Legal Advisor Dechert (Luxembourg) LLP 1 Allée Scheffer B.P. 709 L-2017 Luxembourg

#### **INVESTMENT OBJECTIVES AND POLICIES**

The purpose of Cohen & Steers SICAV (the "Company") is to provide investors with an opportunity for investment in a professionally managed collective investment vehicle in order to seek optimum return from the capital invested consistent with the Investment Manager's determination of risk.

#### European Real Estate Securities Fund (Sub-Fund)

The European Real Estate Securities Fund's investment objective is total return, the components of which are current income and capital appreciation, measured in Euro, through investment in the equity securities of companies in the European real estate industry ("European Real Estate Securities") provided that such securities may be considered as transferable securities (as defined in the Company's Prospectus).

The Sub-Fund seeks to achieve its investment objective by investing primarily in the securities of companies operating in those European countries which are, or may become, members of the "Eurozone" (members from time to time of the European Union which have adopted euro as their currency), as well as Denmark, Norway, Sweden, Switzerland and the United Kingdom. Investments may also be made, to a limited extent, in equity securities of companies located in the smaller and emerging markets of Europe (as defined by the MSCI Emerging Markets Index). Investments may also be made from time to time in non-European countries whose business is conducted primarily in Europe.

### **Global Real Estate Securities Fund (Sub-Fund)**

The Global Real Estate Securities Fund's investment objective is total return, the components of which are current income and capital appreciation, measured in USD. The Sub-Fund seeks to achieve this objective by investing at least 50% of its net assets in a portfolio of transferable equity securities (common stocks and preferred stocks) of companies that are engaged principally in the real estate industry throughout the world. These securities are either listed or dealt on a regulated market (as defined in the Company's Prospectus). The Sub-Fund invests in real estate equity securities of companies domiciled primarily in developed countries and may invest up to 15% of its net assets in real estate equity securities of companies domiciled in emerging market countries (as defined by the MSCI Emerging Markets Index).

### Global Listed Infrastructure Fund (Sub-Fund)

The Global Listed Infrastructure Fund's investment objective is total return, the components of which are current income and capital appreciation, measured in USD. The Sub-Fund seeks to achieve this objective by investing at least 80% of its net assets in common stock and other equity securities issued by infrastructure companies worldwide, which consist of utilities, pipelines, toll roads, airports, railroads, marine ports, telecommunications companies and other infrastructure companies. The Sub-Fund invests in securities of companies domiciled primarily in developed countries and may invest up to 15% of its net assets in securities of companies domiciled in emerging market countries (as defined by the MSCI Emerging Markets Index).

#### **INVESTMENT OBJECTIVES AND POLICIES (CONTINUED)**

### **Global Preferred Securities Fund (Sub-Fund)**

The Global Preferred Securities Fund's investment objective is total return, the components of which are high current income and capital appreciation, measured in USD. The Sub-Fund seeks to achieve this objective by investing at least 80% of its net assets in a portfolio of preferred and debt securities issued by companies worldwide, including traditional preferred securities; hybrid preferred securities that have investment and economic characteristics of both preferred stock and debt securities; floating rate preferred securities; corporate debt securities; convertible securities; contingent capital securities ("CoCos"); and securities of other open-end, closed-end or exchange-traded funds that invest primarily in preferred and debt securities. The Sub-Fund invests no more than 50% of its net assets in CoCos.

#### Diversified Real Assets Fund (Sub-Fund) (launched 31 May 2018)

The Diversified Real Assets Fund's investment objective is to achieve total return over the long term and to maximize real returns during inflationary environments. "Real returns" are defined as total returns adjusted for the effects of inflation.

The Sub-Fund pursues this objective through investments offering exposure to "real assets," which are defined as (i) real estate, infrastructure, natural resources, commodities, and gold and other precious metals; (ii) companies that own or derive a significant portion of their value from such real assets or the production thereof; and (iii) other assets expected to perform well during periods of high inflation. Under normal market conditions, the Sub-Fund seeks to achieve its investment objective by allocating at least 80% of its net assets to investments worldwide in or providing exposure to, if investments therein are not permitted, the following real asset classes: (i) real estate companies, including real estate investment trusts ("REITs"); (ii) natural resource companies; (iii) infrastructure companies; (iv) commodities; and (v) gold and other precious metals.

#### **Risk Management**

The Company employs the standard commitment approach to comply with the CSSF Circular 11/512 which requires each undertakings for collective investment in transferable securities (UCITS) to calculate its global risk exposure.

