First Trust FactorFX UCITS ETF

The Fund's investment objective is to deliver to investors total returns with lower correlation to the broader equity and bond markets over the medium to long term through its exposure to global currencies and related markets. The actively managed Fund adopts a multi-factor approach when investing in developed and emerging markets, and does so primarily through sovereign fixed income securities denominated in local and global currencies, and/or currency related financial instruments.

³The credit quality ratings are sourced from ICE Data Services and are a simple average of the Moody's, S&P and Fitch bond ratings. For an Index it is the average of its constituent security composite ratings, weighted by full market value. The credit ratings shown relate to the creditworthiness of the issuers of the underlying securities in the Fund, and not to the Fund or its shares. Credit ratings are subject to change. For illustrative purposes only.
