For detailed information on Fund Changes please see "Significant Events - Threadneedle (Lux) Funds" PDF available on [www.columbiathreadneedle.co.uk/en/literature/document-centre/key-investor-information-documents-\(kiids\)/](http://www.columbiathreadneedle.co.uk/en/literature/document-centre/key-investor-information-documents-(kiids)/)

Investment Objective & Policy

The aim of the Fund is to grow the amount you invested.

The Fund invests at least two-thirds of its assets in shares of companies in the UK or companies that have significant operations there.

The Fund may also invest in asset classes and instruments different from those stated above.

The Fund permanently invests a minimum of 75% of its assets in the European Economic Area equities, and is therefore PEA (Plan d'Epargne en Actions) eligible in France.

Investment Approach

The fund invests in UK equities and typically holds between 60 and 80 positions. The fund offers a core, diversified strategy aiming to outperform the index and uses a dynamic approach to exploit opportunities wherever they appear in the market.

Research is carried out by our UK team across a wide range of stocks including mid-sized and smaller companies, although the prime focus for this fund is on larger companies. Access to company management is an important part of our research process and the team have approximately 800 meetings with management per annum.

We search for companies with robust business and financial models, and solid management teams, trading on attractive valuations. The fund combines a fundamental bottom-up, stock-picking process with an understanding of macroeconomic factors.

In order to manage risk we monitor sector and stock weightings in absolute terms and relative to the index.

*Net returns - Net (of fee) returns assume income is reinvested for a local taxpayer, bid to bid performance (which means performance does not include the effect of any initial charges). Source Copyright © 2018 Morningstar UK Limited. Gross returns - Gross Fund returns are in-house calculated daily time weighted based on global close gross valuations with cash flows at start of day and are gross of fees. Past performance is not a guide to future performance. The performance data does not take account of the commissions and costs incurred on the issue and redemption of units. The value of investments and any income is not guaranteed and can go down as well as up and may be affected by exchange rate fluctuations. This means that an investor may not get back the amount invested. Index returns assume reinvestment of dividends and capital gains and unlike fund returns do not reflect fees or expenses. The index is unmanaged and cannot be invested directly.

Attribution analysis is calculated on a daily geometric basis unless otherwise stated. Fund returns may result in residual factors when compared to geometric attribution total returns due to data and calculation methodologies. Variation in weights is the average daily under/overweight position of the fund versus the index over the period. The Attribution table and graph only display a maximum of 12 groupings based on the highest portfolio end weight. The Rolling 3 Month Total Effect Attribution summary is based on the same groupings as the Year to Date Attribution.
