

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Clean Technology

ISIN	LU1618348236	a sub-fund of Vontobel Fund
Share Class	N	This fund is managed by Vontobel Asset Management S.A., which is part of Vontobel Group.
Currency	GBP	This fund is authorised in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and investment policy

This actively managed sub-fund has a sustainable investment objective which consists of investing in the clean technology sector and aims to achieve long-term capital growth in EUR. It is categorized as Article 9 SFDR.

- It invests at least 80% of its net assets in equities and equity-like securities issued by companies worldwide whose products or services contribute to an environmentally sustainable objective in the investment manager's opinion. It may invest up to 20% via Shanghai-Hong Kong Stock Connect and Shenzhen- Hong Kong Stock Connect in China A-Shares. It may also hold cash.
- It mainly invests in securities issued by companies worldwide whose products or services contribute to an environmentally sustainable objective in the investment manager's opinion. The sub-fund invests in economic activities that capture the opportunities arising from long-term structural shifts such as growing population, increasing urbanization and rising income. It focuses on **six core impact pillars**: clean energy infrastructure, resource efficient industry, clean water, building technology, low emission transportation and lifecycle management. The targeted companies provide products and services along the whole value chain, which have the potential to tackle today's pressing problems such as resource scarcity and environmental pollution. The sub-fund regularly reports its positive impact by disclosing the contribution of the holdings to the various impact pillars and corresponding UN Sustainable Development Goals (SDGs). In addition, distinct quantitative impact indicators are disclosed. The business activities of the sub-fund's investments shall not harm any of the other five objectives or another sustainable investment objective (referred as DNSH, do no significant harm).

This aspect is assessed via critical business involvements and environmental controversies, whereby data points from external ESG data providers serve as a guidance. The sub-fund excludes issuers producing nuclear power, owning fossil fuel reserves and producing controversial military weapons. The investment process also includes an evaluation of the holdings' minimum social and good governance requirements. The implementation of the positive impact selection criteria and the ESG assessment leads to the exclusion of at least 20% of potential investments. **Investment universe**: global listed equity markets. 100% of the securities in the sub-fund have the ESG and impact selection criteria applied to it. **Main methodological limits**: potential inconsistencies, inaccuracy or lack of availability of ESG data issued by third party providers. **More details on the above can be found in the prospectus.**

- The sub-fund may use derivatives to achieve the investment objective and for hedging purposes.
- The currency of this class is NOT hedged against the sub-fund's main currency. The investor consequently bears the full currency risk.
- The sub-fund is not managed with reference to a benchmark. The portfolio manager has full investment discretion within the predefined investment limits.
- Any income generated will be reinvested and included in the value of your shares.
- Buying and selling securities entails transaction costs payable in addition to the charges listed.
- Redemption of shares: daily when banks in Luxembourg are open for normal business (see prospectus for details and exceptions).
- N shares are reserved for specific investors and do not grant any rebate or retrocessions. See prospectus for details.

Risk and reward profile

- The indicator above does not signal the risk of a potential loss, but indicates the fluctuations in the sub-fund's share price in the past.
- The share class is assigned to this category because its share price can fluctuate sharply due to the investment policy applied.
 - The historical data used to calculate the profile cannot be used as a reliable guide to the future risk profile of the sub-fund.
 - The risk category shown is not guaranteed and may change.
 - Even the lowest risk category is not entirely free of risk.

When assigning a sub-fund's share class to a risk category, it may be the case that not all risks are taken into account. Such risks include risks in connection with exceptional market events, operational errors, legal and political events. You can find a detailed list of the risks in the "Notice regarding special risks" section in the general part of the sales

- prospectus. The following risks have no direct influence on this category, but may still be important:
- Using derivatives generally creates leverage and entails valuation risks and operational risks. Leverage magnifies gains but also losses. Over-the-counter derivatives involve corresponding counterparty risks.
 - The portfolio has lower risk diversification as the focus lies on companies within a specific investment theme.
 - The sub-fund also includes sustainability criteria in its investment process. This may mean that the sub-fund's performance is more positive or negative than a conventionally managed portfolio.
 - Investments in China A-Shares are subject to changes in political, economic and social conditions in China as well as changes in the policies of the PRC government, laws and regulations.
 - A company's stock price may be adversely affected by changes in the company, its industry or economic environment and prices can change quickly. Equities typically involve higher risks than bonds and money market instruments.
 - This share class is issued in a currency different from the sub-fund currency. The investor is therefore exposed to the full currency risk when investing in the sub-fund.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs for managing, marketing and distributing it. These charges reduce the return on your investment.

ONE-OFF CHARGES TAKEN BEFORE OR AFTER YOU INVEST
