses. If a purchased payer swaption is exercised, the premium is subtracted from the proceeds of the underlying swap in determining whether the relevant Sub-Fund has realised a gain or a loss. If a purchased receiver swaption is exercised, the premium is added to the cost basis of the floating rate investment that has been 'swapped'.

When a swaption is written, an amount equal to the premium received by the relevant Sub-Fund is recorded as a liability and is subsequently adjusted to the current market value of the swaption written. Premiums received from written swaptions that expire unexercised are treated by the relevant Sub-Fund on the expiration date as realised gains. If a written swaption is exercised, the premium is added to the proceeds of the underlying swap in determining whether the relevant Sub-Fund has realised a gain or a loss.

Swaptions held are exchange traded Financial Derivative Instruments.

## (x) Loans

Investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties. A loan is often administered by a bank or other financial institution that acts as an agent for all holders. The agent administers the terms of the loan, as specified in the loan agreement. When investing in a loan participation, (i) the Sub-Funds' have the right to receive payments of principal, interest and any fees to which it is entitled only from the party from whom the Sub-Fund has purchased the participation and only upon receipt by that party of payments from the borrower and (ii) the Sub-Fund generally has no right to enforce compliance by the borrower with the terms of the loan agreement or to vote on matters arising under the loan agreement.
Thus, the Sub-Fund may be subject to credit risk by the party from whom it purchased the loan participation and by the borrower, and the Fund may have minimal control over the terms of any loan modification. When the Sub-Fund purchases assignments of loans, it generally acquires direct rights against the borrower.

## (xi) Unfunded Loans

Unfunded loans occur when the Fund commits to purchase a loan asset and has purchased less than $100 \%$ of the commitment as at the financial period end. The percentage outstanding as at the financial period end is the unfunded loan and is disclosed as such in the Schedule of Investments and as a liability in the Statement of Financial Position. The committed amount is included as an asset in Investments at fair value in the Statement of Financial Position and under Loans in the Schedule of Investments.

## (xii) Revenue recognition

Interest income on cash is recognised on an effective interest rate basis.
When calculating the effective interest rate, the Sub-Funds estimate cash flows considering all contractual terms of the financial instrument but does not consider future credit losses. The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating the interest income or interest expense over the relevant period.
Realised gains and losses on sales of investments are calculated based on the average book cost of the investment and are included in net gains/losses on financial assets and financial liabilities at fair value through profit or loss in the Statement of Comprehensive Income. Unrealised gains and losses on investments arising during the year are also included in net gains/(losses) on financial assets and financial liabilities at fair value through profit or loss in the Statement of Comprehensive Income.

Notes to the financial statements for the financial year ended 30 November 2023 cont/d...

## 1. Significant accounting policies cont/d...

## (xii) Revenue recognition cont/d...

The unrealised gain or loss on open forward foreign currency exchange contracts is calculated by reference to the difference between the contractual rate and the rate to close out the contract at the Statement of Financial Position date. Gains and losses relating to forward foreign currency exchange contracts are included in net gains/(losses) on financial assets and financial liabilities at fair value through profit or loss in the Statement of Comprehensive Income.

## (xiii) Foreign currency translation

In accordance with IAS 21 ("The effects of changes in Foreign Exchange Rates"), items included in the individual Sub-Fund's financial statements are measured using the currency of the primary economic environment in which it operates, the functional currency. The functional currency assessment is done on a Sub-Fund by Sub-Fund basis. All Sub-Funds' base currencies equated to their respective functional currencies when assessed under IAS 21.

Items included in the financial statements of the Sub-Funds are measured in the currency of the primary economic environment in which the Sub-Funds operate (the "functional currency").

The functional currency (and presentational currency) of all Sub-Funds is US Dollars (US\$), with the exception of Muzinich Europeyield Fund, Muzinich Enhancedyield Short-Term Fund, Muzinich Sustainable Credit Fund, Muzinich European Credit Alpha Fund, Muzinich Fixed Maturity 2024 Fund, Muzinich High Yield Bond 2024 Fund and Muzinich Global Short Duration Investment Grade Fund which have functional currency (and presentational currency) of Euro ( $€$ ).

Foreign currency denominated assets and liabilities, including investments, are translated to the functional currency of the relevant Sub-Fund at the exchange rate prevailing at the year end date. Transactions in foreign currencies are translated to the functional currency of the relevant Sub-Fund at the exchange rates ruling at the dates of the transactions. The foreign exchange gain or loss based on the translation of the original cost of investments is included in net gains/losses on financial assets and financial liabilities at fair value through profit or loss in the Statement of Comprehensive Income. The foreign exchange gain or loss on the translation of other assets or liabilities is included in net gains/(losses) on financial assets and financial liabilities at fair value through profit or loss in the Statement of Comprehensive Income. Please refer to Note 15 for exchange rates used at the year end date.

## (xiv) Net assets attributable to redeemable participating Unitholders

The liability to Unitholders is presented in the Statement of Financial Position as "Net assets attributable to redeemable participating Unitholders" and is determined based on the residual assets of the relevant SubFund after deducting all other liabilities. The prices at which Units may be issued or redeemed are calculated by reference to the relevant Sub-Fund's NAV calculated daily in accordance with the Prospectus and the Trust Deed.

## (xv) Expenses

All expenses, including Management and Depositary Fees, are recognised in the Statement of Comprehensive Income on an accruals basis. Fees and charges which are identifiable with a particular Sub-Fund are charged to it and other charges are borne pro-rata to the net assets of each Sub-Fund.

## (xvi) Critical accounting estimates and judgements

The Manager makes estimates and assumptions concerning the future. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the year in which the estimate is revised if the revision affects only

Notes to the financial statements for the financial year ended 30 November 2023 cont/d...

## 1. Significant accounting policies cont/d...

## (xvi) Critical accounting estimates and judgements cont/d...

that year, or in the year of the revision and future years if the revision affects both current and future years. The resulting accounting estimates may not equal the actual results.

## (a) Judgement

Information about judgements made in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements of the Fund are included in Note 1(iv) Financial Instruments at fair value through profit or loss and Note 1(xviii) Functional and presentation currency, to the financial statements.

## (b) Assumptions and estimation uncertainties

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the year ending 30 November 2023 and 30 November 2022 is included in Note 18 to the financial statements and relates to the determination of fair value of financial instruments with significant unobservable inputs.

## (xvii) Transactions costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument.
Transaction costs on the purchase and sale of bonds and financial derivative instruments are expensed on the date of the purchase or sale of the relevant investment.

Transaction costs are shown separately in Note 2 and Note 9 to the financial statements.

## (xviii) Distributions

Distributions, if declared, will only be paid out of a Sub-Fund's net investment income return. Distributions with an ex-date during the financial year are included as a finance cost in the Statement of Comprehensive Income. Dividends will not be paid in respect of any class of Unit which is an accumulating class. Income and profits, if any, attributable to an accumulating Unit class will be accumulated, reinvested in the relevant Sub-Fund on behalf of the Unitholders of that class and will be reflected in the NAV of the relevant accumulating Unit Class. Please see Note 10 for details of any distributions paid during the financial year ended 30 November 2023.

## (xix) Cash and cash equivalents

Cash and cash equivalents include cash in hand and other short-term investments in an active market with original maturities of three months or less and bank overdrafts. All amounts are subject to insignificant changes in fair value. All cash and cash equivalents are held with the Depositary, whose parent company is State Street Bank and Trust Company, which has a long-term credit rating of AA- (30 November 2022: AA-).

Investors should note that, the Fund operates a Subscriptions/Redemptions Account(s) (as defined below) for each of the Sub-Funds in accordance with the requirements of the Central Bank relating to umbrella fund cash accounts. A Subscriptions/Redemptions Account is an account in the name of the Fund through which subscription monies and redemption proceeds and dividend income (if any) for each Sub-Fund are channelled. Monies in a Subscriptions/Redemptions Account are deemed assets of the respective Sub-Funds.
Where monies are held by the Fund in a Subscriptions/Redemptions Account for the account of a Sub-Fund, an investor shall rank as an unsecured creditor of the Fund in respect of any claim in relation to monies held in such Subscriptions/Redemptions Account in the event such Sub-Fund (or another Sub-Fund of the Fund) becomes insolvent.

Notes to the financial statements for the financial year ended 30 November 2023 cont/d...

## 2. Significant agreements

Manager
Muzinich \& Co. (Ireland) Limited has been appointed Manager of the Fund pursuant to the Trust Deed. Management fees charged shall not exceed the rate of the maximum annual management fee as disclosed in the table below:

Notes to the financial statements for the financial year ended 30 November 2023 cont/d...

## 2. Significant agreements cont/d...

## Manager cont/d...

Such fees are accrued on each Dealing Day and payable monthly in arrears. The Manager pays the fees of the Investment Manager. All percentages are unchanged for the financial year ended 30 November 2023.

## Administrator's Fee

The Administrator's fees and expenses are paid directly out of the assets of the Sub-Funds.

## Investment Manager's Performance Fee

A performance fee will be payable out of the assets of the relevant Sub-Funds (not all Sub-Funds have a performance fee), calculated on a unit-by-unit basis for each class of Units so that each issued Unit is charged a performance fee which equates with that issued Unit's performance.

The performance in respect of each issued Unit will be equal to $10 \%$ for Muzinich LongShortCreditYield Fund, and $20 \%$ for Muzinich European Credit Alpha Fund and $20 \%$ for the E Units and N Units of Muzinich Global Tactical Credit Fund, of the increase in the NAV per Unit in each case in excess of the high water mark (the "High Water Mark").

The High Water Mark at any Valuation Day is the greater of:
(i) The highest NAV per Unit on the last day of any preceding Performance Period; or
(ii) The Initial Issue Price per Unit at the end of the initial offer period.

The use of a High Water Mark ensures that Unitholders will not be charged a performance fee until any previous losses are recovered.

The performance fee is payable annually in arrears in respect of each Performance Period. The performance fee will accrue daily and be taken into account in the calculation of the NAV per Unit as at each Valuation Point. In the event that a Unitholder redeems Units prior to the end of a Performance Period, the amount of any accrued but unpaid performance fee in respect of such Units will be paid to the Investment Manager.

At 30 November 2023, a performance fee of US\$Nil (2022: US\$952,423) was charged on Muzinich LongShortCreditYield Fund and $€$ Nil $(2022$ : $€ 456,255)$ was charged on Muzinich European Credit Alpha Fund. These amounts are included in Other expenses in the Statement of Comprehensive Income.

Amounts payable at the financial year end were US\$103,852 (2022: US\$119,521) and $€ 62,930(2022: € 63,077)$ for Muzinich LongShortCreditYield Fund and Muzinich European Credit Alpha Fund, respectively.

In accordance with Regulation 40(4) of the Central Bank of Ireland UCITS Regulations, the Non-Equalisation Performance Fee Performance Period started 1 October 2020 was not ended on 31 December 2020, but instead ended on 31 December 2021. Accrued Non-Equalisation Performance became payable to Investment Manager at the end of the Performance Period (or in the case of a Unit Class closure, on the date of Unit Class closure). Any Non-Equalisation Performance Fee accrued during the Performance Period remained unrealised until the end of the Performance Period.

## Depositary

State Street Custodial Services (Ireland) Limited has been appointed Depositary pursuant to the Trust Deed. For this service, the Depositary's fee is $0.02 \%$ p.a. of the NAV of the relevant Sub-Fund accrued on each Dealing Day and payable monthly in arrears.
Depositary fees are paid directly out of the assets of the Sub-Funds. The Sub-Fund pays a transaction charge on the purchase and sale of each investment, and transaction fees associated with financial derivative instruments.

## Transaction Costs

For the financial year ended 30 November 2023, brokerage charges, taxes and Custody transaction costs, included in net gains/(losses) on financial assets and financial liabilities at fair value through profit or loss in

## 3. Taxation

The Sub-Funds are regarded as resident in Ireland for tax purposes. It is the intention of the Manager that the business of the Sub-Funds will be conducted in such a manner as to ensure that they are Irish resident for tax purposes.
The Sub-Funds qualify as an investment undertaking as defined in Section 739B(1) of the Taxes Consolidation Act, 1997 (of Ireland) as amended (the "Taxes Act"). Under current Irish law and practice, the Sub-Funds are not chargeable to Irish tax on their income and gains.

However, tax can arise on the happening of a "chargeable event" in a Sub-Fund. A chargeable event includes any distribution payments to Unitholders or any encashment, redemption, cancellation, transfer or deemed disposal of Units or the appropriation or cancellation of Units of a Unitholder by a Sub-Fund for the purposes of meeting the amount of tax payable on a gain arising on a transfer. A deemed disposal will occur at the expiration of a "Relevant Period", meaning a period of eight years beginning with the acquisition of a Unit by a Unitholder and each subsequent period of eight years beginning immediately after the preceding Relevant Period.

No tax will arise on a Sub-Fund in respect of chargeable events in respect of Unitholders who are neither Irish Resident nor Ordinarily Resident in Ireland at the time of the chargeable event provided that a Relevant Declaration is in place and a Sub-Fund is not in possession of any information which would reasonably suggest that the information contained therein is no longer materially correct. In the absence of either a Relevant Declaration or a Sub-Fund satisfying and availing of equivalent measures there is a presumption that the Unitholder is Irish Resident or Ordinarily Resident in Ireland.
A chargeable event does not include:

- An exchange by a Unitholder, effected by way of an arms-length bargain where no payment is made to the Unitholder of Units in a Sub-Fund for other Units in a Sub-Fund;
- Any transactions (which might otherwise be a chargeable event) in relation to Units held in a recognised clearing system as designated by order of the Irish Revenue Commissioners;
- A transfer by a Unitholder of the entitlement to Units where the transfer is between spouses and former spouses, subject to certain conditions; or
- An exchange of Units arising on a qualifying amalgamation or reconstruction (within the meaning of Section 739 H of the Taxes Act) of a Sub-Fund with another investment undertaking.

If a Sub-Fund becomes liable to account for tax if a chargeable event occurs, a Sub-Fund shall be entitled to deduct from the payment arising on a chargeable event an amount equal to the appropriate tax and/or where applicable, to appropriate or cancel such number of Units held by the Unitholder or the beneficial owner of the Units as are required to meet the amount of tax. The relevant Unitholder shall indemnify and keep a Sub-Fund indemnified against loss arising to a Sub-Fund by reason of a Sub-Fund becoming liable to account for tax on the happening of a chargeable event if no such deduction, appropriation or cancellation has been made.

Notes to the financial statements for the financial year ended 30 November 2023 cont/d...

## 3. Taxation cont/d...

Dividends received by a Sub-Fund from investments in Irish equities may be subject to Irish dividend withholding tax at the standard rate of income tax (currently 20\%). However, a Sub-Fund can make a declaration to the payer that it is a collective investment undertaking beneficially entitled to the dividends which will entitle a Sub-Fund to receive such dividends without deduction of Irish dividend withholding tax.
Dividends, interest and capital gains received from other investments made by a Sub-Fund may be subject to withholding taxes imposed by the country from which the investments income/gains are received, and such taxes may not be recoverable by a Sub-Fund and its Unitholders.

## 4. Equalisation

Income equalisation arrangements apply to the Sub-Funds. The arrangements are intended to ensure that the income per Unit which is distributed in respect of the distribution period is not affected by changes in the number of Units in issue during the year. The arrangements have no effect on the NAV of any Unit Class.

Equalisation in relation to the income Units is included within distributions and equalisation in the Statement of Comprehensive Income. The calculation of equalisation is based on total accumulated undistributed net income.

## Performance fees - Muzinich LongShortCreditYield Fund, Muzinich European Credit Alpha Fund

A performance fee will be payable out of the assets of the Sub-Fund calculated on a Unit-by-Unit basis for each class of Units so that each issued Unit is charged a performance fee which equates with that issued Unit's performance.

The performance fee in respect of each issued Unit will be equal to 10\% for Muzinich LongShortCreditYield Fund and $20 \%$ for Muzinich European Credit Alpha Fund and the E Units issued by Muzinich Global Tactical Credit Fund, of the increase in the NAV per Unit in each case in excess of the high water mark (hereinafter called the "High Water Mark").

## Deficit Subscriptions

If Units are issued at a time when the NAV per Unit is less than the High Water Mark (hereinafter called a "Deficit Subscription"), the adjustments set out below will be made by State Street Fund Services (Ireland) Limited (the "Administrator") to reduce inequities that could otherwise result for a Unitholder or the Investment Manager.

When a Deficit Subscription occurs, the Unitholder will be required to pay a Performance Fee with respect to any subsequent appreciation in the value of those Units from the NAV per Unit at the date of issue, calculated to the Valuation Day up to the High Water Mark. The Performance Fee will be charged at the end of the Performance Period by redeeming such number of the Unitholder's Units as have an aggregate NAV (after accrual of any Performance Fee) equal to the applicable percentage of any such appreciation (a "Performance Fee Redemption"). The aggregate NAV of the Units so redeemed will be paid to the Investment Manager as a Performance Fee. Performance Fee Redemptions are employed to ensure that the Sub-Fund maintains a uniform NAV per Unit. As regards the Unitholder's remaining Units, any appreciation in the NAV per Unit of those Units above the High Water Mark will be charged a Performance Fee in the normal manner.

## Premium Subscriptions

When Units are purchased when the NAV per Unit is greater than the High Water Mark for the Units (hereinafter called a "Premium Subscription"), the prospective Unitholder is required to pay an additional sum equal to the accrued performance fee per Unit (hereinafter called the "Performance Fee Credit"). The Performance Fee Credit is designed to ensure that all holders of Units have the same amount of capital at risk per Unit.

The Performance Fee Credit will be at risk and may depreciate based on the performance of the Sub-Fund subsequent to the subscription. In the event of a decline in the NAV per Unit, the Performance Fee Credit due to the Unitholder will reduce in line with the performance fee accrual for other Units until the Performance Fee Credit is exhausted. Subsequent appreciation in the NAV per Unit will result in a recapture of any

Notes to the financial statements for the financial year ended 30 November 2023 cont/d...

## 4. Equalisation cont/d...

Performance Fee Credit lost due to such reductions, but only to the extent of the previously lost Performance Fee Credit up to the amount paid at subscription.
At the end of the Performance Period, an amount equal to the lower of the Performance Fee Credit paid at the time of the Premium Subscription calculated to the Valuation Day (less any Performance Fee Credit previously applied) or $10 \%$ of the excess of the NAV per Unit over the High Water Mark is applied in the subscription for additional Units for the Unitholder. Such subscription is calculated using the NAV per Unit (net of Performance Fees) on the Valuation Day.

If the Unitholder redeems Units subscribed at the time of the Premium Subscription (hereinafter called "Premium Units") before the last day in any Performance Period, the Unitholder will receive additional redemption proceeds equal to any Performance Fee Credit then remaining multiplied by a fraction, the numerator of which is the number of Premium Units being redeemed and the denominator of which is the number of Premium Units owned by the Unitholder immediately prior to the redemption.

## 5. NAV per Unit

The NAV per Unit of each Unit Class is determined by dividing the net assets of the Unit Class by the total number of Units in issue for that Unit Class. The NAV per Unit and the number of Units outstanding at the year end is set out in the Portfolios of Investments.

## 6. Number of Units in issue and net assets attributable to Redeemable Participating Unitholders

Each Unit will represent an individual beneficial interest in the relevant Sub-Fund. The return on an investment in the relevant Sub-Fund will depend solely upon the investment performance of the assets in that Sub-Fund and the increase or decrease (as the case may be) in the NAV of the Units. The amount payable to a Unitholder in respect of each Unit upon liquidation of a Sub-Fund will equal the NAV per Unit at the date of liquidation. The Units in issue are shown in the Portfolios of Investments.

In accordance with the provisions of the Fund's Prospectus, listed investments and investments with prices quoted in over the counter markets or by market makers are stated at the mid price on the valuation day for the purpose of determining NAV per Unit for subscriptions and redemptions and for various fee calculations.

Net assets attributable to Unitholders represents a liability in the Statement of Financial Position, carried at the redemption amount that would be payable at the Statement of Financial Position date if the Unitholder exercised the right to redeem the Units in the relevant Sub-Fund.
Units in a Sub-Fund may be designated as one or more Classes of Units, the respective rights of which may differ.

## Discretionary Units

This Class of Units may pay distributions (if any) out of interest income earned and realised and unrealised net capital gains after the deduction of expenses in respect of each Accounting Period on any Business Day as may from time to time be determined by the Manager, in its absolute discretion. The amount of the distribution (if any) for any Accounting Period will be determined by the Manager. Any sums not distributed will be accumulated and reflected in the NAV per Unit for the Discretionary Units.

Discretionary Units of Muzinich Enhancedyield Short-Term Fund may pay distributions (if any) out of net income and realised and unrealised gains net of realised and unrealised losses in respect of each Accounting Period and interim Accounting Period and out of capital, on any Business Day as may from time to time be determined by the Manager, in its absolute discretion.

Notes to the financial statements for the financial year ended 30 November 2023 cont/d...

6. Number of Units in issue and net assets attributable to Redeemable Participating Unitholders cont/d...<br>Income Units

This Class of Units will distribute interest income earned after the deduction of expenses in respect of each Accounting Period. Any sums not distributed will be accumulated and reflected in the NAV of the Unit. The distributions will normally be payable twice a year, in or around June and December in each year.

## Monthly Income Units

This Class of Unit will distribute net income earned after the deduction of expenses on a monthly basis. Distributions will be declared on the last Business Day of each month and payable shortly thereafter. Any sums not distributed will be accumulated and reflected in the NAV of the Units.

## IRD Income Units

IRD Income Units will distribute interest income earned, and may at the discretion of the Manager distribute out of realised and unrealised net capital gains and/or from capital, after the deduction of expenses in respect of each Accounting Period. Any sums not distributed will be accumulated and reflected in the NAV of the Unit. The distributions will normally be payable twice a year, in or around June and December in each year. IRD Income Units which have a distribution frequency designated in the name of the Units, such as Monthly or Quarterly, will declare dividends in accordance with their applicable frequency. Dividends that are declared monthly will be declared on the last Business Day of each month and dividends that are declared quarterly will be declared on or around 31 March, 30 June, 30 September and 31 December, unless otherwise set out in the relevant Supplement.

## Accumulation Units

This Class of Units will accumulate the income, realised and unrealised net capital gains/losses and will not pay any distributions in respect of any accounting period.

## Discretionary S Units

This Class of Units may pay distributions out of interest income earned and realised and unrealised net capital gains after the deduction of expenses in respect of each Accounting Period on any Business Day as may from time to time be determined by the Manager, in its absolute discretion. The amount of the distribution for any Accounting Period will be determined by the Manager, subject to a minimum distribution payment of $2 \%$ per Accounting Period. Any sums not distributed will be accumulated and reflected in the NAV of the Unit.

## Hedged Income/Accumulation Units

This Class of Units will be hedged against exchange rate fluctuations between the Denominated Class Currency and the Base Currency of the relevant Sub-Fund. The Investment Manager will try to mitigate the risk of currency volatility by using forward foreign currency exchange contracts.
The following tables show the movement in subscriptions and redemptions of each type of Unit that was in issue during the financial year ended 30 November 2023:

## Audit fees

Fees and expenses excluding VAT, paid to the statutory auditors, Deloitte Ireland LLP, in respect of the financial year ended 30 November 2023 and prior financial year ended 30 November 2022, entirely relate to the audit of the financial statements of the Sub-Funds. There were no fees and expenses paid in respect of other assurance, tax advisory or non-audit services provided by the auditors for the financial year ended 30 November 2023 or financial year ended 30 November 2022.

Notes to the financial statements for the financial year ended 30 November 2023 cont/d...

## 10. Distributions

The Manager will determine the distribution policy of each Unit Class in accordance with the criteria for each Unit Class. The distributions will normally be paid in or around June and December in each year. Any sums not distributed will be accumulated and reflected in the NAV of each Unit.

All other Sub-Funds had only Accumulation Units in issue, therefore no distributions were paid on these Sub-Funds.

## 11. Cash and cash equivalents

At the financial year ended 30 November 2023, all cash at bank balances are held with State Street Bank and Trust ( 30 November 2022: State Street Bank and Trust). The long term credit rating for State Street Bank and Trust at 30 November 2023 is AA- (30 November 2022: AA-).

Notes to the financial statements for the financial year ended 30 November 2023 cont/d...

## 11. Cash and cash equivalents cont/d...

Investors should note that, the Fund operates a Subscriptions/Redemptions Account(s) (as defined below) for each of the Sub-Funds in accordance with the requirements of the Central Bank relating to umbrella fund cash accounts. A Subscriptions/Redemptions Account is an account in the name of the Fund through which subscription monies and redemption proceeds and dividend income (if any) for each Sub-Fund are channelled. Monies in a Subscriptions/Redemptions Account are deemed assets of the respective Sub-Funds.

Where monies are held by the Fund in a Subscriptions/Redemptions Account for the account of a Sub-Fund, an investor shall rank as an unsecured creditor of the Fund in respect of any claim in relation to monies held in such Subscriptions/Redemptions Account in the event such Sub-Fund (or another Sub-Fund of the Fund) becomes insolvent.

Trade and other creditors are payable at various dates in the next three months in accordance with the suppliers' usual and customary credit terms.

Notes to the financial statements for the financial year ended 30 November 2023 cont/d...

## 14. Efficient portfolio management

The Investment Manager may, on behalf of a Sub-Fund engage in transactions in financial derivative instruments for the purposes of efficient portfolio management and/or to protect against exchange risks within the conditions and limits laid down by the Central Bank.
Efficient portfolio management transactions relating to the assets of the Sub-Funds may be entered into by the Investment Manager with one of the following aims; (a) a reduction of risk (including currency exposure risk); (b) a reduction of cost (with no increase or minimal increase in risk); and (c) generation of additional capital or income for a Sub-Fund with a level of risk consistent with the risk profile of a Sub-Fund and the diversification requirements in accordance with the UCITS Regulations and as disclosed in the Prospectus.

In relation to efficient portfolio management operations the Investment Manager will look to ensure that the techniques and instruments used are economically appropriate in that they will be realised in a cost-effective way. Such techniques and instruments include but are not limited to futures, options, interest rate swaps, credit default swaps (to buy and sell protection) and forward foreign currency exchange contracts.

Any direct and indirect operational costs and/or fees which arise as a result of the use of efficient portfolio management techniques is deducted from the revenue delivered to the relevant Sub-Fund at normal commercial rates and does not include any hidden revenue.

Such direct or indirect costs and fees are paid to the relevant counterparty to the financial derivative instruments transaction, which, in the case of financial derivative instruments used for currency hedging purposes, includes the Depositary or entities related to the Depositary. All revenues generated through the use of efficient portfolio management techniques, net of direct and indirect operational costs and fees, is returned to the relevant Sub-Fund.
The Sub-Funds invest in financial derivative instruments ("FDIs") in accordance with conditions or requirements imposed by the Central Bank.

Cash collateral received, if any, on FDIs is disclosed in Note 11.
The Investment Manager employs a risk management process in respect of a Sub-Fund which enables it to monitor and measure the risks attached to the financial derivative positions using a commitment approach and details of this process have been provided to the Central Bank. FDls not included in the risk management process will not be utilised until such time as a revised risk management process has been submitted to and cleared by the Central Bank. The Manager will provide on request to Unitholders supplementary information relating to the risk management methods employed by the Investment Manager in respect of the Sub-Funds including the quantitative limits that are applied and any recent developments on the risk and yield characteristics of the main categories of investments.

All Sub-Funds with the exception of Muzinich LongShortCreditYield Fund and Muzinich Global Tactical Credit Fund use forward foreign currency exchange contracts to hedge the currency exposures of securities or other assets of a Sub-Fund denominated in a currency other than the base currency of the relevant Sub-Fund or the denominated currency of a hedged Unit class.
In relation to Muzinich LongShortCreditYield Fund and Muzinich Global Tactical Credit Fund, FDIs are utilised by the Sub-Funds for both investment purposes and efficient portfolio management purposes. The income arising from these FDIs is disclosed within the net gains/(losses) on financial assets and financial liabilities at fair value through profit or loss in the Statement of Comprehensive Income. The realised and unrealised gains and losses are also disclosed in the Statement of Comprehensive Income. Counterparty transaction costs on FDIs are embedded in the price of FDls and are therefore not separately identifiable for disclosure within the financial statements.

All derivative contracts open at 30 November 2023 are disclosed in the Portfolios of Investments.
There are no other instruments used on the Sub-Funds which require any additional disclosures in relation to efficient portfolio management.

Notes to the financial statements for the financial year ended 30 November 2023 cont/d...

## 15. Exchange rates

Investments and other assets and liabilities denominated in currencies other than $€$ were converted at the following rates at the financial year end:

| $30 / 11 / 2023$ | Rate | $30 / 11 / 2022$ | Rate |
| :--- | ---: | :--- | ---: |
|  |  |  | 0.9810 |
| CHF | 0.9488 | CHF | 0.8646 |

* The above unitholdings represent all of the Units issued in respect of the relevant class.

## Performance fees

A performance fee will be payable out of the assets of the relevant Sub-Fund calculated on a Unit-by-Unit basis for each class of Units so that each issued Unit is charged a performance fee which equates with that issued Unit's performance.

