Investment Objective and Philosophy

Cohen & Steers SICAV Global Preferred Securities Fund ("Fund") seeks to achieve total return through investment in global preferred securities. In pursuing total return, the Fund seeks both capital appreciation and current income. The Fund invests in a global portfolio consisting principally of preferred securities and other capital securities (also known as hybrids) that trade on exchanges as well as over-the-counter (OTC). The team conducts rigorous fundamental research by analyzing traditional credit metrics, valuing the structural features of individual securities and assessing external market factors. We utilize proprietary pricing models to identify preferred securities that we believe to be undervalued relative to their modified option-adjusted credit risk spread.

Such an approach offers investors the potential for:

- High-income relative to other fixed income securities
- Value-driven opportunities through investment grade rated and other securities
- Access to the larger institutional preferred securities market, which includes floating and fixed-to-floating rate securities
- Diversification due to low overlap with other fixed income classes
- Active management by Cohen & Steers' dedicated preferred securities team

Performance returns stated net of fees. There is no guarantee that any historical trend illustrated in this report will be repeated in the future, and there is no way to predict when such a trend will begin. There is no guarantee that any market forecast in this report will be realized. **Current performance may be lower or higher than the performance quoted. The investment return and the principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Periods less than one year are not annualized. Returns are historical and include change in share price and reinvestment of all distributions.** There is no guarantee that any investment objective will be achieved. If the currency in which the past performance is displayed differs from the currency of the country in which an investor resides, then the investor should be aware that due to the exchange rate fluctuations the performance shown may be higher or lower if converted into the investor's local currency. An investor cannot invest directly in an index, and index performance does not reflect the deduction of fees, expenses or taxes.
