

Nordea 1 - Emerging Stars Equity Fund (AI-EUR)

Any investment decision in the sub-funds should be made on the basis of the current prospectus and the Key Investor Information Document (KIID).

Investment strategy

This Sub-fund aims to achieve long-term capital growth by investing mainly in a diversified portfolio of equity or Equities Related Securities of companies, which are domiciled or exercise the predominant part of their economic activity in the Emerging Markets. The fund is managed by the Fundamental Equities Team, based in Copenhagen, focusing on fundamental bottom-up research. Alpha is generated through stock selection and by actively incorporating an ESG based analysis as part of the investment process. Actively managed. Benchmark used for performance comparison only. Risk characteristics of the fund's portfolio may bear some resemblance to those of the benchmark.

ESG integration summary

This fund does not invest in companies involved in the production of illegal or nuclear weapons or exhibiting more than 10% of their revenues from oil sand. We also exclude companies with large and sustained exposure to coal mining, with a 10% revenue threshold on thermal coal and a 30% revenue threshold on total coal (including metallurgical coal). Beyond these corporate exclusions (1), we have developed a specific range of cutting-edge products focusing on Responsible Investment: the STARS funds. Our dedicated Responsible Investment team conducts a thorough ESG analysis on each holding resulting in an internal score. Our proprietary ESG scoring model includes a business model dimension in addition to environmental, social and governance aspects. We assess how sustainability trends can positively or negatively impact the company's business model, its value chain, products and services. We also seek to understand the company's contribution to these themes. Please note that the MSCI ESG rating is mainly backward looking, relying mainly on publicly available information and can differ from Nordea's internal scoring which is based on a forward-looking approach. (1) Nordea Asset Management corporate exclusion list is available on the following link: <https://www.nordea.com/en/sustainability/sustainable-business/investments/exclusion-list/>

ESG Scores per pillar

Source: All data is from MSCI ESG Fund Ratings as of 29/04/2022, based on holdings as of 31/12/2021. The overall portfolio rating is calculated on an industry relative basis while the underlying individual E, S and G ratings are absolute. Hence, the overall rating cannot be seen as an average of the individual E, S and G ratings. Rated on a scale of 0 to 10, where 0 is very poor and 10 is very good.

ESG labels

Label ISR recognises the fund. Label ISR is created and supported by the French Finance Ministry. The label's goal is to increase the visibility of SRI products among savers in France and Europe. The fund is recognized by **LuxFLAG ESG Label**. LuxFLAG is an international and independent non-profit association and labelling agency. The fund has received recognition from the Belgian Central Labelling Agency in the form of **Towards Sustainability** label. The label aims to instill trust and reassure potential investors that the financial product is managed with sustainability in mind and is not exposed to very unsustainable practices, without requiring of investors to do a detailed analysis themselves.

Weighted average carbon intensity

(In Tons of CO2 equivalent per dollar millions of sales). Source: Data sourced from MSCI Inc. for equities and ISS Ethix for fixed Income. For sovereigns (countries) turnovers is replaced by GDP. Please note that only scope 1 & 2 are taken into consideration, excluding scope 3. The carbon intensity of our fund might therefore appear higher than the benchmark.

ESG legend

Scope 1 refers to direct GHG emissions, Scope 2 refers to indirect GHG emissions from the consumption of purchased electricity and Scope 3 refers to other indirect emissions that occur from sources not owned or controlled by the company.

Risk & Reward Profile (RRP)

The indicator measures the risk of fluctuations of the Net Asset Value of the share class based on the last 5 years volatility and places the fund in category 6. This means that the purchase of units in the fund is connected to high risk of such fluctuations. Please note that category 1 does not mean a risk free investment. Historical data, such as is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the UCITS, as the category might change in the future. Following risks are materially relevant to the UCITS but are not adequately captured by the synthetic indicator and may cause additional loss:

Country risk — China: The legal rights of investors in China are uncertain, government intervention is common and unpredictable, and some of the major trading and custody systems are unproven.

Depository receipt risk: Depository receipts (certificates that represent securities held on deposit by financial institutions) carry illiquid securities and counterparty risks.

Derivatives risk: Small movements in the value of an underlying asset can create large changes in the value of a derivative, making derivatives highly volatile in general, and exposing the fund to potential losses significantly greater than the cost of the derivative.

Emerging and frontier markets risk: Emerging and frontier markets are less established, and more volatile, than developed markets. They involve higher risks, particularly market, credit, legal and currency risks, and are more likely to experience risks that, in developed markets, are associated with unusual market conditions, such as liquidity and counterparty risks.