### **REPORT OF THE BOARD OF DIRECTORS for the six months ended 30 June 2018**

### **European Real Estate Securities Fund**

We would like to share with you our report for the six months ended 30 June 2018. The total returns, including reinvestment of all dividends and distributions, for the Cohen & Steers SICAV European Real Estate Securities Fund and the comparative benchmark were:

#### Market Review

The period was modestly positive overall for European real estate equities, although performance varied widely by country. The group initially declined amid an early-period spike in bond yields, even as broad-based economic growth continued to benefit real estate fundamentals. Markets began to recover as inflation remained generally benign and Europe's economic momentum slowed, allowing for a retreat in bond yields. However, other macro concerns—such as political uncertainty in Italy and Spain and increased global trade tensions—emerged as factors driving bouts of volatility.

In monetary policy news, the European Central Bank (ECB) announced it would end its bond-buying quantitative easing program by the end of 2018. However, the ECB also said that interest rates will likely remain unchanged at low levels until at least mid-2019.

#### **Fund Performance**

The Fund had a positive total return in the period and significantly outperformed its benchmark.

The U.K. had mixed performance amid economic uncertainty as Brexit negotiations unfolded. Our emphasis on lesscyclical companies contributed to relative performance, as they generally outperformed more economically sensitive stocks. The Fund's overweights in self storage operators Big Yellow Group and Safestore Holdings had significant gains, as did its overweight in industrial landlord Segro. In addition, the Fund did not own Intu Properties, a retail landlord that fell on tenant bankruptcy concerns.

Germany's real estate stocks performed well, aided by continued economic growth that supported fundamentals. Stock selection in Germany benefited the Fund's performance, led by overweights in apartment landlords Deutsche Wohnen and ADO Properties, which continued to benefit from strong demand and low new supply.

An overweight in Spain aided performance as well. The country, which has one of Europe's fastest-growing economies, was a top performer in the period. The Fund's underweight in the Netherlands, which declined, further contributed to relative returns.

Factors that detracted from the Fund's relative performance included stock selection and an overweight in France. In particular, the Fund had overweight positions in diversified company Covivio (formerly Foncière des Régions) and retail landlord Klépierre that declined. The Fund's underweight in Belgium, which had a significant gain, and overweight in Norway, which struggled, also hindered performance.

### **REPORT OF THE BOARD OF DIRECTORS for the six months ended 30 June 2018 (continued)**

### **Global Real Estate Securities Fund**

We would like to share with you our report for the six months ended 30 June 2018. The total returns, including reinvestment of all dividends and distributions, for the Cohen & Steers SICAV Global Real Estate Securities Fund and the comparative benchmark were:

#### Market Review

The flat overall total return for global real estate stocks in the six-month period ended June 30, 2018 belied occasional heightened market volatility and a wide dispersion of returns by country. The group initially declined amid an early-period spike in bond yields, even as broad-based economic growth continued to benefit real estate fundamentals. Markets began to recover as inflation remained generally benign and global economic momentum slowed, allowing for a retreat in bond yields. However, other macro concerns—such as political uncertainty in Italy and Spain and increased global trade tensions—emerged as factors driving bouts of volatility. The U.S. Federal Reserve continued to raise short-term interest rates, although other central banks kept rates mostly unchanged at historically low levels.

The period saw a continued wave of real estate mergers and acquistions, a trend that has highlighted the potential for value opportunities, with many real estate companies trading at meaningful discounts to their underlying net asset values. In the U.S., activity included regional mall owner GGP endorsing a bid from Brookfield Property Partners, and an affiliate of Greystar Real Estate Partners announcing that it would acquire student housing REIT Education Realty Trust (EDR) in a \$4.6 billion privatization. The offer was at a 26% premium to EDR's 90-day volume-weighted average share price. Elsewhere of note, Blackstone made a bid for Australia's Investa Office Fund, an all-cash offer at a 13% premium to Investa's previous-close share price. European retail landlord Unibail-Rodamco completed its acquisition of Australia's Westfield.

#### **Fund Performance**

The Fund had a slightly negative total return in the period and underperformed its benchmark. The Fund's out-of-index allocation to Brazilian mall companies detracted from performance. Brazilian stocks in general were pressured by signs of economic deceleration, election uncertainty and rising oil prices. In addition to hampering the consumer, higher fuel costs sparked a crippling truckers' strike.

Most real estate stocks in Hong Kong had negative returns, with developers generally posting the largest declines due to their sensitivity to slowing growth in China and global trade concerns. Stock selection in Hong Kong hindered performance, in part because on an overweight in developer Sun Hung Kai Properties, which struggled, and the Fund's non-investment in Wharf Real Estate Investment, which benefited from better-than-expected retail sales data in the period.

