Ongoing charge includes management fee, custody and administration costs but excludes transaction costs such as swap costs. Costs may increase or decrease as result of currency and exchange rate fluctuations. Consult the legal documents for further information on costs.

Investment risks

For complete information on risks, refer to the legal documents.

The value of investments, and any income from them, will fluctuate. This may partly be the result of changes in exchange rates. Investors may not get back the full amount invested.

The creditworthiness of the debt the Fund is exposed to may weaken and result in fluctuations in the value of the Fund. There is no guarantee the issuers of debt will repay the interest and capital on the redemption date.

The risk is higher when the Fund is exposed to high yield debt securities.

Changes in interest rates will result in fluctuations in the value of the fund.

The Fund intends to invest in securities of issuers that manage their ESG exposures better relative to their peers. This may affect the Fund's exposure to certain issuers and cause the Fund to forego certain investment opportunities. The Fund may perform differently to other funds, including underperforming other funds that do not seek to invest in securities of issuers based on their ESG ratings.

About the index

The Bloomberg MSCI Euro Liquid Corporate ESG Weighted SRI Bond Index measures the investment grade, fixed-rate, taxable, Euro-denominated securities issued by corporate issuers, and applies additional ESG criteria for security eligibility. The index negatively screens issuers that are involved in business activities that are restricted because they are inconsistent with certain values-based business involvement criteria.

Past performance does not predict future returns.

ETF performance shown is calculated with reference to the Net Asset Value, inclusive of net reinvested income and net of ongoing charges and portfolio transaction costs, in EUR. The figures do not reflect the actual share price, the impact of the bid/offer spread or broker commissions. Returns may increase or decrease as a result of currency fluctuations. ETF NAV performance differs from that of the index due to the ongoing charges and portfolio transaction costs and due to the fact that the ETF does not necessarily always hold all the securities in the index in their respective weighting. This ETF does not charge an entry fee. For share classes with fewer than ten 12 month periods since launch, performance data does not exist for some of the periods covered in the standardised 12 month performance table.

Glossary

Benchmark: An index against which the ETF is measured, in terms of relative performance, risk and other useful comparisons.

Distribution Yield: The distribution yield is a measurement of cash flow being paid. It's the sum of the distributions over 12 months divided by the net asset value (NAV) of the fund.

Effective Duration: Effective Duration is a measure of the potential impact on a bond's (or a portfolio of bonds') price of a 1% change in interest rates, across all maturities. This measure takes into account the possible changes in expected bond cash flows for bonds with embedded optionality (for example, the bond issuer's right to redeem bonds at a pre-determined price on certain dates) due to the 1% change in interest rates.

ESG: Environmental, Social and Governance, three key factors in measuring sustainability and societal impact of a company.

ETF: Exchange traded fund. A type of fund that is traded on the stockmarket like ordinary shares. ETFs can be bought and sold during trading hours, like ordinary shares, whereas other types of funds are priced once a day only.

Factors: An investment approach that seeks to identify and invest in securities that display certain quantifiable characteristics. Common examples of factors include Value, Quality and Momentum. A factor strategy may seek to target just one factor or combine multiple factors.

Hedged: The intended result of reducing the portfolio's exposure to a specific risk, such as the risk of fluctuations between currency exchange rates ("currency hedging").

Investment Grade: Refers to the quality of a company's credit. To be considered an investment grade issue, the company must be rated at 'BBB' or higher by a recognized credit rating agency. Companies with an investment grade credit rating are generally considered to be lower risk than those with sub investment grade ratings, also known as high yield issuers.

ISA: Individual Savings Account. A type of investment account in the UK in which the tax on income is lower than usual, and there is no tax on profits made from an increase in the value of shares.

Physical Replication: Physical funds invest directly in constituents of the benchmark index.

Replication Method: Strategy employed by the fund to achieve its objective.

SIPP: Self-Invested Pension Plan. A type of UK pension for which a person makes their own investment decisions.

UCITS: Undertakings for Collective Investments in Transferable Securities. European regulatory framework for an investment vehicle that can be marketed across the European Union.

UK Reporting Status: Indicates whether or not the fund has United Kingdom fund tax status, this can lead to a UK investor receiving favourable tax rates on any gain or disposal of holdings in the fund.

US Treasuries: US Treasury bonds are government debt securities issued by the US Federal government.

Yield To Maturity: The rate of the return anticipated on a bond if it is held until the maturity date.

Yield To Worst (YTW): is the most conservative measure of yield that can be received on a bond assuming that it doesn't default on its payments. For a callable bond, it will be the lower of the yield to maturity (YTM) or

yield to call (YTC).

Yield to Call (YTC): is the yield on a callable bond that assumes a bond is called by the issuer at the earliest opportunity.

Article 6 SFDR

For the purposes of meeting the requirements of Article 6 SFDR, we have disclosed information on Sustainability Risks in the Prospectus Addendum found on [etf.invesco.com](https://www.etf.invesco.com)

Article 8 SFDR

We consider that this fund is promoting environmental or social characteristics and meets the criteria in Article 8 of the SFDR. For further information please refer to the Prospectus Addendum and the index provider's methodology found on [etf.invesco.com](https://www.etf.invesco.com)

Invesco's Commitment to ESG

At Invesco, our commitment to ESG investing is a key element of our ambition to be the most client-centric asset manager.

