COMMODITIES ■

Objective and Investment Policy

Seeks to increase the value of your investment over the recommended holding period.

The Sub-Fund invests in derivatives whose value is linked to commodity market indices or to particular commodity prices. At least two thirds of the Sub-Fund's assets will be exposed to the performance of a representative commodity index, which is currently the Bloomberg Commodity Index. The Sub-Fund also invests at least 51% of its assets in bonds and money market securities from around the world. At least two-thirds of the Sub-Fund's investments will either be denominated in euro or hedged back to the euro. The Sub-Fund may also use derivatives, including credit default swaps, to reduce various risks, for efficient portfolio management or as a way to gain exposure to various assets, markets or income streams. Further information relating to the indices used is provided in the Prospectus.

Benchmark : The Sub-Fund is actively managed by reference to and seeks to outperform the Bloomberg Commodity Index. The Sub-Fund is predominantly exposed to the issuers of the Benchmark, however, the management of the Sub-Fund is discretionary, and will be exposed to issuers not included in the Benchmark. The Sub-Fund monitors risk exposure in relation to the Benchmark and the extent of deviation from the Benchmark is expected to be limited.

Management Process : The investment manager constructs a portfolio with similar risks to the benchmark, then uses a risk-managed approach to identify investment strategies, in particular, those associated with core rates, thematic opportunities, relative interest rates and inflation, that may help the Sub-Fund outperform the benchmark.

Risk & Reward Profile *(Source: Fund Admin)*

Risk Indicator *(Source : Fund Admin)*

The risk indicator assumes you keep the product for 6 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the Amundi S.F. prospectus.