Japan had a solid return, aided by an improving economy and high occupancy rates in most markets. Our underweight in J-REITs as a group detracted from relative returns, as they outperformed developers, favored for their above-average dividend income and relatively defensive characteristics.

### **REPORT OF THE BOARD OF DIRECTORS for the six months ended 30 June 2018 (continued)**

### **Global Real Estate Securities Fund (continued)**

Despite having one of their worst starts in years, U.S. real estate investment trusts (REITs) regained their footing to deliver a modestly positive total return for the first half of 2018. The turnaround occurred as interest rates stabilized and amid valuations that appeared attractive, based both on general discounts to REITs' underlying net asset values and compared with earnings multiples for S&P 500 companies. Stock selection in the U.S. hampered relative returns, partly because we did not own Public Storage, which had a significant gain.

Germany's real estate stocks performed well, aided by continued economic growth that supported fundamentals. Stock selection in Germany benefited the Fund's performance, led by overweights in apartment landlords Deutsche Wohnen and ADO Properties, which continued to benefit from strong demand and low new supply.

The U.K. had mixed performance amid economic uncertainty as Brexit negotiations unfolded. Our emphasis on lesscyclical companies contributed to relative performance, as they generally outperformed more economically sensitive stocks. The Fund's overweights in self storage operators Big Yellow Group and Safestore Holdings had significant gains; in addition, the Fund did not own Intu Properties, a retail landlord that fell on tenant bankruptcy concerns.

An overweight in Spain aided performance as well. The country, which has one of Europe's fastest-growing economies, was a top performer globally in the period. The Fund's non-investment in Singapore further contributed to relative performance. The market, which tends to be sensitive to global trade news, was adversely affected by growing trade tensions, in addition to higher oil costs and concerns of an economic slowdown in China.

### **REPORT OF THE BOARD OF DIRECTORS for the six months ended 30 June 2018 (continued)**

### **Global Listed Infrastructure Fund**

We would like to share with you our report for the six months ended 30 June 2018. The total returns, including reinvestment of all dividends and distributions, for the Cohen & Steers SICAV Global Listed Infrastructure Fund and the comparative benchmark were:

Cohen & Steers SICAV Global Listed Infrastructure Fund — Class I .....-1.82% FTSE Global Core Infrastructure 50/50 Net Tax Index .....-1.94%

#### Market Review

The first half of 2018 was choppy for global equities amid heightened uncertainty about interest rates and rising global trade tensions between the U.S. and its key trading partners. Economic growth remained relatively firm globally, led by the U.S., where unemployment reached its lowest level in two decades, although Europe and some emerging markets showed some signs of deceleration. Initially, interest rates rose sharply in most regions in response to the possibility that economic strength may result in further monetary tightening, but then retreated as rising protectionism raised concerns over global growth.

In this environment, global infrastructure stocks declined, underperforming global equities, which had a slightly positive return. In general, sectors more closely associated with trade, such as marine ports, airports and toll roads, underperformed the more defensive sectors.

### **Fund Performance**

The Fund had a negative total return and modestly outperformed its benchmark. The midstream energy sector was volatile in the period, initially declining amid mounting investor uncertainty regarding restructurings and a regulatory proposal from the Federal Energy Regulatory Commission (FERC). While the FERC ruling sparked a significant selloff in master limited partnerships (MLPs), the sector eventually recovered as concerns eased and companies generally beat earnings expectations. In addition, fundamentals continued to improve across the sector due to high, stable energy prices and rising production volumes. Stock selection and an overweight in the sector benefited performance. In particular, the Fund held an out-of-index position in Cheniere Energy Inc., which upwardly revised its cash-flow guidance for the next several years.

An underweight in toll roads also benefited performance. The sector underperformed due to rising trade concerns, as well as political uncertainty in Italy and Brazil. In Brazil, toll road operators seeking to renegotiate and extend their concession experienced less favorable outcomes.

The Fund benefited from not owning marine ports, which was a notable laggard as trade concerns surfaced. Stock selection in the electric utilities sector also aided performance. In particular, the Fund did not own Dominion Resources, which declined nearly 14% in the period. Stock selection in water further contributed to performance.

An underweight and security selection in the generally defensive gas distribution sector detracted from relative performance. This was due in part to not owning Sempra Energy, which saw activist investors increase their stakes and propose a plan for accelerated value creation.

### **REPORT OF THE BOARD OF DIRECTORS for the six months ended 30 June 2018 (continued)**

### Global Listed Infrastructure Fund (continued)

Stock selection in railways detracted from performance. In particular, the Fund held an overweight in Brazil-based Rumo, which declined amid economic challenges and political uncertainty in the country.