The performance fee in respect of each issued Unit will be equal to $10 \%$ for Muzinich LongShortCreditYield Fund and 20\% for Muzinich European Credit Alpha Fund, of the increase in the NAV per Unit in each case in excess of the high water mark (hereinafter called the "High Water Mark").
At 30 November 2023, a performance fee of US\$Nil $(2022$ : US $\$ 952,423$ ) was charged on Muzinich LongShortCreditYield Fund and $€$ Nil ( 2022 : $€ 456,255$ ) was charged on Muzinich European Credit Alpha Fund.
Amounts payable for performance fees at the financial year end for Muzinich LongShortCreditYield Fund were US $\$ 103,852$ (2022: US $\$ 119,521$ ) , for Muzinich European Credit Alpha Fund were $€ 62,930(2022: ~ € 63,077)$ and for Muzinich Global Fixed Maturity 2027 Fund were $€ 35,000$.

Notes to the financial statements for the financial year ended 30 November 2023 cont/d...

## 16. Related party transactions cont/d...

## Performance fees cont/d...

The Manager may from time to time and at their sole discretion and out of their own resources decide to waive part or all of the Manager Fee, Annual Administrative Fee, Investment Manager Fee, Equalisation or Non-equalisation performance fees. These fee waivers are voluntary and may be discontinued by the Investment Manager at any time without prior notice. These fee waivers may result in a reimbursement of expenses to the Sub-Funds by the Investment Manager.

## Directors

Mr. Mark Clark is a director of the Investment Manager and also an employee and director of the Sub-Investment Manager to the Sub-Funds.

Ms. Ersilia Molnar and Mr. Alex McKenna are directors of the Manager and Investment Manager. Mr. Alex McKenna is also an employee of the Investment Manager.

Effective 3 October 2022, Mr. Mark Clark resigned as director of the Manager. Effective 3 October 2022, Ms. Katharine Laing, an employee of the Investment Manager, was appointed as director of the Manager.

For the financial year ended 30 November 2023 the director fees paid were EUR52,369 (30 November 2022: EUR46,053). There were no amounts outstanding to the directors as at 30 November 2023 ( 30 November 2022: Nil).

## Transactions

During the financial year ending 30 November 2023, there was a Transaction-in-Kind where assets from two segregated mandates, which were managed by the Investment Manager, were moved into Muzinich Americayield Fund Hedged USD Accumulation G Units for trade date 10 January 2023 with a value of US\$33,603,148.

## Cross investments

At 30 November 2023, Muzinich Enhancedyield Short-Term Fund sold its Units in Muzinich Emerging Market Corporate Debt Fund for $€ 26,906,263$ and Muzinich European Credit Alpha Fund for $€ 8,355,850$. As at 30 November 2022, Muzinich Enhancedyield Short-Term Fund held 263,377 Units in Muzinich Emerging Market Corporate Debt Fund with a fair value of $€ 26,799,382$ being $4.29 \%$ of the Units of Muzinich Emerging Market Corporate Debt Fund and 68,000 Units in Muzinich European Credit Alpha Fund with a fair value of $€ 7,976,400$ being $0.45 \%$ of the Units of Muzinich European Credit Alpha Fund.

At 30 November 2023, Muzinich EmergingMarketsShortDuration Fund held 55,351 Units in Muzinich Emerging Market Corporate Debt Fund with a fair value of US\$6,156,103 being 1.94\% of the Units of Muzinich Emerging Market Corporate Debt Fund (2022: 55,351 Units in Muzinich Emerging Market Corporate Debt Fund with a fair value of US\$5,799,091 being 0.90\% of the Units of Muzinich Emerging Market Corporate Debt Fund).

At 30 November 2023, Muzinich LongShortCreditYield Fund held 50,010 Units in Muzinich European Credit Alpha Fund with a fair value of US\$6,883,492 being $1.03 \%$ of the Units of Muzinich European Credit Alpha Fund (2022: 50,010 Units in Muzinich European Credit Alpha Fund with a fair value of US\$6,040,104 being 0.33\% of the Units of Muzinich European Credit Alpha Fund).

At 30 November 2023, Muzinich Global Tactical Credit Fund held 113,377 Units in Muzinich Emerging Market Corporate Debt Fund with a fair value of US $\$ 12,609,758$ being $3.98 \%$ of the Units of Muzinich Emerging Market Corporate Debt Fund (2022: 113,377 Units in Muzinich Emerging Market Corporate Debt Fund with a fair value of US $\$ 11,878,478$ being $1.85 \%$ of the Units of Muzinich Emerging Market Corporate Debt Fund), and held 61,025 Units in Muzinich Dynamic Credit Income Fund with a fair value of US\$6,446,720 being 5.75\% of the Units of Muzinich Dynamic Credit Income Fund (2022: 61,025 Units in Muzinich Dynamic Credit Income Fund with a fair value of US\$6,053,717 being $4.58 \%$ of the Units of Muzinich Dynamic Credit Income Fund).

Notes to the financial statements for the financial year ended 30 November 2023 cont/d...

## 17. Financial instruments

The Sub-Funds primarily invest in the following:

| Sub-Fund |  |
| :---: | :---: |
| Muzinich Americayield Fund | Publicly traded debt securities (including notes, such as floating rate short-term and medium-term notes, and bonds) of US corporate borrowers generally traded on recognised exchanges in the US. |
| Muzinich Europeyield Fund | Publicly traded debt securities (including notes, such as floating rate short-term and medium-term notes, and bonds) of European corporate borrowers and European currency-denominated debt securities of North American corporate borrowers generally traded on recognised exchanges in Europe. |
| Muzinich Global High Yield Low Carbon Credit Fund | Publicly traded high yield debt securities (including notes, such as floating rate short-term and medium-term notes, and bonds) which are listed and/or traded on a recognised exchange and which are issued by corporate borrowers which are domiciled, headquartered, or whose primary business activities or principal trading markets are in the US, Europe and emerging markets. The Sub-Fund may have an exposure of more than 20\% of the NAV to emerging markets. |
| Muzinich Enhancedyield Short-Term Fund | Corporate debt securities (including fixed and floating rate notes and bonds) or in US and European Treasury Bonds and US and European Agency Bonds, which are publicly traded on recognised exchanges. The Sub-Fund will at all times invest at least $60 \%$ of its NAV in investment grade bonds. |
| Muzinich ShortDurationHigh Yield Fund | Publicly traded US\$ denominated bonds of corporate borrowers traded on recognised exchanges. |
| Muzinich Sustainable Credit Fund | Debt securities (including fixed and floating rate notes and bonds) which are publicly traded on recognised exchanges and which are issued by companies domiciled in or having their principal place of business in the US, European Union, or other Organisation for Economic Cooperation and Development ("OECD") Member Countries. |
| Muzinich LongShortCreditYield Fund | Higher-yielding corporate debt securities (including notes, such as floating rate short-term and medium-term notes, and bonds) issued primarily by US issuers, and also European and/or emerging market issuers. The Sub-Fund may utilise futures, options, credit default swaps and total return swaps to gain exposure to higher yielding corporate debt and to hedge investments in the Sub-Fund's securities and their related assets, markets and currencies. |
| Muzinich <br> EmergingMarketsShortDuration Fund | Fixed and/or floating rate corporate and government debt instruments i.e. bonds and existing corporate loan receivables (which are collateralised, freely transferable, traded on a regulated market and unlisted), subject to a $9.9 \%$ limit in corporate loans as further detailed below, with relatively short durations, specifically investing in select short maturity and callable issues and floating rate instruments. The Sub-Fund's short duration profile affords Unitholders a degree of protection against rising interest rates. |
| Muzinich Global Tactical Credit Fund | Fixed and/or floating rate corporate bonds issued by US, European and emerging market issuers (normally less than $40 \%$ of the NAV of the Sub-Fund will be invested in emerging market issuers), which are listed and/or traded on a recognised exchange. |

#### Abstract

Sub-Fund

Muzinich Asia Credit Opportunities Fund

Corporate Debt Fund

Debt securities (fixed and/or floating rate) and money market instruments (including but not limited to OECD government bills, treasury notes, commercial paper and certificates of deposit) which are issued by government or corporate issuers which have their head office or exercise an overriding part of their economic activity in Asian countries and which are denominated in Hard Currency.

Debt securities, primarily bonds, (fixed and/or floating rate) and money market instruments (including but not limited to OECD government bills, treasury notes, commercial paper and certificates of deposit) which are issued by government or corporate issuers which have their head office or exercise an overriding part of their economic activity in emerging market countries (Asia, Africa, Latin America and certain parts of Europe) but, to a lesser extent may also invest in European and North American companies with emerging market exposure.

Investing primarily, either directly or indirectly through the use of FDI, in high yield corporate debt securities (including notes, such as floating rate short-term and medium-term notes, and bonds) issued primarily by European issuers, or by companies that carry out a substantial proportion of their activities in Europe but whose issues may be in non- European currencies.

High yield (i.e. sub-investment grade) fixed and/or floating rate corporate bonds and/or investment grade corporate bonds issued by US, European and emerging market issuers (investment in issues from emerging markets will be limited to a maximum of $30 \%$ of the NAV of the Sub-Fund), which are listed and/or traded on a Recognised Exchange. The Sub-Fund may also invest in money market instruments (including but not limited to OECD government bills, treasury notes, commercial paper and certificates of deposit) which are issued by government or corporate issuers.

High yield (i.e. sub-investment grade) fixed and/or floating rate corporate bonds and/or investment grade corporate bonds issued by US, European and emerging market issuers), which are listed and/or traded on a Recognised Exchange. The Sub-Fund may also invest in money market instruments (including but not limited to OECD government bills, treasury notes, commercial paper and certificates of deposit) which are issued by government or corporate issuers.

Investment grade debt securities (including fixed and floating rate notes (such as promissory notes) and bonds) which are publicly traded on Recognised Exchanges and which are issued by US, European and emerging market issuers.

Investing primarily in high yield (i.e. sub-investment grade) corporate and government bonds and in investment grade corporate and government bonds, as rated by Standard and Poor, Moody's and/or Fitch (or another Recognized Credit Rating Agency, or by the Investment Manager in the case of unrated bonds), all of which may be fixed and/or floating rate and issued by US, European and emerging market issuers.

Investing primarily in Hard Currency denominated debt securities, and such securities held in the Sub-Fund's portfolio may be investment grade or non-investment grade as rated by Moody's and/or Standard \& Poor's or as deemed equivalent by the Investment Manager.

[^11]Notes to the financial statements for the financial year ended 30 November 2023

## 17. Financial instruments cont/d...

The Sub-Funds liabilities include bank overdrafts, amounts due to broker, short-term creditors, derivatives and redeemable participating Units with the exception of Muzinich LongShortCreditYield Fund and Muzinich European Credit Alpha Fund, which enter into forward foreign currency exchange contracts for the purpose of currency hedging.
Muzinich \& Co. (Ireland) Limited, as Manager of the Sub-Funds, is responsible for the general risk management process with respect to the Sub-Funds ensuring that the investment mandate and regulatory rules are adhered to. The portfolio management team within the Investment Manager is responsible on a daily basis for credit analysis of underlying assets purchased by the Sub-Funds and reviews average days to maturity as a means of controlling risk, and will ensure that securities, at the time of purchase, normally have a rating as follows:

| Sub-Fund |  |
| :--- | :--- |
| Muzinich Americayield Fund <br> Muzinich Europeyield Fund | A Moody's or equivalent rating of at least B3, but typically less than A. |
| Muzinich Global High Yield Low |  |
| Carbon Credit Fund | The Investment Manager seeks to meet its objective through the careful selection of <br> publicly traded high yield debt securities (including notes, such as floating rate <br> short-term and medium-term notes, and bonds) which are listed and/or traded on a <br> recognised exchange and which are issued by corporate borrowers which are domiciled, <br> headquartered, or whose primary business activities or principal trading markets are in <br> the US, Europe and emerging markets. The Sub-Fund may have an exposure of more than <br> 20\% of the NAV to emerging markets. Such bonds will generally be rated below |
|  | investment grade by Moody's/Standard \& Poor's (or as deemed equivalent by the <br> Investment Manager), but typically less than A. |
|  | The Sub-Fund primarily invests in corporate debt securities (including fixed and floating <br> rate notes and bonds) or in US and European Treasury Bonds and US and European Agency <br> Bonds, which are publicly traded on recognised exchanges. The Sub-Fund maintains an <br> average investment grade Moody's or Standard \& Poor's rating (or as deemed equivalent |
| by the Investment Manager) of at least Baa3 or BBB-, respectively, and will at all times |  |
| invest at least 60\% of its NAV in investment grade bonds (including ancillary liquid |  |
| assets). No more than 40\% of the Sub-Fund's NAV may be rated below investment grade, |  |
| and the minimum permissible rating of a security will be B3/B- by at least one rating |  |
| agency (or as deemed equivalent by the Investment Manager). |  |

## 17. Financial instruments cont/d...

#### Abstract

Sub-Fund

Muzinich EmergingMarketsShortDuration Fund

Muzinich Global Tactical Credit Fund

Muzinich Asia Credit Opportunities Fund

Muzinich Emerging Market Corporate Debt Fund

The Sub-Fund will primarily focus on debt instruments with ratings in the B/BB/BBB ratings categories as cited by Moody's and/or Standard \& Poor's (or as deemed equivalent by the Investment Manager), but may also invest in higher rated securities.

A minimum A- rating or better, in circumstances where the Investment Manager considers it to be in the best interest of the Sub-Fund.

The Sub-Fund will invest at least two thirds of the Sub-Fund's NAV in Hard Currency debt securities issued by government or corporate issuers in Asian countries and up to one third of the Sub-Fund's NAV in debt securities and money market instruments, including securities of Asian, European and North American companies, denominated in the local currencies of emerging market countries, maintaining an average investment grade Moody's or Standard \& Poor's rating (or as deemed equivalent by the Investment Manager) of at least Baa3 or BBB-, respectively. With the exception of permitted investments in transferable securities and money market instruments which are unlisted, all securities/instruments in which the Sub-Fund will invest will be listed and/or traded on a recognised exchange (as defined in the Prospectus). The Sub-Fund may also opportunistically invest a maximum of $10 \%$ of its NAV in transferable securities that are equities including, but not limited to, shares, depositary receipts (e.g. American Depositary Receipts and Global Depositary Receipts) and convertible bonds. In addition, the Sub-Fund may invest up to $10 \%$ of its NAV in China A Shares listed on the Shanghai Stock Exchange via the Northbound Trading Link of the Shanghai Hong Kong Stock Connect program. The Sub-Fund may at times invest a maximum of $50 \%$ of its NAV in non-investment grade debt securities and the minimum permissible rating of such securities will be B3/B- by any one rating agency (or as deemed equivalent by the Investment Manager).

Debt Securities generally rated below investment grade, typically less than AA, by Moody's or Standard \& Poor's (or as deemed equivalent by the Investment Manager). The Investment Manager retains the flexibility to invest substantially in cash and/or money market instruments with investment grade ratings as well as debt instruments issued by OECD banks and corporates with a minimum 'A-' rating or better.

The corporate bonds in which the Investment Manager will primarily invest will be noninvestment grade, but the Investment Manager may also invest in investment grade corporate bonds, which the Investment Manager believes may enhance the overall returns of the Sub-Fund. The securities in which the Sub-Fund may invest will be listed or traded on a Recognised Exchange.

The Sub-Fund will invest in high yield (i.e. sub investment grade) corporate bonds and/or investment grade corporate bonds, as rated by Standard and Poor's, Moody's and/or Fitch (or as deemed equivalent by the Investment Manager) ("Ratings Agency"). Should any difference in rating by one or more Ratings Agency (or firm) arise, the following approach shall be taken; Where there is one available rating this will be used, where there are two available ratings the lowest shall be used, and where there are three available ratings, they will be sorted in ascending order and the second shall be used. A maximum of $7.5 \%$ of the NAV of the Sub-Fund may be invested in corporate bonds that are rated below B3/B-. The allocation between high yield and investment grade, and among various geographies, will be determined primarily based on a relative value assessment across global credit markets.

#### Abstract

Sub-Fund

Muzinich High Yield Bond 2024 Fund

Muzinich Global Short Duration Investment Grade Fund

Muzinich Dynamic Credit Income Fund

The Sub-Fund will invest in high yield (i.e. sub investment grade) corporate bonds and/or investment grade corporate bonds, as rated by Standard and Poor's, Moody's and/or Fitch (or as deemed equivalent by the Investment Manager) ("Ratings Agency"). Should any difference in rating by one or more Ratings Agency (or firm) arise, the following approach shall be taken; Where there is one available rating this will be used, where there are two available ratings the lowest shall be used, and where there are three available ratings, they will be sorted in ascending order and the second shall be used. A maximum of $5 \%$ of the NAV of the Sub-Fund may be invested in corporate bonds that are rated below B3/B- at the time of purchase. The allocation between high yield and investment grade, and among various geographies, will be determined primarily based on a relative value assessment across global credit markets. The Sub-Fund may also invest in Contingent Convertible Securities but such investments (if any) will be limited and are not expected to form a material part of the portfolio.

The Sub-Fund will maintain a portfolio with an average investment grade Moody's or Standard \& Poor's rating (or as deemed equivalent by the Investment Manager) of at least Baa2 or BBB, respectively. The Sub-Fund's investment portfolio will be diversified as to issuer and industry, with no single corporate issuer comprising more than $3 \%$ of the Sub-Fund's NAV. Investments in emerging markets are not expected to exceed $15 \%$ of the Sub-Fund's NAV. The Investment Manager may also invest up to $5 \%$ of the Sub-Fund's NAV in sub-investment grade debt securities which the Investment Manager believes may enhance the overall returns of the Sub-Fund.

The Sub-Fund may invest in investment grade and subinvestment grade corporate hybrid bonds (bonds issued by non-financial companies that have equity-like features) and subordinated debt securities issued by financial companies. At times, the Sub-Fund may invest in asset-backed securities in the form of collateralized loan obligations ("CLO").Such investments will be limited to a maximum of $10 \%$ of the NAV of the Sub-Fund, and a maximum of $2.5 \%$ of the NAV of the Sub-Fund in any one tranche of a CLO. The Sub-Fund may also invest in Contingent Convertible Securities but such investments (if any) will be limited to a maximum of $5 \%$ of the NAV of the Sub-Fund, and a maximum a $2.5 \%$ of the NAV of the Sub-Fund in any one issue. The Investment Manager may maintain a certain level of liquid assets in the Sub-Fund.

The Investment Manager seeks to meet the Sub-Fund's investment objective through investment in debt securities, primarily bonds (fixed and/or floating rate) and money market instruments (including but not limited to OECD government bills, treasury notes, commercial paper and certificates of deposit) which are issued by government or corporate issuers.

* Muzinich Global Fixed Maturity 2027 Fund launched on 20 April 2023.

Details of the investment strategy of the Investment Manager during the year is contained within their report for the relevant Sub-Fund.

Under the UCITS Regulations issued by the Central Bank, the Manager is required to employ a risk management process which enables it to accurately monitor and manage the global exposure to the relevant Sub-Fund from derivatives. The Manager uses a methodology known as the "Commitment Approach" to measure the global exposure of the Sub-Funds and manage the potential loss to the Sub-Funds due to market risk. The Commitment approach is a methodology that aggregates the underlying market or notional values of derivatives to determine the exposure of the Sub-Funds to derivatives. In accordance with the UCITS Regulations, global exposure for the Sub-Funds to derivatives must not exceed $100 \%$ of the relevant Sub-Fund's NAV. During the financial year and the prior financial year the Sub-Funds adhered to this guidance.

Notes to the financial statements for the financial year ended 30 November 2023 cont/d...

## 17. Financial instruments cont/d...

An investment in the Sub-Funds involves certain substantial risks, and returns from the Sub-Funds may not adequately compensate Unitholders for the risks assumed. The Sub-Funds will be subject to those risks common to funds investing in publicly traded securities, including market volatility. The main risks relating to financial instruments are set out below.

## (a) Market Risk

Market risk comprises three types of risk; market price risk, interest rate risk and currency risk.

## (i) Market price risk

This is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk and currency risk), whether those changes are caused by factors specific to individual financial instruments or its issuer, or other factors affecting similar financial instruments traded in the market. The Sub-Funds invest in debt securities.

Movements in the market prices of debt securities will affect the NAV of the Sub-Funds. The Sub-Funds are therefore exposed to market price risks in relation to its debt investments.

The Sub-Funds' overall market positions are monitored on a daily basis by the Sub-Funds' Investment Manager. The portfolio manager for the Sub-Funds reviews the portfolios on a daily basis from a performance and risk perspective. All security trades are subject to pre-trade compliance checks and additionally the portfolios are monitored daily within the Investment Manager's trading system for restrictions and guidelines specific to the relevant Sub-Fund. Within the Investment Manager and Sub-Investment Manager is the Portfolio Risk Analytics Committee ("PRAC"). This body's responsibilities are directly concerned with the relevant Sub-Fund's strategy and compliance with its mandate. The PRAC reports directly to the executive board of the Investment Manager.

The PRAC is responsible for the review of all accounts to assure their conformity with their stated guidelines, such as portfolio diversification, minimum credit rating compliance, etc. This also includes risk control surveillance that involves monitoring of currency positions to make sure that portfolios are properly hedged to limit their exposure to currency risk.

The table below sets out the impact of a $5 \%$ movement in market prices of financial assets at fair value through profit or loss to the net assets attributable to Unitholders of the Sub-Funds.

## 17. Financial instruments cont/d...

(a) Market Risk cont/d...
(ii) Interest rate risk

This is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Sub-Funds invest mainly in fixed income securities i.e. bonds. Accordingly, the value of the investments in the Sub-Funds is sensitive to movements in interest rates.

Longer term obligations are usually more sensitive to interest rate changes. The performance of the Sub- Funds may be affected by changes in economic and marketing conditions and in the legal, regulatory and tax requirements or due to an issuer's individual situation.
A bond's sensitivity to interest rates can be expressed in terms of duration, which gives the estimated percentage change in the relevant portfolio value, associated with a $1 \%$ increase in interest rates. The tables below provide duration numbers at 30 November 2023 and 30 November 2022. Also shown in the tables are the estimated impacts on the portfolio of a $1 \%$ increase in interest rates. The sensitivity analysis is based on a small parallel shift of the yield curve (interest rates of all maturities moving in unison):

30 November 2023:

* Effective 16 February 2022, Muzinich Global High Yield Fund changed its name to Muzinich Global High Yield Low Carbon Credit Fund.
** Muzinich Dynamic Credit Income Fund launched on 28 April 2022.

## (iii) Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. This risk arises on financial instruments that are denominated in a currency other than the functional currency in which they are measured.

The Investment Manager will attempt to mitigate currency risk related to the hedged Unit Classes and non-base currency positions in the portfolios, by using forward foreign currency exchange contracts in order to hedge against fluctuations in currencies other than the functional currency of the relevant Sub-Fund.
At 30 November 2023, forward foreign currency exchange contracts were held on all Sub-Funds for the purpose of Unit Class and portfolio hedging ( 30 November 2022: with the exception of Muzinich Fixed Maturity 2021 Fund).

The tables below provide details of the exposure (by weight) to each currency as at 30 November 2023 at fair value prices. Currency forwards \% represents the percentage of forward foreign currency exchange contracts notional values in the NAV.

* Effective 16 February 2022, Muzinich Global High Yield Fund changed its name to Muzinich Global High Yield Low Carbon Credit Fund.
** Muzinich Dynamic Credit Income Fund launched on 28 April 2022.
At the 30 November 2023 and 30 November 2022 had the exchange rates between foreign currencies and the relevant base currency for each Sub-Fund increased by $10 \%$, with all other variables held constant, the increase in net assets attributable to holders of redeemable participating Units would have amounted to approximately the following amounts. These amounts take account of forward foreign currency exchange contracts notionals of the non-base currency leg. A decrease of $10 \%$ would have had an equal, but opposite effect.

| Sub-Fund | $30 / 11 / 2023$ | $30 / 11 / 2022$ |

* Muzinich Global Fixed Maturity 2027 Fund launched on 20 April 2023.

## (b) Credit risk

This is the risk that one party to a financial instrument or transaction will cause a financial loss for the other party by failing to discharge an obligation when it falls due. This includes counterparty risk and issuer (or investment) risk.

The Sub-Funds are subject to the credit risk of its Depositary with respect to cash balances and settlements. The Investment Manager reviews the creditworthiness of the Depositary for these purposes. The Investment Manager reviews in detail the creditworthiness of all bond issuers before committing to a purchase using available information in the market place. The creditworthiness of issuers is also kept under constant review. The Sub-Funds have no impaired or past due assets.

The Sub-Funds may enter into credit derivatives to isolate and transfer the credit risk associated with a particular reference asset. Credit default swaps provide a measure of protection against defaults of debt issuers. The Sub-Funds' use of credit default swaps does not assure their use will be effective or will have the desired result. A Sub-Fund may either be the buyer or seller in a credit default swap transaction. Credit default swaps are transactions under which the parties obligations depend on whether a credit event has occurred in relation to the reference asset. The credit events are specified in the contract and are intended to identify the occurrence of a significant deterioration in the creditworthiness of the reference asset. On settlement, credit default products may be cash settled or involve the physical delivery of an obligation of the reference entity following a default.

The buyer in a credit default swap contract is obligated to pay the seller a periodic stream of payments over the term of the contract provided that no event of default on an underlying reference asset has occurred.
If a credit event occurs, the seller must pay the buyer the full notional value of the reference asset that may have little or no value. If the Sub-Fund is a buyer and no credit event occurs the Sub-Fund's losses will be limited to the periodic stream of payments over the term of the contract. As a seller, the Sub-Funds will receive a fixed rate of income throughout the term of the contract, provided that there is no credit event. If a credit event occurs, the seller must pay the buyer the full notional value of the reference obligation. The counterparties to the credit default swaps are referenced in the Portfolio.

Notes to the financial statements for the financial year ended 30 November 2023 cont/d...

## 17. Financial instruments cont/d...

(b) Credit risk cont/d...

The Fund may invest in investments such as Bank Loans Participations and typically will result in the Sub-Fund having a contractual relationship only with the lender, not with the borrower. In connection with purchasing participations, the Sub-Funds generally have no right to enforce compliance by the borrower with the terms of the loan agreement relating to the loan, nor any rights of set-off against the borrower, and a Sub-Fund may not directly benefit from any collateral supporting the loan in which it has purchased the participation. As a result, a Sub-Fund will assume the credit risk of both the borrower and the lender that is selling the participation. In the event of the insolvency of the lender selling a participation, a Sub-Fund may be treated as a general creditor of the lender and may not benefit from any set-off between the lender and the borrower.

As disclosed in Note 11, all cash at bank balances are held with the Depositary ( 30 November 2022: the Depositary). State Street Bank and Trust Company, the Parent of the Depositary, currently holds a long term rating of Aa2 (30 November 2022: Aa2) (Moody's). The cash held as collateral is held with Barclays Bank (long term rating: A2), BNP Paribas (long term rating: Aa3), Deutsche Bank (long term rating: A3), Goldman Sachs (long term rating: A1), JP Morgan Chase (long term rating: A2) and Morgan Stanley (long term rating: A3) as detailed in Note 11 (30 November 2022: Barclays Bank, BNP Paribas, Deutsche Bank, Goldman Sachs, JP Morgan Chase and Morgan Stanley). State Street Bank and Trust Company also act as counterparty to the forward foreign currency exchange contracts held at 30 November 2023 and 30 November 2022.
The total carrying value of assets exposed to credit risk and details of credit risk exposures and concentration are contained in the Portfolios of Investments. At 30 November 2023 and 30 November 2022, the following financial assets were exposed to credit risk as summarised in the table below:

[^14]Notes to the financial statements for the financial year ended 30 November 2023 cont/d...

## 17. Financial instruments cont/d...

(b) Credit risk cont/d...

In the event of insolvency or bankruptcy of the Depositary, the cash held by the Depositary on behalf of the Sub-Funds will be treated as a general creditor. The long term credit rating of the parent company of the Depositary, State Street Bank and Trust Company is Aa2 (30 November 2022: Aa2) (Moody's).

The Sub-Fund's securities are maintained within the Depositary's custodial network in segregated accounts. The Depositary will ensure that any agents it appoints to assist in safekeeping the assets of the Sub-Fund will segregate the assets of the Sub-Fund. Thus in the event of insolvency or bankruptcy of the Depositary, the Sub-Fund's assets are segregated and protected and this further reduces counterparty risk.

The Sub-Fund will however, be exposed to the risk of the Depositary or certain depositories used by the Depositary, in relation to the Sub-Fund's cash held by the Depositary. In event of the insolvency or bankruptcy of the Depositary, the Sub-Fund will be treated as a general creditor of the Depositary in relation to cash holdings of the Sub-Fund.

## (c) Liquidity risk

Liquidity risk is defined as the risk that the Sub-Funds may not be able to meet its financial liabilities when they fall due.

The Sub-Funds' investments are primarily in commercial notes, bonds, equities, forward foreign currency exchange contracts, credit default swaps and total return swaps. These are subject to liquidity risks because there may be no active secondary market for these types of investments. The Sub-Funds may not be able to quickly liquidate their investments at amounts close to their fair values in order to respond to its liquidity requirements, including those arising from the redemption of participating Units. The Investment Manager monitors the Sub-Funds' liquidity positions on a daily basis.

The main financial liability of the Sub-Funds is the redemption of participating Units. As part of an open-ended umbrella unit trust, the Sub-Funds are required to redeem Units at a price equivalent to the NAV per Unit, subject to settlement and dealing restrictions laid down in the Trust Deed. The Sub-Funds may also apply a redemption fee of up to a maximum of $1 \%$ (\% of NAV per Unit). The Sub-Fund is therefore exposed to the liquidity risk of meeting Unitholder's redemptions at any time. The Investment Manager ensures that the Sub-Funds have at all times a sufficient amount of liquid assets in order to meet potential redemption requests. The Investment Manager monitors this situation by reviewing liquidity in the market place. The SubFunds also have the ability to limit daily redemption requests to $10 \%$ of the Units in issue.

