Objectives and Investment Policy

- The Sub-Fund seeks an attractive total return through a high level of current income and long-term capital appreciation.
 - The Sub-Fund aims to seek out the best investment opportunities across the business cycle within the emerging debt universe, by adopting an active asset allocation approach and investing across a broad range of fixed income instruments and debt securities.

Therefore, the Sub-Fund will focus on companies whose social and environmental factors and methods of governance have a sustainable impact on financial performance. An Extra-financial analysis process is used to assign an ESG score based on an internal analysis and/or on the data provided by an extra-financial rating agency in order to define the eligible investment universe.
 - In principle, this Class gives you the right to receive dividend distributions.
- This Class is a hedged share class, which means that the currency risk between the Sub-Fund currency and the Class currency is reduced, but not completely eliminated.

- Safekeeping risk: The Sub-Fund's operations may depend on third parties that are located in countries where securities oversight standards are less developed.
- Third parties risk: The failure of the third parties on which the Sub-Fund's operations depend may cause disruptions and losses.
- Emerging markets instability risk: Emerging markets may be subject to political, fiscal and/or economic instability that may imply opportunities for investors but also greater risks.
- Currency risk: the Sub-Fund may invest in securities that are issued in currencies other than the base currency of the Fund. Currency risk arises from changes in the exchange rates between the two currencies.