In the diversified sector, the Fund held a modest overweight position in Macquarie Infrastructure, which declined 30%. The company announced disappointing earnings guidance and a dividend cut related to deteriorating fundamentals in its liquid products terminals business, where several customers unexpectedly decided to not renew their expiring storage-capacity contracts.

Stock selection in airports further detracted from performance. The economically sensitive sector underperformed due to rising trade concerns, political uncertainty in Italy and weakness in Mexico. Investors soured on Mexico's prospects amid concerns regarding upcoming elections, renegotiating trade agreements with the U.S. and currency risk.

### **REPORT OF THE BOARD OF DIRECTORS for the six months ended 30 June 2018 (continued)**

### **Global Preferred Securities Fund**

We would like to share with you our report for the six months ended 30 June 2018. The total returns, including reinvestment of all dividends and distributions, for the Cohen & Steers SICAV Global Preferred Securities Fund and the comparative benchmark were:

\*The blended benchmark consists of 60% ICE BofAML Capital Securities Index, 25% ICE BofAML Hybrid Preferred Securities 8% Constrained Index, and 15% Bloomberg Barclays Developed Market USD Contingent Capital Index

#### Market Review

Against a backdrop of rising interest rates and widening credit spreads, preferred securities had a negative total return in the first half of 2018, but outperformed U.S. Treasuries and investment-grade corporate bonds.

The yield on the 10-year U.S. Treasury rose from 2.4% to as high as 3.1% on a strengthening U.S. economy and rising inflation pressures, driven in part by tax cuts enacted at the end of 2017. However, bond yields settled around 2.8% by the end of June amid concerns of slowing growth in Europe and escalating trade tensions.

Preferreds generally outperformed other fixed income categories, helped in part by relatively high yields, shorter average durations and strengthening bank credit fundamentals. However, there was a sharp divergence within the preferreds market, as retail exchange-listed issues generally advanced, while the institutional over-the-counter (OTC) market declined.

Performance in the exchange-listed market was strongly influenced by technical factors. Despite negative investor sentiment toward fixed income broadly during the period, demand for exchange-listed issues remained relatively healthy. At the same time, the available pool of exchange-listed securities declined, as several issuers redeemed securities without issuing new ones. As a result, preferred exchange-traded funds (ETFs)—which invest almost exclusively in \$25-par exchange-listed preferreds and now control roughly 20% of the \$25 market—were forced to reinvest substantial funds into a shrinking market. These asset flows kept prices in the \$25 market from falling, and in some cases, pushed prices higher, even though many of the securities trade at premiums.

### **Fund Performance**

The Fund had a negative total return in the six months ended June 30, 2018 and underperformed its benchmark. Coming into the year, the Fund was positioned defensively relative to interest-rate risk and consequently was underweight many of the higher-duration exchange-listed preferreds. Despite the rise in interest rates, these securities generally outperformed amid the favorable supply-demand picture.

### **REPORT OF THE BOARD OF DIRECTORS for the six months ended 30 June 2018 (continued)**

### **Global Preferred Securities Fund (continued)**

The Fund's exposure to contingent capital securities (CoCos) also detracted from relative performance. The securities generally declined as growth in Europe slowed from its strong pace in 2017 and as political uncertainties in Italy, Spain and Germany added to the risk premiums demanded by investors. As well, new issuance weighed on the market given the weak backdrop. We believed the political backdrop and outlook for more supply made European issues somewhat less appealing on a risk-weighted basis, and we reduced our exposure to the region, including the U.K. The insurance sector underperformed, largely due to weakness in Europe. Security selection in the sector detracted from relative performance. This included several out-of-benchmark securities that were pressured by new issues that came to market. In the banking sector, the Fund did not own a long-dated OTC-traded issue from Bank of America that was called at a substantial premium.

In general, an underweight in European hybrid securities aided relative performance, as they underperformed as credit spreads widened. The Fund also benefited from holding several out-of-index securities from Bank of America that outperformed after garnering credit upgrades and being added to the investment-grade preferred benchmark. Not owning several high-coupon, exchange-listed issues from HSBC Holdings also aided relative performance. The securities, which had been trading at premiums, declined on par redemption announcements.

The Fund used derivatives in the form of forward foreign currency exchange contracts for managing currency risk on certain Fund positions denominated in foreign currencies. The forward foreign currency exchange contracts also contributed to the Fund's total return.