The Sub-Funds enter into derivative contracts traded over the counter ("OTC"), which are not traded in an organised market. The Sub-Funds may not be able to liquidate these OTC contracts at an amount which represents their fair value. The Sub-Funds enter into forward foreign currency exchange contracts for the purpose of hedging the Unit Classes in the relevant Sub-Fund and Muzinich LongShortCreditYield Fund enters into other OTC derivative contracts (including credit default swaps, total return swaps and options) in order to pursue its investment objective. The Investment Manager does not consider liquidity risk in relation to OTC contracts to be significant to the Sub-Funds.

Notes to the financial statements for the financial year ended 30 November 2023 cont/d...

* Effective 16 February 2022, Muzinich Global High Yield Fund changed its name to Muzinich Global High Yield Low Carbon Credit Fund.
** Muzinich Dynamic Credit Income Fund launched on 28 April 2022.
All the above liabilities are payable within three months.

## (d) Capital Management

The capital of the Fund is represented by the net assets attributable to redeemable participating Unitholders. The amount of net assets attributable to redeemable participating Unitholders can change significantly on a daily basis, as the Fund is subject to daily subscriptions and redemptions at the discretion of the Unitholders.

As a result, a redemption request may have a significant impact on the liquidity of the Fund and its ability to continue as a going concern. See Liquidity Risk note above for details of how this risk is mitigated.

The Fund's aim with respect to management of its capital is to safeguard its ability to continue as a going concern in order that each Sub-Fund may achieve its overall objective of long-term capital growth, and to maintain a strong capital base to support the development of each Sub-Fund's investment activities.
The Investment Manager monitors capital on the basis of the value of net assets attributable to redeemable participating Unitholders.

## (e) Fair value hierarchy

IFRS 13 requires disclosures surrounding the level in the fair value hierarchy in which fair value measurement inputs are categorised for assets and liabilities measured in the Statement of Financial Position. The determination of the fair value for financial assets and financial liabilities for which there is no observable market price requires the use of valuation techniques.

Notes to the financial statements for the financial year ended 30 November 2023 cont/d...

## 17. Financial instruments cont/d...

## (e) Fair value hierarchy cont/d...

The Fund categorises investments using the following hierarchy as defined by IFRS 13:
Level 1 Quoted market prices in an active market for an identical instrument.
Level 2 Valuation techniques based on observable inputs. This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Level 3 Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs could have a significant impact on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

For each class of assets and liabilities not measured at fair value in the Statement of Financial Position but for which fair value is disclosed, IFRS 13 requires the Fund to disclose the level within the fair value hierarchy within which the fair value measurement would be categorised and a description of the valuation technique and inputs used in the technique.

Assets and liabilities, including reverse repurchase agreements, not carried at fair value are carried at amortised cost; their carrying values are a reasonable approximation of fair value.

Cash and cash equivalents include deposits held with banks and other short-term investments in an active market and they are categorised as Level 1.

Receivable for investments sold and other receivables include the contractual amounts for settlement of trades and other obligations due to the Fund. Payable for investments sold and other payables represent the contractual amounts and obligations due by the Fund for settlement of trades and expenses. All receivable and payable balances are categorised as Level 2.
The puttable value of redeemable units is calculated based on the net difference between total assets and all other liabilities of each Sub-Fund within the Fund in accordance with the Funds' Prospectus. These Units are not traded on an active market.

A demand feature is attached to these Units, as they are redeemable at the holders' option and can be redeemed on any dealing date for cash/assets equal to a proportionate share of the Fund's NAV attributable to the Unit Class. The fair value is based on the amount payable on demand, discounted from the first date that the amount could be required to be paid. The impact of discounting in this instance is not material. As such, Level 2 is deemed to be the most appropriate categorisation for net assets attributable to holders of redeemable units held.

There were no transfers between levels during the financial year ended 30 November 2023 or the financial year ended 30 November 2022.

## (f) Offsetting

The Sub-Funds mitigate the credit risk of derivatives by entering into master netting agreements and holding collateral in the form of cash.

Derivative transactions are either transacted on an exchange with central clearing counterparties or entered into under International Derivatives Swaps and Dealers Association ("ISDA") master netting agreements. A default by a party in performance with respect to one transaction under such an ISDA agreement would give the other party the right to terminate all transactions under such ISDA agreement and calculate one net amount owed from one party to the other. Exchange traded derivatives are not subject to a master netting agreement.
The ISDA agreement does not meet the criteria for offsetting in the Statement of Financial Position. This is because they create a right of set-off of recognised amounts that is enforceable only following an event of default, insolvency or bankruptcy of the Fund or the counterparties. In addition, the Fund and its counterparties do not intend to settle on a net basis or to realise the assets and settle the liabilities simultaneously. All amounts are shown gross in the Statement of Financial Position. Amounts shown in the tables below show positions in the event of default, insolvency or bankruptcy of the Fund or the counterparties.

At 30 November 2023 and 30 November 2022 futures contacts held by Muzinich Europeyield Fund, Muzinich LongShortCreditYield Fund and Muzinich European Credit Alpha Fund were traded on an exchange and therefore not subject to a master netting agreement and have been excluded from the tables below.

The following tables present information about the offsetting of FDIs and collateral amounts as at 30 November 2023:

Muzinich Americayield Fund
$\left.\begin{array}{lrr}\hline & \begin{array}{r}\text { Gross amounts of } \\ \text { recognised financial }\end{array} & \begin{array}{r}\text { Gross amounts of } \\ \text { recognised financial }\end{array} \\ \text { assets presented in the liabilities presented in } \\ \text { the Statement of }\end{array}\right\}$

## 18. Soft commission arrangements

There were no soft commission arrangements in place during the financial year or during the prior financial year and there are no plans to introduce such programs.

## 19. Directed Brokerage

There were no directed brokerage fees paid or received by the Sub-Funds during the financial year ended 30 November 2023 (30 November 2022: Nil).

Notes to the financial statements for the financial year ended 30 November 2023 cont/d...

## 20. Material changes to the Prospectus

The following material changes were made to the Prospectus during the financial year:
20 April 2023, Muzinich Global Fixed Maturity 2027 Fund launched.
Effective 2 May 2023, the benchmark of the Muzinich Global Tactical Credit Fund was updated from USD 3 Month LIBOR to U.S. 3 Month Treasury Bill.

## 21. Significant events during the financial year

Effective 11 January 2023, the Annual Administrative Fee charged on all Unit classes was amended to $0.05 \%$ on Muzinich Americayield Fund, Muzinich Asia Credit Opportunities Fund, Muzinich Sustainable Credit Fund, Muzinich EmergingMarketsShortDuration Fund, Muzinich Enhancedyield Short-Term Fund, Muzinich Europeyield Fund, Muzinich Global Tactical Credit Fund, Muzinich ShortDurationHighYield Fund, Muzinich Global High Yield Low Carbon Credit Fund, Muzinich Global Short Duration Investment Grade Fund, Muzinich Dynamic Credit Income Fund and Muzinich Emerging Market Corporate Debt Fund.

On 19 March 2023, Swiss investment bank UBS Group AG agreed to buy Credit Suisse for CHF3 billion in an all-stock deal brokered by the government of Switzerland and the Swiss Financial Market Supervisory Authority. As part of this, Additional Tier 1 (AT1) bonds were written down to zero. Muzinich Enhancedyield Short-Term Fund held two of these bonds which represented $0.17 \%$ of the market value of the Fund on March 17 2023 (last business day before the takeover).
Effective 2 May 2023, the benchmark of the Muzinich Global Tactical Credit Fund was updated from USD 3 Month LIBOR to U.S. 3 Month Treasury Bill.

The below Units launched and terminated during the financial year:

| Funds | Unit Class | Launch date |

|  | Hedged CHF Accumulation H Units |
|  |  |

Based on our analysis and views on further deterioration in the markets following Russia's invasion of Ukraine, the Investment Manager and Sub-Investment Manager sold all the Fund's Russian holdings in early March 2022 on fiduciary grounds and has no direct exposure at this time. The Fund managed to take advantage of the limited liquidity in these names. We continue to very carefully monitor the evolving conditions for all of our indirect and unrelated exposures globally. The ongoing military operation in Ukraine and the related sanctions targeted against the Russian Federation may continue to impact on the Global Economy.

There have been no other significant events affecting the Sub-Funds during the financial year.

## 22. Significant events after the year end

Effective 26 January 2024, Muzinich Fixed Maturity 2024 Fund changed its name to Muzinich Fixed Maturity 2028 Fund.

Effective 26 January 2024, Muzinich High Yield Bond 2024 Fund changed its name to Muzinich High Yield Bond 2028 Fund.

Effective 26 January 2024, Muzinich Global Market Duration Investment Grade Fund launched.
The compulsory redemption of the relevant Units and closure of the Unit Classes as indicated in the table below, took effect on 30 January 2024.

| Sub-Funds | Unit Classes |
| :--- | :--- |
| Muzinich Americayield Fund | Hedged GBP Accumulation S Units |
| Muzinich Enhanceyield Short-Term Fund | Hedged EUR Income G Units |
|  | Hedged GBP Accumulation R Units |
| Muzinich Global Short Duration Investment Grade Fund | Hedged USD Accumulation Founder Units |
| Muzinich Global Tactical Credit Fund | Hedged AUD Accumulation R Units |
| Huzinich LongShortCreditYield Fund | Hedged GBP Accumulation Founder Units |
|  | Hedged GBP Accumulation E Units |
| Huzinich Sustainable Credit Fund | Hedged USD Accumulation NA Units |

There have been no other significant events affecting the Fund since the Statement of Financial Position date that require amendment to or disclosure in the financial statements.

## 23. Approval of the financial statements

The financial statements were approved by the Directors of the Manager on 20 March 2024.

## Appendix III - Remuneration Disclosure (Unaudited)

Reference is made to the UCITS Regulations and specifically the remuneration requirements set out in regulations 24 A and 24 B thereof. The Manager has implemented a remuneration policy in line with the provisions of regulation 24A ("Remuneration Policy").

The European Securities and Markets Authority ("ESMA") was mandated under Article 14a(4) of Directive 2009/65/EC (as amended) (the "UCITS Directive") to produce guidance on the application of remuneration principles under Article 14b. ESMA issued the "Guidelines on sound remuneration policies under the UCITS Directive and AIFMD" ("the "ESMA Guidelines") on 31 March 2016, and the ESMA Guidelines have applied since 1 January 2017 to UCITS management companies such as the Manager, and to the extent applicable its delegate(s).
Regulation $89(3 A)$ of the UCITS Regulations requires the annual report of the Fund to contain certain remuneration-related information, and this requirement applied as of 18 March 2016.

In the financial year of the Fund ended on 30 November 2023:
(a) Only fixed remuneration (meaning payments or benefits without consideration of any performance criteria) is paid by the Manager to the three independent Directors. The other five Directors who are executives of the Manager and/or Investment Manager are not paid such remuneration. The Board of Directors of the Manager, as identified in the section of the Prospectus headed "Directory", are responsible for awarding remuneration and any benefits and these are set at a level that reflects the qualifications and contribution required taking into account the Manager's size, internal organisation and the nature, scope and complexity of its activities.
(b) Director's fees charged for the year amounted to EUR 52,369.
(c) The Remuneration Policy was subject to an annual review in accordance with the requirements of the UCITS Regulations and amended to reflect changes in Identified Staff of the Manager.
(d) In accordance with Section IX of the ESMA Questions and Answers on the UCITS Directive, the following extract is the information disclosed by the Investment Manager which is subject to regulatory requirements on remuneration for its relevant staff to whom investment management (including risk management) activities have been delegated that are equally as effective as those under the UCITS Directive.
(e) For the year ended 31 December 2023, the total remuneration to all staff paid by the AIFM during that period was EUR 21,826,849.

Due to the Investment Manager's financial year end, the audited information for 2023 needed to provide relevant disclosure attributable to the Fund is not currently available. However, the latest available audited information is included below and, for reference, the fees paid to the Manager by the Fund during the period are disclosed in Note 17 above. The Investment Manager's fees are paid out of the Manager's fee.

## Appendix III - Remuneration Disclosure (Unaudited) cont/d...

The below information is an extract from the Notes to the Financial Statements of Muzinich \& Co. Limited for the Year Ended 31 December 2022.
7. Staff costs

|  | 2022 |
| :--- | ---: |
| Wages and salaries | $\frac{£}{}$ |
| Social security costs | $53,114,256$ |
| Cost of defined contribution scheme | $8,901,870$ |
|  | $1,318,545$ |

## 8. Employees

The average monthly number of employees, including the Directors, during the year was as follows:

Marketing and Client Service
Investment 78
Operations and Administrative 40

## Appendix IV - Securities Financing Transaction Regulations

Article 13 of Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse, and amending Regulation (EU) No 648/2012, requires UCITS investment companies to provide the following information on the use made of securities financing transactions and Total Return Swaps.

## Muzinich LongShortCreditYield Fund

## Total Return Swaps

Market value of assets engaged in securities financing transactions at 30 November 2023

Currency
US\$ $(3,470,692)$
\% of Net Assets
(0.96)\%

Top 10 Counterparties used for each type of Total Return Swap at 30 November 2023*

| Counterparty Name | Value of outstanding transactions | Country of Establishment |
| :--- | ---: | ---: |
| Barclays Bank | US\$ $(405,177)$ | United Kingdom |
| BNP Paribas | US\$ $(3,065,515)$ | France |

* The above is a complete list of counterparties.

Settlement/clearing for each type of Total Return Swap:
Bi-Lateral

| Maturity tenor of the Total | US\$ |
| :--- | ---: |
| Return Swaps | $(405,177)$ |
| Less than 1 month | $(3,065,515)$ |

## Appendix V - Additional Information regarding Hong Kong registered Funds (Unaudited) cont/d...

Transactions with Connected Persons for the Sub-Funds distributed in Hong Kong
Connected Persons of the Manager, the Investment Managers, the Depositary and the Directors of the Manager are those as defined in the SFC Code. All transactions entered into during the financial year between the authorised Sub-Funds and the Manager, the Investment Managers, the Depositary and the Directors of the Manager and their respective Connected Persons were carried out in the normal course of business and on normal commercial terms. Security investments and currency transactions through a broker who is a Connected Person of the Manager, the Investment Advisors, the Depositary and the Directors of the Manager were as follows for the financial year ended 30 November 2023:

| Sub-Fund | Total Purchases \& Sales through a broker who is a Connected Person US\$ | \% of Total Purchases \& Sales | Commissions US\$ | Average Rate of Commissions in \% |
| :---: | :---: | :---: | :---: | :---: |
| Muzinich Americayield Fund | 623,726 | 21.16 |  |  |
| Muzinich Europeyield Fund | 688,426 | 30.48 | - |  |
| Muzinich Enhancedyield Short-Term Fund | 65,462,367 | 81.97 | - |  |
| Muzinich ShortDurationHighYield Fund | 1,714,503 | 34.54 | - |  |
| Muzinich EmergingMarketsShortDuration Fund | 2,420,167 | 60.53 | - |  |
| Muzinich Global Tactical Credit Fund | 9,651,710 | 52.53 | - |  |
| Muzinich Asia Credit Opportunities Fund | 123,792 | 28.02 | - |  |

There was no commission charged on the transactions in the above table for the financial year ended 30 November 2023.

## Appendix VI - Sustainable Finance Disclosure (Unaudited)

## 1. Article 6 Disclosure

The following sub-funds of Muzinich Funds have been categorised as Article 6 financial products for the purposes of Regulation (EU) 2019/2088 ("SFDR") (each, an "Article 6 Fund", together the "Article 6 Funds"):

- Muzinich Fixed Maturity 2024 Fund
- Muzinich High Yield Bond 2024 Fund

For the purpose of Regulation EU/ 2020/852 (the "Taxonomy Regulation"), it should be noted that the investments underlying the Article 6 Funds do not take into account the EU criteria for environmentally sustainable economic activities.

## 2. Article 8 Disclosure

The following sub-funds of Muzinich Funds have been categorised as Article 8 financial products for the purposes SFDR (each, an "Article 8 Fund", together the "Article 8 Funds").

- Muzinich Americayield Fund
- Muzinich Europeyield Fund
- Muzinich Global High Yield Low Carbon Credit Fund
- Muzinich Enhancedyield Short-Term Fund
- Muzinich ShortDurationHighYield Fund
- Muzinich Sustainable Credit Fund
- Muzinich LongShortCreditYield Fund
- Muzinich EmergingMarketsShortDuration Fund
- Muzinich Global Tactical Credit Fund
- Muzinich Asia Credit Opportunities Fund
- Muzinich Emerging Market Corporate Debt Fund
- Muzinich European Credit Alpha Fund
- Muzinich Global Short Duration Investment Grade Fund
- Muzinich Dynamic Credit Income Fund
- Muzinich Global Fixed Maturity 2027 Fund

Muzinich \& Co. Limited (the "Investment Manager") evaluates and integrates sustainability risks as part of the investment research process and uses data provided by experienced, independent ESG data providers in order to evaluate the ESG risk management by an issuer.

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.
That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

 indicators measure how the environmental or social characteristics promoted by the financial product are attained.
## Product name:

Legal entity identifier:

## Muzinich Americayield Fund

54930086G66KM1ZTG004

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

It made sustainable investments with an environmental objective: _\%

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
$\square$
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: $\qquad$

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $0.87 \%$ of sustainable investments.

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

## How did the sustainability indicators perform?

The sustainability indicators performed as follows:

| The percentage of an individual <br> issuer's revenue which may be <br> derived from specific business <br> activities (e.g., controversial <br> weapons production). | At the end of each of the four quarters in the reference period, this financial <br> product: <br> - |
| :--- | :--- |
| controversial weapons <br> - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from <br> tobacco production |  |
| - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from |  |
| coal mining or coal-related electricity generation, or issuers with up to 30\% of |  |
| coal-related revenues which had not made a public commitment to |  |
| decommission their coal assets by 2025. |  |

Reference index used: ICE BofA BB-B US Non-Financial Cash Pay High Yield Constrained Index
The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'. <br> ...and compared to previous periods?}

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

> The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

> The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

> Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

## Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct involvement in entities which derived more than $10 \%$ of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index. <br> The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor. <br> The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor. |
| :---: | :---: | :---: |
| Carbon footprint | High |  |
| GHG intensity of investee companies | High |  |
| Exposure to activities in the fossil fuel sector | High |  |
| Non-renewable energy consumption and production | Medium |  |
| Energy consumption intensity per high impact climate sector | Low |  |
| Activities negatively affecting biodiversity-sensitive areas | Medium |  |
| Emissions to water | Low |  |
| Hazardous waste ratio | Low |  |

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment <br> Manager's risk team and portfolio managers. |
| :---: | :---: | :--- |
| Policies, processes and compliance <br> mechanisms to monitor <br> compliance with UN Global <br> Compact principles and OECD <br> Guidelines for Multinational <br> Enterprises | High | Medium |

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2022 30/11/2023

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

| Largest investments | Sector | \% Assets | Country |
| :--- | :--- | :--- | :--- |
| Royal Caribbean Cruises | Transportation and Storage | $1.84 \%$ | US |
| American Airlines Inc | Transportation and Storage | $1.74 \%$ | US |
| Caesars Entertain Inc | Arts, Entertainment and Recreation | $1.56 \%$ | US |
| Carnival Corp | Transportation and Storage | $1.51 \%$ | US |
| Cco HIdgs LIc/cap Corp | Information And Communication | $1.25 \%$ | US |
| Fce Bank Plc | Manufacturing | $1.16 \%$ | GB |
| Bread Financial HIdgs | Financial and Insurance Activities | $1.14 \%$ | US |
| Dish Dbs Corp | Information And Communication | $1.11 \%$ | US |
| Eqm Midstream Partners L | Transportation and Storage | $1.04 \%$ | US |
| Cdi Escrow Issuer Inc | Arts, Entertainment and Recreation | $1.02 \%$ | US |
| Amn Healthcare Inc | Administrative and Support Service Activities | $1.00 \%$ | US |
| Albertsons Cos/safeway | Wholesale and Retail Trade; Repair of Motor | $1.00 \%$ | US |
| Calpine Construction Finance Co | Electricity, Gas, Steam and Air Conditioning | $0.98 \%$ | US |
| Transdigm Inc | Manufacturing | $0.97 \%$ | US |
| Tallgrass Nrg Prtnr/fin | Transportation and Storage | $0.95 \%$ | US |

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

## Asset allocation

describes the share of investments in specific assets.

## What was the asset allocation?

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $3.81 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $3.11 \%$ |
| Agriculture, Forestry and Fishing | $0.00 \%$ |
| Arts, Entertainment and Recreation | $4.34 \%$ |
| Construction | $2.70 \%$ |
| Education | $0.62 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $2.25 \%$ |
| Financial and Insurance Activities | $6.65 \%$ |
| Human Health And Social Work Activities | $4.73 \%$ |
| Information And Communication | $17.81 \%$ |
| Manufacturing | $23.69 \%$ |
| Mining and Quarrying | $7.88 \%$ |
| Other Service Activities | $0.00 \%$ |
| Professional, Scientific and Technical Activities | $1.07 \%$ |
| Public Administration and Defence; Compulsory Social Security | $0.17 \%$ |
| Real Estate Activities | $4.40 \%$ |
| Transportation and Storage | $10.89 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $0.06 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $4.07 \%$ |
| Cash or data unavailable | $0.75 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy'?

X
Yes, $\qquad$

X In fossilgas
In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.

## - capital

expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure ( OpEx ) reflects the green operational activities of investee companies.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional

 activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.00 \%$ | $0.00 \%$ | $0.03 \%$ |
| Taxonomy-aligned Nuclear | $0.00 \%$ | $0.00 \%$ | $0.01 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.01 \%$ | $0.75 \%$ | $0.83 \%$ |
| Non Taxonomy-aligned | $99.99 \%$ | $99.25 \%$ | $99.13 \%$ |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.00 \%$ | $0.00 \%$ | $0.03 \%$ |
| Taxonomy-aligned Fossil gas | $0.00 \%$ | $0.00 \%$ | $0.01 \%$ |
| Taxonomy-aligned Nuclear | $0.01 \%$ | $0.76 \%$ | $0.84 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $99.99 \%$ | $99.24 \%$ | $99.12 \%$ |
| Non Taxonomy-aligned |  |  |  |

[^19]
## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

| Investments in Transitioning and Enabling Activities |  |
| :---: | :---: |
| Transitional activities | $0.00 \%$ |
| Enabling activities | $0.39 \%$ |

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $0.87 \%$, while the figure for the previous reference period was $2.30 \%$.

sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

|  | 9. Lack of a human rights policy | Share of investments in entities without human rights policies |  | 11.52\% | 9.00\% |  |
|  | 15. Lack of anticorruption and antibribery policies | Share of investments in entities without policies on anti-corruption and anti-bribery consistent with the United Nations Convention against Corruption |  | 0.67\% | 2.00\% |  |

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj . Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.
That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

 indicators measure how the environmental or social characteristics promoted by the financial product are attained.
## Product name:

Legal entity identifier:

549300JBHQVWT2N8U421

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

It made sustainable investments with an environmental objective: _\%

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
$\square$
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: $\qquad$

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $1.72 \%$ of sustainable investments.

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

## How did the sustainability indicators perform?

The sustainability indicators performed as follows:

| The percentage of an individual <br> issuer's revenue which may be <br> derived from specific business <br> activities (e.g., controversial <br> weapons production). | At the end of each of the four quarters in the reference period, this financial <br> product: <br> - |
| :--- | :--- |
| controversial weapons <br> - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from <br> tobacco production |  |
| - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from |  |
| coal mining or coal-related electricity generation, or issuers with up to 30\% of |  |
| coal-related revenues which had not made a public commitment to |  |
| decommission their coal assets by 2025. |  |

Reference index used: ICE BofA BB-B European Currency Non-Financial High Yield Constrained Index
The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.
...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

> The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

> The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

> Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

## Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct involvement in entities which derived more than $10 \%$ of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index. <br> The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor. <br> The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor. |
| :---: | :---: | :---: |
| Carbon footprint | High |  |
| GHG intensity of investee companies | High |  |
| Exposure to activities in the fossil fuel sector | High |  |
| Non-renewable energy consumption and production | Medium |  |
| Energy consumption intensity per high impact climate sector | Low |  |
| Activities negatively affecting biodiversity-sensitive areas | Medium |  |
| Emissions to water | Low |  |
| Hazardous waste ratio | Low |  |

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment <br> Manager's risk team and portfolio managers. |
| :---: | :---: | :--- |
| Policies, processes and compliance <br> mechanisms to monitor <br> compliance with UN Global <br> Compact principles and OECD <br> Guidelines for Multinational <br> Enterprises | High | Medium |

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2022 30/11/2023

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

| Largest investments | Sector |  | \% Assets |
| :--- | :--- | :--- | :---: |
| Country |  |  |  |
| Electricite De France Sa | Electricity, Gas, Steam and Air Conditioning | $1.95 \%$ | FR |
| Teva Pharm Fnc NI Ii | Manufacturing | $1.67 \%$ | IL |
| Virgin Media Bristol LLC | Information And Communication | $1.63 \%$ | US |
| Iliad | Information And Communication | $1.55 \%$ | FR |
| Wintershall Dea Fin 2bv | Mining and Quarrying | $1.49 \%$ | DE |
| Faurecia | Manufacturing | $1.44 \%$ | FR |
| Bayer Ag | Manufacturing | $1.35 \%$ | DE |
| Volkswagen Bank Gmbh | Manufacturing | $1.33 \%$ | DE |
| Telefonica Emisiones Sau | Information And Communication | $1.32 \%$ | ES |
| Rcs \& Rds Sa | Information And Communication | $1.27 \%$ | RO |
| Iho Verwaltungs Gmbh | Manufacturing | $1.27 \%$ | DE |
| Allwyn Entertainment Fin | Arts, Entertainment and Recreation | $1.26 \%$ | GB |
| Rci Banque Sa | Manufacturing | $1.26 \%$ | FR |
| Fce Bank Plc | Manufacturing | $1.25 \%$ | GB |
| Telecom Italia Capital | Information And Communication | $1.17 \%$ | IT |

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

## Asset allocation

describes the share of investments in specific assets.

## What was the asset allocation?

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $1.65 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $5.13 \%$ |
| Agriculture, Forestry and Fishing | $1.05 \%$ |
| Arts, Entertainment and Recreation | $6.50 \%$ |
| Construction | $1.98 \%$ |
| Education | $0.77 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $3.05 \%$ |

| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $3.61 \%$ |
| Cash or data unavailable | $0.48 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy'?

X
Yes, $\qquad$
X
In fossil gas
X
In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.

## - capital

expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure ( OpEx ) reflects the green operational activities of investee companies.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional

 activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.70 \%$ | $1.22 \%$ | $0.49 \%$ |
| Taxonomy-aligned Nuclear | $1.10 \%$ | $1.42 \%$ | $0.63 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.37 \%$ | $0.90 \%$ | $1.07 \%$ |
| Non Taxonomy-aligned | $97.84 \%$ | $96.46 \%$ | $97.81 \%$ |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.72 \%$ | $1.25 \%$ | $0.51 \%$ |
| Taxonomy-aligned Fossil gas | $1.13 \%$ | $1.47 \%$ | $0.65 \%$ |
| Taxonomy-aligned Nuclear | $0.38 \%$ | $0.92 \%$ | $1.10 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $98.40 \%$ | $97.16 \%$ | $98.22 \%$ |
| Non Taxonomy-aligned |  |  |  |

[^20]
## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

| Investments in Transitioning and Enabling Activities |  |
| :---: | :---: |
| Transitional activities | $0.05 \%$ |
| Enabling activities | $0.59 \%$ |

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $1.72 \%$, while the figure for the previous reference period was $1.25 \%$.

sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

## What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are
indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj . Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.
That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product name:
Legal entity identifier:

Muzinich Global High Yield Low Carbon Credit Fund
49300MBBOIKQASDXP90

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

It made sustainable investments with an environmental objective: _\%

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
$\square$
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: $\qquad$

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $\mathbf{2 . 5 0 \%}$ of sustainable investments.