Liquidity risk: Certain securities may become hard to value or to buy or sell at a desired time and price which could affect the fund's value and its ability to pay redemption proceeds or other obligations in a timely manner.

Securities handling risk: Some countries may restrict securities ownership by outsiders or may have less regulated custody practices.

Taxation risk: A country could change its tax laws or treaties in ways that affect the fund or shareholders.

Glossary / Definition of Terms

Alpha

The risk-adjusted excess return relative to the benchmark, resulting from portfolio active management. It reflects the portion of the excess return that is not explained by systemic risk.

Beta

A measurement of the volatility of returns relative to the overall market beta equal to one. A security with beta higher (lower) than one has greater (lower) risk relative to the broad market.

Commitment

Represented by the sum of notional, or the sum of the commitments of individual derivatives after netting and hedging.

Correlation

The degree to which two variables move together. The metric assumes values between -1 and 1. A positive (negative) correlation means that variables move in the same (opposite) direction(s). If there is no relationship between each other, the correlation will be close to zero.

Dividend Yield

Annual dividends per share divided by share price.

Earning Per Share

Net earnings (12M forward) available to common shareholders divided by the weighted average number of common shares outstanding.

Fund VaR

The probability-based estimate of the minimum loss over a period of time (horizon), given a certain confidence level, presented as percentage of the assets under management of the fund.

Information ratio

A measure of risk-adjusted return that is defined as the excess annual return of the portfolio over its benchmark (active return) relative to the variability of that excess return (tracking error). It is used to assess the added value of the active management.

Market Capitalisation

Total value of all company's outstanding shares at the current market price.

Maximum Drawdown

The largest loss measured from peak to trough until a new peak is attained.

Ongoing charges

It is an estimate of the charges that excludes performance related fees and transaction costs including third party brokerage fees and bank charges on securities transactions.

Price to book Ratio

A valuation ratio calculated as price per share divided by book value per share.

Price to Earning Ratio

The ratio of share price to forecasted 12M earnings per share.

Sharpe Ratio

A risk adjusted performance measure calculated as the portfolio's excess return relative to the risk-free rate divided by its volatility. The greater the ratio, the better its risk-adjusted performance has been.

Tracking error

The volatility of the fund's excess returns over its benchmark returns. It quantifies how closely a manager's return pattern follows that of the benchmark.

Volatility

A statistical measure of the distribution of returns for a specific time period with a certain confidence interval. It gives an insight on the amount of risk and uncertainty of a security or portfolio. Commonly, the higher the volatility, the riskier the security or portfolio.

Performance calculated NAV to NAV (net of fees and Luxembourg taxes) in the currency of the respective share class, gross income and dividends reinvested, excluding initial and exit charges as per 29/04/2022. Initial and exit charges could affect the value of the performance. **The performance represented is historical; past performance is not a reliable indicator of future results and investors may not recover the full amount invested. The value of shares can greatly fluctuate as a result of the sub-fund's investment policy and cannot be ensured, you could lose some or all of your invested money.** If the currency of the respective share class differs from the currency of the country where the investor resides the represented performance might vary due to currency fluctuations. The sub-funds mentioned are part of Nordea 1, SICAV, an open-ended Luxembourg-based investment company (Société d'Investissement à Capital Variable), validly formed and existing in accordance with the laws of Luxembourg and with European Council Directive 2009/65/EC of 13 July 2009. **This document is advertising material and does not disclose all relevant information concerning the presented sub-funds.** Any investment decision in the sub-funds should be made on the basis of the current prospectus and the Key Investor Information Document (KIID), which are available, along with the current annual and semi-annual reports, electronically in English and in the local language of the market where the mentioned SICAV is authorised for distribution, without charge upon request from Nordea Investment Funds S.A., 562, rue de Neudorf, P.O. Box 782, L-2017 Luxembourg, from the local representatives or information agents, or from our distributors as well as on www.nordea.lu. Investments in derivative and foreign exchange transactions may be subject to significant fluctuations which may affect the value of an investment. **Investments in Emerging Markets involve a higher element of risk. The value of shares can greatly fluctuate as a result of the sub-fund's investment policy and cannot be ensured. Investments in equity and debt instruments issued by banks could bear the risk of being subject to the bail-in mechanism (meaning that equity and debt instruments could be written down in order to ensure that most unsecured creditors of an institution bear appropriate losses) as foreseen in EU Directive 2014/59/EU. For further details of investment risks associated with these sub-funds, please refer to the relevant Key Investor Information Document (KIID), available as described above.** The investment promoted concerns the acquisition of units or shares in a sub-fund, not in any given underlying asset such as shares of a company, as these are only the underlying assets owned by the fund.