#### **REPORT OF THE BOARD OF DIRECTORS for the period ended 30 June 2018 (continued)**

### Diversified Real Assets Fund (launched 31 May 2018)

We would like to share with you our report for the period beginning May 31, 2018 (inception date) and ended 30 June 2018. The total returns, including reinvestment of all dividends and distributions, for the Cohen & Steers SICAV Diversified Real Assets Fund and the comparative benchmark were:

| Cohen & Steers SICAV Diversified Rea | l Assets Fund — | – Class FX USD | 0.61%  |
|--------------------------------------|-----------------|----------------|--------|
| SICAV Real Assets Blended Benchmar   | k               |                | 0.20%* |

\*The blended benchmark consists of 25% FTSE EPRA/NAREIT Developed Real Estate Index, 20% Bloomberg Commodity Index Total Return, 20% S&P Global Natural Resources Index, 20% Dow Jones Brookfield Global Infrastructure Index, 10% BofA Merrill Lynch 1-3 Year US Corporate Index and 5% Gold spot price

#### Market Review

The first half of 2018 was choppy for financial markets amid heightened uncertainty about interest rates and rising global trade tensions between the U.S. and its key trading partners. Economic growth remained relatively firm globally, led by the U.S., where unemployment reached its lowest level in two decades. However, Europe and some emerging markets showed some signs of deceleration. Interest rates initially rose in most regions in response to the prospect of higher inflation, but then retreated as rising protectionism raised concerns over global growth. Oil prices climbed to near four-year highs as global demand remained strong and the Organization of Oil Exporting Countries (OPEC) announced only modest increases in production.

In this environment, natural resource equities had solid performance. The group was led by energy stocks that rose on the continued recovery in oil.

Global real estate stocks regained their footing after a negative start to the year, recovering as interest-rate concerns eased and as earnings remained generally solid. However, performance varied widely by country. Germany was a positive standout, aided by strong fundamentals in its apartment sector. Singapore, which is typically sensitive to global trade issues, was among the poorer performers.

Infrastructure companies also rallied after a weak start. Midstream energy stocks were especially strong in the second quarter of 2018, as earnings generally beat expectations and fundamentals continued to improve sector-wide due to high, stable energy prices and rising production volumes.

Amid healthy demand and an ongoing rebalancing of supplies, commodity prices climbed to a three-year high in May 2018. However, the group then reversed course and ended the period with a flat return as growth concerns, fears of an escalating global trade war and the strong U.S. dollar weighed on most sectors. Energy commodities were a positive outlier, rising on improving fundamentals. Gold declined in the face of a strong U.S. dollar and as speculative investors began to wind down trades betting on a rise in gold prices.

### **REPORT OF THE BOARD OF DIRECTORS for the period ended 30 June 2018 (continued)**

### Diversified Real Assets Fund (launched 31 May 2018) (continued)

### **Fund Performance**

The Fund had a negative total return for the period beginning May 31, 2018 (inception date) and ending June 30, 2018, and underperformed its blended benchmark. Stock selection in the Fund's infrastructure allocation detracted from relative performance, as our holdings had a positive absolute return but trailed the infrastructure component of the benchmark. The Fund's underweight in real estate stocks also hindered relative performance. An overweight in natural resource stocks and an underweight in gold modestly aided the Fund's relative performance in the brief period.

#### NOTES TO THE FINANCIAL STATEMENTS as at 30 June 2018

#### 1 General Information

Cohen & Steers SICAV (the "Company") is an open-ended investment company with variable capital (Société d'Investissement à Capital Variable). The Company is registered under the Register of Commerce Number B 89486 in the Grand Duchy of Luxembourg as an undertaking for collective investment pursuant to Part I of the Law of 17 December 2010, as amended, concerning undertakings for collective investment. Such registration however, does not imply a positive assessment by the supervisory authority of the quality of the shares of the Company (the "Shares") offered for sale. Any representation to the contrary is unauthorised and unlawful. The Company is an Undertaking for Collective Investment in Transferable Securities ("UCITS") for the purpose of the Council Directive EEC/85/611 ("UCITS Directive").

The Company currently consists of five Sub-Funds: the European Real Estate Securities Fund, the Global Real Estate Securities Fund, the Global Listed Infrastructure Fund, the Global Preferred Securities Fund and the Diversified Real Assets Fund (launched 31 May 2018) (each a "Sub-Fund" and, together, the "Sub-Funds"), each of which offers several classes of Shares (each a "Class" and, together, "Classes").

The European Real Estate Securities Fund currently offers Class "A", Class "AX", Class "C", Class "CX", Class "L", Class "LX", Class "I" and Class "IX", Class "K" and Class "KX" Shares.

The Global Real Estate Securities Fund currently offers Class "A", Class "AX", Class "C", Class "CX", Class "L", Class "LX", Class "IX", Class "IX", Class "K" and Class "KX" Shares.

