Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

"Sterling Hedged I Class Accumulation Units ", a unit class of Finisterre Unconstrained Emerging Markets Fixed Income Fund (the Fund), a sub-fund of Principal Global Investors Funds (the Trust) (ISIN: IE00BD2ZKY71)

This Fund is managed by Principal Global Investors (Ireland) Limited (the Manager), part of The Principal Financial Group of companies

Objectives and investment policy

The Fund seeks to maximise income, while minimising volatility and potential losses.

The Fund seeks to achieve this by actively investing above 51% in a diversified range of fixed-income and financial derivative instruments ("FDI") issued by or referencing emerging markets.

The Fund may invest in the following range of instrument types:
(a) debt-related instruments of corporate, sovereign and quasi-sovereign issuers (including contigent convertible securities);
(b) FDIs including forwards, futures, options, swaps (including total return swaps and credit default swaps), repos and reverse repos;

This Fund is classified as an ESG Orientated Fund as defined in the Prospectus and takes certain environmental and social characteristics into account, including greenhouse gas emissions, employee welfare and citizen welfare across emerging market countries. The Fund also excludes thermal coal producers, companies that derive a significant proportion of revenue from tobacco production and involvement in controversial weapons.

The Fund may hold equities as a result of the conversion of a convertible bond or as the result of a debt restructuring.

These instruments may also be issued by, or relate to underlying issuers in, emerging or developed markets.

The Fund may also invest in UCITS eligible Funds in order to obtain its objective.

While it is generally intended for the Fund to be fully invested at all times, there may be a portion of assets held in cash or deposits at any given time.

Any income received by the unit class will be reinvested.

You may buy or sell units on demand on each Dealing Day being a Business Day as defined in the Fund's supplement (which together with the prospectus constitutes the Prospectus).

The Fund is actively managed and aims to provide an absolute return. The portfolio manager maintains full discretion to select investments for the Fund in line with the above investment policy.

The Manager may, from time to time, determine to include information in its marketing materials relative to an index for performance comparison purposes; however, the index composition is not factored either directly or indirectly into the investment management process and the Fund does not operate any form of target to outperform an index.

Please see the section entitled Investment Objective, Policies, Strategy and Profile of a Typical Investor of the Supplement where full details are disclosed.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk						Typically higher rewards, higher risk
1	2	3	**4**	5	6	7

This Fund is ranked at 4 because funds of this type have experienced average rises and falls in value in the past.

The following are risks materially relevant that are not captured by the SRRI:

•The market value of debt securities is affected by changes in prevailing interest rates. The Fund may also be exposed to credit and default risk by investing in such securities. The default risk increases for below investment grade debt securities.

•The Fund may utilise a number of derivative instruments in managing the Investment Objective of the Fund. The primary risks associated with the use of such instruments are credit risk, counterparty risk, liquidity risk, legal risk and collateral risk.

•Investments in Russia are currently subject to certain heightened risks with regard to the ownership and custody of securities. In addition, in light of the current ongoing regional conflict in Europe, Russia has been the subject of economic sanctions imposed by countries throughout the world.

•The Manager integrates sustainability risks into the investment processes for the Fund in relation to risk management and decision making. This means sustainability factors are considered as part of the investment process which may carry the risk that the Fund's performance may be negatively impacted due to restrictions placed on its exposure to certain sectors or types of investments as a result.

•Investments in the China Interbank Bond Market through Bond Connect may subject the Fund to additional liquidity, settlement, legal and regulatory risk.

•There may be risks associated with investment in Contingent convertible securities due to the unpredictable nature of conversion events and the higher credit risk of subordinated instruments. CoCos are also subject to coupon cancellations, as coupon payments are entirely discretionary and may be cancelled by the issuer at any point, with any such cancelled payments being written off which can ultimately lead to a mispricing risk.

•The value of an investment may fluctuate due to changes in exchange rates between currencies and may or may not be hedged back to the Fund's base currency.

Please see the section entitled Special Investment Considerations and Risks of the Prospectus where full details are disclosed.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year	
Ongoing charges	0.92%

Charges taken from the Fund under specific conditions	
Performance fee	NONE

Ongoing charges are based on the last year's expenses, for the year ended December 2023, and this figure may vary from year to year. It excludes:

• Portfolio transactions costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

• Whereas the entry charge will not normally be made on a conversion, the Manager is entitled to make any such charges at its discretion. In particular, if more than four conversions are made during a twelve month period, the Manager may impose a service fee for any subsequent conversions during the subsequent twelve month period.

For more information about charges, please see Charges and Expenses in the Prospectus which is available as set out below.