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $40 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

The sustainability indicators performed as follows:

| The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production). | At the end of each of the four quarters in the reference period, this financial product: <br> - Held 0 issuers ( $0 \%$ by weight) involved in the end manufacture of controversial weapons <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from tobacco production <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from the extraction of conventional and non-conventional fossil fuels <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from coal mining or coal-related electricity generation or issuers with up to $30 \%$ of coal-related revenues which had not made a public commitment to decommission their coal assets by 2025. |
| :---: | :---: |
| An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards. | The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee. <br> At the end of each of the four quarters in the reference period, this financial product held 0 issuers (or exposure $0 \%$ by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards. |
| The indicators of Principal Adverse Impact as defined by the SFDR. | The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template. |
| The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities. | The weighted average carbon intensity of this financial product has remained more than $40 \%$ lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below. <br> A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. |
| Limits on ESG scoring and research coverage | At the end of each of the four quarters in the reference period, this financial product: <br> - Held 0 issuers (0\% by weight) with an ESG Risk Rating of 40 or above as specified by the ESG policy <br> - Had a weighted average ESG Risk Rating below 30 as specified by the ESG policy <br> - Maintained a portfolio which when excluding cash holdings, was more than $90 \%$ covered by an independent ESG data provider |

Reference index used: ICE BofA Global High Yield Constrained Index
The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.
...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

> Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse
impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| Policies, processes and compliance <br> mechanisms to monitor <br> compliance with UN Global <br> Compact principles and OECD <br> Guidelines for Multinational <br> Enterprises | High | ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment <br> Manager's risk team and portfolio managers. |
| :---: | :---: | :--- |
| Unadjusted gender pay gap | Medium |  |
| Board gender diversity | Medium | The Investment Manager monitors controversies relating to <br> this PAI and may choose to engage issues which do not provide <br> adequate disclosures, or do manage risks relating to this PAI <br> factor. The reference period represents the first year in which <br> the Investment Manager has formally monitored this PAI and <br> will consider further actions to mitigate it once it has been able <br> to compare different investments over a longer research <br> period. Under some circumstances the Investment Manager <br> may choose to decline an investment opportunity to invest, or <br> to divest from entities which cause severe adverse impacts on <br> this factor. <br> weapons |
| Investments in companies without <br> carbon emission reduction <br> initiatives | Medium |  |

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2022 30/11/2023

| Largest investments | Sector |  | \% Assets |
| :--- | :--- | :---: | :---: |
| Country |  |  |  |
| Us Treasury N/b | Public Administration and Defence; | $3.60 \%$ | US |
| Caesars Entertain Inc | Arts, Entertainment and Recreation | $1.15 \%$ | US |
| Treasury Bill | Public Administration and Defence; | $1.09 \%$ | US |
| Fce Bank Plc | Manufacturing | $1.04 \%$ | GB |
| Electricite De France Sa | Electricity, Gas, Steam and Air Conditioning | $0.90 \%$ | FR |
| Klabin Austria Gmbh | Manufacturing | $0.86 \%$ | BR |
| Ball Corp | Manufacturing | $0.85 \%$ | US |
| Commerzbank Ag | Financial and Insurance Activities | $0.82 \%$ | DE |
| Cco HIdgs Llc/cap Corp | Information And Communication | $0.82 \%$ | US |
| Royal Caribbean Cruises | Transportation and Storage | $0.82 \%$ | US |
| Bayer Ag | Manufacturing | $0.78 \%$ | DE |
| Sba Communications Corp | Real Estate Activities | $0.78 \%$ | US |
| Lottomatica Spa/roma | Arts, Entertainment and Recreation | $0.78 \%$ | IT |
| Carnival Corp | Transportation and Storage | $0.77 \%$ | US |
| Onemain Finance Corp | Financial and Insurance Activities | $0.75 \%$ | US |

## Asset allocation

 describes the share of investments in specific assets.The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

## What was the asset allocation?

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| $\quad$ NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $2.42 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $3.30 \%$ |
| Agriculture, Forestry and Fishing | $0.11 \%$ |
| Arts, Entertainment and Recreation | $7.71 \%$ |
| Construction | $1.98 \%$ |
| Education | $0.36 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $2.56 \%$ |
| Financial and Insurance Activities | $15.42 \%$ |
| Human Health And Social Work Activities | $1.85 \%$ |
| Information And Communication | $15.88 \%$ |
| Manufacturing | $22.42 \%$ |
| Mining and Quarrying | $0.17 \%$ |
| Other Service Activities | $1.01 \%$ |
| Professional, Scientific and Technical Activities | $1.28 \%$ |
| Public Administration and Defence; Compulsory Social Security | $4.69 \%$ |
| Real Estate Activities | $5.45 \%$ |
| Transportation and Storage | $5.84 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $0.00 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $4.18 \%$ |
| Cash or data unavailable | $0.66 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?

X
Yes, $\qquad$ $\mathbf{X}$ In fossil gas X In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.
- capital
expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

## - operational

 expenditure (OpEx) reflects the green operational activities of investee companies.
## Enabling activities

 directly enable other activities to make a substantial contribution to an environmental objective.
## Transitional

activities are activities for which low-carbon alternatives are not

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.28 \%$ | $0.36 \%$ | $0.22 \%$ |
| Taxonomy-aligned Fossil gas | $0.28 \%$ | $0.36 \%$ | $0.22 \%$ |
| Taxonomy-aligned Nuclear | $0.13 \%$ | $1.33 \%$ | $2.28 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $99.31 \%$ | $97.95 \%$ | $97.29 \%$ |
| Non Taxonomy-aligned |  |  |  |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.30 \%$ | $0.39 \%$ | $0.23 \%$ |
| Taxonomy-aligned Fossil gas | $0.30 \%$ | $0.39 \%$ | $0.23 \%$ |
| Taxonomy-aligned Nuclear | $0.14 \%$ | $1.44 \%$ | $2.47 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $99.56 \%$ | $98.17 \%$ | $97.30 \%$ |
| Non Taxonomy-aligned |  |  |  |

yet available and among others have greenhouse gas emissions levels corresponding to the best performance.

sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.
${ }^{1}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegate Regulation (EU) 2022/1214.

## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

| Investments in Transitioning and Enabling Activities |  |
| :---: | :---: |
| Transitional activities | $0.00 \%$ |
| Enabling activities | $0.83 \%$ |

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $2.50 \%$, while the figure for the previous reference period was 3.04\%.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

|  | 15. Lack of anticorruption and antibribery policies | Share of investments in entities without policies on anti-corruption and anti-bribery consistent with the United Nations Convention against Corruption |  | 1.95\% | 1.00\% |  |

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj . Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.
That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product name:
Legal entity identifier:

Muzinich Enhancedyield Short-Term Fund
549300T0Z7X48JW8L065

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

It made sustainable investments with an environmental objective: _\%

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
$\square$
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: $\qquad$

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $\mathbf{3 . 2 2 \%}$ of sustainable investments.

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective

It promoted $\mathrm{E} / \mathrm{S}$ characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

The sustainability indicators performed as follows:

| The percentage of an individual <br> issuer's revenue which may be <br> derived from specific business <br> activities (e.g., controversial <br> weapons production). | At the end of each of the four quarters in the reference period, this financial <br> product: <br> - Held 0 issuers (0\% by weight) involved in the end manufacture of <br> controversial weapons <br> - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from <br> tobacco production <br> - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from <br> coal mining or coal-related electricity generation, or issuers with up to 30\% of <br> coal-related revenues which had not made a public commitment to |
| :--- | :--- |
| decommission their coal assets bv 2025. |  |

Reference index used
Custom: 60\%ICE BofA 1-3 Year Global Corporate Index, 40\% ICE BofA 1-3 Year BB-B Global High Yield Non-Financial Constrained Index

The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'. <br> ...and compared to previous periods?}

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse
impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.
$\left.\begin{array}{|c|c|c|}\hline \text { GHG emissions } & \text { High } & \begin{array}{l}\text { High } \begin{array}{c}\text { This Financial Product excluded issuers with direct } \\ \text { involvement in entities which derived more than 10\% of their } \\ \text { annual revenues from the mining or extraction of thermal coal } \\ \text { and/or the production of energy from thermal coal, subject to } \\ \text { an allowance for entities which the Investment Manager } \\ \text { deemed to have a credible transition plan to reduce their } \\ \text { reliance or exposure to thermal coal in favour of less carbon } \\ \text { intensive forms of energy such as renewable energy. } \\ \text { 2) The Investment Manager has maintained a WACI target } \\ \text { in order to reduce this financial product's overall carbon } \\ \text { intensity relative to a chosen reference index. }\end{array} \\ \hline \text { GHG intensity of investee } \\ \text { companies }\end{array} \\ \hline \begin{array}{c}\text { High }\end{array} \\ \hline \begin{array}{c}\text { Exposure to activities in the fossil } \\ \text { fuel sector }\end{array} & \text { High } \begin{array}{c}\text { Non-renewable energy } \\ \text { consumption and production }\end{array} & \text { Medium }\end{array} \begin{array}{l}\text { The Investment Manager monitored these PAI via monthly } \\ \text { portfolio carbon reports which include energy mixes of } \\ \text { portfolio companies and is linked to this financial product's } \\ \text { carbon efficiency target. | Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment <br> Manager's risk team and portfolio managers. |
| :---: | :---: | :--- |
| Policies, processes and compliance <br> mechanisms to monitor <br> compliance with UN Global <br> Compact principles and OECD <br> Guidelines for Multinational <br> Enterprises | High | Medium |

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2022 30/11/2023

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

| Largest investments | Sector | \% Assets | Country |
| :--- | :--- | :--- | :--- |
| Credit Suisse Ag | Financial and Insurance Activities | $1.21 \%$ | CH |
| Rci Banque Sa | Manufacturing | $1.16 \%$ | FR |
| Aercap Ireland Cap/globa | Financial and Insurance Activities | $1.16 \%$ | IE |
| Avolon Holdings Fndg Ltd | Financial and Insurance Activities | $1.11 \%$ | IE |
| Unicredit Spa | Financial and Insurance Activities | $1.09 \%$ | IT |
| Aircastle Ltd | Financial and Insurance Activities | $1.09 \%$ | US |
| Aib Group Plc | Financial and Insurance Activities | $1.08 \%$ | IE |
| Dae Funding Llc | Financial and Insurance Activities | $1.03 \%$ | AE |
| Ing Groep Nv | Financial and Insurance Activities | $1.03 \%$ | NL |
| Danske Bank A/s | Financial and Insurance Activities | $1.00 \%$ | DK |
| Rec Limited | Financial and Insurance Activities | $1.00 \%$ | IN |
| Deutsche Bank Ag | Financial and Insurance Activities | $0.99 \%$ | DE |
| Barclays Plc | Financial and Insurance Activities | $0.95 \%$ | GB |
| Intesa Sanpaolo Spa | Financial and Insurance Activities | $0.94 \%$ | IT |
| Caixabank Sa | Financial and Insurance Activities | $0.93 \%$ | ES |

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

## What was the asset allocation?

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

## In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $1.39 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.47 \%$ |
| Administrative and Support Service Activities | $2.49 \%$ |
| Agriculture, Forestry and Fishing | $0.00 \%$ |
| Arts, Entertainment and Recreation | $0.78 \%$ |
| Construction | $0.97 \%$ |
| Education | $0.05 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $1.36 \%$ |
| Financial and Insurance Activities | $43.34 \%$ |
| Human Health And Social Work Activities | $0.34 \%$ |
| Information And Communication | $8.70 \%$ |
| Manufacturing | $18.27 \%$ |
| Mining and Quarrying | $1.95 \%$ |
| Other Service Activities | $0.37 \%$ |
| Professional, Scientific and Technical Activities | $0.43 \%$ |
| Public Administration and Defence; Compulsory Social Security | $0.00 \%$ |
| Real Estate Activities | $6.22 \%$ |
| Transportation and Storage | $7.44 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $0.14 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $2.23 \%$ |
| Cash or data unavailable | $0.60 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?

X
Yes, $\qquad$ $\mathbf{X}$ In fossil gas X In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.
- capital
expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

## - operational

 expenditure (OpEx) reflects the green operational activities of investee companies.
## Enabling activities

 directly enable other activities to make a substantial contribution to an environmental objective.
## Transitional

activities are activities for which low-carbon alternatives are not

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.03 \%$ | $0.16 \%$ | $0.14 \%$ |
| Taxonomy-aligned Fossil gas | $0.14 \%$ | $0.23 \%$ | $0.10 \%$ |
| Taxonomy-aligned Nuclear | $0.67 \%$ | $2.52 \%$ | $2.99 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $99.16 \%$ | $97.09 \%$ | $96.78 \%$ |
| Non Taxonomy-aligned |  |  |  |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.04 \%$ | $0.16 \%$ | $0.15 \%$ |
| Taxonomy-aligned Nuclear | $0.14 \%$ | $0.23 \%$ | $0.10 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.69 \%$ | $2.58 \%$ | $3.06 \%$ |
| Non Taxonomy-aligned | $99.13 \%$ | $97.02 \%$ | $96.69 \%$ |

yet available and among others have greenhouse gas emissions levels corresponding to the best performance.

sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.
${ }^{1}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegate Regulation (EU) 2022/1214.

## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

| Investments in Transitioning and Enabling Activities |  |
| :---: | :---: |
| Transitional activities | $0.04 \%$ |
| Enabling activities | $0.84 \%$ |

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $3.22 \%$, while the figure for the previous reference period was 1.96\%.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference
benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj . Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.
That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

 indicators measure how the environmental or social characteristics promoted by the financial product are attained.
## Product name:

Legal entity identifier:

Muzinich ShortDurationHighYield Fund
549300JY3OQ0XVIAWY52

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

It made sustainable investments with an environmental objective: _\%

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
$\square$
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: $\qquad$

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $0.63 \%$ of sustainable investments.

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

## How did the sustainability indicators perform?

The sustainability indicators performed as follows:

| The percentage of an individual <br> issuer's revenue which may be <br> derived from specific business <br> activities (e.g., controversial <br> weapons production). | At the end of each of the four quarters in the reference period, this financial <br> product: <br> - |
| :--- | :--- |
| controversial weapons <br> - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from <br> tobacco production |  |
| - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from |  |
| coal mining or coal-related electricity generation, or issuers with up to 30\% of |  |
| coal-related revenues which had not made a public commitment to |  |
| decommission their coal assets by 2025. |  |

Reference index used: ICE BofA BB-B US Non-Financial Cash Pay High Yield Constrained Index
The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.

## ...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

> The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

> The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

> Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

## Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct involvement in entities which derived more than $10 \%$ of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index. <br> The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor. <br> The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor. |
| :---: | :---: | :---: |
| Carbon footprint | High |  |
| GHG intensity of investee companies | High |  |
| Exposure to activities in the fossil fuel sector | High |  |
| Non-renewable energy consumption and production | Medium |  |
| Energy consumption intensity per high impact climate sector | Low |  |
| Activities negatively affecting biodiversity-sensitive areas | Medium |  |
| Emissions to water | Low |  |
| Hazardous waste ratio | Low |  |

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment <br> Manager's risk team and portfolio managers. |
| :---: | :---: | :--- |
| Policies, processes and compliance <br> mechanisms to monitor <br> compliance with UN Global <br> Compact principles and OECD <br> Guidelines for Multinational <br> Enterprises | High | Medium |

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2022 30/11/2023

| Largest investments | Sector |  | \% Assets |
| :--- | :--- | :---: | :---: |
| Country |  |  |  |
| American Airlines Inc | Transportation and Storage | $1.98 \%$ | US |

| Ardagh Pkg Fin/hldgs Usa | Manufacturing | $1.06 \%$ | US |

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

## Asset allocation

describes the share of investments in specific assets.

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

## What was the asset allocation?

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $3.40 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $3.66 \%$ |
| Agriculture, Forestry and Fishing | $0.00 \%$ |
| Arts, Entertainment and Recreation | $6.94 \%$ |
| Construction | $0.56 \%$ |
| Education | $0.82 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $0.84 \%$ |
| Financial and Insurance Activities | $8.03 \%$ |
| Human Health And Social Work Activities | $5.17 \%$ |
| Information And Communication | $14.64 \%$ |
| Manufacturing | $23.40 \%$ |
| Mining and Quarrying | $7.75 \%$ |
| Other Service Activities | $0.00 \%$ |
| Professional, Scientific and Technical Activities | $0.17 \%$ |
| Public Administration and Defence; Compulsory Social Security | $0.11 \%$ |
| Real Estate Activities | $5.50 \%$ |
| Transportation and Storage | $11.94 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $1.21 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $3.29 \%$ |
| Cash or data unavailable | $1.03 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy'?

X
Yes, $\qquad$
X
In fossil gas
X
In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.

## - capital

expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure ( OpEx ) reflects the green operational activities of investee companies.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional

 activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.00 \%$ | $0.43 \%$ | $0.46 \%$ |
| Taxonomy-aligned Nuclear | $0.00 \%$ | $0.00 \%$ | $0.00 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.00 \%$ | $0.05 \%$ | $0.16 \%$ |
| Non Taxonomy-aligned | $100.00 \%$ | $99.53 \%$ | $99.37 \%$ |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.00 \%$ | $0.43 \%$ | $0.47 \%$ |
| Taxonomy-aligned Fossil gas | $0.00 \%$ | $0.00 \%$ | $0.00 \%$ |
| Taxonomy-aligned Nuclear | $0.00 \%$ | $0.05 \%$ | $0.16 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $100.00 \%$ | $99.52 \%$ | $99.36 \%$ |
| Non Taxonomy-aligned |  |  |  |

[^21]
## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $0.63 \%$, while the figure for the previous reference period was $0.54 \%$.
sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

## What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

## Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

The sustainability indicators performed as follows:

| The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production). | At the end of each of the four quarters in the reference period, this financial product: <br> - Held 0 issuers ( $0 \%$ by weight) involved in the end manufacture of controversial weapons <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $5 \%$ of revenues from production of alcoholic beverages <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $5 \%$ of revenues from production or distribution of adult entertainment <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $5 \%$ of revenues from production of fur or specialty leather products <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $5 \%$ of revenues from the provision of commercial gambling services <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $5 \%$ of revenues from military contracting <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $5 \%$ of revenues from the production of nuclear power or related services <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $5 \%$ of revenues from the extraction of non-conventional forms of oil or gas <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $0 \%$ of revenues from tobacco production <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from coal mining or coal-related electricity generation <br> - Held 0 issuers ( $0 \%$ by weight) listed on the Norges Bank Investment |
| :---: | :---: |
| An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards. | The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee. <br> At the end of each of the four quarters in the reference period, this financial product held 0 issuers (or exposure $0 \%$ by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards. |
| The indicators of Principal Adverse Impact as defined by the SFDR. | The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template. |
| The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities. | The weighted average carbon intensity of this financial product has remained more than $10 \%$ lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below. <br> A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. |
| The percentile rank of an issuers ESG score relative to industry peers | This investment product held 1 issuer ( $0.15 \%$ by weight) which did not which are deemed by an independent ESG data provider to rank, relative to a sector peer group, as below the median sector score. |

[^22]The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.
...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

> Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse
impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct involvement in entities which derived more than $10 \%$ of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index. <br> The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor. <br> The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor. |
| :---: | :---: | :---: |
| Carbon footprint | High |  |
| GHG intensity of investee companies | High |  |
| Exposure to activities in the fossil fuel sector | High |  |
| Non-renewable energy consumption and production | Medium |  |
| Energy consumption intensity per high impact climate sector | Low |  |
| Activities negatively affecting biodiversity-sensitive areas | Medium |  |
| Emissions to water | Low |  |
| Hazardous waste ratio | Low |  |

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment <br> Manager's risk team and portfolio managers. |

| Advance Auto Parts | Wholesale and Retail Trade; Repair of Motor | $0.89 \%$ | US |

## Asset allocation

describes the share of investments in specific assets.

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

## What was the asset allocation?

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

## In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $1.42 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $1.64 \%$ |
| Agriculture, Forestry and Fishing | $0.00 \%$ |
| Arts, Entertainment and Recreation | $0.00 \%$ |
| Construction | $3.15 \%$ |
| Education | $0.00 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $2.91 \%$ |
| Financial and Insurance Activities | $35.97 \%$ |
| Human Health And Social Work Activities | $0.26 \%$ |
| Information And Communication | $10.16 \%$ |
| Manufacturing | $20.14 \%$ |
| Mining and Quarrying | $0.76 \%$ |
| Other Service Activities | $0.03 \%$ |
| Professional, Scientific and Technical Activities | $0.63 \%$ |
| Public Administration and Defence; Compulsory Social Security | $0.00 \%$ |
| Real Estate Activities | $9.30 \%$ |
| Transportation and Storage | $3.97 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $1.09 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $6.79 \%$ |
| Cash or data unavailable | $0.29 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy'?

X
Yes, $\qquad$
X
In fossil gas
X
In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.

## - capital

expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure ( OpEx ) reflects the green operational activities of investee companies.

## Enabling activities

 directly enable other activities to make a substantial contribution to an environmental objective.
## Transitional

activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.04 \%$ | $0.12 \%$ | $0.01 \%$ |
| Taxonomy-aligned Nuclear | $0.84 \%$ | $1.12 \%$ | $0.50 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $1.03 \%$ | $4.42 \%$ | $5.21 \%$ |
| Non Taxonomy-aligned | $98.08 \%$ | $94.34 \%$ | $94.28 \%$ |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.04 \%$ | $0.12 \%$ | $0.01 \%$ |
| Taxonomy-aligned Fossil gas | $0.85 \%$ | $1.14 \%$ | $0.51 \%$ |
| Taxonomy-aligned Nuclear | $1.05 \%$ | $4.48 \%$ | $5.28 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $98.06 \%$ | $94.26 \%$ | $94.19 \%$ |
| Non Taxonomy-aligned |  |  |  |

[^23]
## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

| Investments in Transitioning and Enabling Activities |  |
| :---: | :---: |
| Transitional activities | $0.00 \%$ |
| Enabling activities | $0.90 \%$ |

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $5.72 \%$, while the figure for the previous reference period was 6.76\%. sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

PAI Report
Principal adverse sustainability impacts statement

| Adverse Sustainability Indicator |  | Metric | Units | This | Previous | Actions taken |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\begin{aligned} & \frac{n}{c} \\ & \cdot \frac{0}{n} \\ & \cdot \underline{n} \\ & \frac{1}{0} \\ & n \\ & 0 \\ & 0 \\ & 0 \\ & 0 \\ & 0 \\ & \end{aligned}$ | 1. GHG emissions | Scope 1 GHG emissions | tCO2e | 61,138 | 6,826 | This financial product applies a carbon efficiency target whereby the Investment Manager seeks to maintain a weighted average carbon intensity (WACI) at least $10 \%$ lower than that of the relevant reference index. Further information is available in the relevant precontractual disclosures. |
|  |  | Scope 2 GHG emissions |  | 6,867 | 2,241 |  |
|  |  | Scope 3 GHG emissions |  | 68,006 | 64,012 |  |

Investments in companies without carbon emission reduction initiatives | Share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement | percent | 32.02\% | 39.00\% |  |
| Additional social and employee, respect for human rights, anti-corruption and anti-bribery matters indicators |  |  |  |  |  |  |
|  | 6. Insufficient whistleblower protection | Share of investments in entities without policies on the protection of whistleblowers | percent | 0.20\% | 3.00\% |  |
|  | 9. Lack of a human rights policy | Share of investments in entities without human rights policies |  | 6.35\% | 10.00\% |  |
|  | 15. Lack of anticorruption and antibribery policies | Share of investments in entities without policies on anti-corruption and anti-bribery consistent with the United Nations Convention against Corruption |  | 0.49\% | 4.00\% |  |

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj . Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.
That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

 indicators measure how the environmental or social characteristics promoted by the financial product are attained.
## Product name:

Legal entity identifier:

## Muzinich LongShortCreditYield Fund

549300T036TR20Y6DW57

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

It made sustainable investments with an environmental objective: _\%

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
$\square$
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: $\qquad$

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $0.46 \%$ of sustainable investments.

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective

It promoted $\mathrm{E} / \mathrm{S}$ characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

## How did the sustainability indicators perform?

The sustainability indicators performed as follows:

| The percentage of an individual <br> issuer's revenue which may be <br> derived from specific business <br> activities (e.g., controversial <br> weapons production). | At the end of each of the four quarters in the reference period, this financial <br> product: <br> - |
| :--- | :--- |
| controversial weapons <br> - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from <br> tobacco production |  |
| - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from |  |
| coal mining or coal-related electricity generation, or issuers with up to 30\% of |  |
| coal-related revenues which had not made a public commitment to |  |
| decommission their coal assets by 2025. |  |

Reference index used: ICE BofA US Cash Pay High Yield Index
The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'. <br> ...and compared to previous periods?}

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

> The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

> The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

> Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

## Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct involvement in entities which derived more than $10 \%$ of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index. <br> The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor. <br> The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor. |
| :---: | :---: | :---: |
| Carbon footprint | High |  |
| GHG intensity of investee companies | High |  |
| Exposure to activities in the fossil fuel sector | High |  |
| Non-renewable energy consumption and production | Medium |  |
| Energy consumption intensity per high impact climate sector | Low |  |
| Activities negatively affecting biodiversity-sensitive areas | Medium |  |
| Emissions to water | Low |  |
| Hazardous waste ratio | Low |  |

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment <br> Manager's risk team and portfolio managers. |

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

## Asset allocation

describes the share of investments in specific assets.

## What was the asset allocation?

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $3.75 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $1.55 \%$ |
| Agriculture, Forestry and Fishing | $0.00 \%$ |
| Arts, Entertainment and Recreation | $5.04 \%$ |
| Construction | $1.69 \%$ |
| Education | $0.03 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $3.06 \%$ |
| Financial and Insurance Activities | $11.72 \%$ |
| Human Health And Social Work Activities | $4.25 \%$ |
| Information And Communication | $10.57 \%$ |
| Manufacturing | $22.69 \%$ |
| Mining and Quarrying | $7.74 \%$ |
| Other Service Activities | $0.00 \%$ |
| Professional, Scientific and Technical Activities | $0.50 \%$ |
| Public Administration and Defence; Compulsory Social Security | $1.62 \%$ |
| Real Estate Activities | $4.40 \%$ |
| Transportation and Storage | $9.45 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $1.01 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $4.70 \%$ |
| Cash or data unavailable | $1.76 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy'?

X
Yes, $\qquad$
X
In fossil gas
X
In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.

## - capital

expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure ( OpEx ) reflects the green operational activities of investee companies.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional

 activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.00 \%$ | $0.08 \%$ | $0.06 \%$ |
| Taxonomy-aligned Nuclear | $0.00 \%$ | $0.08 \%$ | $0.04 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.01 \%$ | $0.34 \%$ | $0.38 \%$ |
| Non Taxonomy-aligned | $99.99 \%$ | $99.50 \%$ | $99.52 \%$ |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.00 \%$ | $0.09 \%$ | $0.07 \%$ |
| Taxonomy-aligned Fossil gas | $0.00 \%$ | $0.08 \%$ | $0.04 \%$ |
| Taxonomy-aligned Nuclear | $0.01 \%$ | $0.37 \%$ | $0.40 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $99.99 \%$ | $99.55 \%$ | $99.51 \%$ |
| Non Taxonomy-aligned |  |  |  |

[^24]
## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $0.46 \%$, while the figure for the previous reference period was $0.75 \%$.
sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

## What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj . Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.
That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

 indicators measure how the environmental or social characteristics promoted by the financial product are attained.Product name:
Legal entity identifier:

Muzinich EmergingMarketsShortDuration Fund
549300ND8K253GYQK585

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

It made sustainable investments with an environmental objective: _\%

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
$\square$
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: $\qquad$

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $3.78 \%$ of sustainable investments.

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

## How did the sustainability indicators perform?

The sustainability indicators performed as follows:

| The percentage of an individual <br> issuer's revenue which may be <br> derived from specific business <br> activities (e.g., controversial <br> weapons production). | At the end of each of the four quarters in the reference period, this financial <br> product: <br> - |
| :--- | :--- |
| controversial weapons <br> - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from <br> tobacco production |  |
| - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from |  |
| coal mining or coal-related electricity generation, or issuers with up to 30\% of |  |
| coal-related revenues which had not made a public commitment to |  |
| decommission their coal assets by 2025. |  |

Reference index used: ICE BofA ML Custom Emerging Markets Short Duration Index
The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.
....and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

#### Abstract

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

## Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct involvement in entities which derived more than $10 \%$ of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index. <br> The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor. <br> The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor. |
| :---: | :---: | :---: |
| Carbon footprint | High |  |
| GHG intensity of investee companies | High |  |
| Exposure to activities in the fossil fuel sector | High |  |
| Non-renewable energy consumption and production | Medium |  |
| Energy consumption intensity per high impact climate sector | Low |  |
| Activities negatively affecting biodiversity-sensitive areas | Medium |  |
| Emissions to water | Low |  |
| Hazardous waste ratio | Low |  |

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment <br> Manager's risk team and portfolio managers. |

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

## Asset allocation

describes the share of investments in specific assets.

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

## What was the asset allocation?

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $2.90 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $0.80 \%$ |
| Agriculture, Forestry and Fishing | $0.00 \%$ |
| Arts, Entertainment and Recreation | $1.48 \%$ |
| Construction | $2.79 \%$ |
| Education | $1.80 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $4.59 \%$ |
| Financial and Insurance Activities | $22.52 \%$ |
| Human Health And Social Work Activities | $0.00 \%$ |
| Information And Communication | $8.45 \%$ |
| Manufacturing | $25.65 \%$ |
| Mining and Quarrying | $8.25 \%$ |
| Other Service Activities | $0.00 \%$ |
| Professional, Scientific and Technical Activities | $1.19 \%$ |
| Public Administration and Defence; Compulsory Social Security | $1.38 \%$ |
| Real Estate Activities | $6.23 \%$ |
| Transportation and Storage | $6.85 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $0.00 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $3.44 \%$ |
| Cash or data unavailable | $0.24 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy'?

X
Yes, $\qquad$
X
In fossil gas
X
In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.

## - capital

expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure ( OpEx ) reflects the green operational activities of investee companies.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional

 activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.00 \%$ | $0.01 \%$ | $0.02 \%$ |
| Taxonomy-aligned Nuclear | $0.00 \%$ | $0.00 \%$ | $0.00 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.00 \%$ | $2.63 \%$ | $3.77 \%$ |
| Non Taxonomy-aligned | $100.00 \%$ | $97.36 \%$ | $96.22 \%$ |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.00 \%$ | $0.01 \%$ | $0.02 \%$ |
| Taxonomy-aligned Fossil gas | $0.00 \%$ | $0.00 \%$ | $0.00 \%$ |
| Taxonomy-aligned Nuclear | $0.00 \%$ | $2.71 \%$ | $3.87 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $100.00 \%$ | $97.28 \%$ | $96.11 \%$ |
| Non Taxonomy-aligned |  |  |  |

[^25]What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $3.78 \%$, while the figure for the previous reference period was $3.84 \%$.
sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

## What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

| PAl Report |  |  |  |  |  |  |

|  | 15. Lack of anticorruption and antibribery policies | Share of investments in entities without policies on anti-corruption and anti-bribery consistent with the United Nations Convention against Corruption |  | 7.32\% | 2.00\% |  |

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj . Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.
That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

 indicators measure how the environmental or social characteristics promoted by the financial product are attained.
## Product name:

Legal entity identifier:

Muzinich Global Tactical Credit Fund
549300914IEWVSQ6QI72

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

It made sustainable investments with an environmental objective: _\%

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
$\square$
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: $\qquad$

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $\mathbf{2 . 9 5 \%}$ of sustainable investments.