The Global Listed Infrastructure Fund currently offers Class "A", Class "AX", Class "C", Class "CX", Class "F", Class "FX", Class "I" and Class "IX" Shares.

The Global Preferred Securities Fund currently offers Class "A", Class "AX", Class "F", Class "FX", Class "I" and Class "IX" Shares.

The Diversified Real Assets Fund (launched 31 May 2018) currently offers Class "A", Class "AX", Class "C", Class "CX", Class "DCX", Class "F", Class "FX", Class "I" and Class "IX" Shares.

Each of the Classes of Shares described above can be issued in USD, EUR, GBP, CHF or any other freely convertible currency.

Each of the Classes of Shares described above may be offered as currency hedged share classes where the currency of the relevant class is different from the reference currency of the relevant Sub-Fund.

Within the European Real Estate Securities Fund, Global Listed Infrastructure Fund, Global Real Estate Securities Fund, the Global Preferred Securities Fund and the Diversified Real Assets Fund (launched 31 May 2018), the Board of Directors will issue distribution shares ("Distribution Shares") and capitalisation shares ("Capitalisation Shares"), designated X shares).

Capitalisation Shares capitalise their entire earnings, whereas Distribution Shares pay a dividend.

#### NOTES TO THE FINANCIAL STATEMENTS as at 30 June 2018 (continued)

#### 2 Significant Accounting Policies

The Combined Financial Statements are prepared in accordance with the requirements of the Luxembourg regulatory authorities and are presented in euro. The following is a summary of significant accounting policies followed by the Company.

#### a) Security Valuation

Investments in securities that are listed on the New York Stock Exchange are valued, except as indicated below, at the last sale price reflected at the close of the New York Stock Exchange on the business day as of which such value is being determined. If there has been no sale on such day, the securities are valued at the mean of the closing bid and asked prices for the day or, if no asked price is available, at the bid price.

Securities not listed on the New York Stock Exchange but listed on other domestic or foreign securities exchanges are valued in a similar manner. Securities traded on more than one securities exchange are valued at the last sale price on the business day as of which such value is being determined as reflected on the tape at the close of the exchange representing the principal market for such securities.

Readily marketable securities traded in the over-the-counter market, including listed securities whose primary market is believed by the Investment Manager to be over-the-counter, are valued at the official closing prices as reported by sources as the Board of Directors deem appropriate to reflect their fair market value. If there has been no sale on such day, the securities are valued at the mean of the closing bid and asked prices for the day, or if no asked price is available, at the bid price.

Securities for which market prices are unavailable, or securities for which the Investment Manager determines that bid and/or asked price does not reflect market value, may be valued at fair value pursuant to procedures adopted by the Company's Board of Directors at its discretion. Circumstances in which market prices may be unavailable include, but are not limited to, when trading in a security is suspended, the exchange on which the security is traded is subject to an unscheduled close or disruption or material events occur after the close of the exchange on which the security is principally traded. In these circumstances, the Company determines fair value in a manner that fairly reflects the market value of the security on the valuation date based on consideration of any information or factors it deems appropriate. These may include recent transactions in comparable securities, information relating to the specific security and developments in the markets.

The Company's use of fair value pricing may cause the Net Asset Value of Sub-Fund shares to differ from the Net Asset Value that would be calculated using market quotations. Fair value pricing involves subjective judgements, and it is possible that the fair value determined for a security may be materially different than the value that could be realised upon the sale of that security.

#### b) Combined Accounts and Translation of Foreign Currencies

The Combined Financial Statements have been presented in euro, the functional currency of the Company. Financial Statements stated in currencies other than euro have been combined at the Reuters exchange rate ruling at 30 June 2018 (Euro 1: USD 1.1676).

#### NOTES TO THE FINANCIAL STATEMENTS as at 30 June 2018 (continued)

#### 2 Significant Accounting Policies (continued)

#### b) Combined Accounts and Translation of Foreign Currencies (continued)

For the purpose of the Combined Financial Statements, the investments are valued on the basis of the closing prices as of 30 June 2018.

Assets and liabilities denominated in currencies other than the Portfolios' reporting currencies have been translated at the rates of exchange ruling at 30 June 2018. Cost of investments, income and expenditures denominated in currencies other than the Sub-Funds' reporting currency have been translated at the exchange rates ruling on the day of transaction. The exchange gain or loss arising from the translation of these items is taken into account in the determination of the results of operations.