Environmental, social, and governance (ESG) considerations are a critical part of our corporate culture, and we appreciate they also may be important in your own investment strategy.

Although not all of our ETFs follow an index with specific ESG characteristics, the information on this page provides transparency to help you identify long-term risks and opportunities in your investments.

Business involvement screens can help you gain better insights into potentially controversial business activities that a fund or index may be exposed to.

All ESG, carbon emissions, and business involvement data are sourced from MSCI ESG Research. In order to assess the ESG profile, the fund or index must have at least 10 securities or constituents, and 65% of the fund's weight must be covered by MSCI ESG Research. For more details, please see MSCI's methodology on www.msci.com

Important ESG Information

The above information is for illustrative purposes only. Providing this information is not indicative of how or whether ESG factors will be integrated into a fund. Unless otherwise stated in the legal offering documents (fund and share class specific Key Investor Information Document (KIID), prospectus, annual & semi-annual reports), the ESG information provided on this page does not change a fund's investment objective or policy or constrain the fund's investable universe. For more information regarding a fund's investment strategy, please see the fund's prospectus, available free of charge on our website [etf.invesco.com](https://www.etf.invesco.com) and from the issuers. The rating may vary from one rating agency to another. The rating may change over time and is not a guarantee of future performance of the fund.

Glossary

MSCI ESG Fund Rating: Designed to measure the ESG risks and opportunities of a fund's underlying holdings, making it possible to rank or screen mutual funds and ETFs and on a AAA to CCC ratings scale. This rating aims to provide fund level transparency and measure the ESG characteristics of the total portfolio. It is calculated as a direct mapping of MSCI ESG Quality Scores to letter rating categories. ESG Leaders are companies with an ESG rating of AAA or AA (best in class), and ESG Laggards are companies with an ESG rating of B or CCC.

MSCI ESG Quality Score: Calculated as the weighted average of the underlying holding's ESG Scores. It is provided on a 0-10 scale, with 0 and 10 being the respective lowest and highest possible scores. MSCI scores underlying holdings according to their exposure to 20 industry specific material ESG risks and their ability to manage those risks relative to peers. These issuer-level ESG scores correspond to an issuer-level ESG rating. The scores are based on industry-adjusted company ratings from MSCI.

ESG % Coverage: The percentage of the fund and benchmark where MSCI ESG Research is available.

CO₂ Scope 1 Emission: A company's Scope 1 direct emissions (tCO₂e) from operations. The direct emissions data represents the final, MSCI reviewed and approved value based on the MSCI methodology, which selects the accurate value from available sources.

CO₂ Scope 2 Emission: A company's Scope 2 energy indirect emissions (tCO₂e) from operations. The energy indirect emissions data represents the final, MSCI reviewed and approved value based on the MSCI methodology, which selects the accurate value from available sources.

Total Carbon Intensity: Measures the fund or index's overall carbon intensity and carbon efficiency associated with its holdings, based on carbon expertise and research provided by MSCI. It uses the carbon intensity metrics at the company level (Scope 1 + Scope 2) per USUSD1 million of revenue. For government bonds, it uses total country carbon emissions per USUSD1 million GDP.

Wtd Avg (Weighted Average) Carbon Intensity: The underlying funds' exposure to carbon intensive holdings, calculated as the weighted average of the constituent's intensity metrics: Scope 1 + 2 Emissions per USD 1M revenue for corporates and total country carbon emissions per USD 1M GDP for government bonds.

Board Independence: Weighted average percentage of board members that meet the MSCI criteria for independence.

Female Directors: Weighted average percentage of female board members.

SFDR: Part of the EU's Sustainable Finance Action Plan, the Sustainable Finance Disclosure Regulation (SFDR, also known as Disclosure Regulation) aims to promote transparency on sustainability by ensuring that participants in the financial services sector provide consistent information to clients in relation to the sustainability of the products and services they provide. The supplement of the fund and the management company website contain further information on compliance with SFDR.

Article 6: The requirement under SFDR to describe the manner in which sustainability risks are integrated into investment decisions, or to provide an explanation of reasons why sustainability risks are deemed not to be relevant.

Article 8 Fund: A fund that, in accordance with the criteria outlined in Article 8 of SFDR, promotes, among other characteristics, environmental or social characteristics, or a combination of those characteristics and provided that the companies that the fund invests in follow good governance practices.

Article 9 Fund: A fund that, in accordance with the criteria outlined in Article 9 of SFDR has sustainable investment as its objective.

MSCI ESG Business Involvement Screening Research: Provides research on company involvement in products and services, which allow investors to screen companies according to specific criteria motivated by ethical, impact, compliance or ESG risk considerations.

Summary definitions of each business screening are as follows:

UN Global Compact (UNGC) Violations: Percentage of companies in the fund or index that have been identified to have violated United Nations Global Compact principles. Data is based on MSCI ESG Controversies Research and MSCI ESG Global Norms Screening.

Controversial Weapons: Percentage of companies in the fund or index that have been identified to have ties to controversial weapons, including cluster munitions, land mines, biological and chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non detectable fragments.