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

## How did the sustainability indicators perform?

The sustainability indicators performed as follows:

| The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production). | At the end of each of the four quarters in the reference period, this financial product: <br> - Held 0 issuers ( $0 \%$ by weight) involved in the end manufacture of controversial weapons <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from gambling operations <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from adult entertainment <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from tobacco production <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from coal mining or coal-related electricity generation |
| :---: | :---: |
| An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards. | The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee. <br> At the end of each of the four quarters in the reference period, this financial product held 0 issuers (or exposure $0 \%$ by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards. |
| The indicators of Principal Adverse Impact as defined by the SFDR. | The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template. |
| The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities. | The weighted average carbon intensity of this financial product has remained more than $10 \%$ lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below. <br> A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. |

Reference index used: ICE BofA Global Corporate \& High Yield Index
The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'. <br> ...and compared to previous periods?}

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

> The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

> The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

> Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

## Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct involvement in entities which derived more than $10 \%$ of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index. <br> The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor. <br> The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor. |
| :---: | :---: | :---: |
| Carbon footprint | High |  |
| GHG intensity of investee companies | High |  |
| Exposure to activities in the fossil fuel sector | High |  |
| Non-renewable energy consumption and production | Medium |  |
| Energy consumption intensity per high impact climate sector | Low |  |
| Activities negatively affecting biodiversity-sensitive areas | Medium |  |
| Emissions to water | Low |  |
| Hazardous waste ratio | Low |  |

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment <br> Manager's risk team and portfolio managers. |
| :---: | :---: | :--- |
| Policies, processes and compliance <br> mechanisms to monitor <br> compliance with UN Global <br> Compact principles and OECD <br> Guidelines for Multinational <br> Enterprises | High | Medium |

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2022 30/11/2023

| Largest investments | Sector |  | \% Assets |

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

## Asset allocation

describes the share of investments in specific assets.

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

## What was the asset allocation?

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $3.32 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $1.74 \%$ |
| Agriculture, Forestry and Fishing | $0.00 \%$ |
| Arts, Entertainment and Recreation | $0.00 \%$ |
| Construction | $0.91 \%$ |
| Education | $0.00 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $2.29 \%$ |
| Financial and Insurance Activities | $14.48 \%$ |
| Human Health And Social Work Activities | $1.90 \%$ |
| Information And Communication | $8.20 \%$ |
| Manufacturing | $26.94 \%$ |
| Mining and Quarrying | $1.94 \%$ |
| Other Service Activities | $0.32 \%$ |
| Professional, Scientific and Technical Activities | $0.88 \%$ |
| Public Administration and Defence; Compulsory Social Security | $16.16 \%$ |
| Real Estate Activities | $4.37 \%$ |
| Transportation and Storage | $8.47 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $0.64 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $5.46 \%$ |
| Cash or data unavailable | $0.43 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy'?

X
Yes, $\qquad$
X
In fossil gas
X
In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.

## - capital

expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure ( OpEx ) reflects the green operational activities of investee companies.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional

 activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |

| Non Taxonomy-aligned |  |  |  |

[^26]
## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $2.95 \%$, while the figure for the previous reference period was $1.12 \%$.

sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

## What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj . Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.
That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

 indicators measure how the environmental or social characteristics promoted by the financial product are attained.
## Product name:

Legal entity identifier:

5493002D54TFNT7E2J18

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

It made sustainable investments with an environmental objective: _\%

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: $\qquad$

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $\mathbf{4 . 3 5 \%}$ of sustainable investments.

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective

It promoted $\mathrm{E} / \mathrm{S}$ characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

## How did the sustainability indicators perform?

The sustainability indicators performed as follows:

| The percentage of an individual <br> issuer's revenue which may be <br> derived from specific business <br> activities (e.g., controversial <br> weapons production). | At the end of each of the four quarters in the reference period, this financial <br> product: <br> - |
| :--- | :--- |
| controversial weapons <br> - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from <br> tobacco production |  |
| - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from |  |
| coal mining or coal-related electricity generation, or issuers with up to 30\% of |  |
| coal-related revenues which had not made a public commitment to |  |
| decommission their coal assets by 2025. |  |

Portfolio weighted average carbon intensity versus reference index

Reference index used: ICE BofA Asian Dollar Index
The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'. <br> ...and compared to previous periods?}

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

> The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

> The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

> Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

## Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct involvement in entities which derived more than $10 \%$ of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index. <br> The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor. <br> The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor. |
| :---: | :---: | :---: |
| Carbon footprint | High |  |
| GHG intensity of investee companies | High |  |
| Exposure to activities in the fossil fuel sector | High |  |
| Non-renewable energy consumption and production | Medium |  |
| Energy consumption intensity per high impact climate sector | Low |  |
| Activities negatively affecting biodiversity-sensitive areas | Medium |  |
| Emissions to water | Low |  |
| Hazardous waste ratio | Low |  |

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment <br> Manager's risk team and portfolio managers. |
| :---: | :---: | :--- |
| Policies, processes and compliance <br> mechanisms to monitor <br> compliance with UN Global <br> Compact principles and OECD <br> Guidelines for Multinational <br> Enterprises | High | Medium |

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2022 30/11/2023

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

## Asset allocation

describes the share of investments in specific assets.

| Largest investments | Sector | \% Assets | Country |
| :--- | :--- | :--- | :--- |
| Cathay Pac Mtn Fin Hk | Transportation and Storage | $2.42 \%$ | HK |
| China Cinda 2020 I Mngmn | Financial and Insurance Activities | $2.35 \%$ | CN |
| Bank Of East Asia Ltd | Financial and Insurance Activities | $2.01 \%$ | HK |
| Star Energy Co Issue | Electricity, Gas, Steam and Air Conditioning | $1.98 \%$ | ID |
| Fortune Star Bvi Ltd | Accommodation and Food Service Activities | $1.96 \%$ | CN |
| Upl Corp Ltd | Manufacturing | $1.94 \%$ | IN |
| Prosus Nv | Information And Communication | $1.92 \%$ | CN |
| Meituan | Information And Communication | $1.88 \%$ | CN |
| Huarong Finance 2017 Co | Financial and Insurance Activities | $1.85 \%$ | CN |
| Enn Clean Energy | Electricity, Gas, Steam and Air Conditioning | $1.77 \%$ | CN |
| Hyundai Assan Otomotiv | Manufacturing | $1.77 \%$ | KR |
| Kookmin Bank | Financial and Insurance Activities | $1.67 \%$ | KR |
| Dah Sing Bank Ltd | Financial and Insurance Activities | $1.65 \%$ | HK |
| Airport Authority Hk | Transportation and Storage | $1.57 \%$ | HK |
| Rec Limited | Financial and Insurance Activities | $1.53 \%$ | IN |

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

## What was the asset allocation?

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $4.53 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $0.00 \%$ |
| Agriculture, Forestry and Fishing | $0.00 \%$ |
| Arts, Entertainment and Recreation | $4.85 \%$ |
| Construction | $1.46 \%$ |
| Education | $0.00 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $9.14 \%$ |
| Financial and Insurance Activities | $26.64 \%$ |
| Human Health And Social Work Activities | $0.00 \%$ |
| Information And Communication | $8.11 \%$ |
| Manufacturing | $20.23 \%$ |
| Mining and Quarrying | $1.25 \%$ |
| Other Service Activities | $0.00 \%$ |
| Professional, Scientific and Technical Activities | $0.00 \%$ |
| Public Administration and Defence; Compulsory Social Security | $1.41 \%$ |
| Real Estate Activities | $6.50 \%$ |
| Transportation and Storage | $10.00 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $0.00 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $1.59 \%$ |
| Cash or data unavailable | $0.62 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy'?

X
Yes, $\qquad$
X
In fossil gas
X
In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.

## - capital

expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure ( OpEx ) reflects the green operational activities of investee companies.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional

 activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.00 \%$ | $0.05 \%$ | $0.03 \%$ |
| Taxonomy-aligned Nuclear | $0.00 \%$ | $0.00 \%$ | $0.00 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.28 \%$ | $2.54 \%$ | $4.31 \%$ |
| Non Taxonomy-aligned | $99.72 \%$ | $97.41 \%$ | $95.65 \%$ |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.00 \%$ | $0.06 \%$ | $0.04 \%$ |
| Taxonomy-aligned Fossil gas | $0.00 \%$ | $0.00 \%$ | $0.00 \%$ |
| Taxonomy-aligned Nuclear | $0.30 \%$ | $2.72 \%$ | $4.62 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $99.70 \%$ | $97.22 \%$ | $95.34 \%$ |
| Non Taxonomy-aligned |  |  |  |

[^27]
## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $4.35 \%$, while the figure for the previous reference period was 7.70\%.
sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

# How did this financial product perform compared to the reference benchmark? 

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

| ¢ | 14. Exposure to controversial weapons | Share of investments in investee companies involved in the manufacture or selling of controversial weapons (antipersonnel mines, cluster munitions, chemical and biological weapons) |  | 0.00\% | 0.00\% | This financial product applies a zero tolerance policy to companies involved in the production of controversial weapons. Further information is available in the relevant precontractual disclosures. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| controversial weapons <br> - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from <br> tobacco production |  |
| - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from |  |
| coal mining or coal-related electricity generation, or issuers with up to 30\% of |  |
| coal-related revenues which had not made a public commitment to |  |
| decommission their coal assets by 2025. |  |

Reference index used: ICE BofA US Emerging Markets Liquid Corporate Plus Index
The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.

## ...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

## Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct involvement in entities which derived more than $10 \%$ of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index. <br> The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor. <br> The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor. |
| :---: | :---: | :---: |
| Carbon footprint | High |  |
| GHG intensity of investee companies | High |  |
| Exposure to activities in the fossil fuel sector | High |  |
| Non-renewable energy consumption and production | Medium |  |
| Energy consumption intensity per high impact climate sector | Low |  |
| Activities negatively affecting biodiversity-sensitive areas | Medium |  |
| Emissions to water | Low |  |
| Hazardous waste ratio | Low |  |

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment <br> Manager's risk team and portfolio managers. |
| :---: | :---: | :--- |
| Policies, processes and compliance <br> mechanisms to monitor <br> compliance with UN Global <br> Compact principles and OECD <br> Guidelines for Multinational <br> Enterprises | High | Medium |

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2022 30/11/2023

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

| Largest investments | Sector |  | \% Assets |
| :--- | :--- | :---: | :---: |
| Country |  |  |  |
| Petroleos Mexicanos | Manufacturing | $2.17 \%$ | MX |
| Teva Pharm Fnc NI Ii | Manufacturing | $1.58 \%$ | IL |
| Fortune Star Bvi Ltd | Accommodation and Food Service Activities | $1.51 \%$ | CN |
| Gold Fields Orogen Hold | Mining and Quarrying | $1.19 \%$ | ZA |
| Bank Leumi Le-israel | Financial and Insurance Activities | $1.14 \%$ | IL |
| Alpek Sa De Cv | Manufacturing | $1.12 \%$ | MX |
| Ecopetrol Sa | Manufacturing | $1.11 \%$ | CO |
| America Movil Sab De Cv | Information And Communication | $1.10 \%$ | MX |
| Orbia Advance Corp Sab | Manufacturing | $1.07 \%$ | MX |
| Usiminas International | Manufacturing | $1.07 \%$ | BR |
| Bancolombia Sa | Financial and Insurance Activities | $1.03 \%$ | CO |
| Mizrahi Tefahot Bank Ltd | Financial and Insurance Activities | $1.00 \%$ | IL |
| Pt Pertamina (persero) | Manufacturing | $0.96 \%$ | ID |
| Mdgh Gmtn Rsc Ltd | Financial and Insurance Activities | $0.96 \%$ | AE |
| National Central Cooling | Electricity, Gas, Steam and Air Conditioning | $0.95 \%$ | AE |

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

## Asset allocation

describes the share of investments in specific assets.

## What was the asset allocation?

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $2.91 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $0.88 \%$ |
| Agriculture, Forestry and Fishing | $0.00 \%$ |
| Arts, Entertainment and Recreation | $1.72 \%$ |
| Construction | $1.63 \%$ |
| Education | $0.67 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $5.97 \%$ |
| Financial and Insurance Activities | $16.97 \%$ |
| Human Health And Social Work Activities | $0.59 \%$ |
| Information And Communication | $6.84 \%$ |
| Manufacturing | $33.59 \%$ |
| Mining and Quarrying | $8.26 \%$ |
| Other Service Activities | $0.00 \%$ |
| Professional, Scientific and Technical Activities | $0.06 \%$ |
| Public Administration and Defence; Compulsory Social Security | $0.70 \%$ |
| Real Estate Activities | $5.57 \%$ |
| Transportation and Storage | $6.87 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $0.00 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $3.15 \%$ |
| Cash or data unavailable | $1.17 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy'?

X
Yes, $\qquad$
X
In fossil gas
X
In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.

## - capital

expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure ( OpEx ) reflects the green operational activities of investee companies.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional

 activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.00 \%$ | $0.01 \%$ | $0.01 \%$ |
| Taxonomy-aligned Nuclear | $0.00 \%$ | $0.01 \%$ | $0.02 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.00 \%$ | $1.04 \%$ | $1.90 \%$ |
| Non Taxonomy-aligned | $100.00 \%$ | $98.94 \%$ | $98.07 \%$ |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.00 \%$ | $0.01 \%$ | $0.01 \%$ |
| Taxonomy-aligned Fossil gas | $0.00 \%$ | $0.01 \%$ | $0.02 \%$ |
| Taxonomy-aligned Nuclear | $0.00 \%$ | $1.08 \%$ | $1.97 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $100.00 \%$ | $98.90 \%$ | $98.00 \%$ |
| Non Taxonomy-aligned |  |  |  |

[^28]What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $1.93 \%$, while the figure for the previous reference period was 2.59\%.

sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

## What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are
indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

|  | 15. Lack of anticorruption and antibribery policies | Share of investments in entities without policies on anti-corruption and anti-bribery consistent with the United Nations Convention against Corruption |  | 7.16\% | 2.00\% |  |

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj . Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.
That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

 indicators measure how the environmental or social characteristics promoted by the financial product are attained.
## Product name:

Legal entity identifier:

## Muzinich European Credit Alpha Fund

549300ZKLE9R6P9GS41

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

It made sustainable investments with an environmental objective: _\%

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
$\square$
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: $\qquad$

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $\mathbf{2 . 3 7 \%}$ of sustainable investments.

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

## How did the sustainability indicators perform?

The sustainability indicators performed as follows:

| The percentage of an individual <br> issuer's revenue which may be <br> derived from specific business <br> activities (e.g., controversial <br> weapons production). | At the end of each of the four quarters in the reference period, this financial <br> product: <br> - |
| :--- | :--- |
| controversial weapons <br> - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from <br> tobacco production |  |
| - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from |  |
| coal mining or coal-related electricity generation, or issuers with up to 30\% of |  |
| coal-related revenues which had not made a public commitment to |  |
| decommission their coal assets by 2025. |  |

Reference index used: ICE BofA BB-B Euro High Yield Constrained Index
The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'. <br> ...and compared to previous periods?}

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

> The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

> The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

> Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

## Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct involvement in entities which derived more than $10 \%$ of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index. <br> The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor. <br> The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor. |
| :---: | :---: | :---: |
| Carbon footprint | High |  |
| GHG intensity of investee companies | High |  |
| Exposure to activities in the fossil fuel sector | High |  |
| Non-renewable energy consumption and production | Medium |  |
| Energy consumption intensity per high impact climate sector | Low |  |
| Activities negatively affecting biodiversity-sensitive areas | Medium |  |
| Emissions to water | Low |  |
| Hazardous waste ratio | Low |  |

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment <br> Manager's risk team and portfolio managers. |

## Asset allocation

describes the share of investments in specific assets.

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

## What was the asset allocation?

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $1.60 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $2.87 \%$ |
| Agriculture, Forestry and Fishing | $0.37 \%$ |
| Arts, Entertainment and Recreation | $2.55 \%$ |
| Construction | $1.41 \%$ |
| Education | $0.34 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $2.74 \%$ |
| Financial and Insurance Activities | $30.24 \%$ |
| Human Health And Social Work Activities | $0.79 \%$ |
| Information And Communication | $12.95 \%$ |
| Manufacturing | $20.54 \%$ |
| Mining and Quarrying | $1.60 \%$ |
| Other Service Activities | $0.00 \%$ |
| Professional, Scientific and Technical Activities | $1.50 \%$ |
| Public Administration and Defence; Compulsory Social Security | $1.18 \%$ |
| Real Estate Activities | $5.09 \%$ |
| Transportation and Storage | $6.37 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $0.49 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $1.43 \%$ |
| Cash or data unavailable | $0.39 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy'?

X
Yes, $\qquad$
X
In fossil gas
X
In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.

## - capital

expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure ( OpEx ) reflects the green operational activities of investee companies.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional

 activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.75 \%$ | $1.11 \%$ | $0.51 \%$ |
| Taxonomy-aligned Nuclear | $1.00 \%$ | $1.35 \%$ | $0.66 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.31 \%$ | $1.34 \%$ | $1.67 \%$ |
| Non Taxonomy-aligned | $97.94 \%$ | $96.20 \%$ | $97.16 \%$ |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.80 \%$ | $1.19 \%$ | $0.54 \%$ |
| Taxonomy-aligned Nuclear | $1.07 \%$ | $1.44 \%$ | $0.71 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.33 \%$ | $1.44 \%$ | $1.79 \%$ |
| Non Taxonomy-aligned | $98.44 \%$ | $96.77 \%$ | $97.46 \%$ |

[^29]
## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

| Investments in Transitioning and Enabling Activities |  |
| :---: | :---: |
| Transitional activities | $0.04 \%$ |
| Enabling activities | $0.52 \%$ |

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $2.37 \%$, while the figure for the previous reference period was $1.28 \%$.

sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

## What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj . Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.
That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

 indicators measure how the environmental or social characteristics promoted by the financial product are attained.Product name:
Legal entity identifier:

Muzinich Global Short Duration Investment Grade Fund
549300YFME7OYE62ZO42

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

It made sustainable investments with an environmental objective: _\%

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
$\square$
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: $\qquad$

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $\mathbf{4 . 4 4 \%}$ of sustainable investments.

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

## How did the sustainability indicators perform?

The sustainability indicators performed as follows:

| The percentage of an individual <br> issuer's revenue which may be <br> derived from specific business <br> activities (e.g., controversial <br> weapons production). | At the end of each of the four quarters in the reference period, this financial <br> product: <br> - |
| :--- | :--- |
| controversial weapons <br> - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from <br> tobacco production |  |
| - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from |  |
| coal mining or coal-related electricity generation, or issuers with up to 30\% of |  |
| coal-related revenues which had not made a public commitment to |  |
| decommission their coal assets by 2025. |  |

Reference index used: ICE BofA 1-3 Year Global Corporate Index
The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'. <br> ...and compared to previous periods?}

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

> The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

> The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

> Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

## Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct involvement in entities which derived more than $10 \%$ of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index. <br> The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor. <br> The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor. |
| :---: | :---: | :---: |
| Carbon footprint | High |  |
| GHG intensity of investee companies | High |  |
| Exposure to activities in the fossil fuel sector | High |  |
| Non-renewable energy consumption and production | Medium |  |
| Energy consumption intensity per high impact climate sector | Low |  |
| Activities negatively affecting biodiversity-sensitive areas | Medium |  |
| Emissions to water | Low |  |
| Hazardous waste ratio | Low |  |

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment <br> Manager's risk team and portfolio managers. |
| :---: | :---: | :--- |

## Asset allocation

describes the share of investments in specific assets.

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $1.79 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.23 \%$ |

| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $2.46 \%$ |
| Cash or data unavailable | $0.19 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?

Yes, $\qquad$

In fossil gas
X
In nuclear energy

## No

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.

## - capital expenditure

 (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy. - operational expenditure (OpEx) reflects the green operational activities of investee companies.
## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional

 activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.00 \%$ | $0.00 \%$ | $0.00 \%$ |
| Taxonomy-aligned Fossil gas | $0.28 \%$ | $0.35 \%$ | $0.08 \%$ |
| Taxonomy-aligned Nuclear | $1.09 \%$ | $3.97 \%$ | $4.36 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $98.63 \%$ | $95.67 \%$ | $95.56 \%$ |
| Non Taxonomy-aligned |  |  |  |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.00 \%$ | $0.00 \%$ | $0.00 \%$ |
| Taxonomy-aligned Fossil gas | $0.29 \%$ | $0.36 \%$ | $0.09 \%$ |
| Taxonomy-aligned Nuclear | $1.13 \%$ | $4.11 \%$ | $4.50 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $98.58 \%$ | $95.53 \%$ | $95.42 \%$ |
| Non Taxonomy-aligned |  |  |  |

[^30]
## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $4.44 \%$, while the figure for the previous reference period was $3.31 \%$.
sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

## What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

What investments were included under "other", what was their purpose
and were there any minimum environmental or social safeguards? and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

| PAl Report |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

|  | 15. Lack of anticorruption and antibribery policies | Share of investments in entities without policies on anti-corruption and anti-bribery consistent with the United Nations Convention against Corruption |  | 0.72\% | 3.00\% |  |

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.
That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

## Product name:

Legal entity identifier:

## Muzinich Dynamic Credit Income Fund

549300MSJCNAPHIGUC69

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

It made sustainable investments with an environmental objective: _\%

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
$\square$
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: $\qquad$

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $\mathbf{2 . 3 3 \%}$ of sustainable investments.

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

## How did the sustainability indicators perform?

The sustainability indicators performed as follows:

| The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production). | At the end of each of the four quarters in the reference period, this financial product: <br> - Held 0 issuers ( $0 \%$ by weight) involved in the end manufacture of controversial weapons <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from gambling operations <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from adult entertainment <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from tobacco production <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from coal mining or coal-related electricity generation |
| :---: | :---: |
| An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards. | The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee. <br> At the end of each of the four quarters in the reference period, this financial product held 0 issuers (or exposure $0 \%$ by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards. |
| The indicators of Principal Adverse Impact as defined by the SFDR. | The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template. |
| The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities. | The weighted average carbon intensity of this financial product has remained more than $10 \%$ lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below. <br> A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. |

Reference index used
Custom: 70\% ICE BofA BB-B Global High Yield Index, 30\% ICE BofA BBB Global Corporate Index
The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.
...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

> Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse
impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment |
| :---: | :---: | :--- |
| Policies, processes and compliance <br> mechanisms to monitor <br> compliance with UN Global <br> Compact principles and OECD <br> Guidelines for Multinational <br> Enterprises | High | Manager's risk team and portfolio managers. |

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2022 30/11/2023

| Largest investments | Sector | \% Assets | Country |
| :--- | :--- | :---: | :---: |
| Us Treasury N/b | Public Administration and Defence; | $1.57 \%$ | US |
| Faurecia | Manufacturing | $1.03 \%$ | FR |
| T-mobile Usa Inc | Information And Communication | $0.92 \%$ | US |
| Wintershall Dea Fin 2bv | Mining and Quarrying | $0.88 \%$ | DE |
| Ecopetrol Sa | Manufacturing | $0.87 \%$ | CO |
| Sherwin-williams Co | Manufacturing | $0.85 \%$ | US |
| American Airlines Inc | Transportation and Storage | $0.84 \%$ | US |
| Spirit Aerosystems Inc | Manufacturing | $0.84 \%$ | US |
| Carnival Corp | Transportation and Storage | $0.81 \%$ | US |
| Royal Caribbean Cruises | Transportation and Storage | $0.80 \%$ | US |
| Blackstone Pp Eur Hold | Real Estate Activities | $0.75 \%$ | LU |
| Hilcorp Energy I/hilcorp | Mining and Quarrying | $0.71 \%$ | US |
| Sunnova Energy Corp | Construction | $0.70 \%$ | US |
| Northern Oil And Gas Inc | Mining and Quarrying | $0.68 \%$ | US |
| Crown Castle Inc | Real Estate Activities | $0.68 \%$ | US |

## Asset allocation

 describes the share of investments in specific assets.The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

## What was the asset allocation?

\#1 Aligned with $\mathrm{E} / \mathrm{S}$ characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

## In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $2.21 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $2.13 \%$ |
| Agriculture, Forestry and Fishing | $0.37 \%$ |
| Arts, Entertainment and Recreation | $0.00 \%$ |
| Construction | $2.12 \%$ |
| Education | $0.27 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $2.05 \%$ |
| Financial and Insurance Activities | $10.38 \%$ |
| Human Health And Social Work Activities | $1.83 \%$ |
| Information And Communication | $8.50 \%$ |
| Manufacturing | $33.97 \%$ |
| Mining and Quarrying | $6.40 \%$ |
| Other Service Activities | $0.25 \%$ |
| Professional, Scientific and Technical Activities | $1.71 \%$ |
| Public Administration and Defence; Compulsory Social Security | $1.97 \%$ |
| Real Estate Activities | $6.33 \%$ |
| Transportation and Storage | $8.82 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $0.77 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $4.03 \%$ |
| Cash or data unavailable | $0.88 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy'?

$\qquad$
X
In fossil gas
X
In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.

## - capital

expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy. - operational expenditure ( OpEx ) reflects the green operational activities of investee companies.

## Enabling activities

 directly enable other activities to make a substantial contribution to an environmental objective.
## Transitional

activities are activities for which low-carbon

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.21 \%$ | $0.36 \%$ | $0.15 \%$ |
| Taxonomy-aligned Fossil gas | $0.19 \%$ | $0.26 \%$ | $0.14 \%$ |
| Taxonomy-aligned Nuclear | $0.26 \%$ | $1.48 \%$ | $2.17 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $99.34 \%$ | $97.90 \%$ | $97.54 \%$ |
| Non Taxonomy-aligned |  |  |  |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.22 \%$ | $0.39 \%$ | $0.16 \%$ |
| Taxonomy-aligned Nuclear | $0.20 \%$ | $0.27 \%$ | $0.16 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.28 \%$ | $1.59 \%$ | $2.33 \%$ |
| Non Taxonomy-aligned | $99.46 \%$ | $97.97 \%$ | $97.49 \%$ |

alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.
(\%) are
sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.
${ }^{1}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegate Regulation (EU) 2022/1214.

## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

| Investments in Transitioning and Enabling Activities |  |
| :---: | :---: |
| Transitional activities | $0.02 \%$ |
| Enabling activities | $0.83 \%$ |

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $2.33 \%$, while the figure for the previous reference period was $1.78 \%$.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACl target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

PAI Report
Principal adverse sustainability impacts statement

|  | 5.a. Share of nonrenewable energy consumption | Share of non-renewable energy versus renewable energy consumption, expressed as a percentage |  | 76.08\% | 74.00\% |  |

|  | 15. Lack of anticorruption and antibribery policies | Share of investments in entities without policies on anti-corruption and anti-bribery consistent with the United Nations Convention against Corruption |  | 1.76\% | 1.00\% |  |

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj . Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.
That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

 indicators measure how the environmental or social characteristics promoted by the financial product are attained.
## Product name:

Legal entity identifier:

Muzinich Global Fixed Maturity 2027 Fund
549300QFNEL887GCER39

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

It made sustainable investments with an environmental objective: _\%

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
$\square$
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: $\qquad$

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $6.30 \%$ of sustainable investments.

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

## How did the sustainability indicators perform?

The sustainability indicators performed as follows:

| The percentage of an individual <br> issuer's revenue which may be <br> derived from specific business <br> activities (e.g., controversial <br> weapons production). | At the end of each of the four quarters in the reference period, this financial <br> product: <br> - |
| :--- | :--- |
| controversial weapons <br> - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from <br> tobacco production |  |
| - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from |  |
| coal mining or coal-related electricity generation, or issuers with up to 30\% of |  |
| coal-related revenues which had not made a public commitment to |  |
| decommission their coal assets by 2025. |  |

Reference index used:
Custom: 60\%ICE BofA 1-3 Year Global Corporate Index, 40\% ICE BofA 1-3 Year BB-B Global High Yield Non-Financial Constrained Index

The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.