#### c) Realised Gains and Losses on Sale of Investments in Securities

The gains and losses on sales of investments in securities are determined on the basis of average cost. Gains or losses arising from the disposal of securities, throughout the period, are detailed within the Statement of Operations and Changes in Net Assets. At period-end, holdings in securities have been valued at their last available prices on the main market for the relevant security, unrealised gains or losses are included within the Statement of Operations and Changes in Net Assets.

#### d) Income from Investments

Interest income is accrued on a daily basis. Dividend income is recorded on the ex-dividend date, except for certain dividends, which are recorded as soon as the Company is informed after the ex-dividend date.

#### e) Income from Securities Lending

The Company may lend portions of its securities to third parties. Within the securities lending program the Company receives G10 Government Debt as collateral against the loaned securities. In contingency situations, cash in U.S. dollars can be accepted as collateral and is replaced by G10 Government securities at the first opportunity. This collateral is maintained over the life of the loan for an amount of 105% of the value of loaned securities. In general, lendings may only be effected via recognised clearing houses, or through the intermediary of prime financial institutions that specialise in such activities and in the modus specified by them. The volume of the securities lending transactions is kept at an appropriate level. The Company is entitled to request the return of the securities lend in a manner that enables it, at all times, to meet its redemption obligations. Securities lending transactions are not to jeopardise the management of the Company's assets in accordance with its investment policy.

The European Real Estate Securities Fund, Global Real Estate Securities Fund, Global Listed Infrastructure Fund, Global Preferred Securities Fund and Diversified Real Assets Fund (launched 31 May 2018) did not participate in the Securities lending program in the period ended 30 June 2018. To the extent that it would have participated in such a program, the income earned from the securities lending program would be recorded in 'Securities lending income' in the Statement of Operations and Changes in Net Assets.

#### NOTES TO THE FINANCIAL STATEMENTS as at 30 June 2018 (continued)

#### 2 Significant Accounting Policies (continued)

#### f) Transaction Fees

The transaction costs arising on the disposal and acquisition of investments are expensed to the Statement of Operations and Changes in Net Assets.

#### g) Formation Expenses

The formation expenses of the Company are amortised on a straight-line basis over a period of 5 years. Each Sub-Fund will bear its own formation expenses.

#### h) Forward Foreign Exchange Contracts

Forward foreign exchange contracts represent obligations to purchase or sell foreign currency on a specified future date at a price fixed at the time the contracts are entered into. The values of the forward foreign exchange contracts are adjusted daily based on the applicable exchange rate of the underlying currency. Changes in the value of these contracts are recorded as unrealised appreciation or depreciation until the contract settlement date. When the forward contract is closed, the Sub-Fund records a realised gain or loss equal to the difference between the value at the time the contract was opened and the value at the time it was closed.

The unrealised appreciation/(depreciation) on forward foreign exchange contracts is disclosed in the Statement of Net Assets under "Unrealised appreciation/(depreciation) on forward foreign exchange contracts". Realised gains/(losses) and change in unrealised appreciation/(depreciation) resulting there from are included in the Statement of Operations and Changes in Net Assets respectively under "Net realised gains/(losses) on forward foreign exchange contracts" and "Change in net unrealised appreciation/(depreciation) on forward foreign exchange contracts".

#### i) Swing Pricing Adjustment

A Sub-Fund may suffer dilution of the Net Asset Value due to investors subscribing or redeeming Shares in that Sub-Fund at a price that does not reflect the trading and other costs that arise when portfolio trades are undertaken by the Investment Manager to accommodate the Sub-Fund's cash inflows and outflows.

In order to counter this impact, a swing pricing mechanism may be adopted to protect the interests of shareholders of each Sub-Fund. If on any valuation date, the aggregate net transactions in Shares of a Sub-Fund exceed a pre-determined threshold, as determined and reviewed for each Sub-Fund on a periodic basis by the Board of Directors, the Net Asset Value may be adjusted upwards or downwards to reflect the trading and other costs that arise when portfolio trades are undertaken by the Investment Manager to accommodate the Sub-Fund's cash inflows and outflows. The net inflows and net outflows will be determined by the Board of Directors based on the latest available information at the time of calculation of the Net Asset Value. The swing pricing mechanism may be applied across all Sub-Funds. The extent of the price adjustment will be set by the Board of Directors to reflect dealing and other costs. Such adjustment may vary from Sub-Fund to Sub-Fund and will not exceed 2% of the original Net Asset Value. During the period ended 30 June 2018 the swing pricing was applied by the European Real Estate Securities Fund. Swing pricing impact on the Sub-Fund's Net Assets at the period end was zero.

