Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. As a large portion of the fund is invested in less developed countries, you should be prepared to accept significantly large fluctuations in the value of the fund. The fund may invest in certain securities listed in China which can involve significant regulatory constraints that may affect the liquidity and/or the investment performance of the fund. Investments in small and medium sized companies involve greater risks than those customarily associated with larger companies.

Fund Strategy

The fund aims to provide long-term capital growth from a diversified portfolio of investments in Asian companies with robust business models and competitive advantages. It combines our best investment and highest conviction ideas across ten Asia ex-Japan markets. The team makes use of a bottom-up, selective approach to invest in companies that display sustainable leadership and competitive advantages, with reference to the macroeconomic market environment. We like companies that are trading at a discount to our estimation of fair value. Environmental, Social and Governance (ESG) considerations are fully integrated in the investment process.