## ...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

> The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

> The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

> Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

## Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct involvement in entities which derived more than $10 \%$ of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index. <br> The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor. <br> The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor. |
| :---: | :---: | :---: |
| Carbon footprint | High |  |
| GHG intensity of investee companies | High |  |
| Exposure to activities in the fossil fuel sector | High |  |
| Non-renewable energy consumption and production | Medium |  |
| Energy consumption intensity per high impact climate sector | Low |  |
| Activities negatively affecting biodiversity-sensitive areas | Medium |  |
| Emissions to water | Low |  |
| Hazardous waste ratio | Low |  |

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment <br> Manager's risk team and portfolio managers. |
| :---: | :---: | :--- |
| Policies, processes and compliance <br> mechanisms to monitor <br> compliance with UN Global <br> Compact principles and OECD <br> Guidelines for Multinational <br> Enterprises | High | Medium |

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2022 30/11/2023

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

|  | Largest investments | Sector | \% Assets | Country |
| :---: | :---: | :---: | :---: | :---: |
|  | Commerzbank Ag | Financial and Insurance Activities | 1.10\% | DE |
| The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: | Jcdecaux Se | Information And Communication | 1.04\% | FR |
|  | Autostrade Per L'italia | Transportation and Storage | 1.03\% | IT |
|  | Jyske Bank A/s | Financial and Insurance Activities | 1.02\% | DK |
|  | Ald Sa | Administrative and Support Service Activities | 1.02\% | FR |
|  | Ds Smith Plc | Manufacturing | 1.01\% | GB |
|  | Wabtec Transportation | Manufacturing | 1.01\% | US |
|  | Rci Banque Sa | Manufacturing | 1.01\% | FR |
|  | Fcc Aqualia Sa | Water Supply; Sewerage, Waste | 1.00\% | ES |
|  | Ses Sa | Information And Communication | 1.00\% | LU |
| $\begin{gathered} 01 / 12 / 2022- \\ 30 / 11 / 2023 \end{gathered}$ | Bevco Lux Sarl | Financial and Insurance Activities | 0.99\% | LU |
|  | Ubs Ag | Financial and Insurance Activities | 0.98\% | CH |
|  | Dell Bank International | Manufacturing | 0.96\% | IE |
|  | Viterra Finance Bv | Wholesale and Retail Trade; Repair of Motor | 0.95\% | NL |
|  | Aib Group Plc | Financial and Insurance Activities | 0.94\% | IE |

## Asset allocation

describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

## In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $0.00 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $3.76 \%$ |
| Agriculture, Forestry and Fishing | $0.46 \%$ |
| Arts, Entertainment and Recreation | $1.43 \%$ |
| Construction | $1.33 \%$ |
| Education | $0.42 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $1.58 \%$ |
| Financial and Insurance Activities | $28.29 \%$ |
| Human Health And Social Work Activities | $0.41 \%$ |
| Information And Communication | $10.83 \%$ |
| Manufacturing | $19.58 \%$ |
| Mining and Quarrying | $4.28 \%$ |
| Other Service Activities | $0.00 \%$ |
| Professional, Scientific and Technical Activities | $0.73 \%$ |
| Public Administration and Defence; Compulsory Social Security | $0.00 \%$ |
| Real Estate Activities | $13.29 \%$ |
| Transportation and Storage | $7.52 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $1.00 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $2.97 \%$ |
| Cash or data unavailable | $0.00 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?

Yes, $\qquad$
X
In fossil gas
X In nuclear energy

## No

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy. - operational expenditure (OpEx) reflects the green operational activities of investee companies.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional

 activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.00 \%$ | $0.01 \%$ | $0.02 \%$ |
| Taxonomy-aligned Fossil gas | $0.10 \%$ | $0.13 \%$ | $0.03 \%$ |
| Taxonomy-aligned Nuclear | $1.28 \%$ | $6.15 \%$ | $6.24 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $98.61 \%$ | $93.71 \%$ | $93.70 \%$ |
| Non Taxonomy-aligned |  |  |  |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.00 \%$ | $0.01 \%$ | $0.02 \%$ |
| Taxonomy-aligned Fossil gas | $0.11 \%$ | $0.13 \%$ | $0.03 \%$ |
| Taxonomy-aligned Nuclear | $1.31 \%$ | $6.28 \%$ | $6.37 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $98.59 \%$ | $93.58 \%$ | $93.57 \%$ |
| Non Taxonomy-aligned |  |  |  |

[^31]
## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this is the first period for which the investment manager is reporting on this financial product, it is not possible to compare to a previous reference period.
sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

## What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are
indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj . Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.
That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

 indicators measure how the environmental or social characteristics promoted by the financial product are attained.
## Product name:

Legal entity identifier:

Muzinich Americayield Fund
54930086G66KM1ZTG004

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

It made sustainable investments with an environmental objective: _\%

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
$\square$
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: $\qquad$

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $0.87 \%$ of sustainable investments.

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective
$\square$ It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

## How did the sustainability indicators perform?

The sustainability indicators performed as follows:

| The percentage of an individual <br> issuer's revenue which may be <br> derived from specific business <br> activities (e.g., controversial <br> weapons production). | At the end of each of the four quarters in the reference period, this financial <br> product: <br> - Held 0 issuers (0\% by weight) involved in the end manufacture of <br> controversial weapons <br> - Held 0 issuers (O\% by weight) deriving more than 10\% of revenues from <br> tobacco production <br> - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from <br> coal mining or coal-related electricity generation, or issuers with up to 30\% of <br> coal-related revenues which had not made a public commitment to |
| :--- | :--- |
| decommission their coal assets by 2025. |  |

Reference index used: ICE BofA BB-B US Non-Financial Cash Pay High Yield Constrained Index
The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.

## ...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

## Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct involvement in entities which derived more than $10 \%$ of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index. <br> The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor. <br> The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor. |
| :---: | :---: | :---: |
| Carbon footprint | High |  |
| GHG intensity of investee companies | High |  |
| Exposure to activities in the fossil fuel sector | High |  |
| Non-renewable energy consumption and production | Medium |  |
| Energy consumption intensity per high impact climate sector | Low |  |
| Activities negatively affecting biodiversity-sensitive areas | Medium |  |
| Emissions to water | Low |  |
| Hazardous waste ratio | Low |  |

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment <br> Manager's risk team and portfolio managers. |
| :---: | :---: | :--- |
| Policies, processes and compliance <br> mechanisms to monitor <br> compliance with UN Global <br> Compact principles and OECD <br> Guidelines for Multinational <br> Enterprises | High | Medium |

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2022 30/11/2023

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

|  | Largest investments | Sector | \% Assets | Country |
| :---: | :---: | :---: | :---: | :---: |
|  | Royal Caribbean Cruises | Transportation and Storage | 1.84\% | US |
| The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: | American Airlines Inc | Transportation and Storage | 1.74\% | US |
|  | Caesars Entertain Inc | Arts, Entertainment and Recreation | 1.56\% | US |
|  | Carnival Corp | Transportation and Storage | 1.51\% | US |
|  | Cco HIdgs LIc/cap Corp | Information And Communication | 1.25\% | US |
|  | Fce Bank Plc | Manufacturing | 1.16\% | GB |
|  | Bread Financial HIdgs | Financial and Insurance Activities | 1.14\% | US |
|  | Dish Dbs Corp | Information And Communication | 1.11\% | US |
|  | Eqm Midstream Partners L | Transportation and Storage | 1.04\% | US |
|  | Cdi Escrow Issuer Inc | Arts, Entertainment and Recreation | 1.02\% | US |
| $\begin{gathered} 01 / 12 / 2022- \\ 30 / 11 / 2023 \end{gathered}$ | Amn Healthcare Inc | Administrative and Support Service Activities | 1.00\% | US |
|  | Albertsons Cos/safeway | Wholesale and Retail Trade; Repair of Motor | 1.00\% | US |
|  | Calpine Construction Finance Co | Electricity, Gas, Steam and Air Conditioning | 0.98\% | US |
|  | Transdigm Inc | Manufacturing | 0.97\% | US |
|  | Tallgrass Nrg Prtnr/fin | Transportation and Storage | 0.95\% | US |

## What was the proportion of sustainability-related investments?

## Asset allocation

describes the share of investments in specific assets.

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below. []

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| $\quad$ NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $3.81 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $3.11 \%$ |
| Agriculture, Forestry and Fishing | $0.00 \%$ |
| Arts, Entertainment and Recreation | $4.34 \%$ |
| Construction | $2.70 \%$ |
| Education | $0.62 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $2.25 \%$ |
| Financial and Insurance Activities | $6.65 \%$ |
| Human Health And Social Work Activities | $4.73 \%$ |
| Information And Communication | $17.81 \%$ |
| Manufacturing | $23.69 \%$ |
| Mining and Quarrying | $7.88 \%$ |
| Other Service Activities | $0.00 \%$ |
| Professional, Scientific and Technical Activities | $1.07 \%$ |
| Public Administration and Defence; Compulsory Social Security | $0.17 \%$ |
| Real Estate Activities | $4.40 \%$ |
| Transportation and Storage | $10.89 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $0.06 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $4.07 \%$ |
| Cash or data unavailable | $0.75 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy'?

X
Yes, $\qquad$

X In fossil gas
In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.

## - capital

expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure (OpEx) reflects the green operational activities of investee companies.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional

 activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.00 \%$ | $0.00 \%$ | $0.03 \%$ |
| Taxonomy-aligned Nuclear | $0.00 \%$ | $0.00 \%$ | $0.01 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.01 \%$ | $0.75 \%$ | $0.83 \%$ |
| Non Taxonomy-aligned | $99.99 \%$ | $99.25 \%$ | $99.13 \%$ |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.00 \%$ | $0.00 \%$ | $0.03 \%$ |
| Taxonomy-aligned Nuclear | $0.00 \%$ | $0.00 \%$ | $0.01 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.01 \%$ | $0.76 \%$ | $0.84 \%$ |
| Non Taxonomy-aligned | $99.99 \%$ | $99.24 \%$ | $99.12 \%$ |

[^32]
## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

| Investments in Transitioning and Enabling Activities |  |
| :---: | :---: |
| Transitional activities | $0.00 \%$ |
| Enabling activities | $0.39 \%$ |

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $0.87 \%$, while the figure for the previous reference period was $2.30 \%$.
sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

# How did this financial product perform compared to the reference benchmark? 

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.
That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

 indicators measure how the environmental or social characteristics promoted by the financial product are attained.

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: $\qquad$

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $1.72 \%$ of sustainable investments.

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective $\square$

It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

## How did the sustainability indicators perform?

The sustainability indicators performed as follows:

| The percentage of an individual <br> issuer's revenue which may be <br> derived from specific business <br> activities (e.g., controversial <br> weapons production). | At the end of each of the four quarters in the reference period, this financial <br> product: <br> - Held 0 issuers (0\% by weight) involved in the end manufacture of <br> controversial weapons <br> - Held 0 issuers (O\% by weight) deriving more than 10\% of revenues from <br> tobacco production <br> - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from <br> coal mining or coal-related electricity generation, or issuers with up to 30\% of <br> coal-related revenues which had not made a public commitment to |
| :--- | :--- |
| decommission their coal assets by 2025. |  |

Reference index used: ICE BofA BB-B European Currency Non-Financial High Yield Constrained Index
The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.
...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct involvement in entities which derived more than $10 \%$ of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index. <br> The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor. <br> The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor. |
| :---: | :---: | :---: |
| Carbon footprint | High |  |
| GHG intensity of investee companies | High |  |
| Exposure to activities in the fossil fuel sector | High |  |
| Non-renewable energy consumption and production | Medium |  |
| Energy consumption intensity per high impact climate sector | Low |  |
| Activities negatively affecting biodiversity-sensitive areas | Medium |  |
| Emissions to water | Low |  |
| Hazardous waste ratio | Low |  |

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment |
| :---: | :---: | :--- |
| Policies, processes and compliance <br> mechanisms to monitor <br> compliance with UN Global <br> Compact principles and OECD <br> Guidelines for Multinational <br> Enterprises | High | Manager's risk team and portfolio managers. |

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2022 30/11/2023

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

| Largest investments | Sector |  | \% Assets |
| :--- | :--- | :--- | :--- |
| Country |  |  |  |
| Electricite De France Sa | Electricity, Gas, Steam and Air Conditioning | $1.95 \%$ | FR |
| Teva Pharm Fnc NI Ii | Manufacturing | $1.67 \%$ | IL |
| Virgin Media Bristol LLC | Information And Communication | $1.63 \%$ | US |
| Iliad | Information And Communication | $1.55 \%$ | FR |
| Wintershall Dea Fin 2bv | Mining and Quarrying | $1.49 \%$ | DE |
| Faurecia | Manufacturing | $1.44 \%$ | FR |
| Bayer Ag | Manufacturing | $1.35 \%$ | DE |
| Volkswagen Bank Gmbh | Manufacturing | $1.33 \%$ | DE |
| Telefonica Emisiones Sau | Information And Communication | $1.32 \%$ | ES |
| Rcs \& Rds Sa | Information And Communication | $1.27 \%$ | RO |
| Iho Verwaltungs Gmbh | Manufacturing | $1.27 \%$ | DE |
| Allwyn Entertainment Fin | Arts, Entertainment and Recreation | $1.26 \%$ | GB |
| Rci Banque Sa | Manufacturing | $1.26 \%$ | FR |
| Fce Bank Plc | Manufacturing | $1.25 \%$ | GB |
| Telecom Italia Capital | Information And Communication | $1.17 \%$ | IT |

## What was the proportion of sustainability-related investments?

## Asset allocation

describes the share of investments in specific assets.

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below. []

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $1.65 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $5.13 \%$ |
| Agriculture, Forestry and Fishing | $1.05 \%$ |
| Arts, Entertainment and Recreation | $6.50 \%$ |
| Construction | $1.98 \%$ |
| Education | $0.77 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $3.05 \%$ |
| Financial and Insurance Activities | $5.90 \%$ |
| Human Health And Social Work Activities | $1.05 \%$ |
| Information And Communication | $17.47 \%$ |
| Manufacturing | $32.96 \%$ |
| Mining and Quarrying | $1.86 \%$ |
| Other Service Activities | $0.74 \%$ |
| Professional, Scientific and Technical Activities | $1.54 \%$ |
| Public Administration and Defence; Compulsory Social Security | $0.41 \%$ |
| Real Estate Activities | $4.34 \%$ |
| Transportation and Storage | $7.02 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $0.06 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $3.61 \%$ |
| Cash or data unavailable | $0.48 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy'?

X
Yes, $\qquad$
X
In fossil gas
X
In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.

## - capital

expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure (OpEx) reflects the green operational activities of investee companies.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional

 activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.70 \%$ | $1.22 \%$ | $0.49 \%$ |
| Taxonomy-aligned Nuclear | $1.10 \%$ | $1.42 \%$ | $0.63 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.37 \%$ | $0.90 \%$ | $1.07 \%$ |
| Non Taxonomy-aligned | $97.84 \%$ | $96.46 \%$ | $97.81 \%$ |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.72 \%$ | $1.25 \%$ | $0.51 \%$ |
| Taxonomy-aligned Nuclear | $1.13 \%$ | $1.47 \%$ | $0.65 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.38 \%$ | $0.92 \%$ | $1.10 \%$ |
| Non Taxonomy-aligned | $98.40 \%$ | $97.16 \%$ | $98.22 \%$ |

[^33]
## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

| Investments in Transitioning and Enabling Activities |  |
| :---: | :---: |
| Transitional activities | $0.05 \%$ |
| Enabling activities | $0.59 \%$ |

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $1.72 \%$, while the figure for the previous reference period was $1.25 \%$.
sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

## What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are
indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

# How did this financial product perform compared to the reference benchmark? 

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

|  | Sector B | Mining \& Quarrying | GWh/EURm revenue | 0.64 |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

|  | 15. Lack of anticorruption and antibribery policies | Share of investments in entities without policies on anti-corruption and anti-bribery consistent with the United Nations Convention against Corruption |  | 1.56\% | 3.00\% |  |

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj . Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product name:
Legal entity identifier:

Muzinich Global High Yield Low Carbon Credit Fund
49300MBBOIKQASDXP90

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $\mathbf{2 . 5 0 \%}$ of sustainable investments.

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
$\square$
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: \%

## No

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $40 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

The sustainability indicators performed as follows:

| The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production). | At the end of each of the four quarters in the reference period, this financial product: <br> - Held 0 issuers ( $0 \%$ by weight) involved in the end manufacture of controversial weapons <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from tobacco production <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from the extraction of conventional and non-conventional fossil fuels <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from coal mining or coal-related electricity generation or issuers with up to $30 \%$ of coal-related revenues which had not made a public commitment to decommission their coal assets by 2025. |
| :---: | :---: |
| An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards. | The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee. <br> At the end of each of the four quarters in the reference period, this financial product held 0 issuers (or exposure $0 \%$ by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards. |
| The indicators of Principal Adverse Impact as defined by the SFDR. | The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template. |
| The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities. | The weighted average carbon intensity of this financial product has remained more than $40 \%$ lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below. <br> A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. |
| Limits on ESG scoring and research coverage | At the end of each of the four quarters in the reference period, this financial product: <br> - Held 0 issuers ( $0 \%$ by weight) with an ESG Risk Rating of 40 or above as specified by the ESG policy <br> - Had a weighted average ESG Risk Rating below 30 as specified by the ESG policy <br> - Maintained a portfolio which when excluding cash holdings, was more than $90 \%$ covered by an independent ESG data provider |

Reference index used: ICE BofA Global High Yield Constrained Index
The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.
...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

> Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse
impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAIs on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct <br> involvement in entities which derived more than 10\% of their <br> annual revenues from the mining or extraction of thermal coal <br> and/or the production of energy from thermal coal, subject to <br> an allowance for entities which the Investment Manager <br> deemed to have a credible transition plan to reduce their <br> reliance or exposure to thermal coal in favour of less carbon <br> intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target |
| :---: | :---: | :--- |
| in order to reduce this financial product's overall carbon |  |  |
| GHG intensity of investee |  |  |
| companies |  |  |$\quad$ High | intensity relative to a chosen reference index. |
| :---: |

| Policies, processes and compliance <br> mechanisms to monitor <br> compliance with UN Global <br> Compact principles and OECD <br> Guidelines for Multinational <br> Enterprises | High | ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment <br> Manager's risk team and portfolio managers. |
| :---: | :---: | :--- |
| Unadjusted gender pay gap | Medium |  |
| Board gender diversity | Medium | The Investment Manager monitors controversies relating to <br> this PAI and may choose to engage issues which do not provide <br> adequate disclosures, or do manage risks relating to this PAI <br> factor. The reference period represents the first year in which <br> the Investment Manager has formally monitored this PAI and <br> will consider further actions to mitigate it once it has been able <br> to compare different investments over a longer research <br> period. Under some circumstances the Investment Manager <br> may choose to decline an investment opportunity to invest, or <br> to divest from entities which cause severe adverse impacts on <br> this factor. |
| Investments in companies without <br> carbon emission reduction <br> initiatives | Medium |  |

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2022 30/11/2023

| Largest investments | Sector |  | \% Assets |
| :--- | :--- | :---: | :---: |
| Country |  |  |  |
| Us Treasury N/b | Public Administration and Defence; | $3.60 \%$ | US |
| Caesars Entertain Inc | Arts, Entertainment and Recreation | $1.15 \%$ | US |
| Treasury Bill | Public Administration and Defence; | $1.09 \%$ | US |
| Fce Bank Plc | Manufacturing | $1.04 \%$ | GB |
| Electricite De France Sa | Electricity, Gas, Steam and Air Conditioning | $0.90 \%$ | FR |
| Klabin Austria Gmbh | Manufacturing | $0.86 \%$ | BR |
| Ball Corp | Manufacturing | $0.85 \%$ | US |
| Commerzbank Ag | Financial and Insurance Activities | $0.82 \%$ | DE |
| Cco HIdgs Llc/cap Corp | Information And Communication | $0.82 \%$ | US |
| Royal Caribbean Cruises | Transportation and Storage | $0.82 \%$ | US |
| Bayer Ag | Manufacturing | $0.78 \%$ | DE |
| Sba Communications Corp | Real Estate Activities | $0.78 \%$ | US |
| Lottomatica Spa/roma | Arts, Entertainment and Recreation | $0.78 \%$ | IT |
| Carnival Corp | Transportation and Storage | $0.77 \%$ | US |
| Onemain Finance Corp | Financial and Insurance Activities | $0.75 \%$ | US |

## Asset allocation

 describes the share of investments in specific assets.The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.?

## What was the asset allocation?

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

## In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $2.42 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $3.30 \%$ |
| Agriculture, Forestry and Fishing | $0.11 \%$ |
| Arts, Entertainment and Recreation | $7.71 \%$ |
| Construction | $1.98 \%$ |
| Education | $0.36 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $2.56 \%$ |
| Financial and Insurance Activities | $15.42 \%$ |
| Human Health And Social Work Activities | $1.85 \%$ |
| Information And Communication | $15.88 \%$ |
| Manufacturing | $22.42 \%$ |
| Mining and Quarrying | $0.17 \%$ |
| Other Service Activities | $1.01 \%$ |
| Professional, Scientific and Technical Activities | $1.28 \%$ |
| Public Administration and Defence; Compulsory Social Security | $4.69 \%$ |
| Real Estate Activities | $5.45 \%$ |
| Transportation and Storage | $5.84 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $0.00 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $4.18 \%$ |
| Cash or data unavailable | $0.66 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy'?

X
Yes, $\qquad$

X In fossil gas
X
In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.
- capital
expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure ( OpEx ) reflects the green operational activities of investee companies.

## Enabling activities

 directly enable other activities to make a substantial contribution to an environmental objective.
## Transitional

activities are activities for which low-carbon alternatives are not

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.28 \%$ | $0.36 \%$ | $0.22 \%$ |
| Taxonomy-aligned Fossil gas | $0.28 \%$ | $0.36 \%$ | $0.22 \%$ |
| Taxonomy-aligned Nuclear | $0.13 \%$ | $1.33 \%$ | $2.28 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $99.31 \%$ | $97.95 \%$ | $97.29 \%$ |
| Non Taxonomy-aligned |  |  |  |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.30 \%$ | $0.39 \%$ | $0.23 \%$ |
| Taxonomy-aligned Fossil gas | $0.30 \%$ | $0.39 \%$ | $0.23 \%$ |
| Taxonomy-aligned Nuclear | $0.14 \%$ | $1.44 \%$ | $2.47 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $99.56 \%$ | $98.17 \%$ | $97.30 \%$ |
| Non Taxonomy-aligned |  |  |  |

yet available and among others have greenhouse gas emissions levels corresponding to the best performance.
${ }^{1}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegate Regulation (EU) 2022/1214.

## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

| Investments in Transitioning and Enabling Activities |  |
| :---: | :---: |
| Transitional activities | $0.00 \%$ |
| Enabling activities | $0.83 \%$ |

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $2.50 \%$, while the figure for the previous reference period was 3.04\%.
are
sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

How did this financial product perform compared to the reference
benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

## PAI Report

Principal adverse sustainability impacts statement

| Adverse Sustainability Indicator |  | Metric | Units | This | Previous | Actions taken |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1. GHG emissions | Scope 1 GHG emissions | tCO2e | 614,330 | 6,412 | This financial product applies a carbon efficiency target whereby the Investment Manager seeks to maintain a weighted average carbon intensity (WACI) at least $10 \%$ lower than that of the relevant reference index. Further information is available in the relevant precontractual disclosures. |
|  |  | Scope 2 GHG emissions |  | 99,083 | 1,642 |  |
|  |  | Scope 3 GHG emissions |  | 713,412 | 72,020 |  |
|  |  | Total GHG emissions |  | 1,426,825 | 80,074 |  |
|  | 2. Carbon footprint | Carbon footprint | tCO2e/EUR <br> m invested | 1,526 | 774 |  |
|  | 3. GHG intensity of investee companies | GHG intensity of investee companies | tCO2e/EUR <br> m revenue | 176 | 272 |  |
|  | 4. Exposure to companies active in the fossil fuel sector | Share of investments in companies active in the fossil fuel sector | percent | 6.72\% | 8.00\% | This product excluded issuers which derived more than $10 \%$ revenues from mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities with a credible transition plan to reduce exposure to thermal coal by the end of 2025. |

|  | 14. Exposure to controversial weapons | Share of investments in investee companies involved in the manufacture or selling of controversial weapons (antipersonnel mines, cluster munitions, chemical and biological weapons) |  | 0.00\% | 0.00\% | This financial product applies a zero tolerance policy to companies involved in the production of controversial weapons. Further information is available in the relevant precontractual disclosures. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Additional climate and other environment-related indicators |  |  |  |  |  |  |
| $\frac{\tilde{0}}{\substack{0}}$ | 4. Investments in companies without carbon emission reduction initiatives | Share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement | percent | 34.03\% | 29.00\% |  |
| Additional social and employee, respect for human rights, anti-corruption and anti-bribery matters indicators |  |  |  |  |  |  |
| $\frac{\stackrel{\otimes}{0}}{\frac{0}{0}} \underset{\stackrel{\circ}{\varepsilon}}{\frac{\sim}{む}}$ | 6. Insufficient whistleblower protection | Share of investments in entities without policies on the protection of whistleblowers | percent | 0.91\% | 2.00\% |  |
|  | 9. Lack of a human rights policy | Share of investments in entities without human rights policies |  | 7.21\% | 10.00\% |  |
|  | 15. Lack of anticorruption and antibribery policies | Share of investments in entities without policies on anti-corruption and anti-bribery consistent with the United Nations Convention against Corruption |  | 1.95\% | 1.00\% |  |

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj . Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.
That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product name:
Legal entity identifier:

Muzinich Enhancedyield Short-Term Fund
549300T0Z7X48JW8L065

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $3.22 \%$ of sustainable investments.

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
$\square$
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: _\%

No

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

The sustainability indicators performed as follows:

| The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production). | At the end of each of the four quarters in the reference period, this financial product: <br> - Held 0 issuers ( $0 \%$ by weight) involved in the end manufacture of controversial weapons <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from tobacco production <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from coal mining or coal-related electricity generation, or issuers with up to $30 \%$ of coal-related revenues which had not made a public commitment to decommission their coal assets bv 2025. |
| :---: | :---: |
| An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards. | The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee. <br> At the end of each of the four quarters in the reference period, this financial product held 0 issuers (or exposure $0 \%$ by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards. |
| The indicators of Principal Adverse Impact as defined by the SFDR. | The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template. |
| The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities. | The weighted average carbon intensity of this financial product has remained more than $10 \%$ lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below. <br> A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. |

Reference index used
Custom: 60\%ICE BofA 1-3 Year Global Corporate Index, 40\% ICE BofA 1-3 Year BB-B Global High Yield Non-Financial Constrained Index

The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'. <br> ...and compared to previous periods?}

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed

## ( <br> What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse
impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAIs on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment <br> Manager's risk team and portfolio managers. |
| :---: | :---: | :--- |
| Policies, processes and compliance <br> mechanisms to monitor <br> compliance with UN Global <br> Compact principles and OECD <br> Guidelines for Multinational <br> Enterprises | High | Medium |

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2022 30/11/2023

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

| Largest investments | Sector | \% Assets | Country |
| :--- | :--- | :--- | :--- | :--- |
| Credit Suisse Ag | Financial and Insurance Activities | $1.21 \%$ | CH |
| Rci Banque Sa | Manufacturing | $1.16 \%$ | FR |
| Aercap Ireland Cap/globa | Financial and Insurance Activities | $1.16 \%$ | IE |
| Avolon Holdings Fndg Ltd | Financial and Insurance Activities | $1.11 \%$ | IE |
| Unicredit Spa | Financial and Insurance Activities | $1.09 \%$ | IT |
| Aircastle Ltd | Financial and Insurance Activities | $1.09 \%$ | US |
| Aib Group Plc | Financial and Insurance Activities | $1.08 \%$ | IE |

## What was the proportion of sustainability-related investments?

## Asset allocation

describes the share of investments in specific assets.

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

## What was the asset allocation?

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

## In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $1.39 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.47 \%$ |

yet available and among others have greenhouse gas emissions levels corresponding to the best performance.
sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.
${ }^{1}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegate Regulation (EU) 2022/1214.

## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

| Investments in Transitioning and Enabling Activities |  |
| :---: | :---: |
| Transitional activities | $0.04 \%$ |
| Enabling activities | $0.84 \%$ |

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $3.22 \%$, while the figure for the previous reference period was 1.96\%.

## objective not aligned with the EU Taxonomy?

What was the share of sustainable investments with an environmental

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACl target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

|  | 5.a. Share of nonrenewable energy consumption | Share of non-renewable energy versus renewable energy consumption, expressed as a percentage | percerit | 59.81\% | 77.00\% |  |

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.
That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

 indicators measure how the environmental or social characteristics promoted by the financial product are attained.
## Product name:

Legal entity identifier:

Muzinich ShortDurationHighYield Fund
549300JY3OQ0XVIAWY52

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

It made sustainable investments with an environmental objective: _\%

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
$\square$
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: $\qquad$

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $0.63 \%$ of sustainable investments.

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective
$\square$ It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

## How did the sustainability indicators perform?

The sustainability indicators performed as follows:

| The percentage of an individual <br> issuer's revenue which may be <br> derived from specific business <br> activities (e.g., controversial <br> weapons production). | At the end of each of the four quarters in the reference period, this financial <br> product: <br> - Held 0 issuers (0\% by weight) involved in the end manufacture of <br> controversial weapons <br> - Held 0 issuers (O\% by weight) deriving more than 10\% of revenues from <br> tobacco production <br> - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from <br> coal mining or coal-related electricity generation, or issuers with up to 30\% of <br> coal-related revenues which had not made a public commitment to |
| :--- | :--- |
| decommission their coal assets by 2025. |  |

Reference index used: ICE BofA BB-B US Non-Financial Cash Pay High Yield Constrained Index
The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.
...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct involvement in entities which derived more than $10 \%$ of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index. <br> The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor. <br> The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor. |
| :---: | :---: | :---: |
| Carbon footprint | High |  |
| GHG intensity of investee companies | High |  |
| Exposure to activities in the fossil fuel sector | High |  |
| Non-renewable energy consumption and production | Medium |  |
| Energy consumption intensity per high impact climate sector | Low |  |
| Activities negatively affecting biodiversity-sensitive areas | Medium |  |
| Emissions to water | Low |  |
| Hazardous waste ratio | Low |  |

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment <br> Manager's risk team and portfolio managers. |
| :---: | :---: | :--- |
| Policies, processes and compliance <br> mechanisms to monitor <br> compliance with UN Global <br> Compact principles and OECD <br> Guidelines for Multinational <br> Enterprises | High | Medium |

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2022 30/11/2023

| Largest investments | Sector |  | \% Assets |
| :--- | :--- | :---: | :---: |
| Country |  |  |  |

## What was the proportion of sustainability-related investments?

## Asset allocation

describes the share of investments in specific assets.

