

GQG Partners Emerging Markets Equity UCITS Fund

Class A USD Accumulating | 30 November 2023

Investment Objective and Strategy

The GQG Partners Emerging Markets Equity UCITS Fund seeks long-term capital appreciation.

GQG Partners seeks to invest in high-quality, attractively priced companies exhibiting competitive advantages. Our investment process aims to evaluate each business with a focus on financial strength, sustainability of earnings growth, and quality of management. The resulting portfolio seeks to manage the downside risk of equity investments while providing attractive returns to long-term investors over a full market cycle.

Growth of \$10,000 Since Inception - Net of Fees

This chart assumes initial investment of \$10,000 made on 17/07/2017. Fund performance assumes reinvestment of dividends and capital gain distributions and does not reflect sales charges.

Total Return Performance % (USD) - Net of Fees

Performance data quoted represents past performance. **Past performance does not guarantee future results.** Performance data current to the most recent month-end may be obtained by emailing ucits@gqgpartners.com or visiting gqgpartners.com/products/ucits/. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Returns greater than one year are annualized. Performance may reflect agreements to limit a fund's expenses, which would further reduce performance if not in effect. Returns are calculated net of taxes withheld on foreign dividends, interest, and capital gains, and include reinvestment of dividends and capital gains. Dividends accrued as of ex-dividend date. There can be no assurance that the Fund will achieve its investment objective. The performance data contained herein is calculated by a data provider whose calculation methodology may result in Fund performance that is lower or higher than performance quoted in Fund reports.

The **MSCI EM Index (Net)** is a free float-adjusted market capitalization index that is designed to measure equity market performance of emerging market companies. The index is net of foreign withholding taxes and dividends, is unmanaged, and does not include the effect of fees. It is not possible to invest directly in an index. Net total return indices reinvest dividends after the deduction of withholding taxes, using (for international indices) a tax rate applicable to nonresident institutional investors who do not benefit from double taxation treaties. Information about benchmark indices is provided to allow you to compare it to the performance of GQG strategies. Investors often use these well-known and widely recognized indices as one way to gauge the investment performance of an investment manager's strategy compared to investment sectors that correspond to the strategy. However, GQG's investment strategies are actively managed and not intended to replicate the performance of the indices: the performance and volatility of GQG's investment strategies may differ materially from the performance and volatility of their benchmark indices, and their holdings will differ significantly from the securities that comprise the indices. You cannot invest directly in indices, which do not take into account trading commissions and costs.