#### NOTES TO THE FINANCIAL STATEMENTS as at 30 June 2018 (continued)

#### 3 Taxe d'abonnement

Under current Luxembourg law and practice, there are no Luxembourg ordinary income, capital gains, estate or inheritance taxes payable by the Company or its shareholders in respect of their Shares in the Company, except by shareholders who are domiciled in, residents of, or maintain a permanent establishment in the Grand Duchy of Luxembourg and by certain shareholders who were former Luxembourg residents.

Classes A, AX, C, CX, L and LX of the Company are subject to the taxes on Luxembourg UCITS at the rate of 0.05%, Classes F, FX, DCX, I, IX, K and KX are subject to the taxes on Luxembourg UCITS at the rate of 0.01% per annum of the value of the total net assets of such class on the last day of each calendar quarter. These annual taxes are not due on assets of the Company which are invested in units or shares of other Luxembourg UCITS. The Company will continue to use its best efforts to conduct its operations in such a manner that it will not be subject to taxation in any jurisdiction other than Luxembourg and to invest primarily in investments not subject to any withholding tax on interest or dividends.

#### 4 Dividend Policy

Distribution shares pay a dividend to their holders. Capitalisation shares capitalise income.

For Distribution shares, the Company intends to declare dividends which will be equal to the net investment income attributable to such classes of shares. Dividends which should have been declared on a day which is not a business day are accrued and declared on the preceding business day. Income earned on a day which is not a business day is included in the Net Asset Value of that Sub-Fund on the first business day of the following month. Dividends are distributed as set out in the sections of the Company's prospectus describing each of the Sub-Funds. Dividends are automatically reinvested in additional shares of the relevant class free of any charge unless the shareholder has nominated on the application form to receive such dividends in cash as set out in the sections of the Company's prospectus describing each of the Sub-Funds.

The dealing day applicable for such automatic reinvestment is the first business day following the distribution of the dividends.

#### 5 Management Fee

Under the terms of the Investment Management Agreement, Cohen & Steers UK Limited is entitled to receive from the Company a fee payable quarterly in arrears and calculated on the average daily net assets (before deduction of the fee) at the annual rates set forth below:

| Sub-Fund                             | Share Class  | Rate                                      |

#### 5 Management Fee (continued)

#### 6 Expenses Reimbursed

Subject to termination or revision at the sole discretion of the Investment Manager, with respect to the shares of the Sub-Funds, the Investment Manager has agreed to bear within the Sub-Funds the expenses attributable to each class of share such that the total expense ratio of each class of share does not exceed a percentage per annum, based on the average daily net assets of the relevant class. Currently, the European Real Estate Securities Fund total expense ratio for Class A and AX is set at 1.75%, Class C and CX is set at 1.00%, Class I and IX is set at 1.05%, Class K and KX is set at 0.85% and Class L and LX is set at 1.05%; the Global Real Estate Securities Fund total expense ratio for Class A and AX is set at 1.70%, Class C and CX is set at 0.90%, Class I and IX is set at 1.05%, Class K and KX is set at 0.80% and Class L and LX is set at 1.10%; the Global Listed Infrastructure Fund total expense ratio for Class A and AX is set to 1.70%, Class C and CX is set to 0.90%, Class F and FX is set to 0.55% and Class I and IX is set at 1.20%; the Global Preferred Securities Fund total expense ratio for Class A and AX is set to 0.40%, Class I and IX is set to 0.50%; the Diversified Real Assets Fund total expense ratio for Class A and AX is set at 1.70%, Class C and CX is set at 1.00%, Class DCX is set at 0.60%, Class F and FX is set at 0.55%, Class I and IX is set at 1.00%.

#### NOTES TO THE FINANCIAL STATEMENTS as at 30 June 2018 (continued)

#### 6 Expenses Reimbursed (continued)

The expenses attributable to the European Real Estate Securities Fund, Global Real Estate Securities Fund, Global Listed Infrastructure Fund, Global Preferred Securities Fund and Diversified Real Assets Fund in excess of the total expense ratio amounted respectively to  $\epsilon$ 15,452, \$123,593, \$72,355, \$185,780 and \$25,372 during the period ended 30 June 2018.

#### 7 Depositary, Domiciliary, Transfer Agent and Administration Expenses

Brown Brothers Harriman (Luxembourg) S.C.A. is entitled to receive fees in accordance with normal banking practice in Luxembourg for acting as depositary, registrar, transfer, domiciliary, corporate, paying and administrative agent.

#### 8 Securities Lending

The European Real Estate Securities Fund, Global Real Estate Securities Fund, Global Listed Infrastructure Fund, Global Preferred Securities Fund and Diversified Real Assets Fund (launched 31 May 2018) did not participate in the securities lending program in the period ended 30 June 2018.

#### 9 Investments in Derivative Contracts