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below. []

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $3.40 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $3.66 \%$ |
| Agriculture, Forestry and Fishing | $0.00 \%$ |
| Arts, Entertainment and Recreation | $6.94 \%$ |
| Construction | $0.56 \%$ |
| Education | $0.82 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $0.84 \%$ |
| Financial and Insurance Activities | $8.03 \%$ |
| Human Health And Social Work Activities | $5.17 \%$ |
| Information And Communication | $14.64 \%$ |
| Manufacturing | $23.40 \%$ |
| Mining and Quarrying | $7.75 \%$ |
| Other Service Activities | $0.00 \%$ |
| Professional, Scientific and Technical Activities | $0.17 \%$ |
| Public Administration and Defence; Compulsory Social Security | $0.11 \%$ |
| Real Estate Activities | $5.50 \%$ |
| Transportation and Storage | $11.94 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $1.21 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $3.29 \%$ |
| Cash or data unavailable | $1.03 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy'?

X
Yes, $\qquad$
X
In fossil gas
X
In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.

## - capital

expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure (OpEx) reflects the green operational activities of investee companies.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional

 activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.00 \%$ | $0.43 \%$ | $0.46 \%$ |
| Taxonomy-aligned Nuclear | $0.00 \%$ | $0.00 \%$ | $0.00 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.00 \%$ | $0.05 \%$ | $0.16 \%$ |
| Non Taxonomy-aligned | $100.00 \%$ | $99.53 \%$ | $99.37 \%$ |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.00 \%$ | $0.43 \%$ | $0.47 \%$ |
| Taxonomy-aligned Fossil gas | $0.00 \%$ | $0.00 \%$ | $0.00 \%$ |
| Taxonomy-aligned Nuclear | $0.00 \%$ | $0.05 \%$ | $0.16 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $100.00 \%$ | $99.52 \%$ | $99.36 \%$ |
| Non Taxonomy-aligned |  |  |  |

[^34]
## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

| Investments in Transitioning and Enabling Activities |  |
| :---: | :---: |
| Transitional activities | $0.00 \%$ |
| Enabling activities | $0.01 \%$ |

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $0.63 \%$, while the figure for the previous reference period was $0.54 \%$.
sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

## What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

# How did this financial product perform compared to the reference benchmark? 

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.
That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

## Product name:

Legal entity identifier:

Muzinich Sustainable Credit Fund
549300JOXERWY3FZ4D65

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

It made sustainable investments with an environmental objective: _\%

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
$\square$
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: $\qquad$

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $5.72 \%$ of sustainable investments.

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective
$\square$ It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

The sustainability indicators performed as follows:

| The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production). | At the end of each of the four quarters in the reference period, this financial product: <br> - Held 0 issuers ( $0 \%$ by weight) involved in the end manufacture of controversial weapons <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $5 \%$ of revenues from production of alcoholic beverages <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $5 \%$ of revenues from production or distribution of adult entertainment <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $5 \%$ of revenues from production of fur or specialty leather products <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $5 \%$ of revenues from the provision of commercial gambling services <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $5 \%$ of revenues from military contracting <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $5 \%$ of revenues from the production of nuclear power or related services <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $5 \%$ of revenues from the extraction of non-conventional forms of oil or gas <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $0 \%$ of revenues from tobacco production <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from coal mining or coal-related electricity generation <br> - Held 0 issuers ( $0 \%$ by weight) listed on the Norges Bank Investment |
| :---: | :---: |
| An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards. | The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee. <br> At the end of each of the four quarters in the reference period, this financial product held 0 issuers (or exposure $0 \%$ by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards. |
| The indicators of Principal Adverse Impact as defined by the SFDR. | The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template. |
| The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities. | The weighted average carbon intensity of this financial product has remained more than $10 \%$ lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below. <br> A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. |
| The percentile rank of an issuers ESG score relative to industry peers | This investment product held 1 issuer ( $0.15 \%$ by weight) which did not which are deemed by an independent ESG data provider to rank, relative to a sector peer group, as below the median sector score. |

Reference index used:
Bloomberg Barclays Global Aggregate Corporate Total Return Index Hedged EUR

The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.
....and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

> Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse
impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAls. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment <br> Manager's risk team and portfolio managers. |
| :---: | :---: | :--- |
| Policies, processes and compliance <br> mechanisms to monitor <br> compliance with UN Global <br> Compact principles and OECD <br> Guidelines for Multinational <br> Enterprises | High | Medium |

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2022 30/11/2023

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

|  | Largest investments | Sector | \% Assets | Country |
| :---: | :---: | :---: | :---: | :---: |
|  | Standard Chartered Plc | Financial and Insurance Activities | 1.72\% | GB |
| The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: | Westpac Banking Corp | Financial and Insurance Activities | 1.58\% | AU |
|  | Vena Energy Cap Pte Ltd | Construction | 1.47\% | SG |
|  | Aust \& Nz Banking Group | Financial and Insurance Activities | 1.46\% | AU |
|  | Unicredit Spa | Financial and Insurance Activities | 1.29\% | IT |
|  | Veolia Environnement Sa | Water Supply; Sewerage, Waste | 1.09\% | FR |
|  | Sysco Corporation | Wholesale and Retail Trade; Repair of Motor | 1.01\% | US |
|  | Sweihan Pv Power Co Pjsc | Construction | 1.00\% | AE |
|  | Rec Limited | Financial and Insurance Activities | 0.98\% | IN |
|  | Bank Of America Corp | Financial and Insurance Activities | 0.98\% | US |
| $\begin{gathered} 01 / 12 / 2022- \\ 30 / 11 / 2023 \end{gathered}$ | Fibria Overseas Finance | Manufacturing | 0.97\% | BR |
|  | Morgan Stanley | Financial and Insurance Activities | 0.97\% | US |
|  | T-mobile Usa Inc | Information And Communication | 0.93\% | US |
|  | Broadcom Crp / Caymn Fi | Manufacturing | 0.90\% | US |
|  | Advance Auto Parts | Wholesale and Retail Trade; Repair of Motor | 0.89\% | US |

## What was the proportion of sustainability-related investments?

## Asset allocation

describes the share of investments in specific assets.

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below. []

## What was the asset allocation?

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

## In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $1.42 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $1.64 \%$ |
| Agriculture, Forestry and Fishing | $0.00 \%$ |
| Arts, Entertainment and Recreation | $0.00 \%$ |
| Construction | $3.15 \%$ |
| Education | $0.00 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $2.91 \%$ |
| Financial and Insurance Activities | $35.97 \%$ |
| Human Health And Social Work Activities | $0.26 \%$ |
| Information And Communication | $10.16 \%$ |
| Manufacturing | $20.14 \%$ |
| Mining and Quarrying | $0.76 \%$ |
| Other Service Activities | $0.03 \%$ |
| Professional, Scientific and Technical Activities | $0.63 \%$ |
| Public Administration and Defence; Compulsory Social Security | $0.00 \%$ |
| Real Estate Activities | $9.30 \%$ |
| Transportation and Storage | $3.97 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $1.09 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $6.79 \%$ |
| Cash or data unavailable | $0.29 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy'?

X
Yes, $\qquad$
X
In fossil gas
X
In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.

## - capital

expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure (OpEx) reflects the green operational activities of investee companies.

## Enabling activities

 directly enable other activities to make a substantial contribution to an environmental objective.
## Transitional

activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.04 \%$ | $0.12 \%$ | $0.01 \%$ |
| Taxonomy-aligned Nuclear | $0.84 \%$ | $1.12 \%$ | $0.50 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $1.03 \%$ | $4.42 \%$ | $5.21 \%$ |
| Non Taxonomy-aligned | $98.08 \%$ | $94.34 \%$ | $94.28 \%$ |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.04 \%$ | $0.12 \%$ | $0.01 \%$ |
| Taxonomy-aligned Fossil gas | $0.85 \%$ | $1.14 \%$ | $0.51 \%$ |
| Taxonomy-aligned Nuclear | $1.05 \%$ | $4.48 \%$ | $5.28 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $98.06 \%$ | $94.26 \%$ | $94.19 \%$ |
| Non Taxonomy-aligned |  |  |  |

[^35]
## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

| Investments in Transitioning and Enabling Activities |  |
| :---: | :---: |
| Transitional activities | $0.00 \%$ |
| Enabling activities | $0.90 \%$ |

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $5.72 \%$, while the figure for the previous reference period was 6.76\%.
sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are
indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

# How did this financial product perform compared to the reference benchmark? 

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

PAI Report

| Principal adverse sustainability impacts statement |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Adverse Sustainability Indicator |  | Metric | Units | This | Previous | Actions taken |
|  | 1. GHG emissions | Scope 1 GHG emissions | tCO2e | 61,138 | 6,826 | This financial product applies a carbon efficiency target whereby the Investment Manager seeks to maintain a weighted average carbon intensity (WACI) at least $10 \%$ lower than that of the relevant reference index. Further information is available in the relevant precontractual disclosures. |
|  |  | Scope 2 GHG emissions |  | 6,867 | 2,241 |  |

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj . Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.
That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

 indicators measure how the environmental or social characteristics promoted by the financial product are attained.
## Product name:

Legal entity identifier:

## Muzinich LongShortCreditYield Fund

549300T036TR20Y6DW57

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

It made sustainable investments with an environmental objective: _\%

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
$\square$
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: $\qquad$

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $0.46 \%$ of sustainable investments.

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective $\square$

It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

## How did the sustainability indicators perform?

The sustainability indicators performed as follows:

| The percentage of an individual <br> issuer's revenue which may be <br> derived from specific business <br> activities (e.g., controversial <br> weapons production). | At the end of each of the four quarters in the reference period, this financial <br> product: <br> - Held 0 issuers (0\% by weight) involved in the end manufacture of <br> controversial weapons <br> - Held 0 issuers (O\% by weight) deriving more than 10\% of revenues from <br> tobacco production <br> - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from <br> coal mining or coal-related electricity generation, or issuers with up to 30\% of <br> coal-related revenues which had not made a public commitment to |
| :--- | :--- |
| decommission their coal assets by 2025. |  |

Reference index used: ICE BofA US Cash Pay High Yield Index
The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.
...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct involvement in entities which derived more than $10 \%$ of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index. <br> The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor. <br> The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor. |
| :---: | :---: | :---: |
| Carbon footprint | High |  |
| GHG intensity of investee companies | High |  |
| Exposure to activities in the fossil fuel sector | High |  |
| Non-renewable energy consumption and production | Medium |  |
| Energy consumption intensity per high impact climate sector | Low |  |
| Activities negatively affecting biodiversity-sensitive areas | Medium |  |
| Emissions to water | Low |  |
| Hazardous waste ratio | Low |  |

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment <br> Manager's risk team and portfolio managers. |
| :---: | :---: | :--- |
| Policies, processes and compliance <br> mechanisms to monitor <br> compliance with UN Global <br> Compact principles and OECD <br> Guidelines for Multinational <br> Enterprises | High | Medium |

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2022 30/11/2023

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

| Largest investments | Sector |  | \% Assets | Country |
| :--- | :--- | :--- | :--- | :--- |
| Caesars Entertain Inc | Arts, Entertainment and Recreation | $2.45 \%$ | US |  |
| Albertsons Cos/safeway | Wholesale and Retail Trade; Repair of Motor | $1.85 \%$ | US |  |
| American Airlines Inc | Transportation and Storage | $1.80 \%$ | US |  |
| Cco HIdgs LIc/cap Corp | Information And Communication | $1.46 \%$ | US |  |
| Treasury Bill | Public Administration and Defence; | $1.44 \%$ | US |  |
| Tallgrass Nrg Prtnr/fin | Transportation and Storage | $1.33 \%$ | US |  |
| Hat Holdings I Llc/hat | Real Estate Activities | $1.32 \%$ | US |  |
| Enviva Partners Lp/fin C | Manufacturing | $1.30 \%$ | US |  |
| Muzinich Eu Cre Al-heuraccnx | Financial and Insurance Activities | $1.20 \%$ | IE |  |
| Irb Holding Corp | Accommodation and Food Service Activities | $1.18 \%$ | US |  |
| Hyatt Hotels Corp | Accommodation and Food Service Activities | $1.09 \%$ | US |  |
| Citgo Petroleum Corp | Manufacturing | $1.07 \%$ | US |  |
| Calpine Construction Finance Co | Electricity, Gas, Steam and Air Conditioning | $1.04 \%$ | US |  |
| Fce Bank Plc | Manufacturing | $1.03 \%$ | GB |  |
| Deutsche Bank Ag | Financial and Insurance Activities | $0.94 \%$ | DE |  |

## What was the proportion of sustainability-related investments?

## Asset allocation

describes the share of investments in specific assets.

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below. []

## What was the asset allocation?

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $3.75 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $1.55 \%$ |
| Agriculture, Forestry and Fishing | $0.00 \%$ |
| Arts, Entertainment and Recreation | $5.04 \%$ |
| Construction | $1.69 \%$ |
| Education | $0.03 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $3.06 \%$ |
| Financial and Insurance Activities | $11.72 \%$ |
| Human Health And Social Work Activities | $4.25 \%$ |
| Information And Communication | $10.57 \%$ |
| Manufacturing | $22.69 \%$ |
| Mining and Quarrying | $7.74 \%$ |
| Other Service Activities | $0.00 \%$ |
| Professional, Scientific and Technical Activities | $0.50 \%$ |
| Public Administration and Defence; Compulsory Social Security | $1.62 \%$ |
| Real Estate Activities | $4.40 \%$ |
| Transportation and Storage | $9.45 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $1.01 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $4.70 \%$ |
| Cash or data unavailable | $1.76 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy'?

X
Yes, $\qquad$
X
In fossil gas
X
In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.

## - capital

expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure (OpEx) reflects the green operational activities of investee companies.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional

 activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.00 \%$ | $0.08 \%$ | $0.06 \%$ |
| Taxonomy-aligned Nuclear | $0.00 \%$ | $0.08 \%$ | $0.04 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.01 \%$ | $0.34 \%$ | $0.38 \%$ |
| Non Taxonomy-aligned | $99.99 \%$ | $99.50 \%$ | $99.52 \%$ |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.00 \%$ | $0.09 \%$ | $0.07 \%$ |
| Taxonomy-aligned Fossil gas | $0.00 \%$ | $0.08 \%$ | $0.04 \%$ |
| Taxonomy-aligned Nuclear | $0.01 \%$ | $0.37 \%$ | $0.40 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $99.99 \%$ | $99.55 \%$ | $99.51 \%$ |
| Non Taxonomy-aligned |  |  |  |

[^36]
## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

| Investments in Transitioning and Enabling Activities |  |
| :---: | :---: |
| Transitional activities | $0.00 \%$ |
| Enabling activities | $0.18 \%$ |

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $0.46 \%$, while the figure for the previous reference period was $0.75 \%$.
sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

# How did this financial product perform compared to the reference benchmark? 

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj . Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.
That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: $\qquad$

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $3.78 \%$ of sustainable investments.

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective $\square$

It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

## How did the sustainability indicators perform?

The sustainability indicators performed as follows:

| The percentage of an individual <br> issuer's revenue which may be <br> derived from specific business <br> activities (e.g., controversial <br> weapons production). | At the end of each of the four quarters in the reference period, this financial <br> product: <br> - Held 0 issuers (0\% by weight) involved in the end manufacture of <br> controversial weapons <br> - Held 0 issuers (O\% by weight) deriving more than 10\% of revenues from <br> tobacco production <br> - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from <br> coal mining or coal-related electricity generation, or issuers with up to 30\% of <br> coal-related revenues which had not made a public commitment to |
| :--- | :--- |
| decommission their coal assets by 2025. |  |

Reference index used: ICE BofA ML Custom Emerging Markets Short Duration Index
The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.

## ...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct involvement in entities which derived more than $10 \%$ of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index. <br> The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor. <br> The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor. |
| :---: | :---: | :---: |
| Carbon footprint | High |  |
| GHG intensity of investee companies | High |  |
| Exposure to activities in the fossil fuel sector | High |  |
| Non-renewable energy consumption and production | Medium |  |
| Energy consumption intensity per high impact climate sector | Low |  |
| Activities negatively affecting biodiversity-sensitive areas | Medium |  |
| Emissions to water | Low |  |
| Hazardous waste ratio | Low |  |

## What was the proportion of sustainability-related investments?

## Asset allocation

describes the share of investments in specific assets.

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below. []

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $2.90 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $0.80 \%$ |
| Agriculture, Forestry and Fishing | $0.00 \%$ |
| Arts, Entertainment and Recreation | $1.48 \%$ |
| Construction | $2.79 \%$ |
| Education | $1.80 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $4.59 \%$ |
| Financial and Insurance Activities | $22.52 \%$ |
| Human Health And Social Work Activities | $0.00 \%$ |
| Information And Communication | $8.45 \%$ |
| Manufacturing | $25.65 \%$ |
| Mining and Quarrying | $8.25 \%$ |
| Other Service Activities | $0.00 \%$ |
| Professional, Scientific and Technical Activities | $1.19 \%$ |
| Public Administration and Defence; Compulsory Social Security | $1.38 \%$ |
| Real Estate Activities | $6.23 \%$ |
| Transportation and Storage | $6.85 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $0.00 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $3.44 \%$ |
| Cash or data unavailable | $0.24 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy'?

X
Yes, $\qquad$
X
In fossil gas
X
In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.

## - capital

expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure (OpEx) reflects the green operational activities of investee companies.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional

 activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.00 \%$ | $0.01 \%$ | $0.02 \%$ |
| Taxonomy-aligned Nuclear | $0.00 \%$ | $0.00 \%$ | $0.00 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.00 \%$ | $2.63 \%$ | $3.77 \%$ |
| Non Taxonomy-aligned | $100.00 \%$ | $97.36 \%$ | $96.22 \%$ |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.00 \%$ | $0.01 \%$ | $0.02 \%$ |
| Taxonomy-aligned Nuclear | $0.00 \%$ | $0.00 \%$ | $0.00 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.00 \%$ | $2.71 \%$ | $3.87 \%$ |
| Non Taxonomy-aligned | $100.00 \%$ | $97.28 \%$ | $96.11 \%$ |

[^37]
## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

| Investments in Transitioning and Enabling Activities |  |
| :---: | :---: |
| Transitional activities | $0.09 \%$ |
| Enabling activities | $0.23 \%$ |

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $3.78 \%$, while the figure for the previous reference period was $3.84 \%$.
sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

## What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

 indicators measure how the environmental or social characteristics promoted by the financial product are attained.
## Product name:

Legal entity identifier:

Muzinich Global Tactical Credit Fund
549300914IEWVSQ6QI72

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

It made sustainable investments with an environmental objective: _\%

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
$\square$
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: $\qquad$

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $2.95 \%$ of sustainable investments.

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective
$\square$ It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

The sustainability indicators performed as follows:

| The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production). | At the end of each of the four quarters in the reference period, this financial product: <br> - Held 0 issuers ( $0 \%$ by weight) involved in the end manufacture of controversial weapons <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from gambling operations <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from adult entertainment <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from tobacco production <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from coal mining or coal-related electricity generation |
| :---: | :---: |
| An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards. | The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee. <br> At the end of each of the four quarters in the reference period, this financial product held 0 issuers (or exposure $0 \%$ by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards. |
| The indicators of Principal Adverse Impact as defined by the SFDR. | The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template. |
| The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities. | The weighted average carbon intensity of this financial product has remained more than $10 \%$ lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below. <br> A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. |

Reference index used: ICE BofA Global Corporate \& High Yield Index
The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.
...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct involvement in entities which derived more than $10 \%$ of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index. <br> The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor. <br> The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor. |
| :---: | :---: | :---: |
| Carbon footprint | High |  |
| GHG intensity of investee companies | High |  |
| Exposure to activities in the fossil fuel sector | High |  |
| Non-renewable energy consumption and production | Medium |  |
| Energy consumption intensity per high impact climate sector | Low |  |
| Activities negatively affecting biodiversity-sensitive areas | Medium |  |
| Emissions to water | Low |  |
| Hazardous waste ratio | Low |  |

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment <br> Manager's risk team and portfolio managers. |
| :---: | :---: | :--- |

| Oracle Corp | Information And Communication | $0.74 \%$ | US |

## What was the proportion of sustainability-related investments?

## Asset allocation

describes the share of investments in specific assets.

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.?

## What was the asset allocation?

\#1 Aligned with $\mathrm{E} / \mathrm{S}$ characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

## In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $3.32 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $1.74 \%$ |
| Agriculture, Forestry and Fishing | $0.00 \%$ |
| Arts, Entertainment and Recreation | $0.00 \%$ |
| Construction | $0.91 \%$ |
| Education | $0.00 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $2.29 \%$ |
| Financial and Insurance Activities | $14.48 \%$ |
| Human Health And Social Work Activities | $1.90 \%$ |
| Information And Communication | $8.20 \%$ |
| Manufacturing | $26.94 \%$ |
| Mining and Quarrying | $1.94 \%$ |
| Other Service Activities | $0.32 \%$ |
| Professional, Scientific and Technical Activities | $0.88 \%$ |
| Public Administration and Defence; Compulsory Social Security | $16.16 \%$ |
| Real Estate Activities | $4.37 \%$ |
| Transportation and Storage | $8.47 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $0.64 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $5.46 \%$ |
| Cash or data unavailable | $0.43 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy'?

X
Yes, $\qquad$
X
In fossil gas
X
In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.

## - capital

expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure (OpEx) reflects the green operational activities of investee companies.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional

 activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.04 \%$ | $0.43 \%$ | $0.35 \%$ |
| Taxonomy-aligned Fossil gas | $0.38 \%$ | $0.47 \%$ | $0.11 \%$ |
| Taxonomy-aligned Nuclear | $0.89 \%$ | $2.32 \%$ | $2.49 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $98.69 \%$ | $96.78 \%$ | $97.05 \%$ |
| Non Taxonomy-aligned |  |  |  |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.05 \%$ | $0.53 \%$ | $0.43 \%$ |
| Taxonomy-aligned Fossil gas | $0.47 \%$ | $0.57 \%$ | $0.13 \%$ |
| Taxonomy-aligned Nuclear | $1.08 \%$ | $2.83 \%$ | $3.04 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $98.40 \%$ | $96.07 \%$ | $96.40 \%$ |
| Non Taxonomy-aligned |  |  |  |

[^38]
## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

| Investments in Transitioning and Enabling Activities |  |
| :---: | :---: |
| Transitional activities | $0.37 \%$ |
| Enabling activities | $1.16 \%$ |

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $2.95 \%$, while the figure for the previous reference period was $1.12 \%$.
sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

# How did this financial product perform compared to the reference benchmark? 

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

 indicators measure how the environmental or social characteristics promoted by the financial product are attained.
## Product name:

Legal entity identifier:

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

$\square$
$\square$

## No

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $4.35 \%$ of sustainable investments.
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: \%
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

$\square$

It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

## How did the sustainability indicators perform?

The sustainability indicators performed as follows:

| The percentage of an individual <br> issuer's revenue which may be <br> derived from specific business <br> activities (e.g., controversial <br> weapons production). | At the end of each of the four quarters in the reference period, this financial <br> product: <br> - Held 0 issuers (0\% by weight) involved in the end manufacture of <br> controversial weapons <br> - Held 0 issuers (O\% by weight) deriving more than 10\% of revenues from <br> tobacco production <br> - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from <br> coal mining or coal-related electricity generation, or issuers with up to 30\% of <br> coal-related revenues which had not made a public commitment to |
| :--- | :--- |
| decommission their coal assets by 2025. |  |

Portfolio weighted average carbon intensity versus reference index

Reference index used: ICE BofA Asian Dollar Index
The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.
...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

## Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct involvement in entities which derived more than $10 \%$ of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index. <br> The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor. <br> The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor. |
| :---: | :---: | :---: |
| Carbon footprint | High |  |
| GHG intensity of investee companies | High |  |
| Exposure to activities in the fossil fuel sector | High |  |
| Non-renewable energy consumption and production | Medium |  |
| Energy consumption intensity per high impact climate sector | Low |  |
| Activities negatively affecting biodiversity-sensitive areas | Medium |  |
| Emissions to water | Low |  |
| Hazardous waste ratio | Low |  |

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment <br> Manager's risk team and portfolio managers. |
| :---: | :---: | :--- |
| Policies, processes and compliance <br> mechanisms to monitor <br> compliance with UN Global <br> Compact principles and OECD <br> Guidelines for Multinational <br> Enterprises | High | Medium |

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2022 30/11/2023

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

|  | Largest investments | Sector | \% Assets | Country |
| :---: | :---: | :---: | :---: | :---: |
|  | Cathay Pac Mtn Fin Hk | Transportation and Storage | 2.42\% | HK |
| The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: | China Cinda 2020 I Mngmn | Financial and Insurance Activities | 2.35\% | CN |
|  | Bank Of East Asia Ltd | Financial and Insurance Activities | 2.01\% | HK |
|  | Star Energy Co Issue | Electricity, Gas, Steam and Air Conditioning | 1.98\% | ID |
|  | Fortune Star Bvi Ltd | Accommodation and Food Service Activities | 1.96\% | CN |
|  | Upl Corp Ltd | Manufacturing | 1.94\% | IN |
|  | Prosus Nv | Information And Communication | 1.92\% | CN |
|  | Meituan | Information And Communication | 1.88\% | CN |

## What was the proportion of sustainability-related investments?

## Asset allocation

describes the share of investments in specific assets.

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below. []

## What was the asset allocation?

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $4.53 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $0.00 \%$ |
| Agriculture, Forestry and Fishing | $0.00 \%$ |
| Arts, Entertainment and Recreation | $4.85 \%$ |
| Construction | $1.46 \%$ |
| Education | $0.00 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $9.14 \%$ |
| Financial and Insurance Activities | $26.64 \%$ |
| Human Health And Social Work Activities | $0.00 \%$ |
| Information And Communication | $8.11 \%$ |
| Manufacturing | $20.23 \%$ |
| Mining and Quarrying | $1.25 \%$ |
| Other Service Activities | $0.00 \%$ |
| Professional, Scientific and Technical Activities | $0.00 \%$ |
| Public Administration and Defence; Compulsory Social Security | $1.41 \%$ |
| Real Estate Activities | $6.50 \%$ |
| Transportation and Storage | $10.00 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $0.00 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $1.59 \%$ |
| Cash or data unavailable | $0.62 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy'?

X
Yes, $\qquad$
X
In fossil gas
X
In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.

## - capital

expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure (OpEx) reflects the green operational activities of investee companies.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional

 activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.00 \%$ | $0.05 \%$ | $0.03 \%$ |
| Taxonomy-aligned Nuclear | $0.00 \%$ | $0.00 \%$ | $0.00 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.28 \%$ | $2.54 \%$ | $4.31 \%$ |
| Non Taxonomy-aligned | $99.72 \%$ | $97.41 \%$ | $95.65 \%$ |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.00 \%$ | $0.06 \%$ | $0.04 \%$ |
| Taxonomy-aligned Nuclear | $0.00 \%$ | $0.00 \%$ | $0.00 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.30 \%$ | $2.72 \%$ | $4.62 \%$ |
| Non Taxonomy-aligned | $99.70 \%$ | $97.22 \%$ | $95.34 \%$ |

[^39]
## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

| Investments in Transitioning and Enabling Activities |  |
| :---: | :---: |
| Transitional activities | $0.07 \%$ |
| Enabling activities | $1.10 \%$ |

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $4.35 \%$, while the figure for the previous reference period was 7.70\%.
sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

# How did this financial product perform compared to the reference benchmark? 

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

| PAl Report |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj . Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.
That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

 indicators measure how the environmental or social characteristics promoted by the financial product are attained.
## Product name:

Legal entity identifier:

Muzinich Emerging Market Corporate Debt Fund
549300720XDMF6SMWG51

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
$\square$
in economic activities that do
not qualify as environmentally
in economic activities that do
not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: \%

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $1.93 \%$ of sustainable investments.

## No

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective $\square$

It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

## How did the sustainability indicators perform?

The sustainability indicators performed as follows:

| The percentage of an individual <br> issuer's revenue which may be <br> derived from specific business <br> activities (e.g., controversial <br> weapons production). | At the end of each of the four quarters in the reference period, this financial <br> product: <br> - Held 0 issuers (0\% by weight) involved in the end manufacture of <br> controversial weapons <br> - Held 0 issuers (O\% by weight) deriving more than 10\% of revenues from <br> tobacco production <br> - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from <br> coal mining or coal-related electricity generation, or issuers with up to 30\% of <br> coal-related revenues which had not made a public commitment to |
| :--- | :--- |
| decommission their coal assets by 2025. |  |

Reference index used: ICE BofA US Emerging Markets Liquid Corporate Plus Index
The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.

## ...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct involvement in entities which derived more than $10 \%$ of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index. <br> The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor. <br> The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor. |
| :---: | :---: | :---: |
| Carbon footprint | High |  |
| GHG intensity of investee companies | High |  |
| Exposure to activities in the fossil fuel sector | High |  |
| Non-renewable energy consumption and production | Medium |  |
| Energy consumption intensity per high impact climate sector | Low |  |
| Activities negatively affecting biodiversity-sensitive areas | Medium |  |
| Emissions to water | Low |  |
| Hazardous waste ratio | Low |  |

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment |
| :---: | :---: | :--- |
| Policies, processes and compliance <br> mechanisms to monitor <br> compliance with UN Global <br> Compact principles and OECD <br> Guidelines for Multinational <br> Enterprises | High | Manager's risk team and portfolio managers. |

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2022 30/11/2023

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

| Largest investments | Sector | \% Assets | Country |
| :---: | :---: | :---: | :---: |
| Petroleos Mexicanos | Manufacturing | 2.17\% | MX |
| Teva Pharm Fnc NIII | Manufacturing | 1.58\% | IL |
| Fortune Star Bvi Ltd | Accommodation and Food Service Activities | 1.51\% | CN |
| Gold Fields Orogen Hold | Mining and Quarrying | 1.19\% | ZA |

| Mdgh Gmtn Rsc Ltd | Financial and Insurance Activities | 0.96\% | AE |
| National Central Cooling | Electricity, Gas, Steam and Air Conditioning | 0.95\% | AE |

## What was the proportion of sustainability-related investments?

## Asset allocation

describes the share of investments in specific assets.

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below. []

## What was the asset allocation?

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $2.91 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $0.88 \%$ |
| Agriculture, Forestry and Fishing | $0.00 \%$ |
| Arts, Entertainment and Recreation | $1.72 \%$ |
| Construction | $1.63 \%$ |
| Education | $0.67 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $5.97 \%$ |
| Financial and Insurance Activities | $16.97 \%$ |
| Human Health And Social Work Activities | $0.59 \%$ |
| Information And Communication | $6.84 \%$ |
| Manufacturing | $33.59 \%$ |
| Mining and Quarrying | $8.26 \%$ |
| Other Service Activities | $0.00 \%$ |
| Professional, Scientific and Technical Activities | $0.06 \%$ |
| Public Administration and Defence; Compulsory Social Security | $0.70 \%$ |
| Real Estate Activities | $5.57 \%$ |
| Transportation and Storage | $6.87 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $0.00 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $3.15 \%$ |
| Cash or data unavailable | $1.17 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy'?

X
Yes, $\qquad$
X
In fossil gas
X
In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.

## - capital

expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure (OpEx) reflects the green operational activities of investee companies.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional

 activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.00 \%$ | $0.01 \%$ | $0.01 \%$ |
| Taxonomy-aligned Nuclear | $0.00 \%$ | $0.01 \%$ | $0.02 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.00 \%$ | $1.04 \%$ | $1.90 \%$ |
| Non Taxonomy-aligned | $100.00 \%$ | $98.94 \%$ | $98.07 \%$ |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.00 \%$ | $0.01 \%$ | $0.01 \%$ |
| Taxonomy-aligned Nuclear | $0.00 \%$ | $0.01 \%$ | $0.02 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.00 \%$ | $1.08 \%$ | $1.97 \%$ |
| Non Taxonomy-aligned | $100.00 \%$ | $98.90 \%$ | $98.00 \%$ |

[^40]
## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

| Investments in Transitioning and Enabling Activities |  |
| :---: | :---: |
| Transitional activities | $0.18 \%$ |
| Enabling activities | $0.46 \%$ |

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was 1.93\%, while the figure for the previous reference period was $2.59 \%$.
sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

## What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are
indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACl target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

| PAl Report |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Principal adverse sustainability impacts statement |  |  |  |  |  |  |
| Adverse Sustainability Indicator |  | Metric | Units | This | Previous | Actions taken |
| Greenhouse gas emissions | 1. GHG emissions | Scope 1 GHG emissions | tCO2e | 375,490 | 80,607 | This financial product applies a carbon efficiency target whereby the Investment Manager seeks to maintain a weighted average carbon intensity (WACI) at least $10 \%$ lower than that of the relevant reference index. Further information is available in the relevant precontractual disclosures. |
|  |  | Scope 2 GHG emissions |  | 88,847 | 13,256 |  |
|  |  | Scope 3 GHG emissions |  | 464,337 | 349,192 |  |

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.
That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

 indicators measure how the environmental or social characteristics promoted by the financial product are attained.
## Product name:

Legal entity identifier:

## Muzinich European Credit Alpha Fund

549300ZKLE9R6P9GS41

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $\mathbf{2 . 3 7 \%}$ of sustainable investments.
X No

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
$\square$
in economic activities that do
not qualify as environmentally
in economic activities that do
not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: _\%
with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

## How did the sustainability indicators perform?

The sustainability indicators performed as follows:

| The percentage of an individual <br> issuer's revenue which may be <br> derived from specific business <br> activities (e.g., controversial <br> weapons production). | At the end of each of the four quarters in the reference period, this financial <br> product: <br> - Held 0 issuers (0\% by weight) involved in the end manufacture of <br> controversial weapons <br> - Held 0 issuers (O\% by weight) deriving more than 10\% of revenues from <br> tobacco production <br> - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from <br> coal mining or coal-related electricity generation, or issuers with up to 30\% of <br> coal-related revenues which had not made a public commitment to |
| :--- | :--- |
| decommission their coal assets by 2025. |  |

Reference index used: ICE BofA BB-B Euro High Yield Constrained Index
The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.
...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct involvement in entities which derived more than $10 \%$ of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index. <br> The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor. <br> The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor. |
| :---: | :---: | :---: |
| Carbon footprint | High |  |
| GHG intensity of investee companies | High |  |
| Exposure to activities in the fossil fuel sector | High |  |
| Non-renewable energy consumption and production | Medium |  |
| Energy consumption intensity per high impact climate sector | Low |  |
| Activities negatively affecting biodiversity-sensitive areas | Medium |  |
| Emissions to water | Low |  |
| Hazardous waste ratio | Low |  |

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment |
| :---: | :---: | :--- |
| Policies, processes and compliance <br> mechanisms to monitor <br> compliance with UN Global <br> Compact principles and OECD <br> Guidelines for Multinational <br> Enterprises | High | Manager's risk team and portfolio managers. |

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2022 30/11/2023

## Asset allocation

describes the share of investments in specific assets.

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

## What was the asset allocation?

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $1.60 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $2.87 \%$ |
| Agriculture, Forestry and Fishing | $0.37 \%$ |
| Arts, Entertainment and Recreation | $2.55 \%$ |
| Construction | $1.41 \%$ |
| Education | $0.34 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $2.74 \%$ |
| Financial and Insurance Activities | $30.24 \%$ |
| Human Health And Social Work Activities | $0.79 \%$ |
| Information And Communication | $12.95 \%$ |
| Manufacturing | $20.54 \%$ |
| Mining and Quarrying | $1.60 \%$ |
| Other Service Activities | $0.00 \%$ |
| Professional, Scientific and Technical Activities | $1.50 \%$ |
| Public Administration and Defence; Compulsory Social Security | $1.18 \%$ |
| Real Estate Activities | $5.09 \%$ |
| Transportation and Storage | $6.37 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $0.49 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $1.43 \%$ |
| Cash or data unavailable | $0.39 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy'?

X
Yes, $\qquad$
X
In fossil gas
X
In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.

## - capital

expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- operational expenditure (OpEx) reflects the green operational activities of investee companies.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional

 activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.75 \%$ | $1.11 \%$ | $0.51 \%$ |
| Taxonomy-aligned Nuclear | $1.00 \%$ | $1.35 \%$ | $0.66 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.31 \%$ | $1.34 \%$ | $1.67 \%$ |
| Non Taxonomy-aligned | $97.94 \%$ | $96.20 \%$ | $97.16 \%$ |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.80 \%$ | $1.19 \%$ | $0.54 \%$ |
| Taxonomy-aligned Nuclear | $1.07 \%$ | $1.44 \%$ | $0.71 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.33 \%$ | $1.44 \%$ | $1.79 \%$ |
| Non Taxonomy-aligned | $98.44 \%$ | $96.77 \%$ | $97.46 \%$ |

[^41]
## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

| Investments in Transitioning and Enabling Activities |  |
| :---: | :---: |
| Transitional activities | $0.04 \%$ |
| Enabling activities | $0.52 \%$ |

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $2.37 \%$, while the figure for the previous reference period was $1.28 \%$.
sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

# How did this financial product perform compared to the reference benchmark? 

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj . Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

 indicators measure how the environmental or social characteristics promoted by the financial product are attained.Product name:
Legal entity identifier:

Muzinich Global Short Duration Investment Grade Fund
549300YFME7OYE62ZO42

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

It made sustainable investments with an environmental objective: _\%

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
$\square$
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: $\qquad$

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $\mathbf{4 . 4 4 \%}$ of sustainable investments.

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective

It promoted $\mathrm{E} / \mathrm{S}$ characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

## How did the sustainability indicators perform?

The sustainability indicators performed as follows:

| The percentage of an individual <br> issuer's revenue which may be <br> derived from specific business <br> activities (e.g., controversial <br> weapons production). | At the end of each of the four quarters in the reference period, this financial <br> product: <br> - Held 0 issuers (0\% by weight) involved in the end manufacture of <br> controversial weapons <br> - Held 0 issuers (O\% by weight) deriving more than 10\% of revenues from <br> tobacco production <br> - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from <br> coal mining or coal-related electricity generation, or issuers with up to 30\% of <br> coal-related revenues which had not made a public commitment to |
| :--- | :--- |
| decommission their coal assets by 2025. |  |

Reference index used: ICE BofA 1-3 Year Global Corporate Index
The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.
...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct involvement in entities which derived more than $10 \%$ of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index. <br> The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor. <br> The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor. |
| :---: | :---: | :---: |
| Carbon footprint | High |  |
| GHG intensity of investee companies | High |  |
| Exposure to activities in the fossil fuel sector | High |  |
| Non-renewable energy consumption and production | Medium |  |
| Energy consumption intensity per high impact climate sector | Low |  |
| Activities negatively affecting biodiversity-sensitive areas | Medium |  |
| Emissions to water | Low |  |
| Hazardous waste ratio | Low |  |

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment <br> Manager's risk team and portfolio managers. |

## What was the proportion of sustainability-related investments?

## Asset allocation

describes the share of investments in specific assets.

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $1.79 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.23 \%$ |
| Administrative and Support Service Activities | $3.24 \%$ |
| Agriculture, Forestry and Fishing | $0.00 \%$ |
| Arts, Entertainment and Recreation | $0.16 \%$ |

| Manufacturing | $19.93 \%$ |
| Mining and Quarrying | $1.50 \%$ |
| Other Service Activities | $0.45 \%$ |
| Professional, Scientific and Technical Activities | $0.52 \%$ |
| Public Administration and Defence; Compulsory Social Security | $0.00 \%$ |
| Real Estate Activities | $8.84 \%$ |
| Transportation and Storage | $5.31 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $0.66 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $2.46 \%$ |
| Cash or data unavailable | $0.19 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy'?

Yes, $\qquad$ $X \quad$ In fossil gas $\quad$ In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.

## - capital expenditure

 (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.- operational expenditure (OpEx) reflects the green operational activities of investee companies.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional

 activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.00 \%$ | $0.00 \%$ | $0.00 \%$ |
| Taxonomy-aligned Fossil gas | $0.28 \%$ | $0.35 \%$ | $0.08 \%$ |
| Taxonomy-aligned Nuclear | $1.09 \%$ | $3.97 \%$ | $4.36 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $98.63 \%$ | $95.67 \%$ | $95.56 \%$ |
| Non Taxonomy-aligned |  |  |  |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.00 \%$ | $0.00 \%$ | $0.00 \%$ |
| Taxonomy-aligned Fossil gas | $0.29 \%$ | $0.36 \%$ | $0.09 \%$ |
| Taxonomy-aligned Nuclear | $1.13 \%$ | $4.11 \%$ | $4.50 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $98.58 \%$ | $95.53 \%$ | $95.42 \%$ |
| Non Taxonomy-aligned |  |  |  |

[^42]
## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $4.44 \%$, while the figure for the previous reference period was $3.31 \%$.
sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

## What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

# How did this financial product perform compared to the reference benchmark? 

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

Reference period: 01/12/2022-30/11/2023

## Sustainable

 investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not lay down a list of socially sustainable economic activities.
Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

## Product name:

Legal entity identifier:

Muzinich Dynamic Credit Income Fund
549300MSJCNAPHIGUC69

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

It made sustainable investments with an environmental objective: _\%

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
$\square$
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: $\qquad$

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $\mathbf{2 . 3 3 \%}$ of sustainable investments.

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective

It promoted $\mathrm{E} / \mathrm{S}$ characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

The sustainability indicators performed as follows:

| The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production). | At the end of each of the four quarters in the reference period, this financial product: <br> - Held 0 issuers ( $0 \%$ by weight) involved in the end manufacture of controversial weapons <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from gambling operations <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from adult entertainment <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from tobacco production <br> - Held 0 issuers ( $0 \%$ by weight) deriving more than $10 \%$ of revenues from coal mining or coal-related electricity generation |
| :---: | :---: |
| An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards. | The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee. <br> At the end of each of the four quarters in the reference period, this financial product held 0 issuers (or exposure $0 \%$ by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards. |
| The indicators of Principal Adverse Impact as defined by the SFDR. | The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template. |
| The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities. | The weighted average carbon intensity of this financial product has remained more than $10 \%$ lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below. <br> A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. |

Reference index used
Custom: 70\% ICE BofA BB-B Global High Yield Index, 30\% ICE BofA BBB Global Corporate Index
The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.
...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

> Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse
impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAls. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct involvement in entities which derived more than $10 \%$ of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index. |
| :---: | :---: | :---: |
| Carbon footprint | High |  |
| GHG intensity of investee companies | High |  |
| Exposure to activities in the fossil |  |  |
| Non-renewable energy | Medium | The Investment Manager monitored these PAI via monthly |
| Energy consumption intensity per | Low | with certain issuers where it considers there to be an |
| Activities negatively affecting | Medium | The Investment Manager monitors controversies relating to |
| Emissions to water | Low | PAI and will consider further actions to mitigate it once it has |
| Hazardous waste ratio | Low | invest, or to divest from entities which cause severe adverse |

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment <br> Manager's risk team and portfolio managers. |
| :---: | :---: | :--- |
| Policies, processes and compliance <br> mechanisms to monitor <br> compliance with UN Global <br> Compact principles and OECD <br> Guidelines for Multinational <br> Enterprises | High | Medium |

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2022 30/11/2023

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

| Largest investments | Sector |  | \% Assets |
| :--- | :--- | :--- | :--- |
| Country |  |  |  |
| Us Treasury N/b | Public Administration and Defence; | $1.57 \%$ | US |
| Faurecia | Manufacturing | $1.03 \%$ | FR |
| T-mobile Usa Inc | Information And Communication | $0.92 \%$ | US |
| Wintershall Dea Fin 2bv | Mining and Quarrying | $0.88 \%$ | DE |
| Ecopetrol Sa | Manufacturing | $0.87 \%$ | CO |
| Sherwin-williams Co | Manufacturing | $0.85 \%$ | US |
| American Airlines Inc | Transportation and Storage | $0.84 \%$ | US |
| Spirit Aerosystems Inc | Manufacturing | $0.84 \%$ | US |
| Carnival Corp | Transportation and Storage | $0.81 \%$ | US |
| Royal Caribbean Cruises | Transportation and Storage | $0.80 \%$ | US |
| Blackstone Pp Eur Hold | Real Estate Activities | $0.75 \%$ | LU |
| Hilcorp Energy I/hilcorp | Mining and Quarrying | $0.71 \%$ | US |
| Sunnova Energy Corp | Construction | $0.70 \%$ | US |
| Northern Oil And Gas Inc | Mining and Quarrying | $0.68 \%$ | US |
| Crown Castle Inc | Real Estate Activities | $0.68 \%$ | US |

The proportion of sustainability-related investments for this financial product in the course of the

## Asset allocation

 describes the share of investments in specific assets. reference period is shown in the chart below. ${ }^{[ }$
## What was the asset allocation?

\#1 Aligned with $\mathrm{E} / \mathrm{S}$ characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

## In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $2.21 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $2.13 \%$ |
| Agriculture, Forestry and Fishing | $0.37 \%$ |
| Arts, Entertainment and Recreation | $0.00 \%$ |
| Construction | $2.12 \%$ |
| Education | $0.27 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $2.05 \%$ |
| Financial and Insurance Activities | $10.38 \%$ |
| Human Health And Social Work Activities | $1.83 \%$ |
| Information And Communication | $8.50 \%$ |
| Manufacturing | $33.97 \%$ |
| Mining and Quarrying | $6.40 \%$ |
| Other Service Activities | $0.25 \%$ |
| Professional, Scientific and Technical Activities | $1.71 \%$ |
| Public Administration and Defence; Compulsory Social Security | $1.97 \%$ |
| Real Estate Activities | $6.33 \%$ |
| Transportation and Storage | $8.82 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $0.77 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $4.03 \%$ |
| Cash or data unavailable | $0.88 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy'?

$\qquad$
X
In fossil gas
X
In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.
- capital
expenditure
(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure ( OpEx ) reflects the green operational activities of investee companies.

## Enabling activities

 directly enable other activities to make a substantial contribution to an environmental objective.
## Transitional

activities are activities for which low-carbon

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.21 \%$ | $0.36 \%$ | $0.15 \%$ |
| Taxonomy-aligned Fossil gas | $0.19 \%$ | $0.26 \%$ | $0.14 \%$ |
| Taxonomy-aligned Nuclear | $0.26 \%$ | $1.48 \%$ | $2.17 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $99.34 \%$ | $97.90 \%$ | $97.54 \%$ |
| Non Taxonomy-aligned |  |  |  |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
| Taxonomy-aligned Fossil gas | $0.22 \%$ | $0.39 \%$ | $0.16 \%$ |
| Taxonomy-aligned Nuclear | $0.20 \%$ | $0.27 \%$ | $0.16 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $0.28 \%$ | $1.59 \%$ | $2.33 \%$ |
| Non Taxonomy-aligned | $99.46 \%$ | $97.97 \%$ | $97.49 \%$ |

alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.
${ }^{1}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegate Regulation (EU) 2022/1214.

## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

| Investments in Transitioning and Enabling Activities |  |
| :---: | :---: |
| Transitional activities | $0.02 \%$ |
| Enabling activities | $0.83 \%$ |

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was $2.33 \%$, while the figure for the previous reference period was $1.78 \%$.
are
sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACl target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

Environmental and/or social characteristics

## Did this financial product have a sustainable investment objective?

It made sustainable investments with an environmental objective: _\%

$\square$
in economic activities that qualify as environmentally sustainable under the EU Taxonomy
$\square$
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: $\qquad$

It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective sustainable investment, it had a proportion of $6.30 \%$ of sustainable investments.

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also adheres to a weighted average carbon intensity (WACI) target to ensure that it remains at least $10 \%$ below that of the financial product's reference index. Moreover the portfolio investments are also required to follow good governance practices.

## How did the sustainability indicators perform?

The sustainability indicators performed as follows:

| The percentage of an individual <br> issuer's revenue which may be <br> derived from specific business <br> activities (e.g., controversial <br> weapons production). | At the end of each of the four quarters in the reference period, this financial <br> product: <br> - Held 0 issuers (0\% by weight) involved in the end manufacture of <br> controversial weapons <br> - Held 0 issuers (O\% by weight) deriving more than 10\% of revenues from <br> tobacco production <br> - Held 0 issuers (0\% by weight) deriving more than 10\% of revenues from <br> coal mining or coal-related electricity generation, or issuers with up to 30\% of <br> coal-related revenues which had not made a public commitment to |
| :--- | :--- |
| decommission their coal assets by 2025. |  |

Reference index used:
Custom: 60\%ICE BofA 1-3 Year Global Corporate Index, 40\% ICE BofA 1-3 Year BB-B Global High Yield Non-Financial Constrained Index

The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.

## ...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomyaligned business activities with climate mitigation and/or climate adaptation activities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAls") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAls was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.
During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager considered PAls on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAls as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAls on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAls by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

| GHG emissions | High | 1) This Financial Product excluded issuers with direct involvement in entities which derived more than $10 \%$ of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. <br> 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index. <br> The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor. <br> The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor. |
| :---: | :---: | :---: |
| Carbon footprint | High |  |
| GHG intensity of investee companies | High |  |
| Exposure to activities in the fossil fuel sector | High |  |
| Non-renewable energy consumption and production | Medium |  |
| Energy consumption intensity per high impact climate sector | Low |  |
| Activities negatively affecting biodiversity-sensitive areas | Medium |  |
| Emissions to water | Low |  |
| Hazardous waste ratio | Low |  |

| Violations of UN Global Compact <br> principles and Organization for <br> Economic Cooperation and <br> Development (OECD) Guidelines <br> for Multinational Enterprises | High | In circumstances where the Investment Manager or its <br> independent ESG data provider considers an issuer to have <br> severely breached the UNGC principles pr OECD guidelines for <br> multinational enterprises, the Investment Manager's internal <br> "ESG Eligibility Committee" was asked to determine whether <br> such an issuer should remain eligible for investment in this <br> financial product. Outcomes of the Eligibility Committee's <br> decisions are recorded and implemented via the Investment |

| Policies, processes and compliance <br> mechanisms to monitor <br> compliance with UN Global <br> Compact principles and OECD <br> Guidelines for Multinational <br> Enterprises | High | Manager's risk team and portfolio managers. |

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2022 30/11/2023

## What were the top investments of this financial product?

The 15 largest investments based on average portfolio weights over four quarter-ends in the reporting reference period were as follows:

|  | Largest investments | Sector | \% Assets | Country |
| :---: | :---: | :---: | :---: | :---: |
|  | Commerzbank Ag | Financial and Insurance Activities | 1.10\% | DE |
| The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: | Jcdecaux Se | Information And Communication | 1.04\% | FR |
|  | Autostrade Per L'italia | Transportation and Storage | 1.03\% | IT |
|  | Jyske Bank A/s | Financial and Insurance Activities | 1.02\% | DK |
|  | Ald Sa | Administrative and Support Service Activities | 1.02\% | FR |
|  | Ds Smith Plc | Manufacturing | 1.01\% | GB |
|  | Wabtec Transportation | Manufacturing | 1.01\% | US |
|  | Rci Banque Sa | Manufacturing | 1.01\% | FR |
|  | Fcc Aqualia Sa | Water Supply; Sewerage, Waste | 1.00\% | ES |
|  | Ses Sa | Information And Communication | 1.00\% | LU |
| $\begin{gathered} 01 / 12 / 2022- \\ 30 / 11 / 2023 \end{gathered}$ | Bevco Lux Sarl | Financial and Insurance Activities | 0.99\% | LU |
|  | Ubs Ag | Financial and Insurance Activities | 0.98\% | CH |
|  | Dell Bank International | Manufacturing | 0.96\% | IE |
|  | Viterra Finance Bv | Wholesale and Retail Trade; Repair of Motor | 0.95\% | NL |
|  | Aib Group Plc | Financial and Insurance Activities | 0.94\% | IE |

## What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

\#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
\#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category \#1 Aligned with E/S characteristics covers:

- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category \#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| NACE Sector | \% allocation <br> (excl.cash) |
| :--- | :---: |
| Accommodation and Food Service Activities | $0.00 \%$ |
| Activities of Extraterritorial Organisations and Bodies | $0.00 \%$ |
| Administrative and Support Service Activities | $3.76 \%$ |
| Agriculture, Forestry and Fishing | $0.46 \%$ |
| Arts, Entertainment and Recreation | $1.43 \%$ |
| Construction | $1.33 \%$ |
| Education | $0.42 \%$ |
| Electricity, Gas, Steam and Air Conditioning Supply | $1.58 \%$ |
| Financial and Insurance Activities | $28.29 \%$ |
| Human Health And Social Work Activities | $0.41 \%$ |
| Information And Communication | $10.83 \%$ |
| Manufacturing | $19.58 \%$ |
| Mining and Quarrying | $4.28 \%$ |
| Other Service Activities | $0.00 \%$ |
| Professional, Scientific and Technical Activities | $0.73 \%$ |
| Public Administration and Defence; Compulsory Social Security | $0.00 \%$ |
| Real Estate Activities | $13.29 \%$ |
| Transportation and Storage | $7.52 \%$ |
| Water Supply; Sewerage, Waste Management and Remediation Activities | $1.00 \%$ |
| Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles | $2.97 \%$ |
| Cash or data unavailable | $0.00 \%$ |

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

## Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?

X
Yes, $\qquad$

X In fossil gas X In nuclear energy

## No

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy. - operational expenditure (OpEx) reflects the green operational activities of investee companies.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional

 activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions levels corresponding to the best performance.The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

| 1. Taxonomy-alignment of investments including sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.00 \%$ | $0.01 \%$ | $0.02 \%$ |
| Taxonomy-aligned Fossil gas | $0.10 \%$ | $0.13 \%$ | $0.03 \%$ |
| Taxonomy-aligned Nuclear | $1.28 \%$ | $6.15 \%$ | $6.24 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $98.61 \%$ | $93.71 \%$ | $93.70 \%$ |
| Non Taxonomy-aligned |  |  |  |

| 2. Taxonomy-alignment of investments excluding sovereign bonds* |  |  |  |
| :--- | :---: | :---: | :---: |
|  | OpEx | CapEx | Turnover |
|  | $0.00 \%$ | $0.01 \%$ | $0.02 \%$ |
| Taxonomy-aligned Fossil gas | $0.11 \%$ | $0.13 \%$ | $0.03 \%$ |
| Taxonomy-aligned Nuclear | $1.31 \%$ | $6.28 \%$ | $6.37 \%$ |
| Taxonomy-aligned (no gas and nuclear) | $98.59 \%$ | $93.58 \%$ | $93.57 \%$ |
| Non Taxonomy-aligned |  |  |  |

[^43]
## What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this is the first period for which the investment manager is reporting on this financial product, it is not possible to compare to a previous reference period.
sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

## What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "\#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAls. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.
The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

## Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

| PAl Report |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Principal adverse sustainability impacts statement |  |  |  |  |  |  |
| Adverse Sustainability Indicator |  | Metric | Units | This | Previous | Actions taken |
| Greenhouse gas emissions | 1. GHG emissions | Scope 1 GHG emissions | tCO2e | 110,289 |  | This financial product applies a carbon efficiency target whereby the Investment Manager seeks to maintain a weighted average carbon intensity (WACI) at least $10 \%$ lower than that of the relevant reference index. Further information is available in the relevant precontractual disclosures. |
|  |  | Scope 2 GHG emissions |  | 12,249 |  |  |
|  |  | Scope 3 GHG emissions |  | 122,538 |  |  |

| $\begin{aligned} & \frac{7}{N} \\ & \frac{N}{\omega} \\ & \frac{3}{0} \\ & \frac{0}{0} \end{aligned}$ | 7. Activities negatively affecting biodiversitysensitive areas | Share of investments in investee companies with sites/operations located in or near to biodiversitysensitive areas where activities of those investee companies negatively affect those areas | percent | 0.97\% |  |  |
| $\begin{aligned} & \bar{む} \\ & \frac{\pi}{3} \end{aligned}$ | 8. Emissions to water | Tonnes of emissions to water generated by investee companies per million EUR invested, (weighted average) | Tonnes/EUR m invested |  |  |  |
| $\begin{aligned} & \cong \\ & \stackrel{N}{0} \\ & 3 \end{aligned}$ | 9. Hazardous waste and radioactive waste ratio | Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, (weighted average) |  | 77.56 | - |  |
| Social and employee matters | 10. Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises | Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises | percent | 0.00\% | 0.00\% | This financial product applies a policy which requires the Investment Manager to exclude issuers which severely breach norms and standards such as those mentioned. |
|  | 11. Lack of processes and compliance mechanisms to monitor compliance with international norms | Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises |  | 33.71\% | - |  |
|  | 12. Unadjusted gender pay gap | Average unadjusted gender pay gap of investee companies |  | 28.26\% |  |  |
|  | 13. Board gender diversity | Average ratio of female to male board members in investee companies |  | 34.87\% | - |  |
|  | 14. Exposure to controversial weapons | Share of investments in investee companies involved in the manufacture or selling of controversial weapons (antipersonnel mines, cluster munitions, chemical and biological weapons) |  | 0.00\% | 0.00\% | This financial product applies a zero tolerance policy to companies involved in the production of controversial weapons. Further information is available in the relevant precontractual disclosures. |

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

[^29]:    ${ }^{1}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegate Regulation (EU) 2022/1214.

[^30]:    ${ }^{1}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegate Regulation (EU) 2022/1214.

[^31]:    ${ }^{1}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegate Regulation (EU) 2022/1214.

[^32]:    ${ }^{1}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegate Regulation (EU) 2022/1214.

[^33]:    ${ }^{1}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegate Regulation (EU) 2022/1214.

[^34]:    ${ }^{1}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegate Regulation (EU) 2022/1214.

[^35]:    ${ }^{1}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegate Regulation (EU) 2022/1214.

[^36]:    ${ }^{1}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegate Regulation (EU) 2022/1214.

[^37]:    ${ }^{1}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegate Regulation (EU) 2022/1214.

[^38]:    ${ }^{1}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegate Regulation (EU) 2022/1214.

[^39]:    ${ }^{1}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegate Regulation (EU) 2022/1214.

[^40]:    ${ }^{1}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegate Regulation (EU) 2022/1214.

[^41]:    ${ }^{1}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegate Regulation (EU) 2022/1214.

[^42]:    ${ }^{1}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegate Regulation (EU) 2022/1214.

[^43]:    ${ }^{1}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegate Regulation (EU) 2022/1214.
